Licensure Advancement	
Tenure	
Leadership Opportunities	
Dismissal	
Layoffs	

National Council on Teacher Quality
Teacher Policy Strengths and Areas for Growth
Vermont

POLICY AREA	VERMONT'S STRENGTHS	VERMONT'S OPPORTUNITIES FOR GROWTH
AREA 1: GENERAL TEACHER PI	REPARATION	
Program Entry		The state should require that all teacher preparation programs limit admission to applicants with either a minimum 3.0 GPA or those who have scored in the top half of all college-going students on tests of academic proficiency.
Teacher Shortages and Surpluses		The state should publish data on teacher production that connect program completion, certification, and district hiring statistics, and also provide guidance regarding program acceptance numbers.
Program Performance Measures		The state should connect program graduates' student growth data to their teacher preparation programs.
Program Reporting Requirements		The state should hold teacher preparation programs accountable for teacher quality by outlining consequences for programs that do not meet standards, including loss of program approval.
Student Teaching/ Clinical Practice		The state should require that cooperating teachers are selected based on evidence of effectiveness and that the clinical practice experience for candidates for licenses with broad grade spans takes place in at least two developmental grade levels.
AREA 2: ELEMENTARY TEACHE	R PREPARATION	
Content Knowledge	The state requires elementary teacher candidates to pass a content test with individually scored subtests in each of the core content areas.	
Teaching Mathematics	The state's elementary content test includes an independently scored math subtest.	
Teaching Reading		The state should require that elementary teacher candidates pass a science of reading test to ensure knowledge of effective reading instruction and candidates are fully prepared to meet the instructional shifts associated with college- and career-readiness standards.
Licensure Deficiencies		The state should require early childhood education teachers who are eligible to teach elementary grades to pass an elementary content test with individually scored subtests in each of the core content areas, pass a science of reading t and be fully prepared to meet the instructional shifts associated with college- and career-readiness standards.
AREA 3: SECONDARY TEACHE	R PREPARATION	
Middle School Content Knowledge	The state requires middle school teachers to pass a rigorous single-subject content test.	
Middle School Licensure Deficiencies	The state does not allow middle school teachers to teach on a K-8 generalist license.	
Adolescent Literacy		The state should require that all middle school and secondary candidates are fully prepared to meet the instructional shifts associated with college- and career-readiness standards.
Secondary Content Knowledge	The state requires all secondary teachers to pass a single-subject content test as a condition of initial licensure and to add an endorsement to an existing license.	
Secondary Licensure Deficiencies		The state should require secondary general science teachers and secondary social studies teachers to pass a single-subject content test for each discipline they are licensed to teach.
AREA 4: SPECIAL EDUCATION	TEACHER PREPARATION	
Content Knowledge		The state should require elementary special education teachers to pass the same content test as general elementary education teachers and that secondary special education teachers demonstrate content knowledge in core subjects at the secondary level.

at the secondary level.

Teaching Reading		The state should require that elementary special education candidates pass a rigorous assessment in the science of reading instruction and are fully prepared to meet the instructional shifts associated with college- and career-readiness standards.
Licensure Deficiencies		The state should eliminate its K-12 special education certification.
AREA 5: ALTERNATE ROUTE T	EACHER PREPARATION	
Program Entry		The state should increase alternate route admissions requirements by requiring a rigorous test or a GPA of 3.0 or higher.
Preparation for the Classroom		The state should require that all alternate route programs prepare new teachers for the classroom through manageable and relevant coursework, intensive mentoring and induction, and a supervised practice teaching experience.
AREA 6: HIRING		
Requirements for Out-of-State Teachers		The state should require evidence of effective teaching during previous employment for licensure reciprocity, ensure out-of-state teachers meet the state's testing requirements, and offer a standard license to certified out-of-state teachers without unnecessary requirements.
Provisional and Emergency Licensure		The state should ensure teachers' subject-matter knowledge before granting emergency licensure, and restrict emergency licensure to no more than one year.
AREA 7: TEACHER AND PRINC	CIPAL EVALUATION	
Measures of Student Growth		The state should ensure objective evidence of student growth is the determinative factor in teacher evaluations.
Measures of Professional Practice		The state should require observations for all teachers, ensure teacher evaluators are trained and certified, and require the use of multiple or third-party observers with subject-matter expertise.
Frequency of Evaluation and Observation		The state should require that all teachers are evaluated annually and observed multiple times, and that new teachers are supported with feedback early in the year.
Linking Evaluation to Professional Growth		The state should require that teachers are supported with adequate evaluation feedback, aligned professional development, and improvement plans (for ineffective teachers), under a system with at least three rating categories.
Data Systems Needed for Evaluation		The state should formalize its definition of teacher of record and its process for teacher roster verification, develop the capacity to link student-level data and teacher performance, and publish teacher mobility data.
Distributing Teacher Talent Equitably		The state should report school-level data about teacher performance to help support the equitable distribution of teacher talent.
Principal Effectiveness		The state should require that principal effectiveness is determined, in part, by objective measures of student growth and teacher effectiveness/instructional leadership, and that ineffective principals participate in improvement planning.
Principal Evaluation and Observation		The state should evaluate all principals annually, require multiple observations/site visits for all principals, and require principal evaluators to be trained and certified.
AREA 8: TEACHER COMPENS	ATION	
Performance		The state should support performance pay based on evidence of effectiveness.
High-Need Schools and Subjects		The state should support additional pay for working in high-need schools and teaching in shortage subject areas.
Prior Work		The state should encourage additional compensation for new teachers with relevant prior work experience.
AREA 9: RETAINING EFFECTIV	YE TEACHERS	
Licensure Advancement		The state should base licensure advancement and renewal on teacher effectiveness.
Tenure		The state should connect tenure decisions to evidence of teacher effectiveness.
Leadership Opportunities		The state should support teacher leadership opportunities.
Dismissal		The state should enable ineffective classroom performance to be a basis for dismissal, and not allow multiple appeals for teachers who are dismissed.
Layoffs		The state should require districts to consider evidence of effectiveness when determining which teachers to lay off during reductions in force.
