# Kansas

Are New Teachers Being Prepared for College- and Career-Readiness Standards?

#### Acknowledgments

#### **STATES**

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Although this year's edition did not require the extensive review that comprehensive editions require, we still wanted to make sure that we captured all relevant policy changes and that states' perspectives were represented. Every state formally received a draft of the policy updates we identified in June 2014 as well as a draft of analyses and recommendations for the new indicators related to college- and career-readiness standards for comment and correction. States also received a final draft of their reports a month prior to release. All but two states responded to our inquiries. While states do not always agree with our recommendations, their willingness to engage in dialogue, explain their differing points of view and often acknowledge the imperfections of their teacher policies are important steps in moving forward.

#### **FUNDERS**

The primary funders for the 2014 Yearbook were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- Gleason Family Foundation
- J.A. and Kathryn Albertson Foundation
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

#### **STAFF**

Sandi Jacobs, *Project Director*Kathryn M. Doherty, *Special Contributor*Kelli Lakis, *Lead Researcher*Phil Lasser and Lisa N. Staresina, *Researchers* 

Special thanks to Leigh Zimnisky and Justin Rakowski at Ironmark for their design of the 2014 *Yearbook*. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original *Yearbook* design and ongoing technical support.

### Teacher Preparation Policy Priorities for Kansas

## Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of
  informational texts as well as incorporate complex informational texts into classroom instruction.
   Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

  \*Priority for elementary, middle, secondary and special education teacher preparation.\*
- Ensure teachers are prepared to intervene and support students who are struggling with reading. Priority for elementary, middle, secondary and special education teacher preparation.

#### Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass
  a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires
  a meaningful passing score for each area.
- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

#### Additional priorities for secondary teacher preparation:

• Require secondary social studies teachers to pass a content test for each discipline they are licensed to teach.

#### Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate, and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

#### Raise admission requirements:

Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

#### Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.
- Publicly report performance data.

### Teacher Preparation in Kansas

The 2014 State Teacher Policy Yearbook keeps the spotlight on the critical issue of teacher preparation. In addition to updating the full set of teacher preparation policies reviewed in last year's comprehensive edition, the 2014 Yearbook casts a critical eye on whether states have established requirements for teacher preparation and licensure that help to ensure that teachers are ready for the increased demands of states' college- and career-readiness standards for K-12 students.

### 2014 Teacher Prep Policy Update for Kansas

Based on a review of state legislation, rules and regulations, NCTQ has identified the following recent teacher prep policy changes in Kansas:

#### Teacher Licensure

Kansas now requires teacher candidates to pass a test of academic proficiency, but only at the point of licensure and not as a condition of admission to teacher preparation programs.

http://www.ksde.org/Agency/DivisionofLearningServices/TeacherLicensureandAccreditation/Licensure

#### Elementary Teacher Preparation

Elementary teachers in Kansas are required to pass the revised Praxis II test Elementary Education: Curriculum, Instruction and Assessment (5017). Early childhood education teachers must pass the revised Education of Young Children (5024) test.

Praxis Test Requirements http://www.ets.org/praxis

### Kansas Response to Policy Update

States were asked to review NCTQ's identified updates and also to comment on policy changes related to teacher preparation that have occurred in the last year, pending changes, or teacher preparation in the state more generally.

Kansas noted that institutions of higher education have the responsibility to set entrance requirements for teacher preparation. The state also indicated that it is in the process of revising all teacher preparation program standards. More detail can be found in the state responses to NCTQ's analysis throughout this report.

## **Elementary Teacher Preparation**

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- 1. The state should ensure that all elementary teachers are sufficiently prepared for the ways that college- and career-readiness standards affect instruction of all subject areas. Specifically,
  - A. The state should require that all new elementary teachers are prepared to incorporate complex texts and academic language into instruction.
  - B. The state should ensure that all new elementary teachers are prepared to incorporate literacy skills as an integral part of every subject.
  - C. The state should ensure that all new elementary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new elementary teachers, including those who can teach elementary grades on an early childhood license, pass a rigorous test of reading instruction in order to attain licensure.
- 3. The state should ensure that all elementary teacher candidates, including those who can teach elementary grades on an early childhood license, possess sufficient content knowledge in all core subjects, including mathematics.
- 4. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 45 credit hours to ensure appropriate depth in the core subject areas of English, mathematics, science, social studies and fine arts.
- 5. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement ensures that prospective teachers have taken higher-level academic coursework.

### Elementary Teacher Prep Analysis: Kansas

#### PREPARING ELEMENTARY TEACHERS FOR COLLEGE- AND **CAREER-READINESS STANDARDS**

The new demands of college- and career-readiness standards for students heighten the need for elementary teachers to have a strong content background in all of the subject matter taught in the elementary grades. Kansas, like most states, has adopted such standards and must ensure that its preparation and licensure requirements for new teachers address this need.

Currently, Kansas offers an elementary license to teach grades K-6. The state offers two early childhood education licenses: birth to K and birth to grade 3. Both are under the early childhood unified title. Key licensing requirements for elementary school teachers in Kansas include:

#### **KANSAS** ELEMENTARY TEACHER PREP SNAPSHOT

State requires passing a content test in each of the four core subjects.

State requires adequate test on the science of reading.

State requires academic content specialization.

State has adequate/appropriate requirements for teachers who teach elementary grades on an early childhood license.

Yes

In addition to the strong content background called for by collegeand career-readiness standards, teacher candidates must also be prepared for the key instructional shifts that differentiate these standards from their predecessors. Elementary teachers in Kansas are required to pass the regenerated Praxis II test Elementary Education: Curriculum, Instruction and Assessment (5017), which now incorporates some of the instructional shifts in the use of text associated with the state's college- and career-readiness standards for students.

Early childhood education teachers in Kansas are required to pass the regenerated Education of Young Children (5024) test, which now incorporates some of the instructional shifts in the use of text associated with these standards.

