Washington

Are New Teachers Being Prepared for College- and Career-Readiness Standards?

2014 State Teacher Policy Yearbook

National Council on Teacher Quality

Acknowledgments

STATES

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Although this year's edition did not require the extensive review that comprehensive editions require, we still wanted to make sure that we captured all relevant policy changes and that states' perspectives were represented. Every state formally received a draft of the policy updates we identified in June 2014 as well as a draft of analyses and recommendations for the new indicators related to college- and career-readiness standards for comment and correction. States also received a final draft of their reports a month prior to release. All but two states responded to our inquiries. While states do not always agree with our recommendations, their willingness to engage in dialogue, explain their differing points of view and often acknowledge the imperfections of their teacher policies are important steps in moving forward.

FUNDERS

The primary funders for the 2014 Yearbook were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- Gleason Family Foundation
- J.A. and Kathryn Albertson Foundation
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

STAFF

Sandi Jacobs, *Project Director* Kathryn M. Doherty, *Special Contributor* Kelli Lakis, *Lead Researcher* Phil Lasser and Lisa N. Staresina, *Researchers*

Special thanks to Leigh Zimnisky and Justin Rakowski at Ironmark for their design of the 2014 Yearbook. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original Yearbook design and ongoing technical support.

D National Council on Teacher Quality

Teacher Preparation Policy Priorities for Washington

Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of informational texts as well as incorporate complex informational texts into classroom instruction.
 Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/ social studies, science, technical subjects and the arts.
 Priority for elementary, middle, secondary and special education teacher preparation.
- Ensure teachers are prepared to intervene and support students who are struggling with reading. Priority for middle and special education teacher preparation.

Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires a meaningful passing score for each area.
- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

Additional priorities for middle school teacher preparation:

- Require teacher candidates to pass a content test in every core area they are licensed to teach.
- Eliminate the generalist K-8 license.

Additional priorities for secondary teacher preparation:

- Require secondary candidates to pass a content test in each subject they are licensed to teach.
- Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate, and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

Raise admission requirements:

• Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.

Teacher Preparation in Washington

The 2014 *State Teacher Policy Yearbook* keeps the spotlight on the critical issue of teacher preparation. In addition to updating the full set of teacher preparation policies reviewed in last year's comprehensive edition, the 2014 *Yearbook* casts a critical eye on whether states have established requirements for teacher preparation and licensure that help to ensure that teachers are ready for the increased demands of states' college- and career-readiness standards for K-12 students.

2014 Teacher Prep Policy Update for Washington

Based on a review of state legislation, rules and regulations, NCTQ has identified the following recent teacher prep policy changes in Washington:

Elementary Teacher Preparation

Washington now requires candidates to pass both subtests that comprise the National Evaluation Series (NES) general elementary content test. The first subtest includes English language arts and social studies; the second includes science, math, health and fitness and the arts. Washington now requires its early childhood education teacher candidates to pass the NES Early Childhood Education test.

```
Test Requirements
```

http://www.nestest.com/

Middle School Teacher Preparation

Middle school teacher candidates are now required to pass the Middle Grades Mathematics NES test for program completion.

Test Requirements http://www.nestest.com/

Secondary Teacher Preparation in Science

Beginning in 2016, candidates for the general science license will be required to pass the NES General Science test, which combines physical science, earth and space science, life science and the nature of science. Biology, chemistry, earth and space science and physics NES assessments will be required for secondary science endorsements as well.

Test Requirements http://www.nestest.com/

Special Education Teacher Preparation

The special education NES assessment will be required for special education endorsements beginning in 2019 Test Requirements

http://www.nestest.com/

Washington Response to Policy Update

States were asked to review NCTQ's identified updates and also to comment on policy changes related to teacher preparation that have occurred in the last year, pending changes, or teacher preparation in the state more generally.

Washington was helpful in providing NCTQ with additional information about policy changes related to teacher preparation.

Washington noted that the Professional Educator Standards Board recently updated the definitions for at-risk of low performing and low performing preparation programs.

Elementary Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all elementary teachers are sufficiently prepared for the ways that college- and career-readiness standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new elementary teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new elementary teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new elementary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new elementary teachers, including those who can teach elementary grades on an early childhood license, pass a rigorous test of reading instruction in order to attain licensure.
- 3. The state should ensure that all elementary teacher candidates, including those who can teach elementary grades on an early childhood license, possess sufficient content knowledge in all core subjects, including mathematics.
- 4. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 45 credit hours to ensure appropriate depth in the core subject areas of English, mathematics, science, social studies and fine arts.
- 5. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement ensures that prospective teachers have taken higher-level academic coursework.

Elementary Teacher Prep Analysis: Washington

PREPARING ELEMENTARY TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

The new demands of college- and career-readiness standards for students heighten the need for elementary teachers to have a strong content background in all of the subject matter taught in the elementary grades. Washington, like most states, has adopted such standards and must ensure that its preparation and licensure requirements for new teachers address this need.

Currently, Washington offers an elementary license to teach grades K-8. The state also offers an early childhood license for

grades PreK-3. Key licensing requirements for elementary school teachers in Washington include:

👗 No

Yes

In addition to the strong content background called for by collegeand career-readiness standards, teacher candidates must also be prepared for the key instructional shifts that differentiate these standards from their predecessors. Elementary teachers in Washington are required to pass the NES Elementary Education test. Its framework for the reading and English language arts domain requires teachers to "understand literary, informational, persuasive, and functional texts, and graphic sources." It then includes the following standards that begin to incorporate the instructional shifts in the use of text associated with the state's college- and career-readiness standards for students:

• Demonstrate knowledge of the characteristics and features of various types of informational, persuasive, and functional texts and strategies for promoting students' comprehension of various types of texts and analysis of text structures

• Demonstrate knowledge of the characteristics and features of various types of graphic sources, such as advertisements and editorial cartoons; how visual elements can be used to

RECOMMENDATIONS

Ensure that elementary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Washington has taken a step in the right direction with its adoption of the NES elementary test, which addresses knowledge of informational texts. However, the framework does not appear to capture the major instructional shifts of collegeand career-readiness standards. The state is therefore encouraged to strengthen its teacher preparation requirements and ensure that all elementary and early childhood candidates have the ability to adequately incorporate complex informational text into classroom instruction.

