**Are New Teachers Being
Prepared for College- and
Career-Readiness Standards?**

2014 State Teacher Policy Yearbook

National Council on Teacher Quality

Acknowledgments

STATES

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Although this year's edition did not require the extensive review that comprehensive editions require, we still wanted to make sure that we captured all relevant policy changes and that states' perspectives were represented. Every state formally received a draft of the policy updates we identified in June 2014 as well as a draft of analyses and recommendations for the new indicators related to college- and career-readiness standards for comment and correction. States also received a final draft of their reports a month prior to release. All but two states responded to our inquiries. While states do not always agree with our recommendations, their willingness to engage in dialogue, explain their differing points of view and often acknowledge the imperfections of their teacher policies are important steps in moving forward.

FUNDERS

The primary funders for the 2014 *Yearbook* were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- Gleason Family Foundation
- J.A. and Kathryn Albertson Foundation
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

STAFF

Sandi Jacobs, *Project Director*

Kathryn M. Doherty, *Special Contributor*

Kelli Lakis, *Lead Researcher*

Phil Lasser and Lisa N. Staresina, *Researchers*

Special thanks to Leigh Zimnisky and Justin Rakowski at Ironmark for their design of the 2014 *Yearbook*. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original *Yearbook* design and ongoing technical support.

Teacher Preparation Policy Priorities for Wisconsin

Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of informational texts as well as incorporate complex informational texts into classroom instruction.
Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.
Priority for elementary, middle, secondary and special education teacher preparation.
- Ensure teachers are prepared to intervene and support students who are struggling with reading.
Priority for middle and secondary teacher preparation.

Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires a meaningful passing score for each area.
- Require a content specialization in an academic subject area.

Additional priorities for middle school teacher preparation:

- Require teacher candidates to pass a content test in every core area they are licensed to teach.

Additional priorities for secondary teacher preparation:

- Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

Additional priorities for special education teacher preparation:

- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

Raise admission requirements:

- Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.

Teacher Preparation in Wisconsin

The 2014 *State Teacher Policy Yearbook* keeps the spotlight on the critical issue of teacher preparation. In addition to updating the full set of teacher preparation policies reviewed in last year's comprehensive edition, the 2014 *Yearbook* casts a critical eye on whether states have established requirements for teacher preparation and licensure that help to ensure that teachers are ready for the increased demands of states' college- and career-readiness standards for K-12 students.

2014 Teacher Prep Policy Update for Wisconsin

Based on a review of state legislation, rules and regulations, NCTQ has identified the following recent teacher prep policy changes in Wisconsin:

■ Elementary Teacher Preparation in Reading

Wisconsin now requires the Foundations of Reading Test for the Middle Childhood-Early Adolescence (MC-EA) license. This license is for developmental levels ages 6 through 12 or 13 (grades 1-8).

Test Requirements

http://www.wi.nesinc.com/PageView.aspx?f=GEN_FOR.html

■ Assessing Professional Knowledge

All candidates for licensure will be required to complete and pass edTPA beginning in the 2016-2017 school year.

edTPA

<http://edtpa.aacte.org/state-policy>

Wisconsin Response to Policy Update

States were asked to review NCTQ's identified updates and also to comment on policy changes related to teacher preparation that have occurred in the last year, pending changes, or teacher preparation in the state more generally.

Wisconsin was helpful in providing NCTQ with additional information about policy changes related to teacher preparation.

Wisconsin noted that during 2013-2014, the state drafted content guidelines (program standards) in mathematics and English language arts and reading. The state indicated that Common Core State standards were used in both drafts, and that the process will be completed in fall 2014.

Wisconsin also noted that the first report of teacher preparation program effectiveness will be published by the end of 2014.

Elementary Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should ensure that all elementary teachers are sufficiently prepared for the ways that college- and career-readiness standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new elementary teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new elementary teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new elementary teachers of English language arts are prepared to support struggling readers.
2. The state should require that new elementary teachers, including those who can teach elementary grades on an early childhood license, pass a rigorous test of reading instruction in order to attain licensure.
3. The state should ensure that all elementary teacher candidates, including those who can teach elementary grades on an early childhood license, possess sufficient content knowledge in all core subjects, including mathematics.
4. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 45 credit hours to ensure appropriate depth in the core subject areas of English, mathematics, science, social studies and fine arts.
5. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement ensures that prospective teachers have taken higher-level academic coursework.

How well are states ensuring that elementary teachers are prepared for college- and career-readiness standards?

11

Alaska, Arizona, Hawaii, Iowa, Kansas, Montana, Nebraska, Nevada, North Dakota, Ohio, South Dakota

9

Colorado, Georgia, Illinois, Louisiana, Maine, Maryland, Michigan, Oklahoma, Oregon

PREPARING ELEMENTARY TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

The new demands of college- and career-readiness standards for students heighten the need for elementary teachers to have a strong content background in all of the subject matter taught in the elementary grades. Wisconsin, like most states, has adopted such standards and must ensure that its preparation and licensure requirements for new teachers address this need.

Currently, Wisconsin allows each school district to determine the exact age-level band for each license. The following grade spans are approximations based on the state's definitions. The elementary license which is referred to as the early childhood to middle childhood license, covers birth to age 11 (grade 6). The state also offers a "middle childhood through early adolescence level" license which applies to children ages 6 through 12 or 13, making it the equivalent of a generalist 1-8 license. Wisconsin also offers an early childhood license for birth to age 8 (grade 3). Key licensing requirements for elementary school teachers in Wisconsin include:

WISCONSIN ELEMENTARY TEACHER PREP SNAPSHOT

	State requires passing a content test in each of the four core subjects.
	State requires adequate test on the science of reading.
	State requires academic content specialization.
	State has adequate/appropriate requirements for teachers who teach elementary grades on an early childhood license.