The state's certification assessments only vaguely address incorporating literacy into all academic subjects. The elementary test requires that a teacher "knows how to make connections within reading and language arts topics, across other disciplines, and in real-world contexts." The early childhood assessment requires that

#### **RECOMMENDATIONS**

Ensure that elementary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Kansas's testing frameworks now address informational texts, the state is encouraged to strengthen its teacher preparation requirements and ensure that all candidates who teach the elementary grades have the ability to adequately incorporate complex informational text into classroom instruction.

Incorporate literacy skills as an integral part of every subject.

To ensure that elementary students are capable of accessing varied information about the world around them, Kansas should also—either through testing frameworks or teacher standards—more specifically include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

#### Support struggling readers.

Kansas should articulate specific requirements ensuring that elementary teachers are prepared to intervene and support students who are struggling. The early elementary grades are an especially important time to address reading deficiencies before students fall behind.

Require all elementary teacher candidates—including candidates for an early childhood license—to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects, including mathematics.

Kansas should ensure that its elementary content test is fully aligned with its college- and career-readiness standards. The state should require separate, meaningful passing scores for each core subject covered on the test, including reading/lana teacher "knows strategies to integrate literacy into the content areas (e.g., mathematics, social studies, science, and the arts)."

Kansas's elementary content test also only vaguely addresses struggling readers by requiring that a teacher "knows how to design and use formative assessments to adjust instruction." Its early childhood test also only indirectly addresses the topic by requiring that a teacher "knows programs to support children with diverse needs."

#### **Supporting Research**

Praxis Test Requirement

www.ets.org

Regulations and Standards for Kansas Educators http://www.ksde.org/Agency/DivisionofLearningServices/Teacher LicensureandAccreditation/Licensure/LicensureRegulations andStandards.aspx

#### KANSAS RESPONSE TO ANALYSIS

Kansas was helpful in providing NCTQ with facts that enhanced this analysis. The state added that it is in the process of revising all teacher preparation program standards. A first-phase group of draft standards is in a comment/feedback step, and upon completion the standards will be presented to the state board for approval prior to release. Work groups are in process on a second-phase group, and members are being recruited for the final group. Kansas noted that new program standards will align with its college- and career-readiness standards and will include literacy skills and requirements for addressing diversity among students, including struggling readers.

#### **RECOMMENDATIONS CONTINUED**

guage arts, math, science and social studies. A candidate may achieve a passing score and still be seriously deficient in a particular subject area. Mathematics content in particular should be assessed with a rigorous assessment tool, such as the test required in Massachusetts, that evaluates mathematics knowledge beyond an elementary school level and challenges candidates' understanding of underlying mathematics concepts.

In addition, Kansas is urged to require all early childhood education teacher candidates who teach elementary grades to pass an appropriate test, either the same test as required of other elementary teachers or a comparably rigorous one geared to early childhood content. It is especially worrisome that the state allows teachers up through grade 3 to teach without ever having passed a content test.

Require all teacher candidates who teach elementary grades to pass a rigorous assessment in the science of reading instruction.

Kansas should require a rigorous reading assessment tool to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum knowledge in this area should not be eligible for licensure. Kansas should also require all early childhood education teacher candidates who teach elementary grades to pass a rigorous assessment to ensure that they are adequately prepared in the science of reading instruction before entering the classroom.

#### **RECOMMENDATIONS CONTINUED**

 Require elementary teacher candidates to complete a content specialization in an academic subject area.

In addition to enhancing content knowledge, this requirement would ensure that prospective teachers in Kansas take higher-level academic coursework. The requirement also provides an important safeguard in the event that candidates are unable to successfully complete clinical practice requirements. With an academic concentration (or better still a major or minor), candidates who are not ready for the classroom and do not pass student teaching can still be on track to complete a degree

Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.

Kansas should either articulate a more specific set of standards or establish comprehensive coursework requirements for elementary teacher candidates that align with college- and career-readiness standards to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 45 credit hours in the core subject areas of English, mathematics, science, social studies and fine arts.

#### **EXAMPLES OF BEST PRACTICE**

Both Arkansas and California ensure that elementary teachers are prepared to meet the instructional requirements of collegeand career-readiness standards for students. These states specify that elementary teacher candidates must have the ability to not only build content knowledge and vocabulary through careful reading of informational and literary texts, but also to challenge students with texts of increasing complexity.

Candidates are also required to incorporate literacy skills as an integral part of every subject and are prepared to intervene and support students who are struggling.

In addition, Indiana ensures that all candidates licensed to teach the elementary grades, including early childhood education candidates, possess the requisite knowledge of core content and of the key elements of scientifically based reading instruction before entering the classroom. Elementary and early childhood teacher candidates are required to pass a content test comprised of four independently scored subtests, including mathematics. In addition, these candidates are required to pass a comprehensive assessment that tests the five elements of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Elementary teacher candidates in Indiana must also earn either a major or minor in an academic content area.

Massachusetts's MTEL mathematics subtest continues to set the standard in this area by evaluating mathematics knowledge beyond an elementary school level and challenging candidates' understanding of underlying mathematics concepts.

<sup>1.</sup> Alaska does not require testing for initial licensure.

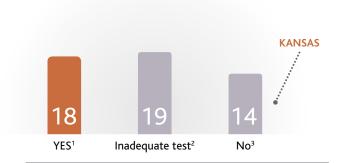

<sup>2.</sup> Massachusetts and North Carolina require a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math.

<sup>3.</sup> Only teachers of grades 4 and 5 are required to pass a content test in Ohio.

Figure 4

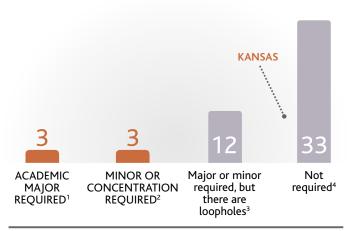

Do states measure new elementary teachers' knowledge of the science of reading?