Incorporate literacy skills as an integral part of every subject.

To ensure that elementary students are capable of accessing varied information about the world around them, Washington's teacher standards should also—either through testing frameworks or teacher standards—include literacy skills and using text to build content knowledge in history/ social studies, science, technical subjects and the arts.

Require elementary teacher candidates—including candidates for an early childhood license—to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects, including mathematics.

Washington should ensure that its elementary content test is appropriately aligned with its college- and career-readiness standards and require separate, meaningful passing scores for each area on the test. Although Washington is on the right track by administering a two-part licensing test, thus making it harder for teachers to pass if they fail some subject areas, the state should require separate, meaningful passconvey a particular message, meaning, or theme; and strategies for promoting students' comprehension and analysis of graphic sources.

Also, Washington's competencies for elementary teachers require that teachers "understand and articulate a wide range of strategies used to comprehend, analyze, interpret, and evaluate a wide variety of literary and expository texts."

The state's elementary competencies address the needs of struggling readers.

Similar competencies exist for early childhood teachers.

Supporting Research NES Test www.nestest.com Competencies http://program.pesb.wa.gov/endorsements/list Washington Administrative Code 181-78A-270(1)

WASHINGTON RESPONSE TO ANALYSIS

Washington asserted that its elementary education endorsement competencies address incorporating literacy skills into all subjects. The state cited the requirement that teachers must be able to "Structure learning activities that enable students to achieve accurate and meaningful understanding of academic content and development of academic skills including:

- acquiring information through reading, writing, listening, speaking and viewing;
- locating, acquiring, and evaluating information from a variety of sources;
- conducting research, and deliberating, forming and evaluate positions tthrough the processes of reading, writing, speaking, viewing and listening;
- constructing deeper and more meaningful understanding through the appropriate use of primary sources; and
- developing in-depth conceptual understanding including the ability to develop/test generalizations and solve problems."

Washington also noted that all endorsements with science, mathematics and language arts competencies have been updated to align with CCSS and NGSS and thus address college- and career-readiness standards.

Supporting Research

http://program.pesb.wa.gov/endorsements/list/k-8 http://program.pesb.wa.gov/endorsements

RECOMMENDATIONS CONTINUED

ing scores for each core subject covered on the test, including reading/language arts, math, science and social studies. A candidate may achieve a passing score and still be seriously deficient in a particular subject area. Mathematics content in particular should be assessed with a rigorous assessment tool, such as the test required in Massachusetts, that evaluates mathematics knowledge beyond an elementary school level and challenges candidates' understanding of underlying mathematics concepts.

In addition, Washington is urged to require all early childhood education teacher candidates who teach elementary grades to pass an appropriate test, either the same test as required of other elementary teachers or a comparably rigorous one geared to early childhood content. It is especially worrisome that the state allows teachers up through grade 3 to teach without ever having passed an adequate content test.

Require all teacher candidates who teach elementary grades to pass a rigorous assessment in the science of reading instruction.

Washington should require a rigorous reading assessment tool to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

Washington should also require all early childhood education teacher candi-

RECOMMENDATIONS CONTINUED

dates who teach elementary grades to pass a rigorous assessment to ensure that they are adequately prepared in the science of reading instruction before entering the classroom.

Require elementary teacher candidates to complete a content specialization in an academic subject area.

In addition to enhancing content knowledge, this requirement would ensure that prospective teachers in Washington take higher-level academic coursework. The requirement also provides an important safeguard in the event that candidates are unable to successfully complete clinical practice requirements. With an academic concentration (or better still a major or minor), candidates who are not ready for the classroom and do not pass student teaching can still be on track to complete a degree.

Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.

Washington should either articulate a more specific set of standards or establish comprehensive coursework requirements for elementary teacher candidates that align with college- and career-readiness standards to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 45 credit hours in the core subject areas of English, mathematics, science, social studies and fine arts.

#### EXAMPLES OF BEST PRACTICE

Both Arkansas and California ensure that elementary teachers are prepared to meet the instructional requirements of collegeand career-readiness standards for students. These states specify that elementary teacher candidates must have the ability to not only build content knowledge and vocabulary through careful reading of informational and literary texts, but also to challenge students with texts of increasing complexity.

Candidates are also required to incorporate literacy skills as an integral part of every subject and are prepared to intervene and support students who are struggling.

In addition, Indiana ensures that all candidates licensed to teach the elementary grades, including early childhood education candidates, possess the requisite knowledge of core content and of the key elements of scientifically based reading instruction before entering the classroom. Elementary and early childhood teacher candidates are required to pass a content test comprised of four independently scored subtests, including mathematics. In addition, these candidates are required to pass a comprehensive assessment that tests the five elements of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Elementary teacher candidates in Indiana must also earn either a major or minor in an academic content area.

Massachusetts's MTEL mathematics subtest continues to set the standard in this area by evaluating mathematics knowledge beyond an elementary school level and challenging candidates' understanding of underlying mathematics concepts.

1. Alaska does not require testing for initial licensure.

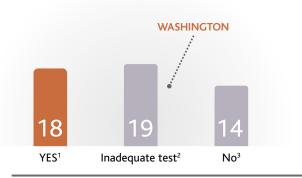

2. Massachusetts and North Carolina require a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math.

3. Only teachers of grades 4 and 5 are required to pass a content test in Ohio.

#### **TEACHER PREP REVIEW FINDINGS**

Only 11 percent of preparation programs ensure that elementary teachers are well prepared in the subjects they will teach.

Just 34 percent of preparation programs provide adequate training to elementary teachers in the science of reading instruction.

From NCTQ's 2014 *Teacher Prep Review* Standard 6: Elementary Content (n=1,166 elementary programs) and Standard 2: Early Reading (n=959 elementary and special education programs)

#### Figure 7

 These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

2. Early childhood candidates may pass either multiple subjects (subscores) or content knowledge (no subscores) test.

## **Middle School Teacher Preparation**

#### **Key Components**

## (The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all middle school teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should require that all new middle school teachers are prepared to incorporate complex texts and academic language into instruction.
  - B. The state should ensure that all new middle school teachers are prepared to incorporate literacy skills as an integral part of every subject.
  - C. The state should ensure that all new middle school teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new middle school teachers pass a licensing test in every core academic area they are licensed to teach.
- The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.