 Yes
  No

In addition to the strong content background called for by college- and career-readiness standards, teacher candidates must also be prepared for the key instructional shifts that differentiate these standards from their predecessors. Wisconsin requires its elementary teachers to pass its Foundations of Reading assessment, which requires teachers to "understand how to apply reading comprehension skills and strategies to informational/expository texts." The framework then offers an extensive list of examples for achieving this competency.

Neither teacher standards nor testing frameworks address incorporating literacy into all academic subjects.

Regarding struggling readers, the Foundations of Reading test requires that teachers be able to do the following:

RECOMMENDATIONS

- **Ensure that elementary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students.**

Incorporate informational text of increasing complexity into classroom instruction.

Although Wisconsin is on the right track with its requirement of the Foundations of Reading test, which addresses knowledge of informational texts, the in-depth coverage of the topic is presented as examples. Therefore, the extent to which this information is required is unclear. Wisconsin is encouraged to make certain that its framework captures the major instructional shifts of college- and career-readiness standards, thereby ensuring that all elementary teachers have the ability to adequately incorporate complex informational text into classroom instruction.

Incorporate literacy skills as an integral part of every subject.

To ensure that elementary students are capable of accessing varied information about the world around them, Wisconsin should also—either through testing frameworks or teacher standards—include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

- **Require all elementary teacher candidates—including candidates for an early childhood license—to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects, including mathematics.**

Wisconsin should ensure that its elementary content test is appropriately aligned with its college- and career-readiness standards. The state should require all candidates teaching elementary grades to earn separate, meaningful passing scores for each core subject covered on the test, including reading/language arts, math, science and social studies. A candidate may achieve a passing score and still be seri-

- Understand formal and informal methods for assessing reading development—for example, assessment of the reading development of individual students (e.g., struggling readers)
- Understand multiple approaches to reading instruction—for example, awareness of strategies and resources for supporting individual students (e.g., struggling readers).

WISCONSIN RESPONSE TO ANALYSIS

Wisconsin noted that during 2013-2014 it drafted licensure program content guidelines (program standards) in math and English language arts and reading and will finish the content guidelines in fall 2014. The state added that Common Core State Standards were used in this process, and that content guidelines are used by its preparation programs to develop curriculum and performance assessments. As content guidelines for other subject areas are developed, the Wisconsin Standards for Literacy in all Subjects will also be utilized. The state also plans to utilize the content guidelines work to review its currently adopted content tests.

Supporting Research

<http://standards.dpi.wi.gov/files/cal/pdf/las-stds.pdf>

RECOMMENDATIONS CONTINUED

ously deficient in a particular subject area. The state should assess mathematics content with a rigorous assessment tool, such as the test required in Massachusetts, that evaluates mathematics knowledge beyond an elementary school level and challenges candidates' understanding of underlying mathematics concepts.

■ **Require elementary teacher candidates to complete a content specialization in an academic subject area.**

In addition to enhancing content knowledge, this requirement would ensure that prospective teachers in Wisconsin take higher-level academic coursework. The requirement also provides an important safeguard in the event that candidates are unable to successfully complete clinical practice requirements. With an academic concentration (or better still a major or minor), candidates who are not ready for the classroom and do not pass student teaching can still be on track to complete a degree.

■ **Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.**

specific set of standards or establish more comprehensive coursework requirements for elementary teacher candidates that align with college- and career-readiness standards to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 45 credit hours in the core subject areas of English, mathematics, science, social studies and fine arts.

EXAMPLES OF BEST PRACTICE

Both **Arkansas** and **California** ensure that elementary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. These states specify that elementary teacher candidates must have the ability to not only build content knowledge and vocabulary through careful reading of informational and literary texts, but also to challenge students with texts of increasing complexity.

Candidates are also required to incorporate literacy skills as an integral part of every subject and are prepared to intervene and support students who are struggling.

In addition, **Indiana** ensures that all candidates licensed to teach the elementary grades, including early childhood education candidates, possess the requisite knowledge of core content and of the key elements of scientifically based reading instruction before entering the classroom. Elementary and early childhood teacher candidates are required to pass a content test comprised of four independently scored subtests, including mathematics. In addition, these candidates are required to pass a comprehensive assessment that tests the five elements of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Elementary teacher candidates in Indiana must also earn either a major or minor in an academic content area.

Massachusetts's MTEL mathematics subtest continues to set the standard in this area by evaluating mathematics knowledge beyond an elementary school level and challenging candidates' understanding of underlying mathematics concepts.

1. Alaska does not require testing for initial licensure.

2. Massachusetts and North Carolina require a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math.

3. Only teachers of grades 4 and 5 are required to pass a content test in Ohio.

TEACHER PREP REVIEW FINDINGS

Only 11 percent of preparation programs ensure that elementary teachers are well prepared in the subjects they will teach.

Just 34 percent of preparation programs provide adequate training to elementary teachers in the science of reading instruction.

From NCTQ's 2014 *Teacher Prep Review* Standard 6: Elementary Content (n=1,166 elementary programs) and Standard 2: Early Reading (n=959 elementary and special education programs)

Figure 7

1. These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.
2. Early childhood candidates may pass either multiple subjects (subscores) or content knowledge (no subscores) test.

Middle School Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should ensure that all middle school teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new middle school teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new middle school teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new middle school teachers of English language arts are prepared to support struggling readers.
2. The state should require that new middle school teachers pass a licensing test in every core academic area they are licensed to teach.
3. The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.

How well are states ensuring that middle school teachers are prepared for college- and career-readiness standards?

