Prep Resources: How to Improve Prep in this Area
Standard 3: English Language Learners
BOOSTER STANDARD — Undergraduate & Graduate Elementary Programs

Follow these steps to improve your preparation program and your score:

1. Provide explicit instruction in the science of early reading – the five core components in the context of classroom – instruction for English Language Learners.
2. Require candidates to demonstrate mastery of early reading instruction for ELLs through assessments and classroom practice.

Components of Effective Reading Instruction

1. **Phonemic awareness** — the knowledge that spoken words can be broken apart into smaller segments of sound known as phonemes.
2. **Phonics** — the knowledge of the correspondence between the sounds (phonemes) and letters or combinations of letters (graphemes) in English.
3. **Fluency** — the ability to recognize words easily, read with greater speed, accuracy, and expression, and to better understand what is read.
4. **Vocabulary** — teaching new words, either as they appear in text, or by introducing new words separately.
5. **Comprehension** — techniques for helping individuals to understand what they read.

A common reason programs do not meet this standard is that they **do not meet the minimal coverage requirements** (at least two lectures and one assignment) for providing early reading instruction for ELL students.

160 programs meet the English Language Learners Standard.

A helpful assignment may be to have teacher candidates practice assessing the reading skills of students whose skills have already been determined by an expert, allowing a comparison of results.

A few programs that meet this standard:
