

# The University of Texas of the Permian Basin

Odessa, Texas

School of Education

## 2010 OVERALL TEACHER PREPARATION PROGRAM DESIGN

The overall design of this institution's teacher preparation program could be improved across a range of elements, as noted below. Because some of the data that we collect is drawn from public sources, we always ask the institution to verify the accuracy and currency of what we have collected. The University of Texas of the Permian Basin graciously provided to us review and comment.

### Admission Standards

#### 1. Admits teacher candidates with strong academic records ●

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

The standards for admission either into the institution or its teacher preparation program should select teacher candidates from only the top half of the college population.

*Because The University of Texas of the Permian Basin is only rated as "selective" in its admissions by U.S. News and World Report, NCTQ also checked the entrance criteria for its School of Education. Fortunately, the school's criteria are higher, using cut-scores that exceed the state's on the THEA (a test of college readiness), thereby ensuring that teacher candidates have sufficiently strong academic credentials.*

### Elementary Teacher Program

#### 2. Prepares teacher candidates to teach reading

##### a. Extent to which the science of reading is covered ◐

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

The research-based content proven to be necessary for teaching all children to read should be clearly evident in course materials such as lecture topics, assignments and textbooks.

*Without taking into consideration a new reading course added in fall 2009, the institution only partially meets the standard because it covers vocabulary and comprehension but does not address the other components of the science of reading. We identified three required textbooks that did not support reading science.*

##### b. Adherence to science of reading throughout coursework NA

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

All of an institution's required reading courses — not just some courses — should impart the research-based content that is necessary for teaching all children to read.

*Because we could discern little evidence of the science of reading being taught in either a single comprehensive course or in a combination of multiple courses (see standard #2a), any further rating on this standard is irrelevant.*

Ratings: ● Meets standard    ◐ Nearly meets standard    ◑ Partly meets standard    ◒ Meets a small part of standard    ○ Fails to meet standard  
 ? Data insufficient for a final rating    ⚠ Data withheld despite request    NA Not applicable    2011 Evaluation pending    NR Not rated

**3. Prepares teacher candidates to teach mathematics**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Teacher candidates, even those who excel in math, generally require three semesters of coursework in order to progress from a procedural to a conceptual understanding of the essential mathematics topics taught in the elementary grades. *The institution does not fully meet the standard because it simply does not require a sufficient number of courses to allow for adequate coverage of the essential topics.*

**4. Educates teacher candidates in the broad content areas relevant to elementary teaching**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Because they cannot teach what they do not know, teacher candidates need to have a solid grasp of literature and composition; American history, world history, art history and music history; geography; and science. *The institution only partially meets this standard because neither the institution nor its teacher preparation program appears to ensure sufficient coverage in the world history, art history and music history content elementary teachers need. We note course requirements in other essential content areas, including literature, composition, American history, world geography and science.*

**5. Requires an area of concentration so that teacher candidates develop content expertise and have a second career option**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Teacher candidates should develop some expertise outside of their professional studies, not only to enrich their own academic experience, but also to serve as a fallback major in the event that the student teaching experience goes poorly. *The institution partially meets this standard because its elementary teacher candidates have the option of completing an academic major independent of education.*

**6. Offers all required courses at least once a year**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

It must be possible to complete the requisite program in a timely manner. *The institution fully meets this standard because it offers all required courses each year.*

**7. Prepares teacher candidates for the profession**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

The well-documented ineffectiveness of first year teachers may be mitigated by professional preparation that includes coursework on classroom management, methods for teaching specific content and diverse learners, child development, assessment and data driven instruction, and how education policy challenges affect practice. *Because in most cases we could only gain access to course descriptions for this standard rather than syllabi, we did not rate this standard. However, our limited examination of course requirements, descriptions and some syllabi suggests that the institution potentially appears to give inadequate attention to a number of essential professional topics, most notably 1) classroom management, 2) mathematics methods, 3) assessment, and 4) education policy challenges.*

**8. Student teaching effectively prepares teacher candidates for the challenges of the classroom**

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Although there are a number of characteristics that define a high quality student teaching program, at a minimum a full-time, full-semester clinical experience is necessary. *The institution meets this minimal standard as it offers a full semester of full-time student teaching.*

## Secondary Teacher Program

9. Prepares high school teacher candidates to teach their subject area(s) ●
- + Rationale    + Methodology    + State findings
- All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages.  
*While most of the course requirements in the certification areas for secondary teachers appear to be sound, the institution does not fully meet the standard because of an inadequate program design in general science. Acknowledging that flawed state regulation is the principal culprit for the prevalence of poorly designed science preparation programs across the state, including here, the institution should not sanction a system that qualifies secondary teachers to teach multiple subject areas in science after having taken sufficient coursework in only one of these areas, biology.*
- 
10. Prepares middle school teacher candidates to teach their subject area(s) ○
- + Rationale    + Methodology    + State findings
- All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages.  
*While course requirements in the other certification areas for middle school teachers appear to be more adequate, the institution does not meet this standard because of an inadequate program design for the "middle school generalist." Acknowledging that flawed state regulation is the principal culprit for the prevalence of poorly designed middle school programs across the state, including here, the institution should not sanction some preparation routes that qualify a middle school teacher in all four core disciplines without sufficient coursework in each.*
- 
11. Offers all required courses (high school certification) at least once a year ●
- + Rationale    + Methodology    + State findings
- It must be possible to complete the requisite program in a timely manner.  
*The institution meets this standard because it offers all required courses each year.*
- 
12. Prepares high school teacher candidates for the profession ?
- + Rationale    + Methodology    + State findings
- The well-documented ineffectiveness of first year teachers may be mitigated by professional preparation that includes coursework on classroom management, methods for teaching specific content and diverse learners, adolescent development, assessment and data driven instruction, and how education policy challenges affect practice.  
*Because in most cases we could only gain access to course descriptions for this standard rather than syllabi, we did not rate this standard. However, our limited examination of course requirements, descriptions and some syllabi suggests that the institution potentially appears to give inadequate attention to a number of essential professional topics for the secondary teacher, most notably 1) adolescent development, 2) assessment, and 3) education policy challenges.*
- 
13. Student teaching effectively prepares high school teacher candidates for the challenges of the classroom 2011
- + Rationale    + Methodology    + State findings
- Although there are a number of characteristics that define a high quality student teaching program, at a minimum a full-time, full-semester clinical experience is necessary.  
*The institution meets this minimal standard as it offers a full semester of full-time student teaching.*