How well are states ensuring that middle school teachers are prepared for college- and career-readiness standards?

> Alaska, Arizona, California, Hawaii, Idaho, Maine, Michigan, Montana, Nebraska, New Mexico, Oklahoma, Oregon, South Dakota, Utah, WASHINGTON, Wyoming

Florida, Georgia, Illinois, Pennsylvania, Tennessee, Texas

Arkansas, Indiana

#### PREPARING MIDDLE SCHOOL TEACHERS FOR COLLEGE-AND CAREER-READINESS STANDARDS

The middle school years are critical to students' education, but, too often, states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Middle school teachers should not only be prepared to teach grade-level content, but should also be prepared to meet the increased instructional requirements of college- and career-readiness standards for students.

Currently, Washington offers a middle school license to teach grades K-8 or 4-9. Key licensing requirements for middle school teachers in Washington include:

# WASHINGTON MIDDLE SCHOOL TEACHER PREP SNAPSHOT State requires teachers to pass a content test for each subject they teach. State requires middle school teachers to hold a

State requires middle school teachers to hold a middle grade or secondary license.

X No

Yes

Preparation and licensure requirements for middle school teachers must address more than just content knowledge; the key instructional shifts articulated in college- and career-readiness standards must also be incorporated. For middle grades certification, Washington requires its English teachers to pass the WEST-E Middle Level Humanities test, which requires teachers to "apply strategies for reading expository texts." This is then followed by a list of examples for achieving this competency.

The state's standards for middle level humanities require that teachers can do the following:

- Understand and construct meaning from a wide variety of culturally relevant literary and expository text including fiction, nonfiction, poetry and drama; and
- Understand and articulate a wide range of strategies used to comprehend, analyze, interpret and evaluate a wide variety of literary, argumentative, narrative and expository texts.

Standards for humanities teachers require them to "understand the function of reading, writing, and communication skills to create meaning and to share a developing awareness of history, geography, civics, and economics." Standards for science teachers require that they "integrate literacy skills into the teaching of science."

#### RECOMMENDATIONS

Ensure that all middle school teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Washington should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students.

## Incorporate literacy skills as an integral part of every subject.

To ensure that middle school students are capable of accessing varied information about the world around them, Washington should also more specifically include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

#### Support struggling readers.

Washington should articulate more specific requirements ensuring that middle school teachers are prepared to intervene and support students who are struggling. While college- and career-readiness standards will increase the need for all middle school teachers to be able to help struggling readers to comprehend grade-level material, training for English language arts teachers in particular must emphasize identification and remediation of reading deficiencies. Regarding struggling readers, Washington's standards for humanities teachers require them to "demonstrate understanding of interpreting assessment results to inform instruction based on assessment data, identify students' proficiencies and difficulties."

Supporting Research NES Test

Competencies http://program.pesb.wa.gov/endorsements/list WAC 181-79A-150; 181-82-105; 201

#### WASHINGTON RESPONSE TO ANALYSIS

Washington asserted that incorporating informational text of increasing complexity into classroom instruction is covered in Standard 5—the knowledge and skills required of all preservice teacher candidates—as "increasing complexity" is a skill needed in all subject areas, not just literacy. The standard includes:

- Applying principles of differentiated instruction, including theories of language acquisition, stages of language and academic language development, in the integration of subject matter across the content areas of reading, mathematical, scientific and aesthetic reasoning
- Planning and/or adapting standards-based curricula that are personalized to the diverse needs of each student
- Planning and/or adapting curricula that are standards driven so that students develop understanding and problem-solving expertise in the content area(s) using reading, written and oral communication, and technology
- Planning and/or adapting learner-centered curricula that engage students in a variety of culturally responsive, developmentally and age-appropriate strategies.

Washington also contended that its middle level endorsements are aligned with the CCSS and NGSS. The state specifically pointed to the standard regarding science-specific instructional methodology that requires a teacher to "demonstrate an understanding of the CCSS for Literacy in Science and Technical Subjects and align instruction in science with instruction that students receive in English Language Arts."

#### Supporting Research

http://program.pesb.wa.gov/endorsements/list/midlevsci http://program.pesb.wa.gov/endorsements/list/midlevhum

#### **RECOMMENDATIONS CONTINUED**

#### Require content testing in all core areas.

Washington should require subject-matter testing for all middle school teacher candidates in every core academic area they intend to teach as a condition of initial licensure. To ensure meaningful middle school content tests, the state should set its passing scores to reflect high levels of performance.

#### Eliminate the generalist license.

Washington should not allow middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers. These teachers are less likely to be adequately prepared to teach core academic areas at the middle school level because their preparation requirements are not specific to the middle or secondary levels, and they need not pass a subject-matter test in each subject they teach. Adopting middle school teacher preparation policies for all such teachers will help ensure that students in grades 7 and 8 have teachers who are appropriately prepared to teach grade-level content, which is different and more advanced than what elementary teachers teach.

#### **EXAMPLES OF BEST PRACTICE**

Illinois ensures that middle school teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. The state's new standards for the middle grades include the instructional shifts toward building content knowledge and vocabulary through increasingly complex texts and careful reading of informational and literary texts associated with these standards. The standards also address the needs of struggling readers.

Illinois's requirements connecting literacy to all subject areas are particularly noteworthy. All middle school teachers must understand "the role, perspective and purpose of text in specific disciplines" and be able to perform tasks such as scaffolding reading to allow students to understand and learn from challenging text; guiding reading discussions that require students to identify key ideas and details of a text; analyze craft and structure and critically evaluate the text; and model reading strategies to improve comprehension.

In addition, Georgia, Mississippi, New Jersey and South Carolina ensure that all middle school teacher candidates are adequately prepared to teach middle school-level content. None of these states offers a K-8 generalist license and all require passing scores on subject-specific content tests. Georgia, Mississippi and South Carolina explicitly require at least two content-area minors, and New Jersey requires a content major along with a minor for each additional area of certification.

1. Offers 1-8 license.

- 2. California offers a K-12 generalist license for all self-contained classrooms.
- 3. With the exception of mathematics.

