Mission & Vision

MISSION: Educate and prepare each student for college, career, and life

VISION: 100% STUDENT SUCCESS

Statement of Philosophy

Philosophy

Pinellas County Schools (PCS) is committed to a philosophy of continual improvement for students and staff. The appraisal system is designed to promote the continual growth and improvement of instructional staff. The professional growth and improvement should translate, at the classroom level, into an improved quality of instruction and learning opportunities for students.

Goal of the Appraisal system

The goal and expectation of the Instructional Appraisal System is to support incremental growth in order to increase expertise year to year producing gains in student achievement with a powerful cumulative effect.

OVERVIEW

Purpose

The purpose of the Instructional Appraisal System is to increase student learning by continually and incrementally improving the quality of instructional and administrative practice. Pinellas County Schools has established an appraisal system that evaluates the performance of instructional staff, providing feedback, support, and growth opportunities.

Statutory Requirements

Florida Statute (F.S.) 1012.34 requires that evaluations:

- Be conducted at least once a year for classroom teachers, EXCEPT teachers newly hired by the district who must be evaluated at least twice in their first year;
- Are based on at least 50% student learning growth data;
- Are based on four levels of performance: “Highly Effective,” “Effective,” “Needs Improvement” (“Developing” for teachers in their first three years) and “Unsatisfactory,” and;
- Include criteria based on the Florida Educator Accomplished Practices.

In addition, Florida Statute requires that:

- Districts report performance evaluation results from the previous school year to the State by December 1 (1012.34(1)(c), F.S); and,
- Any reductions in workforce be based primarily on performance evaluations (1012.33(5), F.S.).
Redesign & Development Process

In January 2009, to begin revision of the Appraisal System, a review committee was developed to determine what was working and find areas for improvement in alignment with new Florida Department of Education (FLDOE) requirements. The first draft of the Appraisal System was completed in the summer. Differentiated Accountability and Florida’s application for the Race To The Top (RTTT) grant required further revisions during the fall.

In addition to participating in a review workshop, facilitated by St. Petersburg College’s Collaborative Labs team, the committee consulted with the District General Counsel and the Accountability, Assessment & Research department to further support the re-development of the Appraisal System. Prior to submitting the draft to the School Board for approval consideration in May 2010, the evaluation instrument was shared with district, school and union representatives.

Upon approval, the new appraisal system was piloted in fifteen schools during the 2010-2011 school year. The Office of Professional Development collected feedback from instructional personnel and peer reviewers throughout the pilot year. Mandates from the Student Success Act, F.S. 1012.34, and feedback data resulted in a rigorous Appraisal System developed for the purpose of increasing student learning growth by improving the quality of instruction, and supervisory practices.

The Appraisal System is annually revised and submitted to Pinellas County School Board and then to the FLDOE for approval.

ROLES & RESPONSIBILITIES

Instructional Staff Roles & Responsibilities
- Know and understand the rubric and the components of each section
- Utilize feedback and strive to continually improve
- Provide documentation as supporting evidence for non-observable indicators
- Complete an annual self-evaluation
- Utilize the Individual Professional Development Plan (IPDP) to intentionally target growth areas in your practice
- Actively participate in professional learning to continually grow your practice
- Complete all processes required of instructional staff in the evaluation process

Administrator Roles & Responsibilities
- Know and understand the rubric and the components of each section
- Provide training regarding the process and criteria of the appraisal system
- Complete and maintain Appraisal Certification requirements
- Provide on-going observation and substantive feedback to support continual growth
- Facilitate and support the IPDP process
- Support instructional staff in becoming a highly effective educator and create an environment that promotes professional learning
- Complete all processes required of administrative staff in the evaluation process
- Meet all appraisal system deadlines
FLORIDA EDUCATOR ACCOMPLISHED PRACTICES (FEAPs)

The new appraisal system is directly aligned with the Florida Educator Accomplished Practices (FEAPs). The FEAPs are the expectations defining the quality instruction rubric. The rubric was designed, in collaboration with stakeholders, to explain the components of quality instruction and to connect instruction to student achievement.