16

Alaska, Arizona, California, Hawaii, Idaho, Maine, Michigan, Montana, Nebraska, New Mexico, Oklahoma, Oregon, South Dakota, Utah, Washington, Wyoming

5

Colorado, Massachusetts, Nevada, North Dakota, **WISCONSIN**

PREPARING MIDDLE SCHOOL TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

The middle school years are critical to students' education, but, too often, states fail to distinguish the knowledge and skills needed by middle school teachers from those needed by an elementary teacher. Middle school teachers should not only be prepared to teach grade-level content, but should also be prepared to meet the increased instructional requirements of college- and career-readiness standards for students.

Regrettably, Wisconsin offers a generalist license for grades 1-8. Key licensing requirements for middle school teachers in Wisconsin include:

**WISCONSIN
MIDDLE SCHOOL TEACHER PREP SNAPSHOT**

State requires teachers to pass a content test for each subject they teach.

State requires middle school teachers to hold a middle grade or secondary license.

Yes

No

Preparation and licensure requirements for middle school teachers must address more than just content knowledge; the key instructional shifts articulated in college- and career-readiness standards must also be incorporated. Wisconsin's content test for its "middle childhood through early adolescence level" license (1-8) is the Praxis II Middle School: Content Knowledge (5146) test, which does not include the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students.

Neither teacher standards nor testing frameworks in other content areas address incorporating literacy skills.

Wisconsin has no requirements for the preparation of middle school teachers that address struggling readers.

Praxis Tests

www.ets.org/praxis

RECOMMENDATIONS

- **Ensure that middle school teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students.**

Incorporate informational text of increasing complexity into classroom instruction.

Either through testing frameworks or teacher standards, Wisconsin should specifically address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students.

Incorporate literacy skills as an integral part of every subject.

To ensure that middle school students are capable of accessing varied information about the world around them, Wisconsin should also include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

Support struggling readers.

Wisconsin should articulate requirements ensuring that middle school teachers are prepared to intervene and support students who are struggling. While college- and career-readiness standards will increase the need for all middle school teachers to be able to help struggling readers to comprehend grade-level material, training for English language arts teachers in particular must emphasize identification and remediation of reading deficiencies.

- **Require content testing in all core areas.**

Wisconsin should require subject-matter testing for all middle school teacher candidates in every core academic area they intend to teach as a condition of initial licensure. To ensure meaningful middle school content tests, the state should set its passing scores to reflect high levels of performance.

WISCONSIN RESPONSE TO ANALYSIS

Wisconsin noted that during 2013-2014, it drafted licensure program content guidelines (program standards) in math and English language arts and reading and will finish the content guidelines in fall 2014. The state added that Common Core State Standards were used in this process, and that content guidelines are used by its preparation programs to develop curriculum and performance assessments. As content guidelines for other subject areas are developed, the Wisconsin Standards for Literacy in all Subjects will also be utilized. The state plans to utilize the content guidelines work to review its currently adopted content tests.

EXAMPLES OF BEST PRACTICE

Illinois ensures that middle school teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. The state's new standards for the middle grades include the instructional shifts toward building content knowledge and vocabulary through increasingly complex texts and careful reading of informational and literary texts associated with these standards. The standards also address the needs of struggling readers.

Illinois's requirements connecting literacy to all subject areas are particularly noteworthy. All middle school teachers must understand "the role, perspective and purpose of text in specific disciplines" and be able to perform tasks such as scaffolding reading to allow students to understand and learn from challenging text; guiding reading discussions that require students to identify key ideas and details of a text; analyze craft and structure and critically evaluate the text; and model reading strategies to improve comprehension.

In addition, **Georgia, Mississippi, New Jersey** and **South Carolina** ensure that all middle school teacher candidates are adequately prepared to teach middle school-level content. None of these states offers a K-8 generalist license and all require passing scores on subject-specific content tests. Georgia, Mississippi and South Carolina explicitly require at least two content-area minors, and New Jersey requires a content major along with a minor for each additional area of certification.

1. Offers 1-8 license.

2. California offers a K-12 generalist license for all self-contained classrooms.

3. With the exception of mathematics.

4. Oregon offers 3-8 license.

Figure 11

Do middle school teachers have to pass an appropriate content test in every core subject they are licensed to teach?

TEACHER PREP REVIEW FINDINGS

82 percent of programs ensure that middle school teachers are well prepared in the subjects they will teach.

From NCTQ's 2014 *Teacher Prep Review* Standard 7: Middle School Content (n=375 middle school programs). State licensing test requirements are also included in evaluating this standard.

1. Alaska does not require content tests for initial licensure.
2. Candidates teaching multiple subjects only have to pass the elementary test. Single-subject credential does not require content test.
3. For K-8 license, Idaho also requires one single-subject test.
4. Illinois requires candidates to take a middle level core content test if a test is available. It is not clear that this will result in teachers passing a test in each subject and draft test frameworks are not yet available for review.
5. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary grades.
6. New Hampshire requires K-8 candidates to pass a middle school content test in one core area.
7. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass the new assessment with three subtests.
8. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.

Secondary Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should ensure that all secondary teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should require that all new secondary teachers are prepared to incorporate complex texts and academic language into instruction.
 - B. The state should ensure that all new secondary teachers are prepared to incorporate literacy skills as an integral part of every subject.
 - C. The state should ensure that all new secondary teachers of English language arts are prepared to support struggling readers.
2. The state should require that secondary teachers pass a licensing test in every subject they are licensed to teach.
3. The state should require secondary general science and general social studies teachers to pass a subject-matter test of each discipline they are licensed to teach.
4. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

How well are states ensuring that secondary teachers are prepared for college- and career-readiness standards?

