 Teacher Preparation Program Accountability

National Council on Teacher Quality

#### Acknowledgments

#### **STATES**

State education agencies remain our most important partners in this effort, and their continued cooperation has helped to ensure the factual accuracy of the final product. Although this year's edition did not require the extensive review that the comprehensive editions require, we still wanted to make sure that we captured all relevant policy changes and that states' perspectives were represented. Every state formally received a draft of the policy updates we identified in July 2012 for comment and correction; states also received a final draft of their reports a month prior to release. All but one state responded to our inquiries. We thank the states for their ongoing willingness to engage in dialogue with us.

#### **FUNDERS**

The primary funders for the 2012 Yearbook were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

#### STAFF

Sandi Jacobs, *Project Director* Sarah Brody, *Project Assistant* Kathryn M. Doherty, *Special Contributor* Kelli Lakis, *Lead Researcher* Stephanie T. Maltz, *Researcher* 

Thank you to the team at CPS Gumpert for their design of the 2012 Yearbook. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original Yearbook design and ongoing technical support.

## Improving Teacher Preparation in Mississippi

The 2012 *State Teacher Policy Yearbook* puts a spotlight on the critical issue of teacher preparation. The 2011 edition of the *Yearbook* provided a comprehensive review of all aspects of states' teacher policies, and although considerable progress was noted in areas related to teacher effectiveness, the same could not be said for teacher preparation. While many states have made advancements in teacher evaluation and tenure requirements, teacher preparation has yet to capture states' attention.

Good preparation does not guarantee that teachers will ultimately be effective, but there is much more that can be done to help ensure that new teachers are "classroom ready." This edition of the *Yearbook* offers states a roadmap of their teacher preparation policies, identifying priorities that need critical attention and also identifying low-hanging fruit, policy changes that states can implement in relatively short order.

### Current Status of Mississippi's Teacher Preparation Policy

Last year's *State Teacher Policy Yearbook* provided an in-depth analysis of each of the topics identified below. The 2012 score includes any policy changes identified in the last year. The 
year symbol indicates a score increase from 2011.

Yearbook Goal	Торіс	2012 Score
1-A	Admission into Preparation Programs

# 2012 Policy Update for Mississippi

Based on a review of state legislation, rules and regulations, NCTQ has identified the following recent policy changes in Mississippi:

#### Teacher Preparation Program Accountability

New legislation in Mississippi requires the newly established Commission on Teacher and Administrator Education, Certification and Licensure and Development to recommend annually approval or disapproval of each preparation program, "subject to a process and schedule determined by the State Board of Education." 2012 H.B. 1144

### Mississippi Response to Policy Update

States were asked to review NCTQ's identified updates and also to comment on policy changes related to teacher preparation that have occurred in the last year, pending changes or teacher preparation in the state more generally. States were also asked to review NCTQ's analysis of teacher preparation authority (See Figure 20).

Mississippi was helpful in providing NCTQ with additional information about policy changes related to teacher preparation. The state also noted that it has increased the passing score for both the Praxis I and pedagogy assessments, and that it is currently implementing an online data dashboard for posting performance and demographic data on teacher preparation programs.

In addition, Mississippi confirmed that the descriptions in Figure 20 accurately reflect state authority for teacher preparation and licensing.

#### COMING SOON

### NCTQ Teacher Prep Review

Preparing teachers to be effective and successful in the classroom requires both the strong state policy framework described in the *Yearbook* and quality implementation by states' teacher preparation programs.

How are **Mississippi's** programs doing? NCTQ will soon answer that question with our forthcoming review of the nation's higher education-based teacher preparation programs that produce 99 percent of traditionally-prepared teachers. The *Review* will find the programs that are doing the best job preparing tomorrow's educators, those that need to improve and those that need to be radically restructured.

The *Review* will be released in Spring 2013. Find out more at www.nctq.org/p/edschools.

For a sneak peek, see page 6.

# **Teacher Preparation Policy Checklist for States**

1.	Raise admission standards.	<ul> <li>Require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission into teacher preparation programs.</li> <li>Require preparation programs to use a common test normed to the general college-bound population.</li> </ul>
2.	Align teacher preparation with Common Core State Standards.	<ul> <li>Ensure that coursework and subject-matter testing for elementary teacher candidates are well aligned with standards.</li> <li>Ensure that teacher preparation programs prepare elementary teaching candidates in the science of reading instruction and require a rigorous assessment of reading instruction.</li> <li>Require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers.</li> </ul>
3.	Improve clinical preparation.	<ul> <li>Ensure that cooperating teachers have demonstrated evidence of effectiveness as measured by student learning.</li> <li>Require summative clinical experience for all prospective teachers that includes at least 10 weeks of full-time student teaching.</li> </ul>
4.	Raise licensing standards.	<ul> <li>Eliminate K-8 generalist licenses.</li> <li>Require subject-matter testing for middle school teacher candidates.</li> <li>Require subject-matter testing for secondary teacher candidates.</li> <li>Require middle school and secondary science and social studies teachers to pass a test of content knowledge that ensures sufficient knowledge of the subjects taught.</li> </ul>
5.	Don't lower the bar for special education teachers.	<ul> <li>Do away with K-12 special education teacher licenses.</li> <li>Require special education teachers to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.</li> </ul>
6.	Hold teacher preparation programs accountable.	<ul> <li>Collect data that connect student achievement gains to teacher preparation programs.</li> <li>Gather other meaningful data that reflect program performance.</li> <li>Establish the minimum standard of performance for each category of data.</li> <li>Produce and publish an annual report card for each teacher preparation program.</li> </ul>