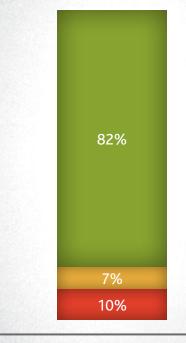

4. Oregon offers 3-8 license.

#### Figure 12

#### **TEACHER PREP REVIEW FINDINGS**

82 percent of programs ensure that middle school teachers are well prepared in the subjects they will teach.

From NCTQ's 2014 Teacher Prep Review Standard 7: Middle School Content (n=375 middle school programs). State licensing test requirements are also included in evaluating this standard.

- 1. Alaska does not require content tests for initial licensure.
- 2. Candidates teaching multiple subjects only have to pass the elementary test. Single-subject credential does not require content test.
- 3. For K-8 license, Idaho also requires one single-subject test.
- 4. Illinois requires candidates to take a middle level core content test if a test is available. It is not clear that this will result in teachers passing a test in each subject and draft test frameworks are not yet available for review.
- 5. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary grades.
- 6. New Hampshire requires K-8 candidates to pass a middle school content test in one core area.
- 7. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass the new assessment with three subtests.
- 8. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.

## **Secondary Teacher Preparation**

#### **Key Components**

## (The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all secondary teachers are sufficiently prepared for the ways that collegeand career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should require that all new secondary teachers are prepared to incorporate complex texts and academic language into instruction.
  - B. The state should ensure that all new secondary teachers are prepared to incorporate literacy skills as an integral part of every subject.
  - C. The state should ensure that all new secondary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that secondary teachers pass a licensing test in every subject they are licensed to teach.
- 3. The state should require secondary general science and general social studies teachers to pass a subject-matter test of each discipline they are licensed to teach.
- 4. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

How well are states ensuring that secondary teachers are prepared for college- and career-readiness standards?

Alaska, California, Hawaii, Montana, New Mexico, Wyoming

Alabama, Arizona, Colorado, Connecticut, Delaware, District of Columbia, Idaho, Illinois, Iowa, Louisiana, Massachusetts, Michigan, Mississippi, Nebraska, Nevada, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, WASHINGTON, Wisconsin

Florida, Georgia, Kansas, Kentucky, Maine, Maryland, Missouri, New Hampshire, New Jersey, Rhode Island, South Dakota, Texas, Utah, Vermont, Virginia, West Virginia

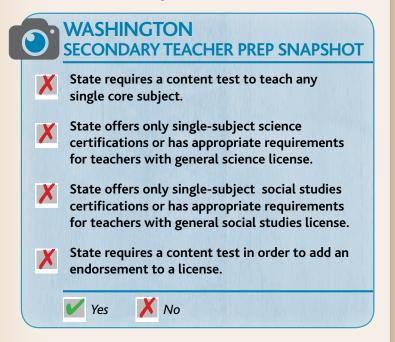

Arkansas, Indiana, Minnesota, New York, Tennessee

20 : NCTQ STATE TEACHER POLICY YEARBOOK 2014 WASHINGTON

## PREPARING SECONDARY TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

To be prepared to meet the instructional requirements of college- and career-readiness standards for their students, secondary teachers must be experts in the subject matter they teach. States should ensure that secondary teachers have sufficient content knowledge in all the subjects they are licensed to teach.

Currently, Washington offers single-subject secondary licenses to teach grades 5-12. Key licensing requirements for secondary school teachers in Washington include:

Not only must secondary teachers possess strong backgrounds in content knowledge as required by college- and career-readiness standards, they must also be able to address the key instructional shifts associated with the standards. Washington requires secondary English teachers to pass the NES English Language Arts assessment, which includes some of the instructional shifts toward building content knowledge and vocabulary through careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students. The state's competencies for English language arts teachers also address informational texts.

However, neither competencies nor secondary tests in other content areas address incorporating literacy skills.

Regarding struggling readers, English language arts competencies require teachers to "use instructional strategies to help students, including struggling readers, develop reading proficiency (such as semantic mapping, directed reading-thinking activities, comprehension skill-based activities, phonics based instruction, and scaffolding)."

#### RECOMMENDATIONS

Ensure that secondary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Washington's required secondary English language arts content test addresses informational texts, the state should ensure that this test really captures the major instructional shifts of collegeand career-ready standards. Washington is therefore encouraged to strengthen its teacher preparation requirements and ensure that all secondary English language arts candidates have the ability to adequately incorporate complex informational text into classroom instruction.

## Incorporate literacy skills as an integral part of every subject.

To ensure that secondary students are capable of accessing varied information about the world around them, Washington should also—either through testing frameworks or teacher standards—include literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

## Require subject-matter testing for secondary teacher candidates.

As a condition of licensure, Washington should require its secondary teacher candidates to pass a content test in each subject area they plan to teach to ensure that they possess adequate subject-matter knowledge and are prepared to teach grade-level content. Washington should not assume that science teachers are adequately prepared to teach math at the high school level. The only way to guarantee requisite subject matter is to require a passing score on a rigorous mathematics assessment.

#### Supporting Research

NES Test www.nestest.com WEST-E Tests www.west.nesinc.com Endorsement Competencies http://program.pesb.wa.gov/endorsements/list Revised Code of Washington 28A.410.220 WAC 181-82-105

#### WASHINGTON RESPONSE TO ANALYSIS

Washington asserted that integrating content areas is required in Standard 5, knowledge and skills for all teachers:

 Applying principles of differentiated instruction, including theories of language acquisition, stages of language, and academic language development, in the integration of subject matter across the content areas of reading, mathematical, scientific, and aesthetic reasoning.

The state added that endorsements with science, mathematics and language arts competencies have been updated to align with CCSS and NGSS. It pointed to "Science-specific Instructional Methodology," which requires a teacher to "demonstrate an understanding of the CCSS for Literacy in Science and Technical Subjects and align instruction in science with instruction that students receive in English Language Arts."

#### **Supporting Research**

http://program.pesb.wa.gov/program-review/standards/standard-5/ teacher

http://program.pesb.wa.gov/endorsements

http://program.pesb.wa.gov/endorsements/list

#### LAST WORD FROM NCTQ

Aligning the secondary science endorsement with instruction received in English language arts and requiring literacy in the content area are commendable. It appears that final approval for this endorsement is slated for early 2015, and NCTQ looks forward to reviewing the state's progress in future editions of the *Yearbook*.