Secondary Teacher Prep Analysis: **Wisconsin**

PREPARING SECONDARY TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

To be prepared to meet the instructional requirements of college- and career-readiness standards for their students, secondary teachers must be experts in the subject matter they teach. States should ensure that secondary teachers have sufficient content knowledge in all the subjects they are licensed to teach.

Currently, Wisconsin allows each school district to determine the exact age-level band for each license. The secondary single-subject grade span is an approximation based on the state's definitions. Wisconsin offers single-subject secondary licenses to teach grades 4–12. Key licensing requirements for secondary school teachers in Wisconsin include:

**WISCONSIN
SECONDARY TEACHER PREP SNAPSHOT**

	State requires a content test to teach any single core subject.
	State offers only single-subject science certifications or has appropriate requirements for teachers with general science license.
	State offers only single-subject social studies certifications or has appropriate requirements for teachers with general social studies license.
	State requires a content test in order to add an endorsement to a license.

 Yes  No

Not only must secondary teachers possess strong backgrounds in content knowledge as required by college- and career-readiness standards, they must also be able to address the key instructional shifts associated with the standards. Wisconsin addresses some of the instructional shifts toward building content knowledge and vocabulary through careful reading of informational and literary texts associated with the state's college- and career-readiness standards for students through its required assessment for English language arts teachers, the Praxis II English Language Arts: Content Knowledge (5038) test.

Neither teacher standards nor secondary tests in other content areas address incorporating literacy skills.

Wisconsin has no requirements for the preparation of secondary teachers that address struggling readers.

RECOMMENDATIONS

- **Ensure that secondary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students.**

Incorporate informational text of increasing complexity into classroom instruction.

Although Wisconsin's required secondary English language arts content test addresses informational texts, the state should strengthen its policy and ensure that teachers are able to challenge students with texts of increasing complexity.

Incorporate literacy skills as an integral part of every subject.

To ensure that secondary students are capable of accessing varied information about the world around them, Wisconsin should also include specific requirements regarding literacy skills and using text as a means to build content knowledge in history/social studies, science, technical subjects and the arts.

Support struggling readers.

Wisconsin should articulate requirements ensuring that secondary teachers are prepared to intervene and support students who are struggling. While college- and career-readiness standards will increase the need for all secondary teachers to be able to help struggling readers to comprehend grade-level material, training for English language arts teachers in particular must emphasize identification and remediation of reading deficiencies.

- **Require secondary teachers with umbrella certifications to pass a content test for each discipline they are licensed to teach.**

By allowing general social studies and general science certifications—and only requiring general knowledge exams for each—Wisconsin is not ensuring that these secondary teachers possess adequate subject-specific content knowledge. The state's required general social studies assessment combines

Subject Assessment Test Guidelines

<http://www.dpi.state.wi.us/tepd/px2subjguide.html>

WISCONSIN RESPONSE TO ANALYSIS

Wisconsin noted that, during 2013-2014, it drafted licensure program content guidelines (program standards) in math and English language arts and reading and will finish the content guidelines in fall 2014. The state added that Common Core State Standards were used in this process, and that content guidelines are used by its preparation programs to develop curriculum and performance assessments. As content guidelines for other subject areas are developed, the Wisconsin Standards for Literacy in all Subjects will be used. The state also plans to use the content guidelines work to review its currently adopted content tests.

RECOMMENDATIONS CONTINUED

all topical areas (e.g., history, geography, economics), and its required general science assessment combines subject areas that include biology, chemistry and physics. Neither assessment reports separate scores for each area. Therefore, candidates could answer many—perhaps all—chemistry questions, for example, incorrectly, yet still be licensed to teach chemistry to high school students.

3. Alaska⁵, Arizona⁶, California, Colorado, Hawaii, Montana, Washington, Wyoming

4. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.

5. Alaska does not require content tests for initial licensure.

6. Candidates with a master's degree in the subject area do not have to pass a content test.

EXAMPLES OF BEST PRACTICE

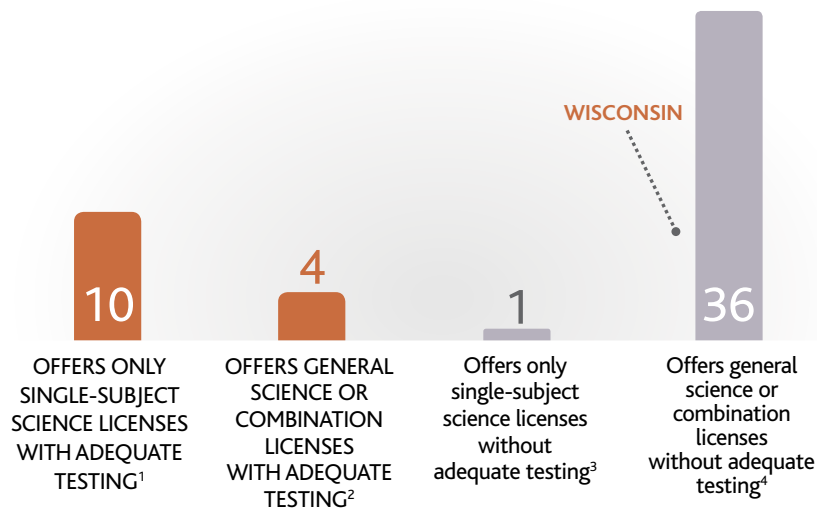

Arkansas has done more than other states to ensure that secondary teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students. Not only does the state address the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these new standards in its educator competencies for secondary English language arts teachers, it also requires teachers to incorporate literacy skills into all content areas. For example, the secondary social studies competency to "incorporate disciplinary literacy" states that "reading competencies for literacy in history/social studies for grades 7-12 include the ability to read informational texts in history and social studies closely and critically to analyze the key ideas and details as well as craft and structure with the purpose of integrating knowledge and ideas both within and across texts." A similar competency exists for both the life science and physical science secondary certifications.