Ratings: ● Meets standard    ● Nearly meets standard    ● Partly meets standard    ● Meets a small part of standard    ○ Fails to meet standard  
 ? Data insufficient for a final rating    ⊘ Data withheld despite request    NA Not applicable    2011 Evaluation pending    NR Not rated

---

## Special Education Teacher Program

### 14. Prepares teacher candidates to teach early reading

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

All special education teachers, regardless of whether they are teaching toddlers or teenagers, need coursework in the research-based strategies shown to dramatically reduce the number of children needing remediation in reading. *The institution only partially meets the standard because it covers vocabulary and comprehension, but does not address the other components of the science of reading.*

### 15. Prepares teacher candidates to teach elementary mathematics

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Special education teachers, regardless of whether they are teaching toddlers or teenagers, generally need three semesters of coursework in order to progress from a procedural to a conceptual understanding of fundamental mathematics topics. *The institution does not fully meet the standard because it simply does not require a sufficient number of courses to allow for adequate coverage of the essential topics.*

### 16. Offers all required courses at least once a year

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

It must be possible to complete the requisite program in a timely manner. *The institution meets this standard because all required courses are offered each year.*

---

## Outcomes

### 17. Systematically seeks and uses feedback on graduates from school districts

### 18. Utilizes available data systems to monitor performance of graduates

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Mirroring a similar commitment now found in K-12 education, higher education institutions must embrace data driven decision making and accountability in preparing teachers. *The institution meets both standards. In our survey of local school districts that hire the institution's graduates, the Odessa Independent School District responded that the institution regularly requests data regarding the job performance of graduates and the performance of graduates' students.*

---

## Institutional Features

### 19. Assigns faculty to teach in their area of expertise

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

Only the most extreme examples of unsuitable assignments are noted, such as an instructor teaching both reading and mathematics methods. *The institution meets this standard as we could find no evidence of faculty being inappropriately assigned.*

### 20. Offers grade-span specific coursework as appropriate

[+ Rationale](#)    [+ Methodology](#)    [+ State findings](#)

A single class with curriculum addressing students from preschoolers to high school seniors cannot adequately prepare both elementary and secondary teacher candidates in areas such as classroom management or instructing students with disabilities. *The institution meets this standard as it appears that it designs separate classes for elementary and secondary candidates on topics benefiting from age-specific approaches.*

**21. Ensures that teacher candidates are prepared to teach in a global society** **NR**[+ Rationale](#)   [+ Methodology](#)   [+ State findings](#)

The world has shrunk. Recognition of that fact should pervade the campus.

*Because this standard is still in a developmental phase, we do not provide an institutional rating and our findings should only be viewed as exploratory. We note that teacher candidates must take a course in world geography, but we did not find coursework requirements regarding foreign language or education-focused study abroad programs, nor do foreign students comprise a significant proportion of the institution's student body.*

**Exit Standards**

**Either state licensure standards are adequate or the institution sets a higher standard for program completion than licensure requires**

If the state fails to establish rigorous licensure requirements, institutions are still obligated to ensure that their graduates meet high standards. For example, if the state does not require a licensure test that measures candidates' knowledge of every subject taught, institutions must fill this vacuum.

**22. Elementary (EC-4/EC-6)** ○[+ Rationale](#)   [+ Methodology](#)   [+ State findings](#)

*The institution does not meet this standard because it relies only on the state's licensing test, the TExES elementary generalist test, to determine if its elementary teacher candidates possess adequate knowledge of reading instruction, as well as content knowledge in four subject areas. This test is wholly inadequate—both because of its low level of rigor and the lack of separate cut-scores for each subject. Recognizing that action on the part of the state to remedy these deficiencies is needed, the institution could require a more meaningful test of reading instruction and insist that its teacher candidates pass assessments in each of four subject areas.*

**23. Middle School (Grades 4-8)** ○[+ Rationale](#)   [+ Methodology](#)   [+ State findings](#)

*The institution does not meet this standard because it qualifies middle school teacher candidates by virtue of passing the middle school generalist licensing test. This test is inadequate because of its lack of separate cut-scores for reading and four core subjects. Recognizing that action on the part of the state to remedy these deficiencies is needed, the institution could require a more meaningful test of reading instruction and insist that its teacher candidates independently pass assessments in each subject area.*

**24. Secondary (Grades 8-12)** ●[+ Rationale](#)   [+ Methodology](#)   [+ State findings](#)

*The institution does not fully meet this standard. Acknowledging that flawed state regulation is the principal culprit for the prevalence of poor design of some secondary programs across the state, the institution should not qualify secondary teacher candidates to teach multiple subjects by means of a "composite subjects" certification (e.g., preparing a teacher to teach "science" instead of chemistry, biology, physics and/or earth science). The institution could remedy the state's regulatory deficiency by requiring candidates to pass content assessments in each subject for exit.*