#### Supporting Research

http://program.pesb.wa.gov/endorsements/endorsement-reviews-in-process-upcoming/science-5-12-review

#### **RECOMMENDATIONS CONTINUED**

Require secondary teachers with umbrella certifications to pass a content test for each discipline they are licensed to teach.

By allowing general social studies and general science certifications-and only requiring general knowledge exams for each—Washington is not ensuring that these secondary teachers possess adequate subject-specific content knowledge. The state's required general social studies assessment combines all topical areas (e.g., history, geography, economics), and its required general science assessment combines subject areas that include biology, chemistry and physics. Neither assessment reports separate scores for each area. Therefore, candidates could answer many—perhaps all—chemistry questions, for example, incorrectly, yet still be licensed to teach chemistry to high school students. Further, Washington should require content tests as a condition of initial licensure.

Require subject-matter testing when adding any subject-area endorsements.

Washington requires passing scores on subject-specific content tests, for teachers who are licensed in core secondary subjects and wish to add another subject area, or endorsement, to their licenses. However, the state has a significant loophole with regards to mathematics. The state should end the policy that allows secondary science teachers may teach certain math courses, including general math, pre-algebra and algebra, without additional subject-knowledge testing requirements.

#### SUMMARY OF SECONDARY TEACHER **PREP FIGURES**

- Figure 13
  - Requirements for instructional shifts associated with college- and career-readiness standards
- Figure 14 Content test requirements
- Figure 15 Requirements for general science teachers
- Figure 16 Requirements for general social studies teachers
- Figure 17

Teacher Prep Review findings about secondary teacher prep

Do secondary teachers have to pass a content test in every subject area for licensure?

1. Strong Practice: Indiana, Minnesota, Missouri, South Dakota, Tennessee

- 2. Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina⁴, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia, West Virginia, Wisconsin [For more on loopholes, see Figure 15 (science) and Figure 16 (social studies).]
- 3. Alaska⁵, Arizona⁶, California, Colorado, Hawaii, Montana, Washington, Wyoming
- 4. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.
- 5. Alaska does not require content tests for initial licensure.
- 6. Candidates with a master's degree in the subject area do not have to pass a content test.

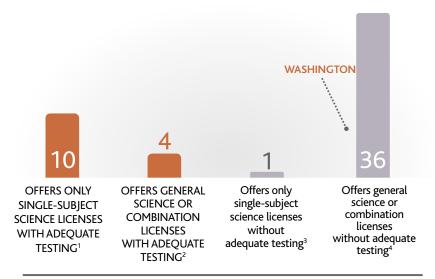

#### **EXAMPLES OF BEST PRACTICE**

Arkansas has done more than other states to ensure that secondary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. Not only does the state address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these new standards in its educator competencies for secondary English language arts teachers, it also requires teachers to incorporate literacy skills into all content areas. For example, the secondary social studies competency to "incorporate disciplinary literacy" states that "reading competencies for literacy in history/social studies for grades 7-12 include the ability to read informational texts in history and social studies closely and critically to analyze the key ideas and details as well as craft and structure with the purpose of integrating knowledge and ideas both within and across texts." A similar competency exists for both the life science and physical science secondary certifications.

Indiana, Minnesota and Tennessee require that all secondary teacher candidates pass a content test to teach any core subject both as a condition of licensure and to add an additional field to a secondary license. Further, neither of these states offers secondary certification in general social studies or science; all teachers must be certified in a specific discipline.

Also worthy of mention is **Missouri**, which requires general social studies teachers to pass a multi-content test with six independently scored subtests. Missouri also offers a general science license that can only be used to teach general science courses. All other science teachers must be certified in a specific discipline.

Do states ensure that secondary general science teachers have adequate subject-matter knowledge?

1. Strong Practice: Florida, Indiana, Kansas, Kentucky, Massachusetts, Minnesota, New York, South Dakota, Tennessee, Virginia

2. Strong Practice: Missouri, New Jersey, Rhode Island⁵, West Virginia⁵

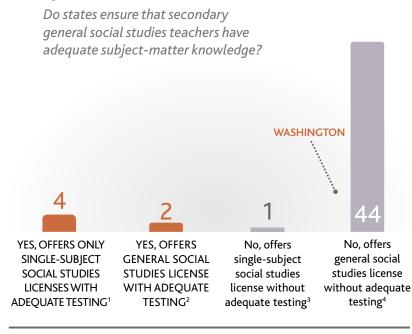

3. California

4. Alabama, Alaska, Arizona⁶, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Georgia⁷, Hawaii, Idaho, Illinois, Iowa, Louisiana, Maine, Maryland, Michigan, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Vermont, Washington, Wisconsin, Wyoming

5. Teachers with the general science license may only teach general science courses.

6. Arizona limits teachers with the general science license to teaching only general science courses. However, candidates with a master's degree in the subject area do not have to pass a content test.

7. Georgia's science test consists of two subtests.

1. Strong Practice: Georgia, Indiana, South Dakota, Tennessee

2. Strong Practice: Minnesota⁵, Missouri

3. Arizona⁶

4. Alabama, Alaska, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma⁷, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

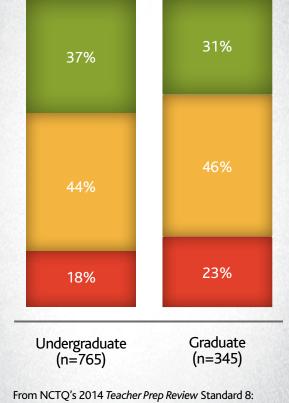

5. Minnesota's test for general social studies is divided into two individually scored subtests.

6. Candidates with a master's degree in the subject area do not have to pass a content test.

7. Oklahoma offers combination licenses without adequate testing.

#### Figure 17 TEACHER PREP REVIEW FINDINGS

Less than 40 percent of preparation programs ensure that secondary teachers are well prepared in the subjects they will teach.

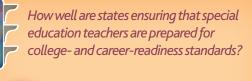

High School Content (n=1,110 high school programs). State licensing test requirements are also considered in evaluating this standard.

