

Kansas City Public Schools

District highlights from NCTQ's Roll call: The importance of teacher attendance

The following analysis reflects the 2012–2013 teacher attendance data sent by 40 large urban districts, including Kansas City Public Schools, to the National Council on Teacher Quality. Long-term absences lasting more than 10 consecutive days were not included in order to exclude leave taken for serious illness and maternity/paternity leave.

Kansas City summary

School poverty level	Number of teachers	Average days absent	Attendance rate	Excellent attendance (3 or fewer days absent)	Moderate attendance (4 –10 days absent)	Frequently absent (11 –17 days absent)	Chronically absent (more than 18 days absent)
Overall	234,031	11	94%	16%	40%	28%	16%
Kansas City	974	10	95%	21%	42%	24%	12%
0 – 20%	0	N/A	N/A	N/A	N/A	N/A	N/A
21 – 40%	0	N/A	N/A	N/A	N/A	N/A	N/A
41 – 60%	21	20	89%	0%	29%	19%	52%
61 – 80%	232	9	95%	27%	36%	26%	11%
81 – 100%	721	9	95%	20%	45%	23%	11%

Poverty level of schools was based on students' eligibility for free- and reduced-price lunch.

Average days absent by district

Percentage of teachers by attendance category

Percentage of absences by attendance category

Percentage of teachers in attendance category by district

Excellent attendance (3 or fewer days absent) Moderate attendance (4 - 10 days absent) Frequently absent (11 - 17 days absent) Chronically absent (18 or more days absent)

Excellent attendance (3 or fewer days absent) Moderate attendance (4 - 10 days absent) Frequently absent (11 - 17 days absent) Chronically absent (18 or more days absent)