APPRAISAL SYSTEM

Evaluation Process Components

**Administrative Review**

The Administrative Review is based upon formal and informal observations of practice, as evidenced in the Professional Indicator Rubric, including observations of professionalism through other site-related work requirements and activities.
**Student Growth Data**

As a requirement of the Student Success Act, all teachers must have student achievement data included as a major portion of the summative evaluation. This data is determined by Value-Added measure, which is a statistical technique that uses multiple years of student and test score data to estimate the effects of individual teachers on student growth.

**Professional Development**

Each year, instructional staff members complete an Individual Professional Development Plan (IPDP). In this plan, action steps are proposed. These actions are taken as an intentional study of a portion of your practice. The action plan describes what professional development you will do to improve your practice. This can include MoodleLMS trainings, observing colleagues who are demonstrating best practices, book study, lesson study, PLCs and cross grade level PLCs that are focused on specific topics.

**Evaluation Process Timeline**

![Evaluation Process Timeline Diagram]

- Administrator schedules the formal observation
- Pre-Observation form is completed by teacher
- Post-Observation conference is conducted
- Formal Observation is conducted
- Pre-Observation Conference is conducted
An Appraisal Timeline is included below:

**August – October**
Teacher and administrator review previous year’s evaluation and student performance results. The current year’s IPDP is developed.

**September-December**
The first semester evaluation is completed for new teachers and struggling teachers. The IPDP is reviewed and revised based upon the evaluation results.

**December-February**
Teacher and administrator review IPDP, current student data and formative feedback. Revisions to the IPDP are made.

**April-June**
The teacher completes the Reflection section of the IPDP. The teacher and administrator review and discuss the IPDP as part of the Summative evaluation process. Potential areas of focus for the next year’s IPDP are identified.

**June-August**
The district analyzes evaluation results, gathers feedback regarding IPDPs and makes revisions to improve the process.

**EVALUATION TRAINING**

**Initial Certification**
In order to provide consistency in teacher observations throughout the district, all administrators are required to participate and complete Appraisal Certification Training which includes more than 20 hours of training. This includes a two day certification training which administrators are required to successfully complete. The training is designed to emphasize the importance of the observer assessing the quality of the students’ learning based upon the actions of the teacher. This is a shift in how traditional observations and feedback have taken place in the past.

The accreditation process was facilitated by Cambridge Education to train district staff in lesson observation. Now, accredited district trainers guide groups of five administrators through practice in observing, scripting, and identifying the impact of teacher action upon students and learning. During the two day process, participants complete four observations (two practice observations on Day 1 and on Day 2, one practice and one for certification), practice a pre-conference and a post conference (completed one-on-one with the facilitator) in order to attain their certification in lesson observation.
Calibration

In order to ensure consistency across the district, administrators will take part in a calibration training to assess mastery of the formal observation process. Annually, all school administrators will participate in training in which they will conduct observations, script what they see and then rate their individual observations. The observation results will be reviewed for consistency in order to determine whether calibration criterion has been met. Each administrator will be provided feedback of their performance. Calibration results are used to develop administrator training.
Administrative Review

**Category 1 Teacher**
(New Teachers to PCS & Teachers Scoring an Unsatisfactory)

**Beginning of the Year (Aug-Nov)**
- Provide electronic access to the Appraisal Handbook within the first twenty (20) workdays
- 35 day formal observation cycle
- Success Plan (develop/revise, if necessary)
- IPDP (Administrative Review in MoodleLMS by the end of October)
- Value-Added summative conference (within first 10 days of school)

**Middle of the Year (Dec-Mar)**
- Substantive visits with feedback
- IPDP Administrative Review (February)
- Success Plan (develop/review, if needed)
- Non-renewal notice submission (February)

**End of the Year (April-May)**
- Continued substantive visits with feedback
- Teacher Self-Assessment (due prior to Pre-Observation Conference)
- Formal observation cycle
- Success Plan (develop/review as needed)
- Summative evaluation conference (before the last 4 weeks of the school year)

