Push for Quality Faces Uphill Climb for Colorado's Teacher Preparation Programs

National Council on Teacher Quality Releases Second Annual Review of Teacher Preparation Programs

One Colorado Program Earns 'Top Ranked' Status

Washington, DC—The National Council on Teacher Quality (NCTQ) released its [2014 Teacher Prep Review](#), with a much expanded and more comprehensive evaluation of 1,612 teacher preparation programs across the United States, and for the first time, a numeric ranking of programs. University of Colorado Boulder earned national 'Top Ranked' status—a distinction awarded to 107 programs in the nation for overall strong performance.

Among the 29 Colorado programs that were fully evaluated, nine elementary and four secondary programs were strong enough to receive a national ranking. Sixteen programs in Colorado did not receive a numeric rank because their performance was in the bottom half of the national sample.

To ensure that all teachers are well prepared, state leaders and local school districts need to demand that programs improve and, if necessary, look across their state lines for the best sources of well-trained teachers. Districts are also advised to dig deeper into the NCTQ findings to identify programs which may not do well overall but do well on particular standards to meet specific district needs, such as teachers with strong preparation in reading instruction.

“Given the increasing knowledge and skills expected of teachers, it is indeed disappointing that we could not identify more than one exemplary program in Colorado. However, Colorado is by no means unique,” noted Kate Walsh, President of the National Council on Teacher Quality. “The dearth of high-quality programs is a national problem that public school educators, state policymakers and advocates, working alongside higher education, must solve together.”

NCTQ fully evaluated 29 undergraduate and graduate programs housed in 15 Colorado institutions—7 percent more than in 2013. In addition to elementary and secondary programs, NCTQ examined one special education program in the state.

Teacher Prep Review Results for Colorado

Programs earning 'Top Ranked' status in bold

Highest ranked elementary programs (national rank):

- **University of Colorado Boulder – Undergraduate (18)**
- Colorado Christian University – Undergraduate (51)

- Colorado State University - Pueblo – Undergraduate (125)
- Fort Lewis College – Undergraduate (125)
- University of Colorado Colorado Springs – Undergraduate (125)

Highest ranked secondary programs (national rank):

- Jones International University – Graduate (285)
- Colorado State University – Undergraduate (346)
- University of Colorado Denver – Undergraduate (380)
- University of Colorado Boulder – Undergraduate (399)

A [complete list of Colorado rankings](#) is available on the NCTQ website.

NCTQ’s review of teacher preparation programs focuses on the knowledge, skills, and academic attributes new teachers need to be classroom ready when they graduate. Drawing from a set of 18 standards, NCTQ applies the relevant standards to elementary, secondary or special education programs. Findings for Colorado include:

Selectivity: 19 percent of programs in Colorado fully meet this standard, compared to the national average of 28 percent. These six programs select candidates above the 50th percentile in the population of college-attending high school graduates, a relatively modest bar compared to what other high-performing nations require. The undergraduate elementary and secondary programs at Colorado State University earned a Strong Design designation for exceptional performance on this standard.

Early reading instruction: 50 percent of evaluated elementary programs in Colorado meet or nearly meet this standard by preparing teacher candidates in effective, scientifically-based reading instruction, compared to 34 percent of programs nationally. The undergraduate elementary program at Colorado State University – Pueblo earned a Strong Design designation for exceptional performance on this standard.

Student teaching: 3 percent of programs in Colorado were found to ensure a high-quality student teaching experience, in which candidates are assigned only to highly skilled teachers and receive frequent concrete feedback. Five percent of programs nationally require such an experience.

Classroom management: Six Colorado programs (27 percent) fully meet the standard by providing feedback to teacher candidates on specific classroom management strategies to improve classroom behavior. 15 percent of programs across the country meet the standard nationally.

Elementary content preparation: Only two programs (13 percent) in Colorado were found to nearly meet this standard, compared to 11 percent of all elementary programs nationally.

Secondary content preparation: The results were not much better for subject matter preparation of secondary teacher candidates, with only the graduate program at Jones International University fully meeting the standard, compared to the national average of 35 percent of programs.

In addition to analyzing colleges and universities providing traditional teacher preparation, NCTQ [reviewed a sample of secondary alternative certification providers](#) not managed by a university or college. The results for these 85 providers, including two programs in Colorado, were even weaker than for traditional programs. NCTQ found their admissions standards to be too low, efforts to assess subject matter knowledge are inadequate, and too little training or support provided to candidates who are asked to hit the ground running in the classroom. Only one provider out of 85 earned high marks (Teach For America, Massachusetts).

The widespread attention surrounding the *Review* has helped to precipitate considerable activity by policymakers to strengthen teacher preparation. Over the last two years, 33 states have made *significant* changes to laws and regulations to improve teacher preparation, and another seven states have taken steps forward. Colorado was one of ten states which made no changes.

In April of this year, the federal government also made an important move to improve teacher preparation by announcing its intention to strengthen accountability measures for teacher preparation programs and restrict millions in grants to only high-performing programs.

“While we are encouraged by the action that has been taken by some states, we have a lot more work to do to provide future teachers with the world-class training that both they and students deserve,” added Walsh. “We urge policymakers and higher ed leaders to make this issue priority number one so that teachers in this country get the best possible training for the classroom.”

The full [2014 Teacher Prep Review report](#) is available on NCTQ’s website. NCTQ has identified [steps Colorado can take to make meaningful improvements to teacher prep](#) and has provided [guidance to districts](#) on how to identify the best trained teachers.

About NCTQ

The National Council on Teacher Quality is a nonprofit, nonpartisan research and policy organization located in Washington DC. Founded in 2000, NCTQ is committed to restructuring the teaching profession, led by our vision that every child deserves effective teachers. NCTQ is committed to lending transparency and increasing public awareness of the four institutions having the greatest impact on teacher quality: states, teacher preparation programs, school districts, and teachers unions.

Funding for the second edition of the *Review* is provided by 54 foundations, located in 22 states.