## **Special Education Teacher Preparation**

#### **Key Components**

## (The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all special education teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should ensure that all new secondary special education teachers are prepared to support struggling readers.
  - B. The state should require that all new secondary special education teachers are prepared to incorporate complex texts and academic language into instruction.
  - C. The state should ensure that all new secondary special education teachers are prepared to incorporate literacy skills as an integral part of every subject.
- 2. The state should require that new elementary special education teachers pass a rigorous test of reading instruction in order to attain licensure.
- The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
- All elementary special education candidates should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
- 5. The state should ensure that secondary special education teachers possess adequate content knowledge.

- Alaska, Arizona, Arkansas, Delaware, District of Columbia, Florida, Georgia, Hawaii, Illinois, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Utah, Vermont, WASHINGTON, Wyoming

### Special Education Teacher Prep Analysis: Washington

## PREPARING SPECIAL EDUCATION TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

Although most special education students are expected to meet the same high college- and career-readiness standards as typical students, too many states set an even lower bar for the preparation and licensure requirements of special education teachers. States must ensure that special education teachers are well grounded in all of the subject matter they will be licensed to teach.

Currently, Washington offers a K-12 special education license. Key licensing requirements for special education teachers in Washington include:

#### WASHINGTON SPECIAL ED TEACHER PREP SNAPSHOT

X State only offers discrete elementary and secondary special education licenses.

Elementary subject-matter test required for special education license.

Secondary test in at least one subject area required for secondary special education license.

X No

Yes

Special education teachers must also be prepared for the key instructional shifts that differentiate college- and career-readiness standards from previous student standards. Washington's preparation and licensure requirements for special education teachers are not aligned with the state's college- and career-readiness standards for students.

Washington does not require its special education teachers who teach the elementary grades to pass a rigorous test of reading instruction. The state does not require content testing, and teacher standards do not address informational texts or literacy skills.

Washington has no requirements for the preparation of elementary or secondary special education teachers that address struggling readers.

#### Supporting Research

Washington Administrative Code 181-82A-202

#### RECOMMENDATIONS

Ensure that special education teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Require all special education teacher candidates who teach elementary grades to pass a rigorous assessment in the science of reading instruction.

Washington should require a rigorous reading assessment tool to ensure that its elementary special education teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary special education teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

## Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Washington should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students.

## Incorporate literacy skills as an integral part of every subject.

To ensure that special education students are capable of accessing varied information about the world around them, Washington should also include specific requirements regarding literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

#### WASHINGTON RESPONSE TO ANALYSIS

Washington asserted that special education competencies require candidates to show they can make a positive impact on student learning, as measured by assessment scores over time, in reading, mathematics and writing. The state specifically pointed to the following competencies:

- Researched-based methods for increasing positive impact on student learning in reading, mathematics and writing
- research-based strategies for skill acquisition in academic content areas.

#### Supporting Research

http://program.pesb.wa.gov/endorsements/list/sped

#### **RECOMMENDATIONS CONTINUED**

#### Support struggling readers.

Washington should articulate requirements ensuring that all special education teachers are prepared to intervene and support students who are struggling with reading. With reading difficulties generally representing the primary reason for special education placements, it is essential that all special education teachers have the knowledge and skills to diagnose and support students with literacy needs.

End licensure practices that fail to distinguish between the skills and knowledge needed to teach elementary grades and secondary grades.

It is virtually impossible and certainly impractical for Washington to ensure that a K-12 special education teacher knows all the subject matter he or she is expected to be able to teach, especially considering state and federal expectations that special education students should meet the same high standards as other students. While the broad K-12 umbrella may be appropriate for teachers of low-incidence special education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students, who are expected to learn grade-level content.

#### Require that elementary special education candidates pass a rigorous content test as a condition of initial licensure.

To ensure that special education teacher candidates who will teach elementary grades possess sufficient knowledge of the subject matter at hand, Washington should require a rigorous content test that reports separate passing scores for each content area. Washington should also set these passing scores to reflect high levels of performance. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

#### **RECOMMENDATIONS CONTINUED**

#### Ensure that secondary special education teachers possess adequate content knowledge.

Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Washington's current policy of requiring no subject-matter testing is problematic and will not help special education students to meet rigorous learning standards. To provide a middle ground, Washington should consider a customized HOUSSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

#### **EXAMPLES OF BEST PRACTICE**

Although all states have weaknesses when it comes to special education teachers' preparedness to meet the instructional requirements of college- and careerreadiness standards for students, both Indiana and New York are notable for addressing the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these standards.

Unfortunately, states are also weak in other areas of special education teacher preparation. However, three states-Missouri, New York and Rhode Island-are worthy of mention for taking steps in the right direction in ensuring that all special education teachers know the subject matter they are required to teach. These three states require that elementary special education candidates pass the same elementary content tests, which are comprised of individual subtests, as general education elementary teachers.

Secondary special education teachers in New York must pass a multi-subject content test for special education teachers comprised of three separately scored sections. Rhode Island requires its secondary special education teachers to hold certification in another secondary area. Secondary special education teachers in Missouri can either take a multi-subject test comprised of four separately scored sections or a single-subject secondary assessment.

Test in at least one subject required for secondary special education license	Louisiana, New Jersey, Pennsylvania², Rhode Island, West Virginia³			
Required for a K-12 special education license	None			

1. Missouri offers a K-12 certification but candidates must pass either the elementary multi-content assessment or the middle/secondary multi-content assessment.

2. In Pennsylvania, a candidate who opts for dual certification in elementary or secondary special education and as a reading specialist does not have to take a content test.

3. West Virginia also allows elementary special education candidates to earn dual certification in early childhood, which would not require a content test. Secondary special education candidates earning a dual certification as a reading specialist are similarly exempted.

4. New York requires a multi-subject content test specifically geared to secondary special education candidates. It is divided into three subtests.

5. Wisconsin requires a middle school level content area test which does not report subscores for each area.

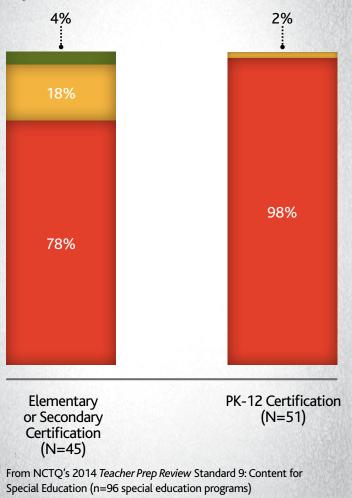

Figure 19

1. Missouri, New Jersey, Oregon and Vermont issue a K-12 certificate, but candidates must meet discrete elementary and/or secondary requirements.

