Texas

Are New Teachers Being Prepared for College- and Career-Readiness Standards?

Acknowledgments

STATES

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Although this year's edition did not require the extensive review that comprehensive editions require, we still wanted to make sure that we captured all relevant policy changes and that states' perspectives were represented. Every state formally received a draft of the policy updates we identified in June 2014 as well as a draft of analyses and recommendations for the new indicators related to college- and career-readiness standards for comment and correction. States also received a final draft of their reports a month prior to release. All but two states responded to our inquiries. While states do not always agree with our recommendations, their willingness to engage in dialogue, explain their differing points of view and often acknowledge the imperfections of their teacher policies are important steps in moving forward.

FUNDERS

The primary funders for the 2014 Yearbook were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- Gleason Family Foundation
- J.A. and Kathryn Albertson Foundation
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

Special thanks to Leigh Zimnisky and Justin Rakowski at Ironmark for their design of the 2014 *Yearbook*. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original *Yearbook* design and ongoing technical support.

Teacher Preparation Policy Priorities for **Texas**

Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of
 informational texts as well as incorporate complex informational texts into classroom instruction.
 Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.
 Priority for elementary and special education teacher preparation.

Additional priorities for elementary teacher preparation:

- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

Additional priorities for secondary teacher preparation:

• Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

Hold preparation programs accountable:

Set minimum standards for program performance with consequences for failure to meet those standards.

Teacher Preparation in **Texas**

The 2014 State Teacher Policy Yearbook keeps the spotlight on the critical issue of teacher preparation. In addition to updating the full set of teacher preparation policies reviewed in last year's comprehensive edition, the 2014 Yearbook casts a critical eye on whether states have established requirements for teacher preparation and licensure that help to ensure that teachers are ready for the increased demands of states' college- and career-readiness standards for K-12 students.

2014 Teacher Prep Policy Update for Texas

Based on a review of state legislation, rules and regulations, NCTQ has identified the following recent teacher prep policy changes in Texas:

Middle School Teacher Preparation

New CORE assessments for the Generalist 4-8 license will be introduced in January 2015. Texas CORE assessments http://cms.texes-ets.org/texes/generalistcore-subjects/

Texas Response to Policy Update

States were asked to review NCTQ's identified updates and also to comment on policy changes related to teacher preparation that have occurred in the last year, pending changes, or teacher preparation in the state more generally.

As discussed in the 2013 *State Teacher Policy Yearbook*, Texas noted that special education candidates applying for special education certificates at the elementary level must pass the elementary content-area test required of the candidates' probationary grade-level or subject-area assignment. At the secondary level, the special education candidates must pass either the content-area test required of the candidates' probationary grade-level or subject-area assignment or complete coursework comprised of not fewer than 24 semester hours.

Texas also noted the following activities of the State Board of Educator Certification (SBEC):

- In February 2014, SBEC adopted a change to policy that aligned the number and content of required continuing professional education (CPE) hours for the renewal of certificates with new statutory assignment-specific requirements for teachers in order to make CPE requirements more relevant and useful.
- At their May and August 2014 meetings, SBEC adopted new passing standards for the Pedagogy and Professional Responsibilities certification examination for Trade and Industrial Education: Grades 6-12; Journalism: Grades 7-12; Business and Finance: Grades 6-12; Marketing: Grades 6-12; Agriculture, Food and Natural Resources: Grades 6-12; Health Science: Grades 6-12; Mathematics/Physical Science/Engineering: Grades 6-12; and Physics/Mathematics: Grades 7-12.
- In August 2014, SBEC adopted a change to policy requiring that subject matter included in the curriculum for candidates seeking initial certification be aligned with reading instruction that improves students' content-area literacy, the skills and competencies captured in the Texas teacher standards that went into effect June 2014 and instruction in detection of students with mental or emotional disorders.
- At their August 2014 meeting, SBEC adopted several changes to policy related to student teaching. The definition of clinical/student teaching was expanded to include 24-week half-day assignments. The practicum that needs to be completed prior to issuance of a probationary certificate was increased from 15 to 30 hours. Clarification was made that observations of teacher candidates by their field supervisors during their clinical/student teaching or internship must be on-site and face-to-face.
- Also at their August 2014 meeting, SBEC adopted several changes to policy related to teacher preparation program accountability. "Consecutively measured years" was defined as consecutive years for which a group's performance is measured, excluding years in which the small-group exception applies. The phrase "willfully or recklessly" was removed, and the word "shall" was replaced with "may" in the sections that relate to sanctions that may be applied to individuals or entities that do not provide requested accountability data and information. The small-group-size exception was raised from 10 to 20 individuals in an accountability group. The informal review process of recommendations related to accreditation sanctions and continuing approval were clarified. The contested case process related to accreditation revocation was also clarified.

Elementary Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- 1. The state should ensure that all elementary teachers are sufficiently prepared for the ways that college- and career-readiness standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new elementary teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new elementary teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new elementary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new elementary teachers, including those who can teach elementary grades on an early childhood license, pass a rigorous test of reading instruction in order to attain licensure.
- 3. The state should ensure that all elementary teacher candidates, including those who can teach elementary grades on an early childhood license, possess sufficient content knowledge in all core subjects, including mathematics.
- 4. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 45 credit hours to ensure appropriate depth in the core subject areas of English, mathematics, science, social studies and fine arts.
- 5. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement ensures that prospective teachers have taken higher-level academic coursework.

Elementary Teacher Prep Analysis: **Texas**

PREPARING ELEMENTARY TEACHERS FOR COLLEGE- AND **CAREER-READINESS STANDARDS**

The new demands of college- and career-readiness standards for students heighten the need for elementary teachers to have a strong content background in all of the subject matter taught in the elementary grades. Texas must ensure that its preparation and licensure requirements for new teachers address this need.

Currently, Texas offers an early childhood certification that is the state's de facto license to teach elementary grades PreK-6. Key licensing requirements for elementary school teachers in Texas include:

State requires passing a content test in each of the four core subjects.

State requires adequate test on the science of reading.

State requires academic content specialization.