- Strong Practice: Alabama, California<sup>4</sup>, Connecticut, Florida, Indiana, Massachusetts, Minnesota, Mississippi, New Hampshire, New Mexico, New York, North Carolina<sup>5</sup>, Ohio, Oklahoma, Tennessee, Virginia, West Virginia, Wisconsin
- Arizona, Arkansas, Delaware, District of Columbia, Georgia, Idaho, Kentucky, Maine, Missouri, New Jersey, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont, Washington, Wyoming
- 3. Alaska, Colorado, Hawaii, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Montana, Nebraska, Nevada, North Dakota, South Dakota
- California allows an exemption from the state's reading test for teachers who already have a single subject credential.
- 5. Teachers have until their second year to pass the reading test.

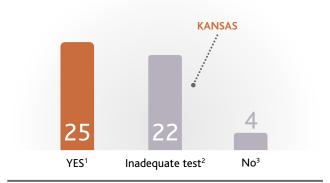

Figure 6

Do states expect elementary teachers to complete an academic concentration?

- 1. Strong Practice: Colorado, Massachusetts, New Mexico
- 2. Strong Practice: Indiana, Mississippi, Oklahoma
- California, Connecticut, Iowa, Maryland, Michigan, Missouri, New Jersey, New York, Tennessee, Texas, Vermont, Virginia
- These states require a major, minor or concentration but there is no assurance it will be in an academic subject area.
- 4. Alabama, Alaska, Arizona, Arkansas, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Minnesota, Montana, Nebraska, Nevada, New Hampshire<sup>5</sup>, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Washington, West Virginia, Wisconsin, Wyoming
- Only K-8 teachers must complete an area of concentration in a field such as humanities, fine arts, social sciences and sciences.

Do states measure new elementary teachers' knowledge of math?

- Strong Practice: Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Idaho, Indiana, Kentucky, Maine, Massachusetts, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia, West Virginia, Wyoming
- Arizona, California, Colorado, Georgia, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Mississippi, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Washington, Wisconsin
- 3. Alaska<sup>4</sup>, Hawaii, Montana, Ohio<sup>5</sup>
- 4. Testing is not required for initial licensure.
- 5. Only teachers of grades 4 and 5 are required to pass an adequate content test.

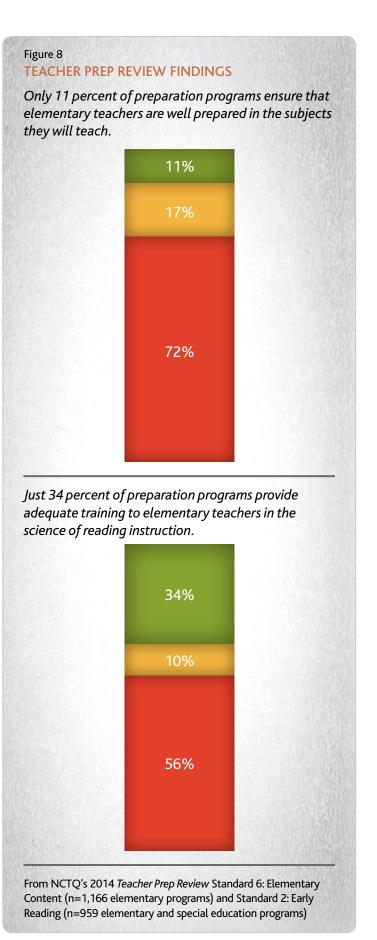

Figure 7

- 1. These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.
- Early childhood candidates may pass either multiple subjects (subscores) or content knowledge (no subscores) test.

## Middle School Teacher Preparation

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all middle school teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should require that all new middle school teachers are prepared to incorporate complex texts and academic language into instruction.
  - B. The state should ensure that all new middle school teachers are prepared to incorporate literacy skills as an integral part of every subject.
  - C. The state should ensure that all new middle school teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new middle school teachers pass a licensing test in every core academic area they are licensed to teach.
- 3. The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.

How well are states ensuring that middle school teachers are prepared for college- and career-readiness standards?

- Alaska, Arizona, California, Hawaii,
  Idaho, Maine, Michigan, Montana,
  Nebraska, New Mexico, Oklahoma,
  Oregon, South Dakota, Utah,
  Washington, Wyoming
- Colorado, Massachusetts,
  Nevada, North Dakota, Wisconsin
  - District of Columbia, Iowa, KANSAS,
    Kentucky, Louisiana, Maryland,
    Minnesota, Mississippi, Missouri,
    New Hampshire, New Jersey, New York,
    North Carolina, Ohio, Rhode Island,
    South Carolina, Vermont, Virginia,
    West Virginia

Alabama, Connecticut, Delaware,

- Florida, Georgia, Illinois, Pennsylvania, Tennessee, Texas
- Arkansas, Indiana

### Middle School Teacher Prep Analysis: Kansas

#### PREPARING MIDDLE SCHOOL TEACHERS FOR COLLEGE-AND CAREER-READINESS STANDARDS

The middle school years are critical to students' education, but, too often, states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Middle school teachers should not only be prepared to teach grade-level content, but should also be prepared to meet the increased instructional requirements of college- and career-readiness standards for students.

Currently, Kansas offers a middle school license to teach grades 5-8. Key licensing requirements for middle school teachers in Kansas include:

## KANSAS MIDDLE SCHOOL TEACHER PREP SNAPSHOT

State requires teachers to pass a content test for each subject they teach.

State requires middle school teachers to hold a middle grade or secondary license.

Yes

No

Preparation and licensure requirements for middle school teachers must address more than just content knowledge; the key instructional shifts articulated in college- and career-readiness standards must also be incorporated. Kansas addresses some of the instructional shifts toward building content knowledge and vocabulary through careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students through its required assessment for middle school English teachers, the Praxis II Middle School English Language Arts (5047) test.

Neither teacher standards nor testing frameworks in other content areas address incorporating literacy skills.

Regarding struggling readers, Kansas's middle school English content test requires that a teacher "knows commonly used research-based approaches to grouping and differentiated instruction to meet specific instructional objectives in English Language Arts" and "understands commonly used research-based strategies for teaching adolescent reading."