**Category 2 Teachers**
(Annual Contract)

**Beginning of the Year (Aug-Nov)**
- Provide electronic access to the Appraisal Handbook within the first twenty (20) workdays
- 1 within the first twenty (20) workdays
- Formal observation cycle (Recommended; required in TIF Schools)
- Success Plan (develop/revise, if necessary)
- IPDP (Administrative Review in MoodleLMS by the end of October)
- Value-Added summative conference (within first 10 days of school)

**Middle of the Year (Dec-Mar)**
- Substantive visits with feedback
- IPDP Administrative Review (February)
- Success Plan (develop/review, if needed)
- Non-renewal notice submission (February)

**End of the Year (April-May)**
- Continued substantive visits with feedback
- Teacher Self-Assessment (due prior to Pre-Observation Conference)
- Formal observation cycle
- Success Plan (develop/review as needed)
- Summative evaluation conference (before the last 4 weeks of the school year)

**Category 3 Teacher**
(Continuing Contract & Professional Service Contract)

**Beginning of the Year (Aug-Nov)**
- Provide electronic access to the Appraisal Handbook within the first twenty (20) workdays
- 1 within the first twenty (20) workdays
- Formal observation cycle (Recommended; required in TIF Schools)
- Success Plan (develop/revise, if necessary)
- IPDP (Administrative Review in MoodleLMS by the end of October)
- Value-Added summative conference (within first 10 days of school)

**Middle of the Year (Dec-Mar)**
- Substantive visits with feedback
- IPDP Administrative Review (February)
- Success Plan (develop/review, if needed)
- Non-renewal notice submission (February)

**End of the Year (April-May)**
- Continued substantive visits with feedback
- Teacher Self-Assessment (due prior to Pre-Observation Conference)
- Formal observation cycle
- Success Plan (develop/review as needed)
- Summative evaluation conference (before the last 4 weeks of the school year)
NARRATIVE DEFINITIONS

1. **Formal Observation Cycle**
   a. **Pre-Observation Conference**: The teacher will use the pre-observation conference form, presented in Appendix B, to advise the administrator of what to expect during the data collecting observation. It should take approximately 10-20 minutes to complete. Administrators will ask clarifying questions regarding information on the pre-observation conference form and teacher comments.
   b. **Data Gathering Observation**: Observation phase to assess performance relative to the observable indicators as evidenced in the rubric. To assure inter-rater reliability, all evaluating administrators will participate in training to use the formative observation tools. This phase of the cycle should be at least 30 minutes.
   c. **Post-Observation Conference**: Informed by the results of the pre-observation conference and the data gathering observation, critical conversations will take place to identify specific areas of strength and improvement to develop an improvement plan with support that outlines changes to performance to achieve improved student learning. The final phase of the formal observation cycle should be approximately 10-20 minutes to complete. Teachers needing more specific support will be placed on a Success Plan presented in Appendix E. The teacher receives and signs the observation tool and post-conference form.

2. **Substantive Visits with Feedback (formative walkthrough)**: Informal progress monitoring observations designed to measure progress relative to specific ‘look fors’, which reflect the indicators on the appraisal rubric. These visits should be ongoing and last approximately 10-15 minutes with immediate feedback so that teachers can improve their performance from visit to visit which can produce gains in student learning. These are evaluative.

3. **Walkthroughs**: Non-evaluative observations to help school leaders strategically monitor SIP goals, the climate of the school, and look at school patterns to monitor school improvement goals and to plan for things such as professional development and celebrations.

4. **Success Plan**: Prescribed improvement plan documenting performance concerns. The teacher will be provided with ongoing support and assistance through professional development and in some cases, be assigned a mentor.

5. **Value-Added Student Data**: The Value-Added score reflects the portion of student growth attributed to the teacher, also known as the “teacher effect.” The number of years the individual has at the particular level (individual, school, or district) will determine their Value-Added percentages (40% or 50%). Flow Chart and Business Rules will be presented following revisions for the 2013-2014 school year based upon changes in statute. By the 2014-2015 school year, all teachers will have their own Value-Added score. Florida Statute (1012.34(8)) requires the State Board of Education to establish a process to permit instructional personnel to review
the class roster for accuracy and to correct any mistakes relative to the identity of students for which the individual is responsible for. Beginning in 2012, using the business rules, teachers will use the FLDOE online tool to verify their rosters for Value-Added data.