N/A State has adequate/appropriate requirements for teachers who teach elementary grades on an early childhood license.

Yes

In addition to the strong content background called for by collegeand career-readiness standards, teacher candidates must also be prepared for the key instructional shifts that differentiate these standards from their predecessors. Texas's required competencies for elementary teachers include the following standards that incorporate some of the instructional shifts in the use of text associated with college- and career-readiness standards for students. Texas's English language arts and reading standards require that a beginning teachers has the following:

Comprehension skills and strategies for understanding and interpreting different types of written materials, including narratives, expository texts, technical writing and content-area textbooks

Skills in how to interpret and evaluate information presented in various formats (e.g., maps, tables and graphs).

Accompanying application standards articulate that new teachers are required to "provide instruction in how to use graphics (e.g., tables, charts, and signs) and other informational texts and technologies (e.g., the Internet) to acquire information."

RECOMMENDATIONS

Ensure that elementary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Texas's competencies and testing standards address informational and expository texts, the state is encouraged to strengthen its teacher preparation requirements and ensure that all elementary candidates have the ability to adequately incorporate complex informational text into classroom instruction.

Incorporate literacy skills as an integral part of every subject.

Texas has taken a step in the right direction addressing literacy in its educator preparation curriculum requirements and teacher standards. However, to ensure that elementary students are capable of accessing varied information about the world around them, the state should expand upon these requirements and specifically include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

Require teacher candidates to pass a rigorous assessment in the science of reading instruction.

Texas should require a rigorous reading assessment tool to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum

Although the state's new Core Subjects EC-6 content assessment does not mention informational texts specifically, its competencies require skills related to various expository texts.

Texas's educator preparation curriculum must include "reading instruction, including instruction that improves students' content-area literacy." The state's newly adopted teacher standards require that "teachers promote literacy and the academic language within the discipline and make discipline-specific language accessible to all learners."

Regarding struggling readers, Texas's standards require beginning teachers to know and understand "how to use assessment to determine when a student needs additional help or intervention to bring the student's performance to grade level, based on state content and performance standards for reading, writing, listening, and speaking that comprise the Texas Essential Knowledge and Skills (TEKS)." The state's elementary content test also addresses the needs of struggling readers.

19 TAC 228.30(b)(1); 149.1001

TEXAS RESPONSE TO ANALYSIS

Texas was helpful in providing NCTQ with the facts necessary for this analysis. The state added that the curriculum for each educator preparation program must rely on scientifically based research to ensure teacher effectiveness and align with the Texas Essential Knowledge and Skills (TEKS), the state's student standards. The TEKS for English language arts and reading, grade 5, identify various types of complex informational texts that beginning teachers need to adequately incorporate into classroom instruction.

Texas also noted that in response to the legislature's mandate, the new content tests for its Core Subjects EC-6 certification is more rigorous and ensures a knowledgeable and skillful content-area teacher.

Supporting Research 19 TAC 228.30

RECOMMENDATIONS CONTINUED

knowledge in this area should not be eligible for licensure.

 Ensure that the content test adequately measures sufficient knowledge in all subjects.

Texas should ensure that its new subject-matter test for elementary teacher candidates rigorously tests each core subject area. To make the test meaningful, Texas should also ensure that the passing scores on each subtest reflect high levels of performance.

 Require elementary teacher candidates to complete a content specialization in an academic subject area.

Texas's policy requiring elementary candidates to earn an academic major is undermined because it may be met with an interdisciplinary major. Unlike an academic major, an interdisciplinary major will not necessarily enhance teachers' content knowledge or ensure that prospective teachers have taken higher-level academic coursework. Further, it does not provide an option for teacher candidates unable to fulfill student teaching or other professional requirements to still earn a degree, as an academic major does.

Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.

Although Texas outlines a more specific set of content standards than most states, the state should either articulate an even more specific set of standards or establish more comprehensive coursework requirements that are specifically geared to the areas of knowledge needed by PK-6 teachers. An adequate curriculum is likely to require approximately 45 credit hours in the core subject areas of English, mathematics, science, social studies and fine arts.

EXAMPLES OF BEST PRACTICE

Both Arkansas and California ensure that elementary teachers are prepared to meet the instructional requirements of collegeand career-readiness standards for students. These states specify that elementary teacher candidates must have the ability to not only build content knowledge and vocabulary through careful reading of informational and literary texts, but also to challenge students with texts of increasing complexity.

Candidates are also required to incorporate literacy skills as an integral part of every subject and are prepared to intervene and support students who are struggling.

In addition, Indiana ensures that all candidates licensed to teach the elementary grades, including early childhood education candidates, possess the requisite knowledge of core content and of the key elements of scientifically based reading instruction before entering the classroom. Elementary and early childhood teacher candidates are required to pass a content test comprised of four independently scored subtests, including mathematics. In addition, these candidates are required to pass a comprehensive assessment that tests the five elements of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Elementary teacher candidates in Indiana must also earn either a major or minor in an academic content area.

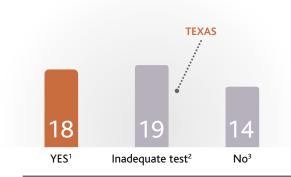

Massachusetts's MTEL mathematics subtest continues to set the standard in this area by evaluating mathematics knowledge beyond an elementary school level and challenging candidates' understanding of underlying mathematics concepts.

- 1. Alaska does not require testing for initial licensure.
- 2. Massachusetts and North Carolina require a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math.
- 3. Only teachers of grades 4 and 5 are required to pass a content test in Ohio.

Figure 4

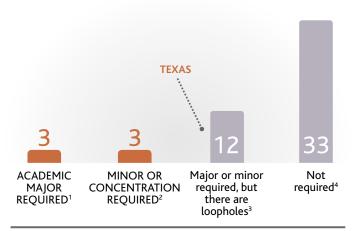

Do states measure new elementary teachers' knowledge of the science of reading?