#### **Supporting Research**

Praxis Test Requirement www.ets.org

Regulations and Standards for Kansas Educators http://www.ksde.org/Agency/DivisionofLearningServices/ TeacherLicensureandAccreditation/Licensure

#### **RECOMMENDATIONS**

Ensure that middle school teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Kansas's English language arts content test for middle school teachers addresses informational texts, the state should strengthen its policy and ensure that teachers are able to challenge students with texts of increasing complexity.

Incorporate literacy skills as an integral part of every subject.

To ensure that middle school students are capable of accessing varied information about the world around them, Kansas should also—either through testing frameworks or teacher standards—include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

#### Support struggling readers.

Kansas should articulate more specific requirements ensuring that middle school teachers are prepared to intervene and support students who are struggling. While college- and career-readiness standards will increase the need for all middle school teachers to be able to help struggling readers to comprehend grade-level material, training for English language arts teachers in particular must emphasize identification and remediation of reading deficiencies.

#### KANSAS RESPONSE TO ANALYSIS

Kansas recognized the factual accuracy of this analysis. The state added that it is in the process of revising all teacher preparation program standards. A first-phase group of draft standards is in a comment/feedback step, and upon completion, the standards will be presented to the state board for approval prior to release. Work groups are in process on a second-phase group, and members are being recruited for the final group. Kansas noted that new program standards will align with its college- and career-readiness standards and will include literacy skills and requirements for addressing diversity among students, including struggling readers.

#### **EXAMPLES OF BEST PRACTICE**

**Illinois** ensures that middle school teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. The state's new standards for the middle grades include the instructional shifts toward building content knowledge and vocabulary through increasingly complex texts and careful reading of informational and literary texts associated with these standards. The standards also address the needs of struggling readers.

Illinois's requirements connecting literacy to all subject areas are particularly noteworthy. All middle school teachers must understand "the role, perspective and purpose of text in specific disciplines" and be able to perform tasks such as scaffolding reading to allow students to understand and learn from challenging text; guiding reading discussions that require students to identify key ideas and details of a text; analyze craft and structure and critically evaluate the text; and model reading strategies to improve comprehension.

In addition, **Georgia**, **Mississippi**, **New Jersey** and **South Carolina** ensure that all middle school teacher candidates are adequately prepared to teach middle school-level content. None of these states offers a K-8 generalist license and all require passing scores on subject-specific content tests. Georgia, Mississippi and South Carolina explicitly require at least two content-area minors, and New Jersey requires a content major along with a minor for each additional area of certification.

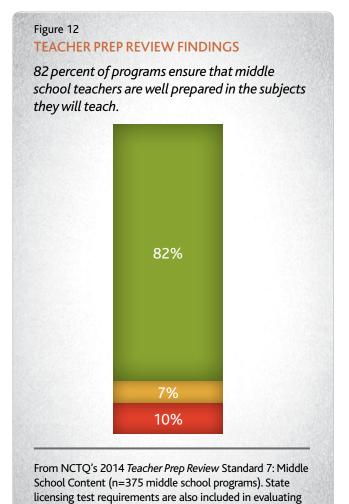

<sup>1.</sup> Offers 1-8 license.

1. Alaska does not require content tests for initial licensure.

this standard.

- 2. Candidates teaching multiple subjects only have to pass the elementary test. Single-subject credential does not require content test.
- 3. For K-8 license, Idaho also requires one single-subject test.
- 4. Illinois requires candidates to take a middle level core content test if a test is available. It is not clear that this will result in teachers passing a test in each subject and draft test frameworks are not yet available for review.
- 5. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary grades.
- 6. New Hampshire requires K-8 candidates to pass a middle school content test in one core area.
- 7. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass the new assessment with three subtests.
- 8. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.

## **Secondary Teacher Preparation**

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all secondary teachers are sufficiently prepared for the ways that collegeand career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should require that all new secondary teachers are prepared to incorporate complex texts and academic language into instruction.
  - B. The state should ensure that all new secondary teachers are prepared to incorporate literacy skills as an integral part of every subject.
  - C. The state should ensure that all new secondary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that secondary teachers pass a licensing test in every subject they are licensed to teach.
- 3. The state should require secondary general science and general social studies teachers to pass a subject-matter test of each discipline they are licensed to teach.
- 4. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

### Secondary Teacher Prep Analysis: Kansas

### PREPARING SECONDARY TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

In order for secondary teachers to be prepared to meet the instructional requirements of college- and career-readiness standards for their students, secondary teachers must be experts in the subject matter they teach. States should ensure that secondary teachers have sufficient content knowledge in all the subjects they are licensed to teach.

Currently, Kansas offers a secondary license to teach grades 6-12. Key licensing requirements for secondary school teachers in Kansas include:

## KANSAS SECONDARY TEACHER PREP SNAPSHOT

State requires a content test to teach any single core subject.

State offers only single-subject science certifications or has appropriate requirements for teachers with general science license.

State offers only single-subject social studies certifications or has appropriate requirements for teachers with general social studies license.

State requires a content test in order to add an endorsement to a license.

Yes

Not only must secondary teachers possess strong backgrounds in content knowledge as required by college- and career-readiness standards, they must also be able to address the key instructional shifts associated with the standards. Kansas addresses some of the instructional shifts toward building content knowledge and vocabulary through careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students through its required assessment for English language arts teachers, the Praxis II English Language Arts: Content Knowledge (5038) test.

Neither teacher standards nor secondary tests in other content areas address incorporating literacy skills.

Kansas has no requirements for the preparation of secondary teachers that address struggling readers.

#### RECOMMENDATIONS

Ensure that secondary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Kansas's required secondary English language arts content test addresses informational texts, the state should strengthen its policy and ensure that teachers are able to challenge students with texts of increasing complexity.

Incorporate literacy skills as an integral part of every subject.

To ensure that secondary students are capable of accessing varied information about the world around them, Kansas should also—either through testing frameworks or standards—include literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

Support struggling readers.