The verification protocol is as follows:

Verification of your roster is a biannual process which serves many purposes; the first verification was completed in January and we are now beginning the second. The students assigned to you, as a result of verification, may be used for the following: your Value-Added calculation (if you receive one,) for possible future calculations, and many other tools being developed by the State of Florida. It is imperative that your roster be accurate. Even if you do not receive a Value-Added score this year, the roster may be used in future calculations.

The Verification Rules are as follows:

1. The rosters are representative from FTE surveys 2 and 3. The State uses the FTE survey data submitted by school districts to compile teacher rosters. The school district does not have an option to use a timeframe other than that as determined by the survey. The delay between survey week and the roster verification process is due to the state’s survey timeline and when the state compiles the rosters statewide.
2. If a student is on a teacher roster ANY day between the survey period, the student must remain on the roster.
3. Only actual errors are to be considered appropriate for changes
   a. Poor attendance or poor performance is NOT a valid reason for removal of a student
      • Keep in mind that VAM accounts for this in the formula
4. If a student is removed from one teacher’s roster he/she must be added to another teacher’s roster
5. Rosters must represent the reality of who is in each teacher’s classroom

Notes for teachers in unique situations:

1. For co-teacher and inclusion teachers:
   a. Teachers in a classroom in which two or more teachers share responsibility for planning, delivering and evaluating instruction for all students in a class are considered co-teachers. To be considered co-teaching, this delivery system is provided whenever a class/subject is taught by two or more teachers and must continue for the entire class period every day the class is taught. All students will be reflected on both teachers’ rosters.
   b. For “Inclusion” or “Support Facilitation” scheduling methods, the inclusion teacher meets with an individual student or small group of students on an individualized basis within a traditional classroom to supplement and/or reinforce instruction given by the Gen Ed
teacher. Both teachers share in the planning of instruction for the inclusion students. The Gen Ed teacher is considered the primary teacher. The inclusion students are reflected on both teachers’ rosters.

2. Elementary Gifted and PE teachers should be scheduled using the scheduling method that best represents how they serve their students.

a. For example, if both PE teachers share all students they are considered co-teachers and all students will be reflected on both teachers’ rosters; if they each have responsibility for certain classes or grade levels, they are considered “self-contained”, and each teacher’s students will only show on their roster.

Instructions Roster Verification Process

---

Instructions
Teachers may check their roster in “Reports Manager” by:

- Sign in to PCSB website
- Click on “reports”
- Go to the folder called “ProfDevelopment”
- Click on the report called “Students Roster (RSK0025)”
- Select the correct FTE Survey Report following from the dropdown
Please ensure that the survey is as it appears below. Once the report is run (view report), you will see the courses that you are teaching. Below the course, you will see three columns of students. Verify that all the students assigned to you meet the criteria stated in the directions above.
Instructions Roster Verification Process

1. If you DO NOT need to make any changes, NO ACTION is necessary

2. If you need to make amendments based upon the Roster Verification rules, please:
   a. Print the roster
      i. Where it states “select format”, choose “Acrobat (PDF) file”
   1. Click on “export” which appears to the right
   2. Print the PDF document as you would any other document from your computer (save a copy for your records)

Remember to make sure that you see ALL pages in the document. At the top left you can see page 1 of 28. This example document has 28 pages that should be verified
b. Manually note the changes needed
   i. Examples: Add student (full name and ID), Delete student because..., Change course because...

c. Give the printed roster to your DMT by **Due Date**
   i. Keep a copy for your records
   ii. You will not have access to the reports after this date

**Next steps:**
1. The DMT will complete the normal amendment process
2. If a teacher submits a change outside of the Roster Verification rules, the DMT will forward the information to the principal
   a. The Principal will follow up with the teacher to explain why the amendment will not be made
3. The DMT will forward any roster conflicts to the principal for review and decision making
4. The DMT will send a copy of the teacher’s printed report and noted changes, with the amendment information, to the FTE Office
5. DMT’s will complete the amendments by **Due Date**
6. The FTE office will complete amendments

---

**Special Note**

Florida Statute 1012.34(8) requires a state process to permit instructional personnel to review the class roster for accuracy and to correct any mistakes. It is important that you carefully follow the guidelines and only add or remove students according to the rules. Intentional changes that do not fall within the rules will result in deletion of those changes and may result in additional review by district personnel in accordance with the Code of Ethics
**STUDENT PERFORMANCE DATA**

Value-Added student data: The Value-Added score reflects the portion of student growth attributed to the teacher, also known as the “teacher effect.” The number of years the individual has at the particular level (individual, school, or district) determines their Value-Added percentages (40% or 50%).