- Strong Practice: Alabama, California⁴, Connecticut, Florida, Indiana, Massachusetts, Minnesota, Mississippi, New Hampshire, New Mexico, New York, North Carolina⁵, Ohio, Oklahoma, Tennessee, Virginia, West Virginia, Wisconsin
- Arizona, Arkansas, Delaware, District of Columbia, Georgia, Idaho, Kentucky, Maine, Missouri, New Jersey, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont, Washington, Wyoming
- 3. Alaska, Colorado, Hawaii, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Montana, Nebraska, Nevada, North Dakota, South Dakota
- California allows an exemption from the state's reading test for teachers who already have a single subject credential.
- 5. Teachers have until their second year to pass the reading test.

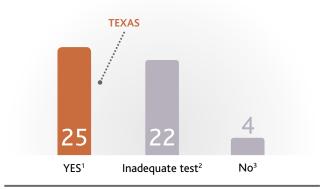

Figure 6

Do states expect elementary teachers to complete an academic concentration?

- 1. Strong Practice: Colorado, Massachusetts, New Mexico
- 2. Strong Practice: Indiana, Mississippi, Oklahoma
- California, Connecticut, Iowa, Maryland, Michigan, Missouri, New Jersey, New York, Tennessee, Texas, Vermont, Virginia
- These states require a major, minor or concentration but there is no assurance it will be in an academic subject area.
- 4. Alabama, Alaska, Arizona, Arkansas, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Minnesota, Montana, Nebraska, Nevada, New Hampshire⁵, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Washington, West Virginia, Wisconsin, Wyoming
- Only K-8 teachers must complete an area of concentration in a field such as humanities, fine arts, social sciences and sciences.

Do states measure new elementary teachers' knowledge of math?

- Strong Practice: Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Idaho, Indiana, Kentucky, Maine, Massachusetts, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia, West Virginia, Wyoming
- Arizona, California, Colorado, Georgia, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Mississippi, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Washington, Wisconsin
- 3. Alaska⁴, Hawaii, Montana, Ohio⁵
- 4. Testing is not required for initial licensure.
- 5. Only teachers of grades 4 and 5 are required to pass an adequate content test.

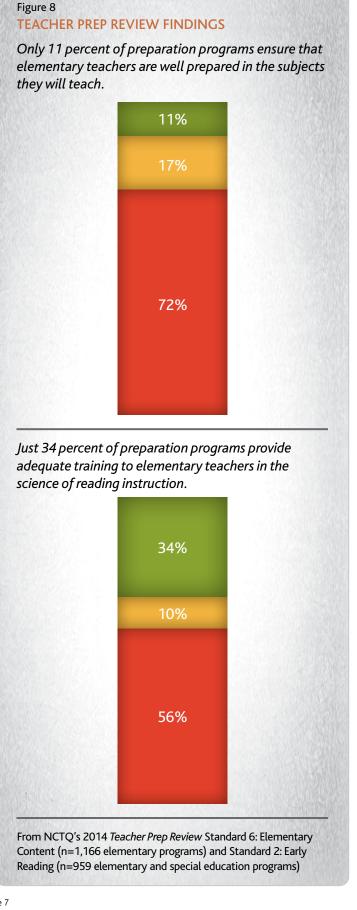

Figure 7

- 1. These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.
- Early childhood candidates may pass either multiple subjects (subscores) or content knowledge (no subscores) test.

Middle School Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all middle school teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new middle school teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new middle school teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new middle school teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that new middle school teachers pass a licensing test in every core academic area they are licensed to teach.
- 3. The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.

How well are states ensuring that middle school teachers are prepared for college- and career-readiness standards?

- Alaska, Arizona, California, Hawaii,
 Idaho, Maine, Michigan, Montana,
 Nebraska, New Mexico, Oklahoma,
 Oregon, South Dakota, Utah,
 Washington, Wyoming
- Colorado, Massachusetts,
 Nevada, North Dakota, Wisconsin
 - Alabama, Connecticut, Delaware,
 District of Columbia, Iowa, Kansas,
 Kentucky, Louisiana, Maryland,
 Minnesota, Mississippi, Missouri,
 New Hampshire, New Jersey, New York,
 North Carolina, Ohio, Rhode Island,
 South Carolina, Vermont, Virginia,
 West Virginia
- Florida, Georgia, Illinois,
 Pennsylvania, Tennessee, TEXAS
- Arkansas, Indiana

Middle School Teacher Prep Analysis: **Texas**

PREPARING MIDDLE SCHOOL TEACHERS FOR COLLEGE-AND CAREER-READINESS STANDARDS

The middle school years are critical to students' education, but, too often, states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Middle school teachers should not only be prepared to teach grade-level content, but should also be prepared to meet the increased instructional requirements of college- and career-readiness standards for students.

Currently, Texas requires either a generalist (grades 4-8) or a subject-specific (grades 4-8) endorsement for all middle school teachers. Key licensing requirements for middle school teachers in Texas include:

State requires middle school teachers to hold a middle grade or secondary license.

Yes

each subject they teach.

Preparation and licensure requirements for middle school teachers must address more than just content knowledge; the key instructional shifts articulated in college- and career-readiness standards must also be incorporated. Standards for middle grades English teachers require that they "understand the importance of reading for understanding, know the components of comprehension, and teach students strategies for improving their comprehension," which includes that they "provide instruction in how to use graphics (e.g., tables, charts, maps, signs), informational texts, and technologies (e.g., the Internet) to acquire information."

Although the state's new Core Subjects 4-8 content assessment does not mention informational texts specifically, its competencies require skills related to expository texts.

Standards for middle grades social studies and science teachers indicate that a teacher must be able to "use a variety of instructional strategies to ensure all students' reading comprehension of content-related texts, including helping students link the content of texts to their lives and connect related ideas across different texts." Texas's educator preparation curriculum must include "reading instruction, including instruction that improves students' content-area literacy." The state's newly adopted teacher standards require that "teachers promote literacy and the academic language within the discipline and make discipline-specific language accessible to all learners."

RECOMMENDATIONS

Ensure that middle school teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Although Texas's standards and testing standards for middle school English teachers address informational and expository texts, the state should strengthen its policy and ensure that teachers are able to challenge students with texts of increasing complexity.