Kansas should articulate requirements ensuring that secondary teachers are prepared to intervene and support students who are struggling. While college- and career-readiness standards will increase the need for all secondary teachers to be able to help struggling readers to comprehend grade-level material, training for English language arts teachers in particular must emphasize identification and remediation of reading deficiencies.

Require secondary social studies teachers to pass a content test for each discipline they are licensed to teach.

By allowing a general social studies certification—and only requiring a general knowledge social studies exam—Kansas is not ensuring that its secondary teachers possess adequate subject-specific content knowledge. The state's required assessment combines all subject areas (e.g., history, geography, economics) and does not report separate scores for each subject area.

- 4. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.
- 5. Alaska does not require content tests for initial licensure.
- 6. Candidates with a master's degree in the subject area do not have to pass a content test.

#### **EXAMPLES OF BEST PRACTICE**

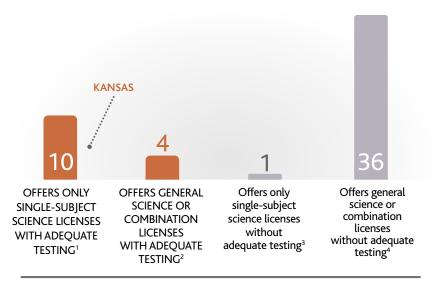

Arkansas has done more than other states to ensure that secondary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. Not only does the state address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these new standards in its educator competencies for secondary English language arts teachers, it also requires teachers to incorporate literacy skills into all content areas. For example, the secondary social studies competency to "incorporate disciplinary literacy" states that "reading competencies for literacy in history/social studies for grades 7-12 include the ability to read informational texts in history and social studies closely and critically to analyze the key ideas and details as well as craft and structure with the purpose of integrating knowledge and ideas both within and across texts." A similar competency exists for both the life science and physical science secondary certifications.

Indiana, Minnesota and Tennessee require that all secondary teacher candidates pass a content test to teach any core subject—both as a condition of licensure and to add an additional field to a secondary license. Further, neither of these states offers secondary certification in general social studies or science; all teachers must be certified in a specific discipline.

Also worthy of mention is **Missouri**, which requires general social studies teachers to pass a multi-content test with six independently scored subtests. Missouri also offers a general science license that can only be used to teach general science courses. All other science teachers must be certified in a specific discipline.

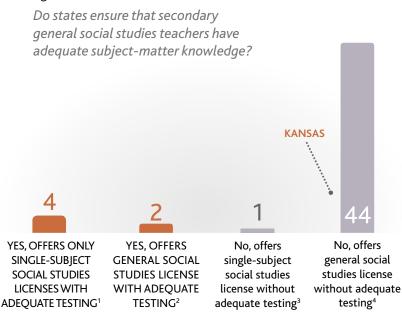

Figure 15

Do states ensure that secondary general science teachers have adequate subject-matter knowledge?

- 1. Strong Practice: Florida, Indiana, Kansas, Kentucky, Massachusetts, Minnesota, New York, South Dakota, Tennessee, Virginia
- 2. Strong Practice: Missouri, New Jersey, Rhode Island<sup>5</sup>, West Virginia<sup>5</sup>
- 3. California
- 4. Alabama, Alaska, Arizona<sup>6</sup>, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Georgia<sup>7</sup>, Hawaii, Idaho, Illinois, Iowa, Louisiana, Maine, Maryland, Michigan, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Vermont, Washington, Wisconsin, Wyoming
- 5. Teachers with the general science license may only teach general science courses.
- Arizona limits teachers with the general science license to teaching only general science courses.However, candidates with a master's degree in the subject area do not have to pass a content test.
- 7. Georgia's science test consists of two subtests.

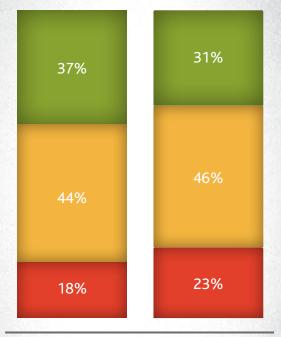

Figure 16

- 5. Minnesota's test for general social studies is divided into two individually scored subtests.
- 6. Candidates with a master's degree in the subject area do not have to pass a content test.
- 7. Oklahoma offers combination licenses without adequate testing.

Less than 40 percent of preparation programs ensure that secondary teachers are well prepared in the subjects they will teach.

Undergraduate (n=765)

Graduate (n=345)

From NCTQ's 2014 *Teacher Prep Review* Standard 8: High School Content (n=1,110 high school programs). State licensing test requirements are also considered in evaluating this standard.

## Special Education Teacher Preparation

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all special education teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
  - A. The state should ensure that all new secondary special education teachers are prepared to support struggling readers.
  - B. The state should require that all new secondary special education teachers are prepared to incorporate complex texts and academic language into instruction.
  - C. The state should ensure that all new secondary special education teachers are prepared to incorporate literacy skills as an integral part of every subject.
- 2. The state should require that new elementary special education teachers pass a rigorous test of reading instruction in order to attain licensure.
- 3. The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
- 4. All elementary special education candidates should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
- The state should ensure that secondary special education teachers possess adequate content knowledge.

### Special Education Teacher Prep Analysis: Kansas

#### PREPARING SPECIAL EDUCATION TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

Although most special education students are expected to meet the same high college- and career-readiness standards as typical students, too many states set an even lower bar for the preparation and licensure requirements of special education teachers. States must ensure that special education teachers are well grounded in all of the subject matter they will be licensed to teach.

Currently, Kansas offers special education licenses for the following grade spans: K-6, 5-8, 6-12, and K-12. Key licensing requirements for special education teachers in Kansas include:

#### **KANSAS** SPECIAL ED TEACHER PREP SNAPSHOT

X State only offers discrete elementary and secondary special education licenses.

Elementary subject-matter test required for special education license.

Secondary test in at least one subject area required for secondary special education license.

Yes

Special education teachers must also be prepared for the key instructional shifts that differentiate college- and career-readiness standards from previous student standards. Regrettably, Kansas's preparation and licensure requirements for special education teachers are not aligned with the state's college- and career-readiness standards for students.