Indiana, Minnesota and Tennessee require that all secondary teacher candidates pass a content test to teach any core subject—both as a condition of licensure and to add an additional field to a secondary license. Further, neither of these states offers secondary certification in general social studies or science; all teachers must be certified in a specific discipline.

Also worthy of mention is **Missouri**, which requires general social studies teachers to pass a multi-content test with six independently scored subtests. Missouri also offers a general science license that can only be used to teach general science courses. All other science teachers must be certified in a specific discipline.

Figure 15

Do states ensure that secondary general science teachers have adequate subject-matter knowledge?

1. **Strong Practice:** Florida, Indiana, Kansas, Kentucky, Massachusetts, Minnesota, New York, South Dakota, Tennessee, Virginia

5. Minnesota's test for general social studies is divided into two individually scored subtests.

6. Candidates with a master's degree in the subject area do not have to pass a content test.

7. Oklahoma offers combination licenses without adequate testing.

Figure 17

TEACHER PREP REVIEW FINDINGS

Less than 40 percent of preparation programs ensure that secondary teachers are well prepared in the subjects they will teach.

From NCTQ's 2014 *Teacher Prep Review* Standard 8: High School Content (n=1,110 high school programs). State licensing test requirements are also considered in evaluating this standard.

Special Education Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should ensure that all special education teachers are sufficiently prepared for the ways that college- and career-readiness English language arts standards affect instruction of all subject areas. Specifically,
 - A. The state should ensure that all new secondary special education teachers are prepared to support struggling readers.
 - B. The state should require that all new secondary special education teachers are prepared to incorporate complex texts and academic language into instruction.
 - C. The state should ensure that all new secondary special education teachers are prepared to incorporate literacy skills as an integral part of every subject.
2. The state should require that new elementary special education teachers pass a rigorous test of reading instruction in order to attain licensure.
3. The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
4. All elementary special education candidates should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
5. The state should ensure that secondary special education teachers possess adequate content knowledge.

How well are states ensuring that special education teachers are prepared for college- and career-readiness standards?

PREPARING SPECIAL EDUCATION TEACHERS FOR COLLEGE- AND CAREER-READINESS STANDARDS

Although most special education students are expected to meet the same high college- and career-readiness standards as typical students, too many states set an even lower bar for the preparation and licensure requirements of special education teachers. States must ensure that special education teachers are well grounded in all of the subject matter they will be licensed to teach.

Currently, Wisconsin offers special education licenses to teach middle childhood-early adolescence (ages 6-12 or 13) and early adolescence through adolescence (ages 10-21). Key licensing requirements for special education teachers in Wisconsin include:

**WISCONSIN
SPECIAL ED TEACHER PREP SNAPSHOT**

- ☒ State only offers discrete elementary and secondary special education licenses.
- ☒ Elementary subject-matter test required for special education license.
- ☒ Secondary test in at least one subject area required for secondary special education license.

☒ Yes ☒ No

Special education teachers must also be prepared for the key instructional shifts that differentiate college- and career-readiness standards from previous student standards.

Wisconsin requires special education teachers to pass its Foundations of Reading test, which requires teachers to “understand how to apply reading comprehension skills and strategies to informational/expository texts.” The state then offers an extensive list of examples for achieving this competency, which incorporate the instructional shifts in the use of text associated with Wisconsin’s college- and career-readiness standards for students.

Neither teacher standards nor testing frameworks in other content areas address incorporating literacy skills.

Wisconsin addresses the needs of struggling readers in its Foundations of Reading test.

Supporting Research

Foundations of ReadingTest

<http://www.wisninc.com/>

Wisconsin Administrative Code, PI 34.27, -.28, -.29

RECOMMENDATIONS

- **Ensure that special education teachers are prepared to meet the instructional requirements of college- and career-readiness standards for students.**

Incorporate informational text of increasing complexity into classroom instruction.

Although Wisconsin is on the right track with its requirement of the Foundations of Reading test, which addresses knowledge of informational texts, the in-depth coverage of the topic is presented as examples. Therefore, the extent to which this information is required is unclear. Wisconsin is encouraged to make certain that its framework captures the major instructional shifts of college- and career-readiness standards, thereby ensuring that all special education candidates have the ability to adequately incorporate complex informational text into classroom instruction.

Incorporate literacy skills as an integral part of every subject.

To ensure that special education students are capable of accessing varied information about the world around them, Wisconsin should—either through testing frameworks or teacher standards—include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.

- **Require that elementary special education candidates pass a rigorous content test as a condition of initial licensure.**

To ensure that special education teacher candidates who will teach elementary grades possess sufficient knowledge of the subject matter at hand, Wisconsin should require a rigorous content test that reports separate passing scores for each content area. Wisconsin should also set these passing scores to reflect high levels of performance. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

WISCONSIN RESPONSE TO ANALYSIS

Wisconsin noted that, during 2013-2014, it drafted licensure program content guidelines (program standards) in math and English language arts and reading and will finish the content guidelines in fall 2014. The state added that Common Core State Standards were used in this process, and that content guidelines are used by its preparation programs to develop curriculum and performance assessments. As content guidelines for other subject areas are developed, the Wisconsin Standards for Literacy in all Subjects will also be used. The state plans to use the content guidelines work to review its currently adopted content tests. Once this work is completed, Wisconsin will move into its special education licensure program content guidelines project.