Adequately align test with state competencies.

The testing framework for Texas's new content assessment does not appear to adequately address the instructional shifts in the use of text required under the state's standards. Therefore, Texas should be mindful that this test may not measure up in terms of English language arts, or in terms of connecting literacy and text to the other core subject areas.

Texas addresses the needs of struggling readers in its standards for English teachers.

TEXAS RESPONSE TO ANALYSIS

Texas was helpful in providing NCTQ with the facts necessary for this analysis. The state added that the curriculum for each educator preparation program must rely on scientifically based research to ensure teacher effectiveness and align with the Texas Essential Knowledge and Skills (TEKS), the state's student standards. The TEKS for English language arts and reading, grade 8, identify various types of complex informational texts that beginning teachers need to adequately incorporate into classroom instruction.

Texas also noted that in response to the legislature's mandate, the new content test for its Core Subjects 4-8 certification is more rigorous and ensures a knowledgeable and skillful content area teacher.

EXAMPLES OF BEST PRACTICE

Illinois ensures that middle school teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. The state's new standards for the middle grades include the instructional shifts toward building content knowledge and vocabulary through increasingly complex texts and careful reading of informational and literary texts associated with these standards. The standards also address the needs of struggling readers.

Illinois's requirements connecting literacy to all subject areas are particularly noteworthy. All middle school teachers must understand "the role, perspective and purpose of text in specific disciplines" and be able to perform tasks such as scaffolding reading to allow students to understand and learn from challenging text; guiding reading discussions that require students to identify key ideas and details of a text; analyze craft and structure and critically evaluate the text; and model reading strategies to improve comprehension.

In addition, Georgia, Mississippi, New Jersey and South Carolina ensure that all middle school teacher candidates are adequately prepared to teach middle school-level content. None of these states offers a K-8 generalist license and all require passing scores on subject-specific content tests. Georgia, Mississippi and South Carolina explicitly require at least two content-area minors, and New Jersey requires a content major along with a minor for each additional area of certification.

1. Alaska does not require content tests for initial licensure.

this standard.

- 2. Candidates teaching multiple subjects only have to pass the elementary test. Single-subject credential does not require content test.
- 3. For K-8 license, Idaho also requires one single-subject test.
- 4. Illinois requires candidates to take a middle level core content test if a test is available. It is not clear that this will result in teachers passing a test in each subject and draft test frameworks are not yet available for review.
- 5. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary grades.
- 6. New Hampshire requires K-8 candidates to pass a middle school content test in one core area.
- 7. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass the new assessment with three subtests.
- 8. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.

Secondary Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all secondary teachers are sufficiently prepared for the ways that collegeand career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new secondary teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new secondary teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new secondary teachers of English language arts are prepared to support struggling readers.
- 2. The state should require that secondary teachers pass a licensing test in every subject they are licensed to teach.
- 3. The state should require secondary general science and general social studies teachers to pass a subject-matter test of each discipline they are licensed to teach.
- 4. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

Secondary Teacher Prep Analysis: **Texas**

PREPARING SECONDARY TEACHERS FOR COLLEGE- AND **CAREER-READINESS STANDARDS**

To be prepared to meet the instructional requirements of college- and career-readiness standards for their students, secondary teachers must be experts in the subject matter they teach. States should ensure that secondary teachers have sufficient content knowledge in all the subjects they are licensed to teach.

Currently, Texas offers single-subject secondary licenses to teach grades 6-12 or 7-12. Key licensing requirements for secondary school teachers in Texas include:

TEXAS SECONDARY TEACHER PREP SNAPSHOT

State requires a content test to teach any single core subject.

State offers only single-subject science certifications or has appropriate requirements for teachers with general science license.

State offers only single-subject social studies certifications or has appropriate requirements for teachers with general social studies license.

State requires a content test in order to add an endorsement to a license.

Yes

Not only must secondary teachers possess strong backgrounds in content knowledge as required by college- and career-readiness standards, they must also be able to address the key instructional shifts associated with the standards. Texas requires secondary English teachers to pass the TExES English Language Arts and Reading test, which includes some of the instructional shifts toward building content knowledge and vocabulary through careful reading of informational and literary texts associated with college- and career-readiness standards for students. Although the framework does not specifically mention informational texts, it does require that "the teacher understands reading skills and strategies for various types of nonliterary texts and teaches students to apply these skills and strategies to enhance their lifelong learning."

Although secondary tests in other content areas do not address incorporating literacy skills, the state's educator standards do address them. For example, the secondary social studies teacher must be able to "use a variety of instructional strategies to ensure all students' reading comprehension of content-related texts, including helping students link the content of texts to their lives

RECOMMENDATIONS

Ensure that secondary teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Texas should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with college- and career-readiness standards for students.

Require secondary teachers with umbrella certifications to pass a content test for each discipline they are licensed to teach.

By allowing general social studies and general science certifications—and only requiring general knowledge exams for each—Texas is not ensuring that these secondary teachers possess adequate subject-specific content knowledge. The state's required general social studies assessment combines all topical areas (e.g., history, geography, economics), and its required general science assessment combines subject areas that include biology, chemistry and physics. Neither assessment reports separate scores for each area. Therefore, candidates could answer many perhaps all—chemistry questions, for example, incorrectly, yet still be licensed to teach chemistry to high school students.

and connect related ideas across different texts." A similar standard is articulated for each science test as well. Texas's educator preparation curriculum must include "reading instruction, including instruction that improves students' content-area literacy." The state's newly adopted teacher standards require that "teachers promote literacy and the academic language within the discipline and make discipline-specific language accessible to all learners."

Regarding struggling readers, the framework for the TEXES English Language Arts and Reading test articulates that teachers must be able to do the following:

- Know how to intervene in students' reading process to promote their comprehension and enhance their reading experience (e.g., using questioning, guiding students to make connections between their prior knowledge and texts)
- Uses assessment results to plan and adapt instruction that addresses students' strengths, needs and interests and that builds on students' current skills to increase their reading proficiency.