#### Figure 22 TEACHER PREP REVIEW FINDINGS

Less than 5 percent of preparation programs ensure that special education teachers are well prepared in the subjects they will teach.

These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

## **Admission into Teacher Preparation**

#### **Key Components**

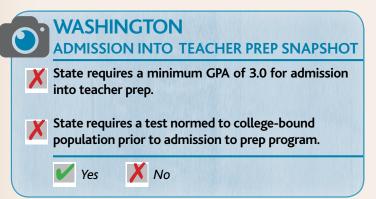

(The factors considered in determining the states' ratings for this topic.)

- 1. The state should limit admission to teacher preparation programs to candidates in the top half of the college-going population.
- 2. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs. Alternatively, academic proficiency could be demonstrated by grade point average.

#### RAISING THE BAR FOR TEACHER PREP THROUGH HIGHER ADMISSION STANDARDS

NCTQ has repeatedly found that too many teacher preparation programs are in need of major improvement, graduating first-year teachers lacking skills and content knowledge adequate to thrive in the classroom. One important way states can raise the bar for teacher preparation programs is to set more ambitious admission requirements for new elementary, secondary and special education teachers. This is even more relevant and important as the increasing expectations of college- and career-readiness standards demand more from teachers academically. A key criterion for admissions is evidence of a strong academic background, and states should require programs to select candidates from the top half of the college-going population. Countries like Singapore and Finland are even more restrictive in admissions; the top half goal is realistic and achievable while representing a significantly higher standard for programs throughout the United States. Until recently, few states had rigorous academic standards for admission, but with states like Rhode Island and Delaware significantly raising the bar by taking the lead in establishing higher standards and new accreditation requirements from CAEP, this is beginning to change.

Washington requires that approved undergraduate teacher preparation programs only accept teacher candidates who have passed its basic skills test, the Washington Educator Skills Test (WEST-B). Although the state sets the minimum score for this test, it is normed just to the prospective teacher population.

Washington also allows teacher preparation programs to exempt candidates who demonstrate equivalent performance on a college entrance exam such as the ACT or SAT.

#### Supporting Research Washington Educator Skills Test

http://www.west.nesinc.com/WA11_overview.asp WAC 181-01-0025

#### WASHINGTON RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Washington did not indicate any policy updates related to admission to teacher preparation.

#### RECOMMENDATIONS

#### Require preparation programs to use a common test normed to the general college-bound population.

The basic skills tests in use in most states largely assess middle school-level skills. To improve the selectivity of teacher candidates—a common characteristic in countries whose students consistently outperform ours in international comparisons—Washington should require an assessment demonstrating that candidates are academically competitive with all peers, regardless of their intended profession. Requiring a common test normed to the general college population would allow for the selection of applicants in the top half of their class, as well as facilitate program comparison.

 Consider requiring candidates to pass subject-matter tests as a condition of admission into teacher programs.

In addition to ensuring that programs require a measure of academic performance for admission, Washington might also want to consider requiring content testing prior to program admission as opposed to at the point of program completion. Program candidates are likely to have completed coursework that covers related test content in the prerequisite classes required for program admission. Thus, it would be sensible to have candidates take content tests while this knowledge is fresh rather than wait two years to fulfill the requirement, and candidates lacking sufficient expertise would be able to remedy deficits prior to entering formal preparation.

#### SUMMARY OF ADMISSION INTO TEACHER **PREP FIGURES**

- Figure 23 Test of academic proficiency requirements
- Figure 24
  - **GPA** requirements
- Figure 25

Teacher Prep Review findings about admissions

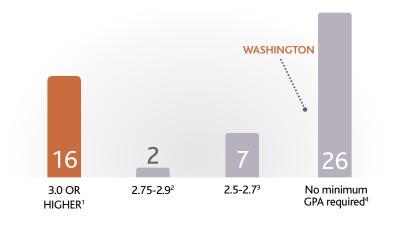

#### EXAMPLES OF BEST PRACTICE

While many states now require CAEP accreditation which includes a standard requiring strong admission practices, Rhode Island and Delaware have set requirements independent of the accreditation process, ensuring that the states' expectations are clear. Both states require a test of academic proficiency normed to the general college-bound population rather than a test that is normed just to prospective teachers. Delaware also requires teacher candidates to have a 3.0 GPA or be in the top 50th percentile for general education coursework completed. Rhode Island also requires an average cohort GPA of 3.0, and, beginning in 2016, the cohort mean score on nationally-normed tests such as the ACT, SAT or GRE must be in the top 50th percentile. In 2020, the requirement for the mean test score will increase from the top half to the top third.

2. Candidates in Oklahoma also have the option of gaining admission with a 3.0 GPA.

^{1.} Requirements for admissions test normed to college-bound population is based on CAEP accreditation standards, not state's own admission policy.

Do states require a minimum GPA for admission to teacher prep?

 Strong Practice: Delaware, District of Columbia⁵, Georgia⁶, Hawaii⁵, Louisiana⁵, Michigan⁵, Mississippi⁶, New Jersey⁶, New York⁵, North Carolina⁵, Oklahoma⁷, Pennsylvania⁸, Rhode Island, South Carolina⁵, Utah, Virginia⁵

- 3. Alabama, Arkansas, Connecticut⁹, Florida, Nebraska, South Dakota, Wisconsin¹⁰
- 4. Alaska, Arizona, California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Tennessee, Vermont, Washington, West Virginia, Wyoming
- 5. Required minimum GPA of 3.0 is based on CAEP accreditation standards, not state's own admission policy.
- 6. The 3.0 GPA requirement is a cohort average; individual candidates in Mississippi and New Jersey must have a 2.75 GPA. Individual candidates in Georgia must have a 2.5 GPA.
- 7. Candidates in Oklahoma also have the option of gaining admission by passing a basic skills test.
- 8. Students can also be admitted with a combination of a 2.8 GPA and qualifying scores on the basic skills test or SAT/ACT.
- 9. Connecticut requires a B- grade point average for all undergraduate courses.
- 10. The GPA admission requirement is 2.5 for undergraduate and 2.75 for graduate programs.