Supporting Research

<http://standards.dpi.wi.gov/files/cal/pdf/las-stds.pdf>

RECOMMENDATIONS CONTINUED

■ Ensure that secondary special education teachers possess adequate content knowledge.

Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Wisconsin's current policy of only requiring a middle school-level general content test is problematic and will not help special education students to meet rigorous learning standards. To provide a middle ground, Wisconsin should consider a customized HOUSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

Teacher Prep Review findings about special education teacher prep

EXAMPLES OF BEST PRACTICE

Although all states have weaknesses when it comes to special education teachers' preparedness to meet the instructional requirements of college- and career-readiness standards for students, both **Indiana** and **New York** are notable for addressing the instructional shifts toward building content knowledge and vocabulary through increasingly complex informational texts and careful reading of informational and literary texts associated with these standards.

Unfortunately, states are also weak in other areas of special education teacher preparation. However, three states—**Missouri**, **New York** and **Rhode Island**—are worthy of mention for taking steps in the right direction in ensuring that all special education teachers know the subject matter they are required to teach. These three states require that elementary special education candidates pass the same elementary content tests, which are comprised of individual subtests, as general education elementary teachers.

Secondary special education teachers in New York must pass a multi-subject content test for special education teachers comprised of three separately scored sections. Rhode Island requires its secondary special education teachers to hold certification in another secondary area. Secondary special education teachers in Missouri can either take a multi-subject test comprised of four separately scored sections or a single-subject secondary assessment.

Figure 20

Which states require subject-matter testing for special education teachers?

Elementary Subject-Matter Test	
Required for an elementary special education license	Alabama, Iowa, Louisiana, Massachusetts, Missouri ¹ , New Jersey, New York, Pennsylvania ² , Rhode Island, West Virginia ³ , WISCONSIN
Required for a K-12 special education license	Colorado, Idaho, North Carolina
Secondary Subject-Matter Test(s)	
Tests in all core subjects required for secondary special education license	Missouri ¹ , New York ⁴ , WISCONSIN ⁵
Test in at least one subject required for secondary special education license	Louisiana, New Jersey, Pennsylvania ² , Rhode Island, West Virginia ³
Required for a K-12 special education license	None

1. Missouri offers a K-12 certification but candidates must pass either the elementary multi-content assessment or the middle/secondary multi-content assessment.

2. In Pennsylvania, a candidate who opts for dual certification in elementary or secondary special education and as a reading specialist does not have to take a content test.

3. West Virginia also allows elementary special education candidates to earn dual certification in early childhood, which would not require a content test. Secondary special education candidates earning a dual certification as a reading specialist are similarly exempted.

4. New York requires a multi-subject content test specifically geared to secondary special education candidates. It is divided into three subtests.

5. Wisconsin requires a middle school level content area test which does not report subscores for each area.

Figure 19

1. Missouri, New Jersey, Oregon and Vermont issue a K-12 certificate, but candidates must meet discrete elementary and/or secondary requirements.

TEACHER PREP REVIEW FINDINGS

Less than 5 percent of preparation programs ensure that special education teachers are well prepared in the subjects they will teach.

From NCTQ's 2014 *Teacher Prep Review* Standard 9: Content for Special Education (n=96 special education programs)

1. These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

Admission into Teacher Preparation

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should limit admission to teacher preparation programs to candidates in the top half of the college-going population.
2. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs. Alternatively, academic proficiency could be demonstrated by grade point average.

How well are states ensuring that teacher prep programs have rigorous admission standards?

18

Alaska, Arizona, California, Colorado, Idaho, Kansas, Maine, Maryland, Massachusetts, Minnesota, Montana, Nevada, New Mexico, North Dakota, Ohio, South Dakota, Vermont, Wyoming

8

Alabama, Arkansas, Florida, Illinois, Iowa, Missouri, Nebraska, Oregon

10

Connecticut, Indiana, Kentucky, New Hampshire, Oklahoma, Pennsylvania, Tennessee, Washington, West Virginia, **WISCONSIN**

2

Georgia, Mississippi

13

Delaware, District of Columbia, Hawaii, Louisiana, Michigan, New Jersey, New York, North Carolina, Rhode Island, South Carolina, Texas, Utah, Virginia

Admission into Teacher Prep Analysis: Wisconsin

RAISING THE BAR FOR TEACHER PREP THROUGH HIGHER ADMISSION STANDARDS

NCTQ has repeatedly found that too many teacher preparation programs are in need of major improvement, graduating first-year teachers lacking skills and content knowledge adequate to thrive in the classroom. One important way states can raise the bar for teacher preparation programs is to set more ambitious admission requirements for new elementary, secondary and special education teachers. This is even more relevant and important as the increasing expectations of college- and career-readiness standards demand more from teachers academically. A key criterion for admissions is evidence of a strong academic background, and states should require programs to select candidates from the top half of the college-going population. Countries like Singapore and Finland are even more restrictive in admissions; the top half goal is realistic and achievable while representing a significantly higher standard for programs throughout the United States. Until recently, few states had rigorous academic standards for admission, but with states like Rhode Island and Delaware significantly raising the bar by taking the lead in establishing higher standards and new accreditation requirements from CAEP, this is beginning to change.

**WISCONSIN**
ADMISSION INTO TEACHER PREP SNAPSHOT

	State requires a minimum GPA of 3.0 for admission into teacher prep.
	State requires a test normed to college-bound population prior to admission to prep program.
	Yes
	No

Wisconsin requires that approved undergraduate teacher preparation programs only accept teacher candidates who have passed a basic skills test, the Praxis I. Although the state sets the minimum score for this test, it is normed just to the prospective teacher population. The state also allows teacher preparation programs to exempt candidates who demonstrate equivalent performance on a college entrance exam. Wisconsin also requires a 2.5 GPA for admission to an undergraduate program. To promote diversity, Wisconsin allows programs to admit up to 10 percent of the total number of students admitted who have not passed the basic skills test.