- 4. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.
- 5. Alaska does not require content tests for initial licensure.
- 6. Candidates with a master's degree in the subject area do not have to pass a content test.

EXAMPLES OF BEST PRACTICE

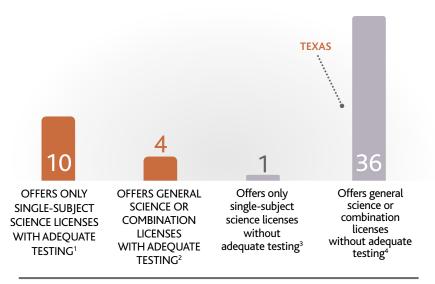

Arkansas has done more than other states to ensure that secondary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. Not only does the state address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these new standards in its educator competencies for secondary English language arts teachers, it also requires teachers to incorporate literacy skills into all content areas. For example, the secondary social studies competency to "incorporate disciplinary literacy" states that "reading competencies for literacy in history/social studies for grades 7-12 include the ability to read informational texts in history and social studies closely and critically to analyze the key ideas and details as well as craft and structure with the purpose of integrating knowledge and ideas both within and across texts." A similar competency exists for both the life science and physical science secondary certifications.

Indiana, Minnesota and Tennessee require that all secondary teacher candidates pass a content test to teach any core subject both as a condition of licensure and to add an additional field to a secondary license. Further, neither of these states offers secondary certification in general social studies or science; all teachers must be certified in a specific discipline.

Also worthy of mention is Missouri, which requires general social studies teachers to pass a multi-content test with six independently scored subtests. Missouri also offers a general science license that can only be used to teach general science courses. All other science teachers must be certified in a specific discipline.

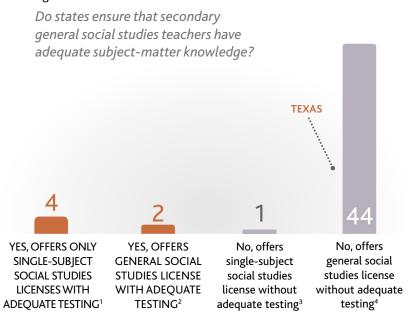

Figure 15

Do states ensure that secondary general science teachers have adequate subject-matter knowledge?

- 5. Minnesota's test for general social studies is divided into two individually scored subtests.
- 6. Candidates with a master's degree in the subject area do not have to pass a content test.
- 7. Oklahoma offers combination licenses without adequate testing.

Undergraduate (n=765)

Graduate (n=345)

From NCTQ's 2014 *Teacher Prep Review* Standard 8: High School Content (n=1,110 high school programs). State licensing test requirements are also considered in evaluating this standard.

Special Education Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- The state should ensure that all special education teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should ensure that all new secondary special education teachers are prepared to support struggling readers.
 - B. The state should require that all new secondary special education teachers are prepared to incorporate complex texts and academic language into instruction.
 - C. The state should ensure that all new secondary special education teachers are prepared to incorporate literacy skills as an integral part of every subject.
- 2. The state should require that new elementary special education teachers pass a rigorous test of reading instruction in order to attain licensure.
- 3. The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
- 4. All elementary special education candidates should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
- The state should ensure that secondary special education teachers possess adequate content knowledge.

Special Education Teacher Prep Analysis: **Texas**

PREPARING SPECIAL EDUCATION TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

Although most special education students are expected to meet the same high college- and career-readiness standards as typical students, too many states set an even lower bar for the preparation and licensure requirements of special education teachers. States must ensure that special education teachers are well grounded in all of the subject matter they will be licensed to teach.

Currently, Texas offers a special education license to teach grades PreK-12. Key licensing requirements for special education teachers in Texas include:

TEXAS SPECIAL ED TEACHER PREP SNAPSHOT

State only offers discrete elementary and secondary special education licenses.

Elementary subject-matter test required for special education license.

Secondary test in at least one subject area required for secondary special education license.

Yes

Special education teachers must also be prepared for the key instructional shifts that differentiate college- and career-readiness standards from previous student standards.

Texas requires special education candidates applying for special education certification at the elementary level to pass the elementary content test required of general education elementary teachers. Although the reading portion addresses all five components of scientifically based reading instruction, it does not amount to a stand-alone assessment.

While the state's new TExES Core Subjects EC-6 content assessment does not specifically address informational texts, the framework does outline various requirements for teachers related to expository texts.

Teacher standards for special education teachers require only an understanding of "the nature and stages of literacy development and various contexts and methods to promote students' literacy development." Texas's educator preparation curriculum must include "reading instruction, including instruction that improves students' content-area literacy." The state's newly adopted teacher standards require that "teachers promote literacy and the academic language within the discipline and make discipline-specific language accessible to all learners."

Texas addresses the needs of struggling readers in its state standards and elementary content test.

RECOMMENDATIONS

Ensure that special education teachers are prepared to meet the instructional requirements of college- and careerreadiness standards for students.

Require all elementary special education teacher candidates to pass a rigorous assessment in the science of reading instruction.

Texas should require a rigorous reading assessment tool to ensure that its elementary special education teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary special education teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Texas should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with college- and career-readiness standards for students.

Incorporate literacy skills as an integral part of every subject.

To ensure that special education students are capable of accessing varied information about the world around them, Texas should also include specific requirements regarding literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

Supporting Research

Approved Educator Standards

TEXES Tests

cms.texes-ets.org

HB 2012 (2013)

Texas Administrative Code Title 19, Part 7, Rule 230.37

TEXAS RESPONSE TO ANALYSIS

Texas was helpful in providing NCTQ with facts that enhanced this analysis. The state added that it requires special education candidates applying for a special education probationary certificate at the elementary level to pass the elementary content area test required of the candidate's probationary grade level or subject-area assignment. At the secondary level, special education candidates applying for a special education probationary certificate must pass the content area test required of the candidate's probationary grade level or subject-area assignment, or complete coursework comprised of not fewer than 24 semester hours, including 12 semester hours of upper-division coursework in the probationary subject-area assignment.