# **Critical Issues for State Teacher Preparation Policy**

## **Critical Attention:** Admission into Teacher Preparation Programs

Mississippi does not ensure that teacher preparation programs admit candidates with strong academic records.

The demands of K-12 classrooms today require teachers with strong academic backgrounds who can positively affect student learning. To ensure that such strong candidates enter classrooms, it is important to set rigorous standards for entry into the teacher pipeline. This begins with teacher preparation program admissions.

Looking to international examples, such top-performing countries as Finland and South Korea admit prospective teacher candidates from the top 10 percent of the college-going population. While a bar that high is a long way from average standards in the United States, it seems reasonable and appropriate that states should limit access to teacher preparation programs to those who are in the top half of the college-going population in terms of academic achievement.

Most states limit their academic screening to basic skills tests, which generally assess only middle school-level skills and which are generally only normed to the prospective teacher population.

At present, Mississippi requires that approved undergraduate teacher preparation programs only accept teacher candidates who have passed a basic skills test (the Praxis I).

Although the state sets the minimum score for this test, it is normed just to the prospective teacher population. Mississippi allows candidates to substitute equivalent scores on the SAT or ACT for its basic skills testing requirement. In addition, the state's current 2.5 GPA requirement for admission to undergraduate programs is too low to be considered a rigorous bar for program admission.

#### NEXT STEPS FOR MISSISSIPPI:

#### Require that programs use a common admissions test normed to the general college-bound population.

Mississippi should require programs to use an assessment that demonstrates that candidates are academically competitive with all peers, regardless of their intended profession. Requiring a common test normed to the general college population would allow for the selection of applicants in the top half of their class while also facilitating program comparison.

#### Increase the GPA requirement.

Requiring only a 2.5 GPA sets a low bar for the academic performance of the state's prospective teachers. Mississippi should consider using a higher GPA requirement for program admission in combination with a test of academic proficiency. A sliding scale of GPA and test scores would allow flexibility for candidates in demonstrating academic ability. When using such multiple measures, a sliding scale that still ensures minimum standards would allow students to earn program admission through a higher GPA and a lower test score, or vice-versa.

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, MISSISSIPPI, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

#### Consider requiring candidates to pass subject-matter tests as a condition of admission into teacher programs.

In addition to ensuring that programs require a measure of academic performance for admission, Mississippi might also want to consider requiring content testing prior to program admission as opposed to at the point of program completion. Program candidates are likely to have completed coursework that covers related test content in the prerequisite classes required for program admission. Thus, it would be sensible to have candidates take content tests while this knowledge is fresh rather than wait two years to fulfill the requirement, and candidates lacking sufficient expertise would be able to remedy deficits prior to entering formal preparation.

### **SNEAK PEEK:** Teacher Prep Review

Are Mississippi's undergraduate teacher preparation programs in the Review sufficiently selective?

## **94%** are not sufficiently selective.

The *Review* will be released in Spring 2013. Find out more at www.nctq.org/p/edschools.

> 1. New Hampshire is in the process of adopting a requirement that will make the test a condition of admission.

# Critical Attention: Elementary Teacher Preparation

Mississippi does not ensure that new elementary teachers are ready to teach to the Common Core Standards.

To be effective, elementary teacher candidates need liberal arts coursework relevant to the K-6 classroom, and they should also be required to pass a rigorous content test that ensures appropriate subject-matter knowledge.

The Common Core State Standards, adopted by nearly all states including Mississippi, represent an effort to significantly raise expectations for the knowledge and skills American students will need for college readiness and global competitiveness. And Mississippi, like all states, must ensure that its teachers are prepared to teach to these high standards.

Although a "standards-based" approach grants greater flexibility to teacher preparation programs regarding program design, it is difficult to monitor or enforce absent a rigorous test. Further, alignment of preparation program instruction with student learning standards should be augmented with a broader and deeper content perspective than what will actually be taught in the elementary classroom.

Unfortunately, Mississippi's policies fail to ensure that elementary teacher candidates will have the subject-area knowledge necessary to teach to these standards. The state does not require a subject-matter test that reports subscores in all areas, and its coursework requirements lack the specificity to guarantee relevancy to the

elementary classroom. In addition, Mississippi does not ensure that teachers will be adequately prepared in the science of reading instruction, another key element of the Common Core State Standards.