Florida Statute 1012.34(8) requires a process to permit instructional personnel to review the class roster for accuracy. The verification process is as follows:

1. Information and timeline available in the Instructional Performance Review site for Teachers and Specialists.
2. Each semester instructional staff will verify rosters
3. District will review rosters and complete final submission to the Florida Department of Education as part of the state roster verification process.

**This process is subject to change based upon FLDOE action.**
RATING GUIDELINES

Making Meaning of the Indicator Levels

**Highly Effective**
“Highly Effective” is when the strategy has been implemented correctly and includes all the components at the effective level and now the teacher can focus on innovating within the element. In other words, the teacher monitors students’ understanding of the learning goal, as defined in the effective rating, seamlessly into his/her instruction and now can shift the focus so that 100% of students’ progress towards the learning goal.

“Highly Effective” comes when the teacher has deep understanding of the strategy and the appearance of effortlessness and ease when using the strategy and demonstrates the ability to flexibly modify the use of the strategy based on the feedback from students (non-verbal, verbal) to improve or maximize student learning. The teacher can explain with clear purpose and intentionality his or her rationale for modifying the use of a strategy to maximize learning for groups of students or individual students. For “Highly Effective” the teacher is adjusting and adapting a strategy from the effective level to ensure all students are learning.

“Highly Effective” has the following characteristics:
- The teacher demonstrates monitoring with fluency and ease to see whether the strategy is working or not and makes adjustments to students’ feedback.
- The teacher adds their own innovations to the strategy to make it more effective. For example, the teacher modifies a KWL into a 4-step process and can explain the intentional modification of the strategy and the impact on increasing student learning. In other words, he/she can explain why/how the modified strategy works better for his/her students than the “standard” strategy.
- Teacher intentionally adjusts and tweaks the strategy for his or her students resulting in greater understanding and learning.
- Sometimes it is planned; sometimes it is “on the spot”
As the teacher monitors the effect a strategy is having on learning and notes that it is not working for all students, he/she adjusts and adapts the strategy so that all students are learning. Ask yourself, “Is the strategy having the desired effect on student learning for most or all?”

**Effective**
Of the things identified in the rubric, all are done correctly unless otherwise noted. This is an area of significant yield for raising student learning for teachers to monitor students’ understanding and is the key to being rated at the “Effective” level. It is not just asking questions of some students in order to check for understanding. Evidence of monitoring of learning can be observed in how the teacher obtains feedback from students about their learning through examination and feedback about student work, conferencing with individual and groups of students and use of particular response rate strategies. It is also about monitoring through listening, looking and responding appropriately when students are following the instruction of the teacher or not doing what has been asked of them. Monitoring is also observed when a teacher makes immediate and specific adjustments based on the feedback that the teacher receives from the student. The teacher implements the strategy as outlined and asks, “Is it having the desired effect for all/most students?”
**Developing/Needs Improvement**

Of the strategies identified in the rubric, one or more constructs were not evident or were implemented incorrectly. Or, they were implemented but not monitored for student learning.

**Unsatisfactory**

Of the evidence identified in the rubric (look-fors), none were apparent. Specific example: The teacher is beginning a new unit of instruction and it would be appropriate to establish learning goals and the teacher did not.