The state added that it currently recommends that special education candidates applying for special education standard certificates also apply for the elementary content areas that they anticipate needing in their desired teaching fields. Texas asserted that the new test frameworks provide a rigorous assessment in the science of reading instruction and noted that the Core Subject EC-6 and Core Subject 4-8 will report a combined subscore for English language arts and reading and the science of teaching reading.

In addition, according to TAC §228.30 (a), the curriculum for each educator preparation program must rely on scientifically based research to ensure teacher effectiveness and align with the Texas Essential Knowledge and Skills (TEKS), the state's student standards. The TEKS for English language arts and reading identify various types of complex informational texts that beginning teachers need to adequately incorporate into classroom instruction. As a result, special education teachers who are being prepared to teach the ELAR TEKS at the elementary, middle and secondary school level will have participated in curricula that are aligned with college- and career-readiness standards.

Finally, Texas added that competencies in its current and new test frameworks for Core Subjects EC-6 and 4-8 address including literacy skills and text to build content knowledge; secondary competencies articulate standards for incorporating literacy skills throughout the content areas as well. As a result, special education teachers who are certified to teach the ELAR TEKS at the elementary, middle and secondary school levels will have passed a certification exam aligned with college- and career-readiness standards.

RECOMMENDATIONS CONTINUED

■ End licensure practices that fail to distinguish between the skills and knowledge needed to teach elementary and secondary grades.

It is virtually impossible and certainly impractical for Texas to ensure that a K-12 special education teacher knows all the subject matter he or she is expected to be able to teach, especially considering state and federal expectations that special education students should meet the same high standards as other students. While the broad K-12 umbrella may be appropriate for teachers of low-incidence special education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students, who are expected to learn grade-level content. Until recently it appeared that Texas had requirements that did distinguish between elementary and secondary teachers within its K-12 license, but that rule has been repealed.

- Require that elementary special education candidates pass a rigorous content test as a condition of initial licensure.
 - To ensure that special education teacher candidates who will teach elementary grades possess sufficient knowledge of the subject matter at hand, Texas should require a rigorous content test that reports separate passing scores for each content area. Texas should also set these passing scores to reflect high levels of performance. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential. Texas requires a content test of special education teachers on a probationary license, but this does not apply to all special education teachers.
- Ensure that secondary special education teachers possess adequate content knowledge.
 - Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Texas's current policy of requiring no subject-matter testing is problematic and will not help special education students to meet rigorous learning standards. To provide a middle ground, Texas should consider a customized HOUSSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

Figure 20

Content test requirements

Figure 21

Science of reading requirements

Figure 22

Teacher Prep Review findings about special education teacher prep

EXAMPLES OF BEST PRACTICE

Although all states have weaknesses when it comes to special education teachers' preparedness to meet the instructional requirements of college- and careerreadiness standards for students, both Indiana and New York are notable for addressing the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these standards.

Unfortunately, states are also weak in other areas of special education teacher preparation. However, three states—Missouri, New York and Rhode Island—are worthy of mention for taking steps in the right direction in ensuring that all special education teachers know the subject matter they are required to teach. These three states require that elementary special education candidates pass the same elementary content tests, which are comprised of individual subtests, as general education elementary teachers.

Secondary special education teachers in New York must pass a multi-subject content test for special education teachers comprised of three separately scored sections. Rhode Island requires its secondary special education teachers to hold certification in another secondary area. Secondary special education teachers in Missouri can either take a multi-subject test comprised of four separately scored sections or a single-subject secondary assessment.

Which states require subject-matter testing for special education teachers?

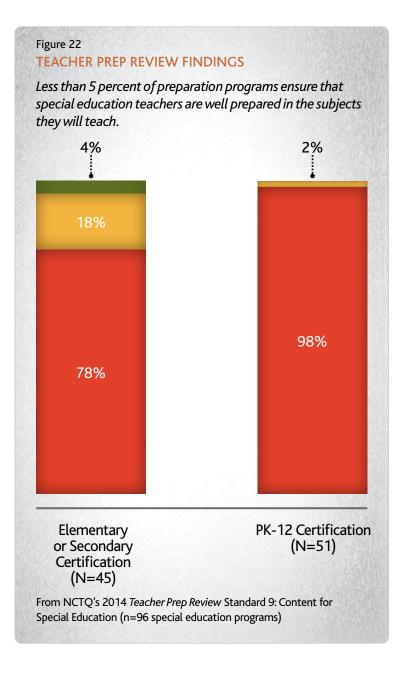

Elementary Subject-Matter Test					
Required for an elementary special education license	Alabama, Iowa, Louisiana, Massachusetts, Missouri ¹ , New Jersey, New York, Pennsylvania ² , Rhode Island, West Virginia ³ , Wisconsin				
Required for a K-12 special education license	Colorado, Idaho, North Carolina				
Secondary Subject-Matter Test(s)					
Tests in all core subjects required for secondary special education license	Missouri¹, New York⁴, Wisconsin⁵				
Test in at least one subject required for secondary special education license	Louisiana, New Jersey, Pennsylvania², Rhode Island, West Virginia³				
Required for a K-12 special education license	None				
Missouri offers a K-12 certification but candidates must pass either the elementary multi-content assessment or the middle/secondary multi-content assessment.					
2. In Pennsylvania, a candidate who opts for dual certification in elementary or secondary special education and as a reading specialist does not have to take a content test.					
3. West Virginia also allows elementary special education candidates to earn dual certification in early childhood, which would not require a content test. Secondary special education candidates earning a dual certification as a reading specialist are similarly exempted.					
New York requires a multi-subject content test specifically geared to secondary special education candidates. It is divided into three subtests.					

Figure 19

Missouri, New Jersey, Oregon and Vermont issue a K-12 certificate, but candidates must meet discrete elementary and/or secondary requirements.

5. Wisconsin requires a middle school level content area test which does not report subscores for each area.

These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

Admission into Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

- 1. The state should limit admission to teacher preparation programs to candidates in the top half of the college-going population.
- 2. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs. Alternatively, academic proficiency could be demonstrated by grade point average.