#### NEXT STEPS FOR MISSISSIPPI:

Require elementary teacher candidates to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects.

Mississippi should ensure that its elementary content test is appropriately aligned with the Common Core State Standards and require separate, meaningful passing scores for each area on the test. Use of a composite passing score offers no assurance of adequate knowledge in each subject area. A candidate may achieve a passing score and still be seriously deficient in a particular subject area.

#### Require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers and require candidates to pass a rigorous math assessment.

Although national standards for teachers adopted by Mississippi require some knowledge in key areas of mathematics, the state should require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers. This includes specific coursework in foundations, algebra and geometry, with some statistics. Mississippi should also require a rigorous assessment that reports a separate subscore for and evaluates mathematics knowledge beyond an elementary school level and challenges candidates' understanding of underlying mathematics concepts.

Alaska, Arizona, Arkansas, Colorado, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, **MISSISSIPPI**, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

Alabama, California, Connecticut, Indiana, Minnesota, New Hampshire

Massachusetts

#### Require teacher candidates to pass a rigorous assessment in the science of reading instruction.

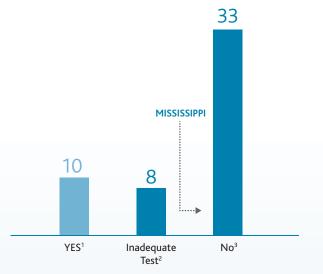

Mississippi should require a rigorous reading assessment to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading, and if it is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically.

#### Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.

Mississippi should either articulate a more specific set of standards or establish more comprehensive coursework requirements for elementary teacher candidates that align with the Common Core Standards to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 36 credit hours in the core subject areas of English, science, social studies and fine arts. Mississippi's current coursework requirements are sensible indicators of important curricular areas, but there is no guarantee that the courses used to meet these requirements will be relevant to the PK-6 classroom.

#### Figure 3

Do states measure new teachers' knowledge of the science of reading?

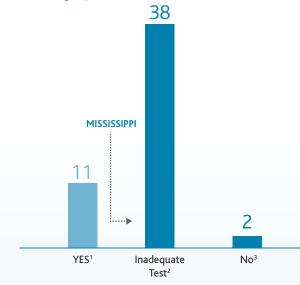

- Strong Practice: Alabama<sup>4</sup>, Connecticut, Massachusetts, Minnesota<sup>5</sup>, New Hampshire, New Mexico<sup>6</sup>, Oklahoma, Tennessee, Virginia, Wisconsin
- 2. California, Florida, Georgia, Idaho, New York, Oregon, Pennsylvania, Texas
- 3. Alaska, Arizona, Arkansas, Colorado, Delaware, District of Columbia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, New Jersey, North Carolina<sup>7</sup>, North Dakota, Ohio, Rhode Island, South Carolina, South Dakota, Utah, Vermont, Washington, West Virginia, Wyoming
- 4. Alabama's reading test spans the K-12 spectrum.
- 5. Based on the limited information available about the test on Minnesota's website.
- 6. Test is under development and not yet available for review.
- 7. North Carolina has adopted a task force recommendation to require the Foundations of Reading test. Rules have yet to be promulgated, including whether the test will be required for initial licensure. Current rules require such tests for professional licensure only.

Do states ensure that elementary teachers know core content?

Do states measure new elementary teachers' knowledge of math?

- 1. Strong Practice: Alabama, Connecticut, Indiana, Kentucky, Massachusetts, Minnesota, New Hampshire, New Jersey, Rhode Island, Utah, Vermont
- 2. Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Louisiana, Maine, Maryland, Michigan, Mississippi, Missouri, Nevada, New Mexico, New York<sup>4</sup>, North Carolina<sup>5</sup>, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, Washington, West Virginia, Wisconsin, Wyoming
- 3. Montana, Nebraska
- 4. New York is in the process of developing a stand-alone math test.
- 5. North Carolina has adopted a task force recommendation to require the Massachusetts Test of General Curriculum, including the math subtest. Rules have yet to be promulgated, including whether the test will be required for initial licensure. Current rules require such tests for professional licensure only.
  - 1. Testing is not required for initial licensure.
  - The required test is a questionable assessment of content knowledge, instead emphasizing methods and instructional strategies.
  - Massachusetts requires a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math (see Figure 4).
  - 4. North Carolina has adopted a task force recommendation to require the Massachusetts Test of General Curriculum. Rules have yet to be promulgated, including whether the test will be required for initial licensure. Current rules require such tests for professional licensure only.
  - 5. Oregon allows "alternative assessment" for candidates who fail twice.