Kansas does not require its special education teachers who teach the elementary grades to pass a rigorous test of reading instruction. The state does not require content testing, and teacher standards do not address informational texts or literacy skills.

Kansas has no requirements for the preparation of elementary or secondary special education teachers that address struggling readers.

#### **Supporting Research**

Regulations and Standards for Kansas Educators http://www.ksde.org/Default.aspx?tabid=123

#### **RECOMMENDATIONS**

**Ensure that special education teachers** are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Require all special education teacher candidates who teach elementary grades to pass a rigorous assessment in the science of reading instruction.

Kansas should require a rigorous reading assessment tool to ensure that its elementary special education teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary special education teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Kansas should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students.

Incorporate literacy skills as an integral part of every subject.

To ensure that special education students are capable of accessing varied information about the world around them, Kansas should also include specific requirements regarding literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

#### KANSAS RESPONSE TO ANALYSIS

Kansas recognized the factual accuracy of this analysis. The state noted that current regulations require that special education teachers complete a program to teach general education; special education programs/licensure are added endorsements to an existing license. Therefore, most teachers assigned to elementary special education have previously completed an elementary education program and content testing and hold an elementary education license, with teachers being prepared to teach reading during completion of their elementary education program. Secondary special education teachers will also have completed a teacher preparation program prior to their special education program, either an elementary or a secondary content area. Content testing is required upon program completion to earn the general education license. Content testing for special education is also required upon completion of the special education program and before the special education endorsement may be added to the license.

Kansas added that it is in the process of revising all teacher preparation program standards. A first-phase group of draft standards is in a comment/feedback step, and, upon completion, the standards will be presented to the state board for approval prior to release. Work groups are in process on a second-phase group, and members are being recruited for the final group. Kansas noted that new program standards will align with its college- and career-readiness standards and will include literacy skills and requirements for addressing diversity among students, including struggling readers.

#### LAST WORD FROM NCTQ

Kansas has done more than many states to offer special education licenses that prepare teachers to teach students in particular grade bands. However, the K-12 endorsement remains problematic. Even as an added endorsement, K-12 teachers are licensed to teach elementary grades even if their general education preparation was at the secondary level and vice versa.

#### **RECOMMENDATIONS CONTINUED**

#### Support struggling readers

Kansas should articulate requirements ensuring that all special education teachers are prepared to intervene and support students who are struggling with reading. With reading difficulties generally representing the primary reason for special education placements, it is essential that all special education teachers have the knowledge and skills to diagnose and support students with literacy needs.

 End licensure practices that fail to distinguish between the skills and knowledge needed to teach elementary grades and secondary grades.

It is virtually impossible and certainly impractical for Kansas to ensure that a K-12 special education teacher knows all the subject matter he or she is expected to be able to teach, especially considering state and federal expectations that special education students should meet the same high standards as other students. While the broad K-12 umbrella may be appropriate for teachers of low-incidence special education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students, who are expected to learn grade-level content.

 Require that elementary special education candidates pass a rigorous content test as a condition of initial licensure.

To ensure that special education teacher candidates who will teach elementary grades possess sufficient knowledge of the subject matter at hand, Kansas should require a rigorous content test that reports separate passing scores for each content area. Kansas should also set these passing scores to reflect high levels of performance. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

#### Ensure that secondary special education teachers possess adequate content knowledge.

Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Kansas's current policy of requiring no subject-matter testing is problematic and will not help special education students to meet rigorous learning standards. To provide a middle ground, Kansas should consider a customized HOUSSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

#### **EXAMPLES OF BEST PRACTICE**

Although all states have weaknesses when it comes to special education teachers' preparedness to meet the instructional requirements of college- and careerreadiness standards for students, both Indiana and New York are notable for addressing the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these standards.

Unfortunately, states are also weak in other areas of special education teacher preparation. However, three states—Missouri, New York and Rhode Island—are worthy of mention for taking steps in the right direction in ensuring that all special education teachers know the subject matter they are required to teach. These three states require that elementary special education candidates pass the same elementary content tests, which are comprised of individual subtests, as general education elementary teachers.

Secondary special education teachers in New York must pass a multi-subject content test for special education teachers comprised of three separately scored sections. Rhode Island requires its secondary special education teachers to hold certification in another secondary area. Secondary special education teachers in Missouri can either take a multi-subject test comprised of four separately scored sections or a single-subject secondary assessment.

similarly exempted.

Missouri, New Jersey, Oregon and Vermont issue a K-12 certificate, but candidates must meet discrete elementary and/or secondary requirements.

These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

## **Admission into Teacher Preparation**

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- 1. The state should limit admission to teacher preparation programs to candidates in the top half of the college-going population.
- 2. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs. Alternatively, academic proficiency could be demonstrated by grade point average.

### Admission into Teacher Prep Analysis: Kansas

#### RAISING THE BAR FOR TEACHER PREP THROUGH HIGHER **ADMISSION STANDARDS**

NCTQ has repeatedly found that too many teacher preparation programs are in need of major improvement, graduating first-year teachers lacking skills and content knowledge adequate to thrive in the classroom. One important way states can raise the bar for teacher preparation programs is to set more ambitious admission requirements for new elementary, secondary and special education teachers. This is even more relevant and important as the increasing expectations of college- and career-readiness standards demand more from teachers academically. A key criterion for admissions is evidence of a strong academic background, and states should require programs to select candidates from the top half of the college-going population. Countries like Singapore and Finland are even more restrictive in admissions; the top half goal is realistic and achievable while representing a significantly higher standard for programs throughout the United States. Until recently, few states had rigorous academic standards for admission, but with states like Rhode Island and Delaware significantly raising the bar by taking the lead in establishing higher standards and new accreditation requirements from CAEP, this is beginning to change.

#### **KANSAS**

#### ADMISSION INTO TEACHER PREP SNAPSHOT

State requires a minimum GPA of 3.0 for admission into teacher prep.