RAISING THE BAR FOR TEACHER PREP THROUGH HIGHER ADMISSION STANDARDS

NCTQ has repeatedly found that too many teacher preparation programs are in need of major improvement, graduating first-year teachers lacking skills and content knowledge adequate to thrive in the classroom. One important way states can raise the bar for teacher preparation programs is to set more ambitious admission requirements for new elementary, secondary and special education teachers. This is even more relevant and important as the increasing expectations of college- and career-readiness standards demand more from teachers academically. A key criterion for admissions is evidence of a strong academic background, and states should require programs to select candidates from the top half of the college-going population. Countries like Singapore and Finland are even more restrictive in admissions; the top half goal is realistic and achievable while representing a significantly higher standard for programs throughout the United States. Until recently, few states had rigorous academic standards for admission, but with states like Rhode Island and Delaware significantly raising the bar by taking the lead in establishing higher standards and new accreditation requirements from CAEP, this is beginning to change.

TEXAS

ADMISSION INTO TEACHER PREP SNAPSHOT

State requires a minimum GPA of 3.0 for admission into teacher prep.

State requires a test normed to college-bound population prior to admission to prep program.

Yes

No

Texas requires that its education preparation programs only admit candidates that first pass the Texas Higher Education Assessment (THEA), a test of academic proficiency that is designed for the general college population, not just for teacher candidates. The state has set minimum scores for admission at levels that appear to be relatively selective when compared to the academic qualifications of applicants to education programs nationwide. The state requires either a minimum GPA of 2.75 or documentation that a candidate's work, business or career experience demonstrates achievement equivalent to the academic achievement represented by the GPA requirement. The work exception may not be used by a program to admit more than 10 percent of any cohort of candidates.

Supporting Research

Texas Administrative Code Title 19 Part 7 Rule 227.10 Texas Statutes Chapter 21 Subchapter B Sec. 21.0441

RECOMMENDATIONS

 Ensure that teacher preparation program candidates are required to achieve a rigorous score on the test of academic proficiency.

Texas is commended for requiring that its programs use an assessment demonstrating that candidates are academically competitive with all peers, regardless of their intended profession. The state should make sure that its cut-score for the THEA is set at the 50th percentile, as requiring a common test normed to the general college population with a rigorous cut-score allows for the selection of applicants in the top half of their class while also facilitating program comparison.

Increase the GPA requirement.

Requiring only a 2.75 GPA sets a low bar for the academic performance of the state's prospective teachers. Texas should consider using a higher GPA requirement for program admission in combination with a test of academic proficiency. A sliding scale of GPA and test scores would allow flexibility for candidates in demonstrating academic ability. When using such multiple measures, a sliding scale that still ensures minimum standards would allow students to earn program admission through a higher GPA and a lower test score, or vice-versa.

TEXAS RESPONSE TO ANALYSIS Texas noted that in addition to the THEA, a candidate may demonstrate basic skills by meeting the alternative requirements of the Texas Success Initiative which include performance standards on the SAT, ACT and STAAR End of Course assessments.

SUMMARY OF ADMISSION INTO TEACHER PREP FIGURES

- Figure 23

 Test of academic proficiency requirements
- **Figure 24**GPA requirements
- Figure 25

 Teacher Prep Review findings about admissions

EXAMPLES OF BEST PRACTICE

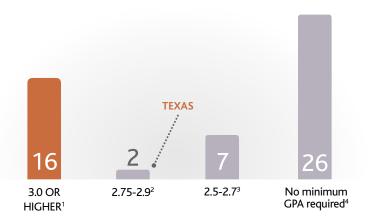

While many states now require CAEP accreditation which includes a standard requiring strong admission practices, **Rhode Island** and **Delaware** have set requirements independent of the accreditation process, ensuring that the states' expectations are clear. Both states require a test of academic proficiency normed to the general college-bound population rather than a test that is normed just to prospective teachers. Delaware also requires teacher candidates to have a 3.0 GPA or be in the top 50th percentile for general education coursework completed. Rhode Island also requires an average cohort GPA of 3.0, and, beginning in 2016, the cohort mean score on nationally-normed tests such as the ACT, SAT or GRE must be in the top 50th percentile. In 2020, the requirement for the mean test score will increase from the top half to the top third.

^{1.} Requirements for admissions test normed to college-bound population is based on CAEP accreditation standards, not state's own admission policy.

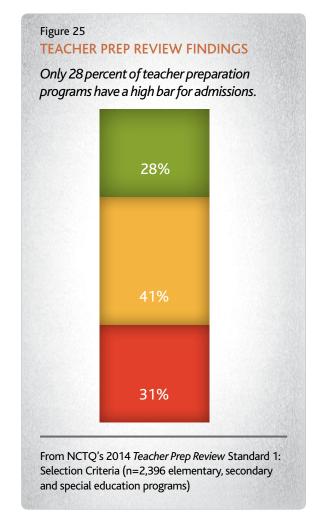

^{2.} Candidates in Oklahoma also have the option of gaining admission with a 3.0 GPA.

Figure 24

Do states require a minimum GPA for admission to teacher prep?

- Strong Practice: Delaware, District of Columbia⁵, Georgia⁶, Hawaii⁵, Louisiana⁵, Michigan⁵, Mississippi⁶, New Jersey⁶, New York⁵, North Carolina⁵, Oklahoma⁷, Pennsylvania⁸, Rhode Island, South Carolina⁵, Utah, Virginia⁵
- 2. Kentucky, Texas
- 3. Alabama, Arkansas, Connecticut⁹, Florida, Nebraska, South Dakota, Wisconsin¹⁰
- Alaska, Arizona, California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Tennessee, Vermont, Washington, West Virginia, Wyoming
- 5. Required minimum GPA of 3.0 is based on CAEP accreditation standards, not state's own admission policy.
- 6. The 3.0 GPA requirement is a cohort average; individual candidates in Mississippi and New Jersey must have a 2.75 GPA. Individual candidates in Georgia must have a 2.5 GPA.
- 7. Candidates in Oklahoma also have the option of gaining admission by passing a basic skills test.
- 8. Students can also be admitted with a combination of a 2.8 GPA and qualifying scores on the basic skills test or SAT/ACT.
- 9. Connecticut requires a B- grade point average for all undergraduate courses.
- 10. The GPA admission requirement is 2.5 for undergraduate and 2.75 for graduate programs.