10 : NCTQ STATE TEACHER POLICY YEARBOOK 2012 MISSISSIPPI Subject mentioned

★ Subject covered in depth

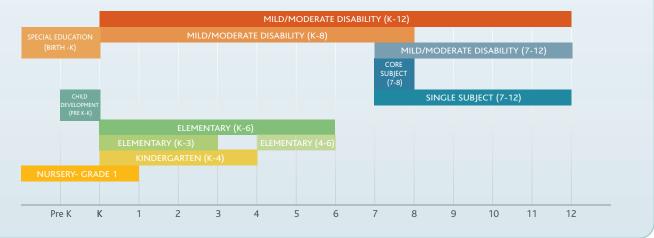

### Figure 7 Where do states set the passing score on elementary content licensure tests<sup>1</sup>?

1 Based on the most recent technical data that could be obtained; data not available for Arizona, California, Florida, Georgia, Illinois, Michigan, Minnesota, Nevada, New Mexico, New York, North Carolina, Oregon and Washington. Montana and Nebraska do not require a content test. Colorado score is for Praxis II, not PLACE. Alabama, Connecticut, Indiana, Kentucky, New Hampshire, New Jersey, Rhode Island, Utah and Vermont now require the Multiple Subjects test and Maryland, Nevada and South Carolina now require the Instructional Practice and Applications test. Both are new Praxis tests for which technical data are not yet available; analysis is based on previously required test.

#### Figure 8

#### Teacher licensing structure in Mississippi

# Critical Attention: Middle School Teacher Preparation

Mississippi is on track to ensure that new middle school teachers will be prepared to teach appropriate grade-level content.

The middle school years are critical to students' education, yet the preparation and licensure requirements for middle school teachers often do not ensure that they are sufficiently prepared to teach grade-level content.

Too many states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Whether teaching a single subject in a departmentalized setting or teaching multiple subjects in a self-contained classroom, middle school teachers must be able to teach significantly more advanced content than what elementary teachers are expected to teach.

Commendably, Mississippi does not offer a K-8 generalist license, and middle school candidates must complete two 21-hour content concentrations in academic coursework. Further, all new middle school teachers are required to pass a Praxis II single-subject content test to attain licensure.

- 2. For K-8 license, Idaho also requires a singlesubject test.
- 3. Illinois has repealed its K-9 license. The state is in the process of revising its middle school certification requirements.
- 4. It is unclear how new legislation will affect testing requirements for middle school candidates.
- 5. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary education grades.
- 6. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass new assessment with three subtests.
- 7. Candidates opting for middle-level endorsement may either complete a major or pass a content test. Oregon allows "alternative assessment" for candidates who fail twice.

# Critical Attention: Secondary Teacher Preparation

 Mississippi could do more to ensure that new secondary teachers will be prepared to teach appropriate grade-level content.

Secondary teachers must be experts in the subject matter they teach, and only a rigorous test ensures that teacher candidates are sufficiently and appropriately knowledgeable in their content area. Coursework is generally only indicative of background in a subject area; even a major offers no certainty of what content has been covered.

Yet not all states ensure that secondary teachers have sufficient content knowledge in the subjects they are licensed to teach. And nearly all states—even those that do generally require content testing for secondary teachers—allow some science and/or social studies teachers to teach with broad licenses that have significant loopholes.

Most high school science courses are specialized, and the teachers of these subjects are not interchangeable. Nonetheless, most states allow teachers to obtain general science or combination licenses across multiple science disciplines, and, in most cases, these teachers need only pass a general knowledge science exam that does not ensure subject-specific content knowledge. This means that a teacher with a background in biology could be fully certified to teach advanced chemistry or Alaska, Arizona, California, Colorado, Iowa, Montana, Nebraska, New Hampshire, North Carolina, Oregon, Washington, Wyoming

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, **MISSISSIPPI**, Missouri, Nevada, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, West Virginia, Wisconsin

Indiana, Minnesota, Tennessee

physics having passed only a general science test—and perhaps answering most of the chemistry or physics questions incorrectly.

Just as with broad field science, most states offer a general social studies license at the secondary level. For this certification, teachers can have a background in a wide variety of fields, ranging from history and political science to anthropology and psychology. Under such a license a teacher who majored in psychology could teach history to high school students having passed only a general knowledge test and answering most—and perhaps all—history questions incorrectly.

Commendably, Mississippi requires that its secondary teacher candidates pass a Praxis II content test to teach any core secondary subjects. However, Mississippi offers a supplemental endorsement in general science, which can be added to a certificate with 21 hours of coursework in the subject; a content test is not required. The state also offers an endorsement in physical science, which combines physics and chemistry. Further, Mississippi only offers a secondary general social studies certificate. Teachers with these licenses are not required to pass individual content tests for each discipline they are permitted to teach. The state also offers general social studies to be added as a supplemental endorsement either with a passing score on the Praxis II content test or with 21 hours of coursework.