**PROFESSIONAL DEVELOPMENT**

**Individual Professional Development Plan (IPDP)**

The purpose of the IPDP is to intentionally and incrementally improve teacher practice in order to increase student achievement. The plan provides an opportunity for analysis of teacher evaluation and student achievement data. Through this analysis instructional staff will reflect upon their professional learning as it relates to impacting student progress; building upon their own professional growth. In order to complete the plan, individuals will review their school-wide initiatives, consider student assessment data, prior year evaluation results and then identify learning goals that focus on student achievement. The IPDP is a requirement of the district and state and a component of the teacher evaluation. The IPDP contains clearly defined goals and activities designed to improve teacher practice. Administrators will meet with staff to discuss their progress and plans at the beginning, middle and end of each school year. Administrator and teacher may document amendments and comments in the notes section.

The Individual Professional Development Plan contains the following sections:

- Demographic Data, Data Analysis,
- Action Plan Development,
- Goal Development, Action Plan Implementation,
- Review and Reflections and Results.

The administrator and teacher both contribute input and notes to the IPDP.

**Teacher Self-Assessment**

The purpose of the teacher self-assessment is to provide teachers with an opportunity to take a reflective look at their current practice, of where they are as related to the indicators and assist them in identifying priority areas for professional growth. The teacher self-assessment form is categorized using the FEAPs and identifies specific indicators for a teacher to rate themselves, using the same ratings as the evaluation. In the IPDP development process, the teacher reviews the previous year’s evaluation results, completes a self-assessment form and then identifies gaps between the current data and performance and the desired state. The teacher and administrator will review this information to identify and establish potential goals for the IPDP.
**Parental Input**

Florida Statute 1012.34(2)c requires that the district “...give parents an opportunity to provide input into employee performance assessment when appropriate.” Each school annually gives notice that they have an opportunity to submit the Parent Input form and submit to the building administrator. This input is included in the formative portion of the Teacher Evaluation. See PCS Parental Input Form in Appendix F.

**Appeals Process**

According to current contract language, as determined through district and PCTA collaboration and negotiation the process for amendment of evaluations is as follows:

Category 2 (Annual Contract) and Category 3 (Professional Services or Continuing Contract) teachers shall have the right to request an appeal through the Area Superintendent in the following cases: Category 2 teachers with an Unsatisfactory evaluation and Category 3 teachers with a Needs Improvement or Unsatisfactory evaluation. The appeal shall be filed in writing with the school principal within five (5) days of receipt of the evaluation. The principal shall issue a written decision within five (5) days thereafter. An appeal may be made to the area superintendent in writing within five (5) days of receipt of the principal’s decision, and the area superintendent’s written decision shall be rendered within five (5) days thereafter. The area superintendent’s decision shall be final, non-appealable, and non-grievable.

APPENDIX B
Pre-observation Conference Form

PINELLAS COUNTY SCHOOLS
PRE-OBSERVATION CONFERENCE FORM

Teacher ___________________________ School Site ___________________________

Subject/Grade ___________________________ Date of Conference ___________________________

Administrator ___________________________ Date/Time of Conference ___________________________

The purpose of the pre-observation conference is to enhance and clarify the understanding of both the teacher and administrator of the classroom observation. The form will guide the discussion led by the teacher.

Directions: The form should be completed by the teacher for the observation time scheduled and given to the administrator prior to the conference.

List the standard(s) and goal(s) to be addressed in the lesson.

________________________________________

Describe what you did to plan for instruction.

________________________________________

Identify the instructional strategies (referenced in the rubric) you will use during the lesson.

________________________________________

________________________________________

________________________________________

List and Sequence the activities

________________________________________

________________________________________

________________________________________

What preceded this lesson?

________________________________________

What will follow the lesson?

________________________________________

Other information to help the administrator better understand the lesson or classroom environment during the observation.

APPENDIX E
SUCCESS PLAN (Sample)
2013-2014 SCHOOL YEAR

➢ Current Behaviors to Improve (as defined in the Professional Indicator Rubric):
  o 
  o 

➢ Support Available to Employee:
  o Principal
  o Assistant Principal
  o Instructional Coach
  o Math/Science Coach
  o Mentor

➢ Calendar Timeline
  o Timeframe for observations

➢ Suggested Activities for Professional Growth:
  o 
  o 
  o 

➢ Teacher Input

__________________________________  ___________________________________
Teacher Signature/Date                  Administrator Signature/Date

➢ Success Plans must be developed collaboratively with the employee.
APPENDIX F

PARENT INPUT FORM AND PARENT/TEACHER INPUT FORM

Attached are two forms that are designed to meet state requirements of providing a mechanism for input into teacher and administrator performance evaluation. Schools are required to advertise this process and make forms available in the school office.