Educator Testing Requirements

<http://tepd.dpi.wi.gov/licensing/wisconsin-educator-testing-requirements>

RECOMMENDATIONS

- **Require all teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs.**

Even though the state's policy permitting programs to admit up to 10 percent of students who have not passed the basic skills test is part of a laudable goal to promote diversity, allowing this exemption is risky because of the low bar set by the Praxis I (see next recommendation).

- **Require preparation programs to use a common test normed to the general college-bound population.**

Wisconsin should require an assessment demonstrating that candidates are academically competitive with all peers, regardless of their intended profession. Requiring a common test normed to the general college population would allow for the selection of applicants in the top half of their class, as well as facilitate program comparison.

- **Increase the GPA requirement.**

Requiring only a 2.5 GPA sets a low bar for the academic performance of the state's prospective teachers. Wisconsin should consider using a higher GPA requirement for program admission in combination with a test of academic proficiency. A sliding scale of GPA and test scores would allow flexibility for candidates in demonstrating academic ability. When using such multiple measures, a sliding scale that still ensures minimum standards would allow students to earn program admission through a higher GPA and a lower test score, or vice-versa.

- **Consider requiring candidates to pass subject-matter tests as a condition of admission into teacher programs.**

In addition to ensuring that programs require a measure of academic performance for admission, Wisconsin might also want to consider requiring content testing prior to program admission as opposed to at the point of program completion. Program candidates are likely to have completed coursework that

WISCONSIN RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Wisconsin did not indicate any policy updates related to admission to teacher preparation.

covers related test content in the prerequisite classes required for program admission. Thus, it would be sensible to have candidates take content tests while this knowledge is fresh rather than wait two years to fulfill the requirement, and candidates lacking sufficient expertise would be able to remedy deficits prior to entering formal preparation.

Figure 23

SUMMARY OF ADMISSION INTO TEACHER PREP FIGURES

■ Figure 23

Test of academic proficiency requirements

■ Figure 24

GPA requirements

■ Figure 25

Teacher Prep Review findings about admissions

EXAMPLES OF BEST PRACTICE

While many states now require CAEP accreditation which includes a standard requiring strong admission practices, **Rhode Island** and **Delaware** have set requirements independent of the accreditation process, ensuring that the states' expectations are clear. Both states require a test of academic proficiency normed to the general college-bound population rather than a test that is normed just to prospective teachers. Delaware also requires teacher candidates to have a 3.0 GPA or be in the top 50th percentile for general education coursework completed. Rhode Island also requires an average cohort GPA of 3.0, and, beginning in 2016, the cohort mean score on nationally-normed tests such as the ACT, SAT or GRE must be in the top 50th percentile. In 2020, the requirement for the mean test score will increase from the top half to the top third.

1. Requirements for admissions test normed to college-bound population is based on CAEP accreditation standards, not state's own admission policy.

2. Candidates in Oklahoma also have the option of gaining admission with a 3.0 GPA.

Figure 24

Do states require a minimum GPA for admission to teacher prep?

1. **Strong Practice:** Delaware, District of Columbia⁵, Georgia⁶, Hawaii⁵, Louisiana⁵, Michigan⁵, Mississippi⁶, New Jersey⁶, New York⁵, North Carolina⁵, Oklahoma⁷, Pennsylvania⁸, Rhode Island, South Carolina⁵, Utah, Virginia⁵
2. Kentucky, Texas
3. Alabama, Arkansas, Connecticut⁹, Florida, Nebraska, South Dakota, Wisconsin¹⁰
4. Alaska, Arizona, California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Tennessee, Vermont, Washington, West Virginia, Wyoming
5. Required minimum GPA of 3.0 is based on CAEP accreditation standards, not state's own admission policy.
6. The 3.0 GPA requirement is a cohort average; individual candidates in Mississippi and New Jersey must have a 2.75 GPA. Individual candidates in Georgia must have a 2.5 GPA.
7. Candidates in Oklahoma also have the option of gaining admission by passing a basic skills test.
8. Students can also be admitted with a combination of a 2.8 GPA and qualifying scores on the basic skills test or SAT/ACT.
9. Connecticut requires a B- grade point average for all undergraduate courses.
10. The GPA admission requirement is 2.5 for undergraduate and 2.75 for graduate programs.

Figure 25

TEACHER PREP REVIEW FINDINGS

Only 28 percent of teacher preparation programs have a high bar for admissions.

From NCTQ's 2014 *Teacher Prep Review* Standard 1: Selection Criteria (n=2,396 elementary, secondary and special education programs)

Teacher Preparation Program Accountability

Key Components

(The factors considered in determining the states' ratings for this topic.)

1. The state should incorporate preparation to teach to college- and career-readiness standards into its accountability requirements for teacher preparation programs.
2. The state should collect data that connects student achievement gains to teacher preparation programs. Such data can include value-added or growth analyses conducted specifically for this purpose or evaluation ratings that incorporate objective measures of student learning to a significant extent.
3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.
5. The state should retain full authority over its process for approving teacher preparation programs.

How well are states ensuring that teacher preparation programs are accountable for their performance?

HOLDING PREPARATION PROGRAMS ACCOUNTABLE FOR RESULTS

The ultimate goal of teacher preparation programs should be to produce teachers who are effective in educating their students and ensure that they are ready for college and career. As programs operate by virtue of state approval, it is the state's responsibility to connect approval to accountability measures that ensure high performance. While this goal may have been hard to assess a few years ago, that is no longer the case. Redesigned evaluations of teacher effectiveness in the majority of states offer an opportunity for states to collect meaningful objective data on the performance of program graduates. To date, few states connect their process of approving teacher preparation programs to measurable outcome data about programs' graduates.