#### NEXT STEPS FOR MISSISSIPPI:

#### Require secondary science teachers to pass a content test for each discipline they are licensed to teach.

By allowing a general science certification and not requiring a content test for each area-Mississippi is not ensuring that these secondary teachers possess adequate subjectspecific content knowledge. Even though general science is a supplemental endorsement, Mississippi is effectively allowing candidates with minimal coursework in a particular area of science—and no testing requirement—to teach virtually any science subject at the secondary level. In addition, Mississippi's required assessment for its physical science license combines subject areas without reporting individual subscores.

#### Require secondary social studies teachers to pass a content test for each discipline they are licensed to teach.

By allowing a general social studies certification-and not requiring a content test for each area-Mississippi is not ensuring that its secondary teachers possess adequate subject-specific content knowledge. The state's required assessment combines all subject areas (e.g., history, geography, economics) and does not report separate scores for each subject area.

1. It is unclear at this point how new legislation will affect content test requirements for secondary teachers.

# Critical Attention: Special Education Teacher Preparation

Mississippi does not ensure that new special education teachers will know the subject matter that they will be required to teach.

Across the country, states are raising performance expectations to ensure that students who graduate from high school are college and career ready. These more rigorous standards apply to special education students just as they do to other students.

The challenge of ensuring that teachers are prepared to teach to the new Common Core State Standards is even more pronounced for special education teachers, who typically have had to meet an even lower bar for content preparation than general educators. And certification rules for special education teachers that do not differentiate between teaching at the elementary and secondary levels only exacerbate the problem.

Allowing a generic K-12 special education certification makes it virtually impossible and certainly impractical for states to ensure that these teachers know all the subject matter they are expected to teach; this issue is just as valid in terms of pedagogical knowledge Alaska, Arizona, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, **MISSISSIPPI**, Missouri, Montana, Nebraska, New Hampshire, New Mexico, Nevada, North Carolina, North Dakota, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Utah, Virginia, Washington, Wyoming

Alabama, Arkansas, Iowa, Louisiana, Maine, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Texas, Vermont, West Virginia, Wisconsin

0

While a K-12 special education license may be appropriate for low-incidence spe-

cial education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students who are expected to learn grade-level content.

Regrettably, Mississippi offers a generic K-12 special education certification, in addition to a K-8 special education endorsement that can be added to an elementary license. However, as noted in the elementary section, requirements for elementary licensure do not ensure teachers are prepared to teach to the Common Core State Standards.

#### **NEXT STEPS FOR MISSISSIPPI:**

Eliminate licenses for special education that do not differentiate between the preparation of elementary teachers and that of secondary teachers.

Mississippi's current model does little to protect some of its most vulnerable students. Failure to ensure that special education teachers are well trained in specific content areas deprives these students of the opportunity to reach their academic potential. Mississippi should limit high-incidence special education certifications to elementary or secondary grades.

Provide a broad liberal arts program of study to elementary special education candidates and require that they pass the same content test as general education teachers.

Mississippi should ensure that special education teacher candidates who will teach elementary grades possess knowledge of the subject matter at hand. Not only should the state require core-

subject coursework relevant to the elementary classroom, but it should also require that these candidates pass the same subject-matter test required of all elementary teachers. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

#### Ensure that secondary special education teachers possess adequate content knowledge.

Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Mississippi's current policy of requiring no subject-matter testing is unacceptable and will not help special education students to meet rigorous learning standards. To provide a middle ground, Mississippi should consider a customized HOUSSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

> 1. Although the state does issue a K-12 certificate, candidates must meet discrete elementary and/or secondary requirements.

Which states require subject-matter testing for special education teachers?

Elementary Subject-Matter Test				
Required for an elementary special education license	Alabama, Arkansas, Iowa, Kansas, Louisiana, Massachusetts, MISSISSIPPI, New Jersey, New York, Oregon <sup>1</sup> , Pennsylvania <sup>2</sup> , Rhode Island, Texas, West Virginia <sup>3</sup> , Wisconsin			
Required for a K-12 special education license	Colorado, Idaho			
Secondary Subject-Matter Test(s)				
Tests in all core subjects required for secondary special education license	None			
Test in at least one subject required for secondary special education license	Arkansas, Kansas, Louisiana, New Jersey, New York⁴, Oregon¹, Pennsylvania², Rhode Island, West Virginia³			
Required for a K-12 special education license	None			

1. Although Oregon requires testing, the state allows an "alternative assessment" option for candidates who fail twice.

2. In Pennsylvania, a candidate who opts for dual certification in elementary or secondary special education and as a reading specialist does not have to take a content test.

3. West Virginia also allows elementary special education candidates to earn dual certification in early childhood, which would not require a content test. Secondary special education candidates earning dual certification as a reading specialist are similarly exempted from the content test.

4. New York requires a multi-subject content test specifically geared to secondary special education candidates. It is divided into three subtests.

# Critical Attention: Student Teaching

 Mississippi does not ensure that teacher preparation programs will provide teacher candidates with a highquality summative clinical experience.