#### Figure 25

#### TEACHER PREP REVIEW FINDINGS

Only 28 percent of teacher preparation programs have a high bar for admissions.

From NCTQ's 2014 *Teacher Prep Review* Standard 1: Selection Criteria (n=2,396 elementary, secondary and special education programs)

^{2.} Kentucky, Texas

## **Teacher Preparation Program Accountability**

#### **Key Components**

## (The factors considered in determining the states' ratings for this topic.)

- The state should incorporate preparation to teach to college- and career-readiness standards into its accountability requirements for teacher preparation programs.
- 2. The state should collect data that connects student achievement gains to teacher preparation programs. Such data can include value-added or growth analyses conducted specifically for this purpose or evaluation ratings that incorporate objective measures of student learning to a significant extent.
- 3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
- 4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.
- 5. The state should retain full authority over its process for approving teacher preparation programs.

teacher preparation programs are accountable for their performance? Alaska, Connecticut, District of

How well are states ensuring that

#### HOLDING PREPARATION PROGRAMS ACCOUNTABLE FOR RESULTS

The ultimate goal of teacher preparation programs should be to produce teachers who are effective in educating their students and ensure that they are ready for college and career. As programs operate by virtue of state approval, it is the state's responsibility to connect approval to accountability measures that ensure high performance. While this goal may have been hard to assess a few years ago, that is no longer the case. Redesigned evaluations of teacher effectiveness in the majority of states offer an opportunity for states to collect meaningful objective data on the performance of program graduates. To date, few states connect their process of approving teacher preparation programs to measurable outcome data about programs' graduates.

#### WASHINGTON TEACHER PREP ACCOUNTABILITY SNAPSHOT

X State collects data that connects student achievement gains to teacher preparation programs.

- State collects other meaningful data that reflect program performance.
- State has set minimum standards for program performance.
- State publishes an annual report card on its own website.

State retains full authority over its approval process.

Washington's approval process for its traditional and alternate route teacher preparation programs does not hold programs accountable for the quality of the teachers they produce.

No

Yes

Washington requires that preparation programs collect candidate "work samples" that document positive impact on student learning; however, the state has no requirement that value-added or other student growth data will be utilized to connect student achievement gains to teacher preparation programs. Washington collects some objective, meaningful data to measure the performance of its preparation programs, including licensure test scores and first-year teacher/principal surveys. However, the state does not apply any transparent, measurable criteria for conferring program approval.

#### RECOMMENDATIONS

#### Collect data that connect student achievement gains to teacher preparation programs.

As one way to measure whether programs are producing effective classroom teachers, Washington should consider the academic achievement gains of students taught by programs' graduates, averaged over the first three years of teaching. Data that are aggregated to the institution (e.g., combining elementary and secondary programs) rather than disaggregated to the specific preparation program are not useful for accountability purposes. Such aggregation can mask significant differences in performance among programs.

Report other meaningful data that reflect program performance.

Although measures of student growth are an important indicator of program effectiveness, they cannot be the sole measure of program quality for several reasons, including the fact that many programs may have graduates whose students do not take standardized tests. The accountability system must therefore include other objective measures that show how well programs are preparing teachers for the classroom. Washington should expand its requirements to also include:

- 1. Evaluation results from the first and/or second year of teaching;
- 2. Number of times, on average, it takes teacher candidates to pass licensing tests
- 3. Five-year retention rates of graduates in the teaching profession.

Further, in the past three years, no programs in Washington have been identified as low performing—an additional indicator that programs lack accountability. The state's website includes data that allow the public to review and compare program performance.

Finally, Washington maintains control over its approval process.

#### Supporting Research

Washington Administrative Code 181-78A Standard II - Accountability and Program Improvement http://program.pesb.wa.gov/review/site-visits/protocol/2010/standard-2 Title II State Reports https://title2.ed.gov Educator Program Information http://data.pesb.wa.gov/program-information

#### WASHINGTON RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Washington did note that the Professional Educator Standards Board recently updated the definitions for at-risk of low performing and low performing programs.

#### **RECOMMENDATIONS CONTINUED**

#### Establish the minimum standard of performance for each category of data.

Merely collecting the types of data described above is insufficient for accountability purposes. The next and perhaps more critical step is for the state to establish precise minimum standards for teacher preparation program performance for each category of data. Programs should then be held accountable for meeting these standards, and there should be consequences for failing to do so, including loss of program approval.

## SUMMARY OF TEACHER PREP PROGRAM ACCOUNTABILITY FIGURES

Figure 26

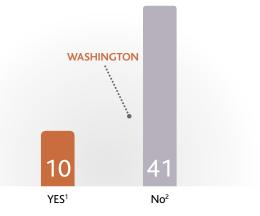

Accountability requirements

Figure 27 Use of student achievement data

#### EXAMPLES OF BEST PRACTICE

No state has yet implemented a full accountability system for teacher preparation that features data, including student achievement gains, connected to teacher preparation programs (not just the institution level); has clear minimum standards of performance for those data; and publishes the results for use by prospective teachers, hiring school districts and the general public. Some states are well on their way. **Georgia** and **Louisiana** collect student achievement gains and set minimum standards of performance, while **Ohio** and **Tennessee** have published report cards that include connections to student achievement gains.

#### Figure 27

## Teacher Preparation Policy Priorities for Washington

## Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of informational texts as well as incorporate complex informational texts into classroom instruction.
  Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/ social studies, science, technical subjects and the arts.
   Priority for elementary, middle, secondary and special education teacher preparation.
- Ensure teachers are prepared to intervene and support students who are struggling with reading. *Priority for middle and special education teacher preparation.*

#### Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires a meaningful passing score for each area.
- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

#### Additional priorities for middle school teacher preparation:

- Require teacher candidates to pass a content test in every core area they are licensed to teach.
- Eliminate the generalist K-8 license.

#### Additional priorities for secondary teacher preparation:

- Require secondary candidates to pass a content test in each subject they are licensed to teach.
- Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

#### Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate, and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

#### Raise admission requirements:

• Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

#### Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.