**WISCONSIN**
TEACHER PREP ACCOUNTABILITY SNAPSHOT

	State collects data that connects student achievement gains to teacher preparation programs.		
	State collects other meaningful data that reflect program performance.		
	State has set minimum standards for program performance.		
	State publishes an annual report card on its own website.		
	State retains full authority over its approval process.		
	Yes		No

Wisconsin's approval process for its traditional and alternate route teacher preparation programs could do more to hold programs accountable for the quality of the teachers they produce.

Wisconsin requires programs to submit a list of program completers who have been recommended for licensure, and performance of graduates will be used to evaluate preparation programs. Beginning in 2013-2014, each program must display its passage rate on the first attempt of recent graduates on licensure exams, and a system will be developed to publicly report these measures of performance for each preparation program. However, Wisconsin has not set minimum standards for teacher preparation program performance for each category of data it collects that can be used for accountability purposes.

RECOMMENDATIONS

■ Collect data that connect student achievement gains to teacher preparation programs.

As one way to measure whether programs are producing effective classroom teachers, Wisconsin should consider the academic achievement gains of students taught by programs' graduates, averaged over the first three years of teaching. Data that are aggregated to the institution (e.g., combining elementary and secondary programs) rather than disaggregated to the specific preparation program are not useful for accountability purposes. Such aggregation can mask significant differences in performance among programs.

■ Report other meaningful data that reflect program performance.

Although measures of student growth are an important indicator of program effectiveness, they cannot be the sole measure of program quality for several reasons, including the fact that many programs may have graduates whose students do not take standardized tests. The accountability system in Wisconsin must therefore include other objective measures that show how well programs are preparing teachers for the classroom, such as:

1. Evaluation results from the first and/or second year of teaching;
2. Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;
3. Average raw scores of teacher candidates on licensing tests, including academic proficiency, subject matter and professional knowledge tests;
4. Number of times, on average, it takes teacher candidates to pass licensing tests
5. Five-year retention rates of graduates in the teaching profession.

Further, in the past three years, no programs in the state have been identified as low performing—an additional indicator that programs lack accountability.

Wisconsin maintains control over its approval process.

2011 Wisconsin Act 166

WISCONSIN RESPONSE TO ANALYSIS

While not asked to respond to the full analysis for this section, Wisconsin did note that the first report of teacher preparation program effectiveness will be published by the end of 2014.

RECOMMENDATIONS CONTINUED

■ Establish minimum standards of performance.

Merely collecting the types of data described above is insufficient for accountability purposes. The next and perhaps more critical step is for Wisconsin to establish precise minimum standards for teacher preparation program performance for each category of data. Programs should then be held accountable for meeting these standards, and there should be consequences for failing to do so, including loss of program approval.

SUMMARY OF TEACHER PREP PROGRAM ACCOUNTABILITY FIGURES

■ Figure 26

Accountability requirements

■ Figure 27

Use of student achievement data

EXAMPLES OF BEST PRACTICE

No state has yet implemented a full accountability system for teacher preparation that features data, including student achievement gains, connected to teacher preparation programs (not just the institution level); has clear minimum standards of performance for those data; and publishes the results for use by prospective teachers, hiring school districts and the general public. Some states are well on their way. **Georgia** and **Louisiana** collect student achievement gains and set minimum standards of performance, while **Ohio** and **Tennessee** have published report cards that include connections to student achievement gains.

Figure 27

Do states connect student achievement data to teacher preparation programs?

1. **Strong Practice:** Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee, Texas

2. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia³, Hawaii³, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland³, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York³, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

3. Included in state's Race to the Top plan, but not in policy or yet implemented.

Figure 26

1. For traditional preparation programs only.

2. State does not distinguish between alternate route programs and traditional preparation programs in public reporting.

3. For alternate routes only.

Teacher Preparation Policy Priorities for Wisconsin

Prepare all teachers to meet the instructional shifts of college- and career-readiness standards for students.

- Strengthen preparation requirements to ensure teacher candidates have the ability to address the use of informational texts as well as incorporate complex informational texts into classroom instruction.
Priority for elementary, middle, secondary and special education teacher preparation.
- Through testing frameworks or teacher standards, include literacy skills and using text to build content knowledge in history/social studies, science, technical subjects and the arts.
Priority for elementary, middle, secondary and special education teacher preparation.
- Ensure teachers are prepared to intervene and support students who are struggling with reading.
Priority for middle and secondary teacher preparation.

Additional priorities for elementary teacher preparation:

- Require all elementary teacher candidates—including candidates for an early childhood license—to pass a rigorous content test that assesses knowledge of all core subjects, including mathematics, and requires a meaningful passing score for each area.
- Require a content specialization in an academic subject area.

Additional priorities for middle school teacher preparation:

- Require teacher candidates to pass a content test in every core area they are licensed to teach.

Additional priorities for secondary teacher preparation:

- Require secondary science and social studies teachers to pass a content test for each discipline they are licensed to teach.

Additional priorities for special education teacher preparation:

- Require elementary special education candidates to pass a rigorous content test as a condition of initial licensure.
- Ensure secondary special education teachers possess adequate content knowledge for the grades and subjects they teach.

Raise admission requirements:

- Limit admission to teacher preparation programs to candidates in the top half of the college-going population, measured by a test normed to the general college-bound population or minimum GPA.

Hold preparation programs accountable:

- Collect performance data to monitor programs, including student achievement gains.
- Set minimum standards for program performance with consequences for failure to meet those standards.