Parent Input Form

(regarding teacher evaluation)

The Parent Input Form (or similar school-based form) may be used by parents regarding input into a teacher evaluation. The administrator decides how much weight is given to the parent input. Forms must be signed to be used for consideration. A copy must be given to the employee. Parent input forms need only be kept on file for one year and then they may be discarded. Forms should be available in the school office. The simplest way to communicate the availability of the form is through the school newsletter.

Parent/Teacher Input Form

(regarding administrator evaluation)

Parent/Teacher Input Form (or a similar school-based form) may be used by parents and teachers to provide input regarding an administrator's evaluation. Forms should be available to parents and teachers in the school office. Forms must be signed and sent to the appropriate Area Superintendent via pony or US mail.

Please be sure to share the information regarding both forms with your parents and staff. Feel free to use the sample notice below as a communication piece for your newsletter.

SAMPLE NEWSLETTER ARTICLE

Parent Input

Pinellas County Schools welcomes input of parents regarding the job performance of district employees. A Parent Input Form is available for parents to give input regarding teacher performance. Also available is a Parent/Teacher Input Form for input regarding administrator performance. Each form requires a signature. A copy of the form will be shared with the employee. Forms are available in the school office.
PINELLAS COUNTY SCHOOLS
PARENT/TEACHER INPUT FORM
(REGARDING ADMINISTRATOR PERFORMANCE)

Pinellas County Schools welcomes the input of parents and teachers regarding the job performance of district administrative employees. When you have completed the form, please return it to appropriate Area Superintendent (see list below) via pony mail (see school secretary for envelope) or by US Mail. Please be sure to retain your copy. The Parent/Teacher Input Forms are available in the main office. All comments will be shared with the employee for professional growth and/or recognition.

PCS Form 3-2807 (Rev. 4/12) Category Y
Review Date 1/13

October 2013
The rubric is the common language of instruction in Pinellas County Schools and can be used as an instrument for self-reflection, assessment, and deliberate conversations among teachers, those responsible for evaluation and those coaching or mentoring colleagues. It is designed to be used as a tool to define performance standards, to help interpret the teacher’s practice, make informed decisions about ongoing professional development and for evaluation purposes. The rubric describes different levels of practice or knowledge. To use the rubric begin with the effective rating description which illustrates that the teacher consistently implements the strategy fluently and monitors the effect on student learning.

### 1.1 Ability to Assess Instructional Needs (FEAP a4)

<table>
<thead>
<tr>
<th>Key Indicator</th>
<th>Highly Effective</th>
<th>Effective</th>
<th>Developing/Needs Improvement</th>
<th>Unsatisfactory</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1a. How do I involve and guide all students in tracking their own progress toward meeting the goals?</strong> <em>(Marzano, 2007)</em></td>
<td>Adjust plans to ensure 100% of students’ progress towards the learning goal</td>
<td>Integrate student self-assessment and reflection of progress toward performance levels using an appropriate criteria/rubric for each learning goal. Provide meaningful and timely feedback on progress toward learning goal. Assist students in setting their personal academic goals and monitoring their growth towards their individual goals. Engage students in peer assessment of work using an appropriate criteria/rubric. Monitors the extent to which students understand their level of performance.</td>
<td>Implement incorrectly or with parts missing</td>
<td>Implementation was called for but not exhibited</td>
</tr>
<tr>
<td><strong>1.1b. How do I use formative assessments to collect and track student progress and guide instruction?</strong> <em>(Danielson, 1996) (Marzano, 2007)</em></td>
<td>Adapt or create new strategies for collecting and tracking student progress to ensure 100% of students’ progress towards the learning goal.</td>
<td>Include a variety of assessments/checks for understanding as a regular part of instruction. Determine student understanding/mastery of the lesson goals. Collect and document student progress using formative assessment results. Monitors the extent to which formative assessment guides student learning.</td>
<td>Implement incorrectly or with parts missing</td>
<td>Implementation was called for but not exhibited</td>