Teacher Preparation Program Accountability

Key Components

(The factors considered in determining the states' ratings for this topic.)

- The state should incorporate preparation to teach to college- and career-readiness standards into its accountability requirements for teacher preparation programs.
- 2. The state should collect data that connects student achievement gains to teacher preparation programs. Such data can include value-added or growth analyses conducted specifically for this purpose or evaluation ratings that incorporate objective measures of student learning to a significant extent.
- 3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
- 4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.
- The state should retain full authority over its process for approving teacher preparation programs.

How well are states ensuring that teacher preparation programs are accountable for their performance?

Teacher Prep Program Accountability Analysis: **Texas**

HOLDING PREPARATION PROGRAMS ACCOUNTABLE FOR RESULTS

The ultimate goal of teacher preparation programs should be to produce teachers who are effective in educating their students and ensure that they are ready for college and career. As programs operate by virtue of state approval, it is the state's responsibility to connect approval to accountability measures that ensure high performance. While this goal may have been hard to assess a few years ago, that is no longer the case. Redesigned evaluations of teacher effectiveness in the majority of states offer an opportunity for states to collect meaningful objective data on the performance of program graduates. To date, few states connect their process of approving teacher preparation programs to measurable outcome data about programs' graduates.

TEXAS

TEACHER PREP ACCOUNTABILITY SNAPSHOT

State collects data that connects student achievement gains to teacher preparation programs.

State collects other meaningful data that reflect program performance.

State has set minimum standards for program performance.

State publishes an annual report card on its own website.

State retains full authority over its approval process.

Yes

No

Texas's approval process for its traditional and alternate route teacher preparation programs is on the right track but could do more to hold programs accountable for the quality of the teachers they produce.

Commendably, to measure the performance of its teacher preparation programs, Texas requires that programs provide student achievement data regarding the academic achievement gains of students taught by the programs' graduates, averaged over the first three years of teaching. The state also relies on other objective, meaningful data to measure the performance of teacher preparation programs. Texas collects data on certification examinations; to calculate pass rates, it divides the number of successful last attempts made by candidates who have finished the program requirements by the total number of last attempts made by those candidates. It also gathers information regarding beginning teach-

RECOMMENDATIONS

Establish the minimum standard of performance for each category of data.

In order to make use of the data Texas already collects and publishes for accountability purposes, it is critical that the state establish minimum standards for teacher preparation program performance for each category of data. The state should be mindful of setting rigorous standards for program performance, as its current requirement that 80 percent of program completers must pass their licensing exams is too low a bar. Programs should be held accountable for meeting rigorous standards, and there should be consequences for failing to do so, including loss of program approval.

Maintain full authority over teacher preparation program approval.

Texas should ensure that it is the state that considers the evidence of program performance and makes the decision about whether programs should continue to be authorized to prepare teachers.

er performance, as measured by the results of beginning teacher appraisals by school administrators. Texas also offers ongoing support by field supervisors to beginning teachers during their first year in the classroom.

Texas requires all programs to post an annual report on the state's website that includes satisfaction data, completer and employer surveys, average entrance exam scores for program participants, average GPA of participants, percentage of program participants obtaining teaching positions and three-year retention rates.

Regrettably, however, Texas fails to apply any transparent, measurable criteria for conferring program approval. The state requires that 80 percent of program completers must pass their licensure exams. However, the 80 percent pass-rate standard, while common among many states, sets the bar quite low and is not a meaningful measure of program performance.

In Texas, there is some overlap of accreditation and state approval. Review teams are comprised solely of CAEP members, and the state has delegated its program review process to CAEP.

TEXAS RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Texas noted several changes that were adopted related to teacher preparation program accountability at the August 2014 SBEC meeting.

In a subsequent response, Texas asserted that the state has set performance standards for two of its performance indications. The state added that it retains full authority over its program approval process.

SUMMARY OF TEACHER PREP PROGRAM **ACCOUNTABILITY FIGURES**

Figure 26

Accountability requirements

Figure 27

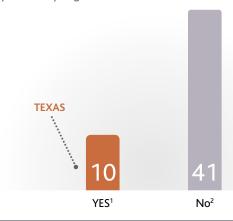

Use of student achievement data

EXAMPLES OF BEST PRACTICE

No state has yet implemented a full accountability system for teacher preparation that features data, including student achievement gains, connected to teacher preparation programs (not just the institution level); has clear minimum standards of performance for those data; and publishes the results for use by prospective teachers, hiring school districts and the general public. Some states are well on their way. Georgia and Louisiana collect student achievement gains and set minimum standards of performance, while Ohio and Tennessee have published report cards that include connections to student achievement gains.

Figure 27 Do states connect student achievement data to teacher preparation programs?

- 1. Strong Practice: Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee, Texas
- 2. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia³, Hawaii³, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland³, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York³, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
- 3. Included in state's Race to the Top plan, but not in policy or yet implemented.

- 1. For traditional preparation programs only.
- 2. State does not distinguish between alternate route programs and traditional preparation programs in public reporting.
- 3. For alternate routes only.

Teacher Preparation Policy Priorities for **Texas**

Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of
 informational texts as well as incorporate complex informational texts into classroom instruction.
 Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.
 Priority for elementary and special education teacher preparation.

Additional priorities for elementary teacher preparation:

- Require a rigorous assessment in the science of reading instruction.
- Require a content specialization in an academic subject area.

Additional priorities for secondary teacher preparation:

• Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

Additional priorities for special education teacher preparation:

- Eliminate the K-12 special education certificate and require licenses that differentiate between preparation of elementary and secondary teacher candidates.
- Require elementary special education candidates to pass a rigorous content test, as well as a rigorous assessment in the science of reading instruction.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

Hold preparation programs accountable:

■ Set minimum standards for program performance with consequences for failure to meet those standards.