The importance of clinical practice in teacher preparation has become a major area of focus. Student teaching is the final clinical experience of teacher preparation, and teacher candidates have only one chance to experience the best possible placement. Student teaching will shape candidates' own performance as teachers and help determine the type of school in which they will choose to teach. A mediocre student teaching experience, let alone a disastrous one, can never be undone.

Central to the quality of the student teaching experience is the classroom teacher who serves as the teacher candidate's mentor, or cooperating teacher. Only strong teachers with evidence of their effectiveness, as assessed by objective measures of student learning and the teachers' principals, should be able to serve as cooperating teachers. Yet placement is much more likely to be the luck of the draw. NCTQ's study *Student Teaching in the United States* found that three out of four teacher preparation programs fail to require that cooperating teachers must be effective instructors.

Mississippi commendably requires candidates to complete at least 12 weeks of full-day student teaching. However, the state fails to articulate any requirements for cooperating teachers.

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, MISSISSIPPI, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

48

3

```
Florida, Indiana, Tennessee
```

#### NEXT STEPS FOR MISSISSIPPI:

Ensure that cooperating teachers have demonstrated evidence of effectiveness as measured by student learning.

In addition to the ability to mentor an adult, cooperating teachers in Mississippi should also be carefully screened for their capacity to further student achievement. Research indicates that the only aspect of a student teaching arrangement that has been shown to have an impact on student achievement is the positive effect of selection of the cooperating teacher by the preparation program, rather than by the student teacher or school district staff.

# Critical Attention: Teacher Preparation Program Accountability

Mississippi does not hold its teacher preparation programs accountable for the effectiveness of the teachers they produce.

Teacher preparation programs operate by virtue of state approval. As such, it is up to states to connect that approval to accountability measures that ensure that all approved programs meet minimum performance standards. Such an accountability system informs the public—including prospective teachers seeking a program as well as districts hiring graduates—by shining a light on high performers as well as identifying those programs performing poorly.

Further, as more states begin to raise expectations for teachers by way of evaluations focused on effectiveness, there is an even greater need to hold teacher preparation programs accountable for the effectiveness of the teachers they produce. Although the quality of both the subject-matter preparation and professional sequence is crucial, there are also additional measures that can provide the state and the public with meaningful, readily understandable indicators of how well programs are doing when it comes to preparing teachers to be successful in the classroom. Alaska, Arizona, Arkansas, California, Connecticut, Delaware, District of Columbia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, **MISSISSIPPI**, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

Alabama, Colorado, Georgia, Kentucky, Michigan, Nevada, North Carolina, Ohio, Rhode Island, South Carolina, Tennessee, Texas

Florida, Louisiana

Although it does not connect student achievement gains to teacher preparation programs, Mississippi does collect some program-specific, objective data that reflect program performance, including job-satisfaction surveys rating the job performance of all first-year teachers. But the state has not established minimum performance standards for the data it collects that can be used for accountability purposes, and these data are not collected for alternate route programs. Further, Mississippi does not provide the public with meaningful, readily understandable indicators of how well programs are doing.

#### NEXT STEPS FOR MISSISSIPPI:

#### Collect data that connect student achievement gains to teacher preparation programs.

As one way to measure whether programs are producing effective classroom teachers, Mississippi should consider the academic achievement gains of students taught by programs' graduates, averaged over the first three years of teaching. Data that are aggregated to the institution (e.g., combining elementary and secondary programs) rather than disaggregated to the specific preparation program are not useful for accountability purposes. Such aggregation can mask significant differences in performance among programs.

#### Collect other meaningful, program-level data that reflect program performance.

Although measures of student growth are an important indicator of program effectiveness, they cannot be the sole measure of program quality for several reasons, including the fact that many programs may have graduates whose students do not take standardized tests. The accountability system must therefore include other objective measures that show how well programs are preparing teachers for the classroom. Mississippi should expand its requirements to its alternate routes and also include such measures as:

- Evaluation results from the first and/or second year of teaching;
- Five-year retention rates of graduates in the teaching profession;
- Average raw scores of teacher candidates on licensing tests, including academic proficiency, subject matter and professional knowledge tests; and
- Number of times, on average, it takes teacher candidates to pass licensing tests.

#### Establish minimum standards of performance.

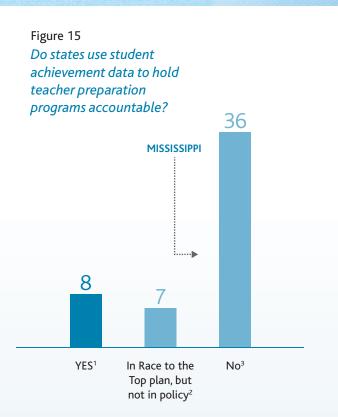

Merely collecting the types of data described above is insufficient for accountability purposes. The next and perhaps more critical step is for the state to establish precise minimum standards for teacher preparation program performance for each category of data. Mississippi should be mindful of setting rigorous standards for program performance, as its current requirement that 80 percent of program graduates must pass the state's licensing tests is too low a bar. Programs should be held accountable for meeting rigorous standards, and there should be consequences for failing to do so, including loss of program approval.