</tr>
<tr>
<td><strong>1.2c. How do I effectively select and utilize an instructional delivery model?</strong> <em>(IRDA, FLDOE)</em> <em>(<a href="http://www.avid.org">http://www.avid.org</a>)</em></td>
<td>Adjust instruction to ensure 100% of students’ progress towards the learning goal</td>
<td>Use an instructional delivery model through a balance of research-based instructional strategies that includes explicit instruction, modeled instruction, guided practice, and independent practice or the 5 E’s appropriately based on student need Monitor the effectiveness of the instructional model on student learning</td>
<td>Implement incorrectly or with parts missing</td>
<td>Implementation was required but not exhibited</td>
</tr>
</tbody>
</table>
| **1.2d. What do I do to help students effectively interact with new knowledge?** *(Marzano, 2007)* | Adjust instruction to ensure 100% of students’ progress towards the learning goal | Use the appropriate instructional elements correctly based on students’ needs:  
- identify critical information  
- organize students to interact with new knowledge  
- preview new content  
- chunk into digestible bites  
- process and elaborate on new information  
- record and represent new knowledge  
- use questioning techniques to promote learning  
Monitor the effectiveness of the selected element(s) on student learning | Implement incorrectly or with parts missing | Implementation was called for but not exhibited |

| 1.2e. What do I do to help students practice and deepen their understanding of new knowledge? (Marzano, 2007) | Adjust instruction to ensure 100% of students' progress towards the learning goal | Use the appropriate instructional elements correctly based on students' needs:  
- review content  
- organize students to practice and deepen knowledge  
- use homework effectively  
- examine similarities and differences  
- examine errors in reasoning  
- practice skills, strategies, and processes  
- revise knowledge  
- use questioning techniques to promote learning  
Monitor the effectiveness of the selected element(s) on student learning | Implement incorrectly or with parts missing.                                    | Implementation was called for but not exhibited |
| 1.2f. What do I do to help students generate and test hypotheses about new knowledge? (Marzano, 2007) | Adjust instruction to ensure 100% of students' progress towards the learning goal | Use the appropriate instructional elements correctly based on students' needs:  
- organize students for cognitively complex tasks  
- engage students in cognitively complex tasks involving generating hypotheses and testing  
- provide resources and guidance  
- use questioning techniques to promote learning  
Monitor the effectiveness of the selected element(s) on student learning | Implement incorrectly or with parts missing                                   | Implementation was called for but not exhibited |
| 1.2g. What do I do to engage students in learning? (IRDA, FLDOE) (Danielson, 1996) (Marzano, 2007) | Adjust instruction to ensure 100% of students' progress towards the learning goal | Use the appropriate instructional elements correctly based on students' needs:  
- Notice and react when students are not engaged  
- Use academic games  
- Manage response rates  
- Use physical movement  
- Maintain a lively pace  
- Demonstrate intensity and enthusiasm  
- Use friendly controversy  
- Provide opportunities for students to talk about themselves  
- Present unusual or intriguing information  
Monitor the effectiveness of the selected element(s) on student learning | Implement incorrectly or with parts missing                                   | Implementation was called for but not exhibited |

| 3.2c. How do I grow and develop professionally? (Danielson, 1996) | Effectively engage in leadership activities by contributing to professional organizations, published literature, professional learning and/or earning an advanced degree to extend my own teaching practice and that of colleagues | Develop and implement an Individual Professional Development Plan (IPDP)  
- Conduct an individual needs assessment by: analyzing disaggregated student data  
- Aligning professional learning to the SIP  
- Incorporating my school or team goals,  
- Utilizing my appraisal results and the results from previous year’s IPDP evaluation  
Implement the plan by:  
- Developing a student achievement (S.M.A.R.T) goal  
- Developing a personal learning goal aligned to the newly identified student achievement goal  
- Participating and demonstrating new professional learning  
- Tracking changes in my professional practice  
- Evaluating the effectiveness of the professional learning on student learning | Participate in professional activities to a limited extent when they are convenient | Implementation was called for but not exhibited |
