2010 OVERALL TEACHER PREPARATION PROGRAM DESIGN

The overall design of this institution’s teacher preparation is among the strongest in the state, most notably in its reading and mathematics preparation of elementary teacher candidates, as well as its overall preparation of secondary teacher candidates. Because some of the data that we collect is drawn from public sources, we always ask the institution to verify the accuracy and currency of what we have collected. Dallas Baptist University graciously provided to us review and comment.

Admission Standards

1. Admits teacher candidates with strong academic records ●

+ Rationale + Methodology + State findings

The standards for admission either into the institution or its teacher preparation program should select teacher candidates from only the top half of the college population.

Because Dallas Baptist University is only rated as “selective” in its admissions by U.S. News and World Report, NCTQ also checked the entrance criteria for its Bush College of Education. Fortunately, the college’s criteria are higher, using cut-scores that exceed the state’s on the THEA (a test of college readiness), thereby ensuring that teacher candidates have sufficiently strong academic credentials.

Elementary Teacher Program

2. Prepares teacher candidates to teach reading ●

a. Extent to which the science of reading is covered ●

+ Rationale + Methodology + State findings

The research-based content proven to be necessary for teaching all children to read should be clearly evident in course materials such as lecture topics, assignments and textbooks.

The institution nearly meets the standard because coursework offers very comprehensive coverage of the science of reading. Textbook support could be improved. Although this program addresses the science of reading, we identified three required textbooks that did not support reading science.

b. Adherence to science of reading throughout coursework ●

+ Rationale + Methodology + State findings

All of an institution’s required reading courses — not just some courses — should impart the research-based content that is necessary for teaching all children to read.

The institution nearly meets the standard because three of four courses address the science of reading.

Ratings: ● Meets standard ● Nearly meets standard ● Partly meets standard ● Meets a small part of standard ○ Fails to meet standard
? Data insufficient for a final rating ⊘ Data withheld despite request NA Not applicable 2011 Evaluation pending NR Not rated

3. Prepares teacher candidates to teach mathematics ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Teacher candidates, even those who excel in math, generally require three semesters of coursework in order to progress from a procedural to a conceptual understanding of the essential mathematics topics taught in the elementary grades.

The institution does not fully meet the standard because it simply does not require a sufficient number of courses to allow for adequate coverage of the essential topics.

4. Educates teacher candidates in the broad content areas relevant to elementary teaching ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Because they cannot teach what they do not know, teacher candidates need to have a solid grasp of literature and composition; American history, world history, art history and music history; geography; and science.

The institution only partially meets this standard because neither the institution nor its teacher preparation program appears to ensure sufficient coverage in the world history and world geography content elementary teachers need. We note course requirements in other essential content areas, including literature, composition, American history, art history, music history and science.

5. Requires an area of concentration so that teacher candidates develop content expertise and have a second career option ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Teacher candidates should develop some expertise outside of their professional studies, not only to enrich their own academic experience, but also to serve as a fallback major in the event that the student teaching experience goes poorly.

The institution only partially meets this standard because we could find no evidence of any subject matter concentrations, save three history and three English courses. Should a teacher candidate fail student teaching, she would face well more than an additional semester's work to be able to graduate under a non-education major.

6. Offers all required courses at least once a year ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

It must be possible to complete the requisite program in a timely manner.

The institution fully meets this standard because it offers all required courses each year.

7. Prepares teacher candidates for the profession ?

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

The well-documented ineffectiveness of first year teachers may be mitigated by professional preparation that includes coursework on classroom management, methods for teaching specific content and diverse learners, child development, assessment and data driven instruction, and how education policy challenges affect practice.

Because for most coursework we could only gain access to course descriptions for this standard rather than syllabi, we did not rate this standard. However, we were able to complete an accurate count of the credit hours in professional coursework that the institution requires, and it appears to be somewhat above typical counts. The institution requires 57 hours of professional coursework (not including student teaching), exceeding the generous upper bound of 50 credits that should be sufficient. (A non-credit licensing test preparation course is also required.) Furthermore, in spite of this count, we believe we are able to identify teaching diverse learners as a key professional topic missing from this sequence.

8. Student teaching effectively prepares teacher candidates for the challenges of the classroom 2011

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Although there are a number of characteristics that define a high quality student teaching program, at a minimum a full-time, full-semester clinical experience is necessary.

The institution meets this minimal standard as it offers a full semester of full-time student teaching.

Secondary Teacher Program

9. Prepares high school teacher candidates to teach their subject area(s) ●
- + Rationale + Methodology + State findings
- All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages.
While most of the course requirements in the certification areas for secondary teachers appear to be sound, the institution only partially meets the standard because of an inadequate program design in general science. Acknowledging that flawed state regulation is the principal culprit for the prevalence of poorly designed science preparation programs across the state, including here, the institution should not sanction a system that qualifies secondary teachers to teach multiple subject areas in science after having taken sufficient coursework in only one of these areas, biology.
-
10. Prepares middle school teacher candidates to teach their subject area(s) ●
- + Rationale + Methodology + State findings
- All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages.
The institution only partially meets the standard because of a flawed program design for the "middle school subject specialist." The institution should not qualify a middle school teacher to teach science without requiring either a major in a science discipline or a combination of courses equivalent to a major that would include at least a minor in one discipline.
-
11. Offers all required courses (high school certification) at least once a year ●
- + Rationale + Methodology + State findings
- It must be possible to complete the requisite program in a timely manner.
The institution meets this standard because it offers all required courses each year.
-
12. Prepares high school teacher candidates for the profession ?
- + Rationale + Methodology + State findings
- The well-documented ineffectiveness of first year teachers may be mitigated by professional preparation that includes coursework on classroom management, methods for teaching specific content and diverse learners, adolescent development, assessment and data driven instruction, and how education policy challenges affect practice.
Because for most coursework we could only gain access to course descriptions for this standard rather than syllabi, we did not rate this standard. However, our limited examination of course requirements and descriptions suggests that the institution potentially appears to give inadequate attention to a number of essential professional topics for the secondary teacher, most notably 1) subject-specific methods and 2) teaching diverse learners.
-
13. Student teaching effectively prepares high school teacher candidates for the challenges of the classroom 2011
- + Rationale + Methodology + State findings
- Although there are a number of characteristics that define a high quality student teaching program, at a minimum a full-time, full-semester clinical experience is necessary.
The institution meets this minimal standard as it offers a full semester of full-time student teaching.