# Publish an annual report card on the state's website.

Mississippi should produce an annual report card that shows all the data the state collects on individual teacher preparation programs, which should be published on the state's website at the program level for the sake of public transparency. Data should be presented in a manner that clearly conveys whether programs have met performance standards.

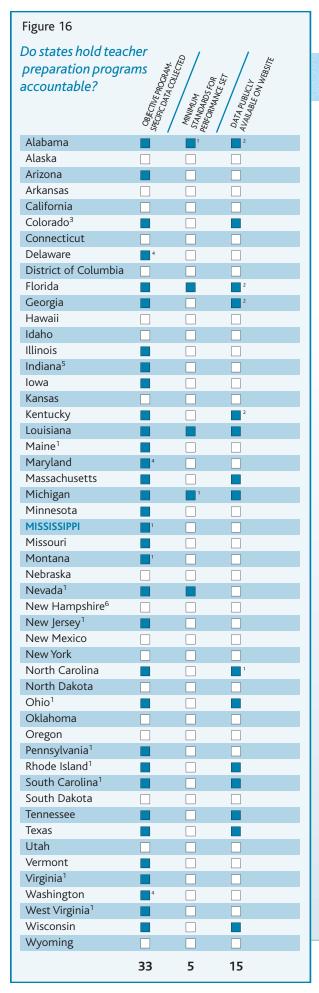

#### Maintain full authority over teacher preparation program approval.

Mississippi has blurred the line between the public process of state program approval and the private process of national accreditation. In fact, it is permissible to substitute NCATE accreditation for state program approval. Mississippi should ensure that it is the state that considers the evidence of program performance and makes the decision about whether programs should continue to be authorized to prepare teachers.

1. Strong Practice: Colorado, Florida, Georgia, Louisiana, North Carolina, Ohio, Tennessee, Texas

- 2. Delaware, District of Columbia, Hawaii, Maryland, Massachusetts, New York, Rhode Island
- 3. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

#### **TEACHER PRODUCTION IN MISSISSIPPI**

States have long established requirements for teacher preparation and licensure and have lately turned their attention toward accountability systems for preparation programs. But one topic that has received little attention from states is the issue of teacher production. From the number of teachers who graduate from preparation programs each year, only a subset are certified and only some of those certified are actually hired in the state; the relationship between these numbers has important implications for related policymaking.

States are rightly focused on areas of chronic teacher shortages, such as secondary mathematics and science, but little consideration is given to areas of consistent oversupply, particularly the overproduction in most states of elementary teachers. While it is certainly desirable to produce a big enough pool to give districts choice in hiring, the substantial oversupply in some teaching areas is not good for the profession. Limited resources are squandered on individuals who will not go on to teach, most critically the scarce supply of student teaching placements with effective cooperating teachers. Admissions criteria, licensure requirements and program accountability standards may be unnecessarily depressed if the dots are not connected from graduation to certification to actual employment in a district.

Maryland's "Teacher Staffing Report" provides a model for other states. Published biennially, the report has been tracking staffing trends in the state for almost three decades. While its primary purpose is to determine teacher shortage areas, it also identifies areas of surplus. By collecting hiring data from districts, Maryland has a rich set of data that can inform policy decisions.

The latest edition of the "Teacher Staffing Report" can be found at: http://www.marylandpublicschools.org/MSDE/ divisions/certification/progapproval/mtsr.

**Mississippi teacher production data:** NCTQ was unable to find any published data on teacher production in Mississippi that connects program completion, certification and hiring statistics.

- 1. Traditional preparation only.
- 2. Reported institutional data do not distinguish between candidates in the traditional and alternate route programs.
- 3. Required, but not yet available.
- 4. Alternate routes only.
- 5. Based on new REPA II regulations.
- 6. New Hampshire is in the process of adopting new reporting requirements.

There are some areas where a small adjustment would result in significantly stronger policy. Here are some issues that represent low-hanging fruit, policies that can be addressed in relatively short order.

To ensure adequate subject-area knowledge, Mississippi should require secondary teachers who obtain certification in general science/ combination science or general social studies to pass individual content tests (or a composite test that reports individual subscores) for each discipline they will be licensed to teach, as noted in the secondary critical attention section.

1. National accreditation can be substituted for state approval.

# **Alternate Routes to Certification**

The policies discussed in the "Critical Attention" section of this report primarily focus on traditional teacher preparation programs because such programs presently train the vast majority of new teachers. Of course, there are some teachers that attain licensure outside of these traditional programs. Alternate routes to certification were developed based on the idea that there should be pathways into the teaching profession for nontraditional candidates who are able to demonstrate strong subject-area knowledge and an above-average academic background.