State requires a test normed to college-bound population prior to admission to prep program.

Yes

Kansas does not require aspiring teachers to pass a test of academic proficiency as a criterion for admission to teacher preparation programs, instead delaying its basic skills assessment until teacher candidates are ready to apply for licensure.

#### KANSAS RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Kansas noted that institutions of higher education have the responsibility to set entrance requirements.

#### **RECOMMENDATIONS**

Require that teacher preparation programs screen candidates for academic proficiency prior to admission.

Teacher preparation programs that do not screen candidates invest considerable resources in individuals who may not be able to successfully complete the program and pass licensing tests. Candidates in need of additional support should complete remediation before entering the program to avoid the possibility of an unsuccessful investment of significant public tax dollars. Kansas should require candidates to pass a test of academic proficiency that assesses reading, mathematics and writing prior to program admission. Alternatively, the state could require a minimum grade point average to establish that candidates have a strong academic history.

Require preparation programs to use a common test normed to the general college-bound population.

Kansas should require an assessment demonstrating that candidates are academically competitive with all peers, regardless of their intended profession. Requiring a common test normed to the general college population would allow for the selection of applicants in the top half of their class, as well as facilitate program comparison.

Consider requiring candidates to pass subject-matter tests as a condition of admission into teacher programs.

In addition to ensuring that programs require a measure of academic performance for admission, Kansas might also want to consider requiring content testing prior to program admission as opposed to at the point of program completion. Program candidates are likely to have completed coursework that covers related test content in the prerequisite classes required for program admission. Thus, it would be sensible to have candidates take content tests while this knowledge is fresh rather than wait two years to fulfill the requirement, and candidates lacking sufficient expertise would be able to remedy deficits prior to entering formal preparation.

## SUMMARY OF ADMISSION INTO TEACHER PREP FIGURES

- **Figure 23**Test of academic proficiency requirements
- Figure 24

  GPA requirements
- Figure 25

  Teacher Prep Review findings about admissions

### **EXAMPLES OF BEST PRACTICE**

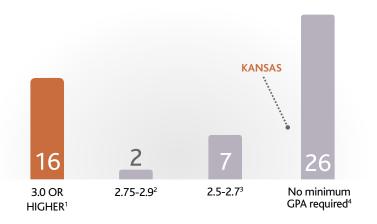

While many states now require CAEP accreditation which includes a standard requiring strong admission practices, **Rhode Island** and **Delaware** have set requirements independent of the accreditation process, ensuring that the states' expectations are clear. Both states require a test of academic proficiency normed to the general college-bound population rather than a test that is normed just to prospective teachers. Delaware also requires teacher candidates to have a 3.0 GPA or be in the top 50th percentile for general education coursework completed. Rhode Island also requires an average cohort GPA of 3.0, and, beginning in 2016, the cohort mean score on nationally-normed tests such as the ACT, SAT or GRE must be in the top 50th percentile. In 2020, the requirement for the mean test score will increase from the top half to the top third.

Requirements for admissions test normed to college-bound population is based on CAEP accreditation standards, not state's own admission policy.

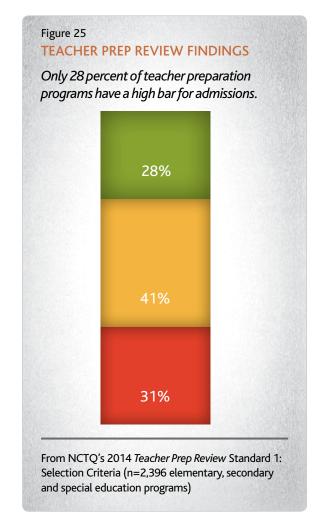

<sup>2.</sup> Candidates in Oklahoma also have the option of gaining admission with a 3.0 GPA.

Figure 24

Do states require a minimum GPA for admission to teacher prep?

- Strong Practice: Delaware, District of Columbia<sup>5</sup>, Georgia<sup>6</sup>, Hawaii<sup>5</sup>, Louisiana<sup>5</sup>, Michigan<sup>5</sup>, Mississippi<sup>6</sup>, New Jersey<sup>6</sup>, New York<sup>5</sup>, North Carolina<sup>5</sup>, Oklahoma<sup>7</sup>, Pennsylvania<sup>8</sup>, Rhode Island, South Carolina<sup>5</sup>, Utah, Virginia<sup>5</sup>
- 2. Kentucky, Texas
- 3. Alabama, Arkansas, Connecticut<sup>9</sup>, Florida, Nebraska, South Dakota, Wisconsin<sup>10</sup>
- Alaska, Arizona, California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Tennessee, Vermont, Washington, West Virginia, Wyoming
- 5. Required minimum GPA of 3.0 is based on CAEP accreditation standards, not state's own admission policy.
- 6. The 3.0 GPA requirement is a cohort average; individual candidates in Mississippi and New Jersey must have a 2.75 GPA. Individual candidates in Georgia must have a 2.5 GPA.
- 7. Candidates in Oklahoma also have the option of gaining admission by passing a basic skills test.
- 8. Students can also be admitted with a combination of a 2.8 GPA and qualifying scores on the basic skills test or SAT/ACT.
- 9. Connecticut requires a B- grade point average for all undergraduate courses.
- 10. The GPA admission requirement is 2.5 for undergraduate and 2.75 for graduate programs.

## **Teacher Preparation Program Accountability**

#### **Key Components**

(The factors considered in determining the states' ratings for this topic.)

- The state should incorporate preparation to teach to college- and career-readiness standards into its accountability requirements for teacher preparation programs.
- 2. The state should collect data that connects student achievement gains to teacher preparation programs. Such data can include value-added or growth analyses conducted specifically for this purpose or evaluation ratings that incorporate objective measures of student learning to a significant extent.
- 3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
- 4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.
- The state should retain full authority over its process for approving teacher preparation programs.

How well are states ensuring that teacher preparation programs are accountable for their performance?