Special Education Teacher Program

Because Dallas Baptist University does not offer a program for special education certification, Standards #14-16 are not included.

Outcomes

17. Systematically seeks and uses feedback on graduates from school districts ○

18. Utilizes available data systems to monitor performance of graduates ○

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Mirroring a similar commitment now found in K-12 education, higher education institutions must embrace data driven decision making and accountability in preparing teachers.

The institution does not meet these standards. In our survey of local school districts that hire the institution's graduates, the Dallas Independent School District responded that the institution does not regularly request any data regarding the job performance of graduates or the performance of graduates' students.

Institutional Features

19. Assigns faculty to teach in their area of expertise ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Only the most extreme examples of unsuitable assignments are noted, such as an instructor teaching both reading and mathematics methods.

The institution meets this standard as we could find no evidence of faculty being inappropriately assigned.

20. Offers grade-span specific coursework as appropriate ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

A single class with curriculum addressing students from preschoolers to high school seniors cannot adequately prepare both elementary and secondary teacher candidates in areas such as classroom management or instructing students with disabilities.

The institution meets this standard as it appears that it designs separate classes for elementary and secondary candidates on topics benefiting from age-specific approaches.

21. Ensures that teacher candidates are prepared to teach in a global society NR

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

The world has shrunk. Recognition of that fact should pervade the campus.

Because this standard is still in a developmental phase, we do not provide an institutional rating and our findings should only be viewed as exploratory. We note that although teacher candidates are not required to take world geography coursework, foreign students comprise nearly 8 percent of the institution's student body, teacher candidates are required to take foreign language and the institution provides opportunities to teach in Asia.

Exit Standards

Either state licensure standards are adequate or the institution sets a higher standard for program completion than licensure requires

If the state fails to establish rigorous licensure requirements, institutions are still obligated to ensure that their graduates meet high standards. For example, if the state does not require a licensure test that measures candidates' knowledge of every subject taught, institutions must fill this vacuum.

22. Elementary (EC-4/EC-6) ○

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

The institution does not meet this standard because it relies only on the state's licensing test, the TExES elementary generalist test, to determine if its elementary teacher candidates possess adequate knowledge of reading instruction, as well as content knowledge in four subject areas. This test is wholly inadequate—both because of its low level of rigor and the lack of separate cut-scores for each subject. Recognizing that action on the part of the state to remedy these deficiencies is needed, the institution could require a more meaningful test of reading instruction and insist that its teacher candidates pass assessments in each of four subject areas.

23. Middle School (Grades 4-8) ●

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

The institution meets this standard because it only qualifies middle school teacher candidates for certification in areas for which the TExES licensing tests appear to be adequate.

24. Secondary (Grades 8-12) ◐

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

The institution does not fully meet this standard. Acknowledging that flawed state regulation is the principal culprit for the prevalence of poor design of secondary programs across the state, the institution should not qualify secondary teacher candidates to teach multiple subjects by means of a "composite subjects" certification (e.g., preparing a teacher to teach "science" instead of chemistry, biology, physics and/or earth science). The institution could remedy the state's regulatory deficiency by requiring candidates to pass content assessments in each subject for exit.

25. Special Education (EC-12) NA

[+ Rationale](#) [+ Methodology](#) [+ State findings](#)

Institution Comment: *Dallas Baptist University offers a rigorous preparation program for teachers at all levels of certification and has a strong record for embracing accountability measures. While we are pleased to share syllabi and the results of data collection for accreditation purposes with the Texas Education Agency and the Southern Association of Colleges and Schools, these will not significantly change the NCTQ ratings because of the criteria selected by NCTQ. The Texas Education Agencies State Board of Educator Certification (SBEC) and the Texas Higher Education Coordinating Board (THECB) both indicate surprise that NCTQ did not contact them since they are willing to send NCTQ the measures required by statute for accrediting university programs in Texas. Further, they stand ready to cite legislation and rule that make compliance with some of NCTQs criteria unattainable. Dallas Baptist University is fully accredited by Southern Association of Colleges and Schools (SACS), and the education programs are fully accredited by the State of Texas through the Texas Education Agency. The negative NCTQ ratings contradict commendations by both regional and state accrediting bodies. Dallas Baptist University thanks NCTQ for the opportunity for this input to be included in the official report. This response will be followed by a mailing of additional materials that we feel will correct several mistakes in the evaluation by NCTQ of the College of Education undergraduate teacher preparation program at Dallas Baptist University.*