Unfortunately, most states have considerable work to do to make their alternate routes viable pathways into the teaching profession. Considerable variation remains in both the quality of states' routes and how much of an alternative to traditional preparation such routes actually provide.

A high-quality, genuinely alternative licensure pathway should be rigorous yet flexible in admissions, focused and deliberate in preparation, and open to broad usage across subjects and grades.

State policy for alternate routes to teacher licensure should ensure that:

- Strong academic performance and subject-matter-knowledge testing are prerequisites for program admission.
- Subject-area majors are not required or candidates have the option to test out of any subject-area coursework requirements.
- Coursework is streamlined and not overly burdensome, and it meets the immediate needs of new teachers.
- Program length is reasonable (no more than two years). Practice teaching and/or intensive mentoring is required.
- Limits are not placed on the subjects and/or grades an alternate route teacher can teach, and alternate route providers are not restricted to colleges and universities; districts and nonprofits should be permitted to offer programs as well.

Mississippi has four alternate routes: Alternate Path to Quality Teachers, Master in Arts of Teaching, Teach Mississippi Institute and the American Board Certification for Teacher Excellence (ABCTE). While the state verifies subject-matter knowledge for all alternate route candidates, the routes would be significantly improved if Mississippi raised admissions requirements, provided stronger supports in the form of practice teaching or intensive mentoring and removed restrictions on the use of its routes (see Figure 19).

#### **NEXT STEPS FOR MISSISSIPPI:**

#### Increase academic requirements for admission into the state's alternate routes.

A minimum GPA requirement is a first step toward ensuring that candidates are of good academic standing. But only the Mississippi Alternate Path to Quality Teachers has such a requirement, and the standard 2.5 GPA overall or 2.75 in the candidate's major is too low. The state should set a standard for all routes, and it should be higher than what is required of traditional teacher candidates, such as a GPA of at least 2.75. Alternatively, the state could require one of the standardized tests of academic proficiency commonly used in higher education for graduate admissions, such as the GRE. Also, while it

is not unreasonable to allow accommodation for career changers who are further removed from their college preparation, Mississippi's standard of a 2.0 GPA for candidates who graduated more than seven years prior to admission sets a low bar indeed.

In addition, Mississippi's requirement that alternate route candidates pass a basic skills test is impractical and ineffective. Basic skills tests measure minimum competency—essentially those skills that a person should have acquired in middle school—and are inappropriate for candidates who have already earned a bachelor's degree.

#### Ensure that preparation provides supports for the immediate needs of new teachers.

Although Mississippi offers alternate routes with streamlined preparation, it could do more to meet the immediate needs of new teachers by strengthening the induction experience for new teachers. None of the routes provides a practice-teaching opportunity but all require a one-year internship period that includes mentoring. Mississippi should provide guidelines to help ensure that the induction program is structured for new teacher success. Effective strategies include requiring practice teaching prior to teaching in the classroom, intensive mentoring with full classroom support in the first few weeks or months of school, a reduced teaching load and release time to allow new teachers to observe experienced teachers during the school day.

#### Eliminate restrictions on alternate route usage and providers.

Mississippi unnecessarily limits the usage of its alternate routes. No route can be used for elementary K-3 certification. The Mississippi Alternate Path to Quality Teachers and Teach Mississippi candidates may only teach in certain subjects for grades 7-12. Master of Arts in Teaching candidates may only teach in certain subjects for grades 4-8. Alternate routes can help expand the teacher pipeline throughout the state, and subject and grade-level limits are counterproductive to this goal.

Although Mississippi is host to a diversity of providers, all programs operate in partnership with a university or college. Further, the specific requirements for the state's alternate routes are articulated in terms of credit hours, effectively precluding nonhigher education providers. Mississippi should remove these restrictions and specifically authorize alternate route programs run by local school districts and nonprofits, as well as institutions of higher education.

# Alternate Route Policy Checklist for States

1.	Set high standards and provide flexibility for meeting them.	<ul> <li>Screen candidates based on academic ability.</li> <li>Set a higher standard for entry than is set for traditional teacher preparation.</li> <li>Require candidates to pass the state's subject-matter licensing test.</li> <li>Don't require a major in the intended subject area; instead, allow candidates to demonstrate subject-matter knowledge on a rigorous test.</li> </ul>
2.	Provide streamlined preparation.	<ul> <li>Limit coursework (ideally to no more than 12 credits a year).</li> <li>Require that the alternate route is an accelerated course of study.</li> <li>Ensure that all coursework requirements target the immediate needs of the new teacher</li> <li>Offer candidates an opportunity to practice teach in a summer training program.</li> <li>Provide intensive mentoring.</li> </ul>
3.	Remove regulatory obstacles.	<ul> <li>Allow for a diversity of alternate route providers.</li> <li>Don't limit the use of alternate routes to shortage areas or to certain grades or subjects.</li> </ul>