- Alaska, Connecticut, District of Columbia, Hawaii, Idaho, Minnesota, Nebraska, New York, North Dakota, South Dakota, Utah, Wyoming
- Arizona, Arkansas, California,
  Illinois, Iowa, KANSAS, Maine, Maryland,

### Teacher Prep Program Accountability Analysis: Kansas

#### HOLDING PREPARATION PROGRAMS ACCOUNTABLE **FOR RESULTS**

The ultimate goal of teacher preparation programs should be to produce teachers who are effective in educating their students and ensure that they are ready for college and career. As programs operate by virtue of state approval, it is the state's responsibility to connect approval to accountability measures that ensure high performance. While this goal may have been hard to assess a few years ago, that is no longer the case. Redesigned evaluations of teacher effectiveness in the majority of states offer an opportunity for states to collect meaningful objective data on the performance of program graduates. To date, few states connect their process of approving teacher preparation programs to measurable outcome data about programs' graduates.

#### **KANSAS**

#### TEACHER PREP ACCOUNTABILITY SNAPSHOT

X State collects data that connects student achievement gains to teacher preparation programs.

State collects other meaningful data that reflect program performance.

State has set minimum standards for program performance.

State publishes an annual report card on its own

State retains full authority over its approval process.

Yes

Kansas's approval process for its traditional and alternate route teacher preparation programs does not hold programs accountable for the quality of the teachers they produce.

Most importantly, Kansas does not collect or report data that connect student achievement gains to teacher preparation programs. The state does collect some objective, meaningful data to measure the performance of teacher preparation programs. Programs must submit evidence of candidates' effects on learning. Examples of assessments include those based on student work samples, portfolio tasks, case studies, follow-up studies and employer surveys.

However, the state does not apply any transparent, measurable criteria for conferring program approval. Further, in the past three years, no programs in the state have been identified as low performing—an additional indicator that programs lack accountabil-

#### **RECOMMENDATIONS**

Collect data that connect student achievement gains to teacher preparation programs.

As one way to measure whether programs are producing effective classroom teachers, Kansas should consider the academic achievement gains of students taught by programs' graduates, averaged over the first three years of teaching. Data that are aggregated to the institution (e.g., combining elementary and secondary programs) rather than disaggregated to the specific preparation program are not useful for accountability purposes. Such aggregation can mask significant differences in performance among programs.

Report other meaningful data that reflect program performance.

Although measures of student growth are an important indicator of program effectiveness, they cannot be the sole measure of program quality for several reasons, including the fact that many programs may have graduates whose students do not take standardized tests. The accountability system must therefore include other objective measures that show how well programs are preparing teachers for the classroom, such as:

- 1. Evaluation results from the first and/or second year of teaching;
- 2. Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;
- 3. Average raw scores of teacher candidates on licensing tests, including academic proficiency, subject matter and professional knowledge tests;
- 4. Number of times, on average, it takes teacher candidates to pass licensing tests
- 5. Five-year retention rates of graduates in the teaching profession.

ity. The state's website does not include a report card that allows the public to review and compare program performance; it merely provides a link to the information posted by Title II.

In Kansas, there is some overlap of accreditation and state approval. Members of CAEP and the state make up the review team and decisions are made jointly; state members must complete CAEP training. Kansas conducts its own program reviews.

#### KANSAS RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Kansas did not indicate any policy updates related to teacher prep program accountability.

#### **RECOMMENDATIONS CONTINUED**

 Establish the minimum standard of performance for each category of data.

Merely collecting the types of data described above is insufficient for accountability purposes. The next and perhaps more critical step is for the state to establish precise minimum standards for teacher preparation program performance for each category of data. Programs should then be held accountable for meeting these standards, and there should be consequences for failing to do so, including loss of program approval.

Publish an annual report card on the state's website.

Kansas should produce an annual report card that shows all the data the state collects on individual teacher preparation programs, which should be published on the state's website at the program level for the sake of public transparency. Data should be presented in a manner that clearly conveys whether programs have met performance standards.

 Maintain full authority over the process for approving teacher preparation programs.

Kansas should ensure that it is the state that considers the evidence of program performance and makes the decision about whether programs should continue to be authorized to prepare teachers

#### SUMMARY OF TEACHER PREP PROGRAM **ACCOUNTABILITY FIGURES**

Figure 26

Accountability requirements

Figure 27

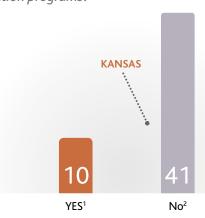

Use of student achievement data

#### **EXAMPLES OF BEST PRACTICE**

No state has yet implemented a full accountability system for teacher preparation that features data, including student achievement gains, connected to teacher preparation programs (not just the institution level); has clear minimum standards of performance for those data; and publishes the results for use by prospective teachers, hiring school districts and the general public. Some states are well on their way. Georgia and Louisiana collect student achievement gains and set minimum standards of performance, while Ohio and Tennessee have published report cards that include connections to student achievement gains.

Figure 27 Do states connect student achievement data to teacher preparation programs?

- 1. Strong Practice: Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee, Texas
- 2. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia<sup>3</sup>, Hawaii<sup>3</sup>, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland³, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York<sup>3</sup>, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
- 3. Included in state's Race to the Top plan, but not in policy or yet implemented.

- 1. For traditional preparation programs only.
- 2. State does not distinguish between alternate route programs and traditional preparation programs in public reporting.
- 3. For alternate routes only.

### Teacher Preparation Policy Priorities for Kansas

## Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of
  informational texts as well as incorporate complex informational texts into classroom instruction.
   Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

  \*Priority for elementary, middle, secondary and special education teacher preparation.\*
- Ensure teachers are prepared to intervene and support students who are struggling with reading. Priority for elementary, middle, secondary and special education teacher preparation.

#### Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires a meaningful passing score for each area.
- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

#### Additional priorities for secondary teacher preparation:

• Require secondary social studies teachers to pass a content test for each discipline they are licensed to teach.

#### Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate, and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

#### Raise admission requirements:

Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

#### Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.
- Publicly report performance data.
