Team Educator Acceleration Model

Process and Eligibility Overview

[Logo]

[Logo]
{Intentionally left blank}
KCS TEAM PARTICIPATION

All building-level educators.

(KCS will **not** include the following groups in the TEAM evaluation process: occupational/physical therapists, nurses, behavioral liaisons, vision screeners, birth-pre-K parent instructors, or central office specialists, supervisors, and administrators.)

---

**EVALUATED**

All educators working full-time 120 days or more.
Part-time and job-share teachers working full academic year.

(There will be a condensed observation cycle for part-time or job share teachers; these professional license teachers will have classroom visits - (1) planning/instruction and (2) environment/instruction)

---

**NOT EVALUATED**

Educators working less than 120 days due to leave, hire date, interim contract length. Contractors who are not KCS employees

---

**Single Building**

Administrators complete summative conference.
Supervisors complete one observation on **AP3** license teachers advancing to professional licensure only at the request of the principal

**Itinerant/Pool**

Supervisors complete summative conference.
Building administrator completes an observation based on # days itinerant in building (including school support services).

**Special Education**

All special education teachers will have one observation completed by department supervisor.
## KCS TEAM Taskforce Summary Guidelines

<table>
<thead>
<tr>
<th>Rubric</th>
<th>Educator Groups</th>
<th>Comments</th>
</tr>
</thead>
</table>
| **Standard Educator Rubric** | ✦ Teachers with TVAAS data  
• Core Foundation Teachers Grades 1 – 5, self-contained  
• Core Foundation Teachers Grades 6 – 8, departmentalized (Math, Reading/Language Arts, Science, Social Studies)  
• Core Foundation Teachers Grades 9 – 12, departmentalized (English I, English II, Algebra I, Algebra II, Biology, US History)  
✦ Teachers without TVAAS data  
• Pre-K –K  
• Fine Arts  
• Computer Technology  
• Physical education/Health/Wellness  
• Career and Technical Education  
• World Languages  
• English Language Learner  
• Special Education  
• High School Courses in English, Math, Science and Social studies without state EOC tests  
• JROTC Instructors  
• Vision Teachers (not screeners) | ✦ Apprentice License teachers require a min. of **4 classroom visits**.  
✦ All teachers on a one-year probationary license (e.g. Interim B, Alternative) require a minimum of 4 classroom visits.  
✦ Professional License teachers require a min. of 2 classroom visits.  
✦ Tenure status does not matter in terms of minimum # of required observations – only license designation.  
✦ All requirements are minimums. The statute does not limit the number of observations.  
• IAP and/or **Level 1 TVAAS** teachers will follow apprentice cycle.  
✦ Apprentice license teachers observations must be announced and half unannounced. (Unannounced means no defined “window,” or other advance notice.)  
✦ Half of observations must be in fall semester (first two quarters) and half in spring semester (last two quarters).  
✦ No specific form required for lesson plan.  
**Required forms:** TOWER system, including categorized scripting and teacher observation report. Electronic PIN signature.  
✦ All teachers retiring at end of school year **will** participate in evaluation process.  
✦ All teachers in classroom for less than 120 days due to late hire, approved leave, or interim/supply status, **will not** participate in evaluation process.  
✦ All job share/part-time teachers **will** participate in evaluation process, with full observation cycle.  
**See TEAM Taskforce Recommendations for more details.** |
| **School Services Rubric** | ✦ School Counselors  
✦ School Psychologists  
✦ Social Workers  
✦ Graduation Coaches  
✦ Mentor Coaches  
✦ Child Find General Educators (Pre-K)  
✦ Instructional Coaches | ✦ See comments under Standard Educator Rubric.  
✦ Observations will be 50% unannounced.  
✦ Co-teaching and Mentor Coaches will have all observations and summative conference completed by Supervisor.  
✦ All other support services will have observations completed with supervisors and building administrators based 3 or more days and 2 or less days rule. Supervisors will complete summative conference. |

TEAM Taskforce Evaluation Recommendations

Suggested Observation Pacing

For year 3, the minimum required number of observations for each teacher will be based on licensure status and evaluation scores from the previous year.

- **Coaching Conversations**
  As the school year begins it is important for evaluators to have a targeted conversation with teachers who scored a 1 on their overall evaluation or individual growth score about the number of required observations and what supports they will receive this year to improve student achievement. These initial coaching conversations should take place before the first official observation of the year.

- **Observing Multiple Domains During One Classroom Visit**
  Districts may choose to observe the instruction domain during the same classroom visit as either the planning domain or environment domain. The observation pacing charts below reflect one possible way domain observations may be combined during classroom visits.

- **Announced vs. Unannounced Visits**
  At least half of domains observed must be unannounced, but it is the district’s discretion to have more than half of domains observed unannounced.

Observations done on a professionally licensed teacher are unannounced

- **Evaluation Rosters** – All teachers are included in the evaluation process. The only exceptions are for teachers working for less than 120 days in the school year due to leave, late hire, interim or supply status. (See recommendation on job share and part-time teachers below.)

- **Retiring Teachers** – All teachers who will retire at the end of the school year in May must be included in the annual evaluation process. Teachers retiring at the end of the fall semester can be excluded from the evaluation roster.

- **Time-Card** – Time-card teachers working in a position greater than 50% must have **two combines observations** but will still cover all **3 domains** like a professionally license teacher under the job-share guidelines below.

- **Job-Share** – State statute does not require evaluation for any teacher working less than 120 days. However, the state does not prohibit a district from choosing to do so. As such, Knox County Schools has decided that job-share (including timecard retirees) teachers will participate in TEAM. Because job-share teachers are excluded from the state statute, we have the flexibility to make adjustments to their observation cycle based on their reduced time in the district. (This has been approved by and confirmed with the TDOE.) This condensed schedule should still meet the requirement of at least 60 or 90 minutes of observation time for professional and apprentice license teachers.

- **Professional License** – Will complete **2 combined observations** (due to the reduced time in schools) but will still cover all 3 domains. They have the option to choose 50% unannounced or all announced.

  **Announced** – One lesson-length observation covering the planning and instruction domains.
  **Unannounced** – One lesson-length observation covering the environment and instruction domains.
Observation Process – These are the guidelines for timing and transparency related to the observation process. The formal observation cycle for the school year will begin only after a teacher has completed beginning of year/summative conference. This should be no earlier than the first full week of September.

- **Announced** – The announced observation requires a pre-conference. The Taskforce recommends that the pre-conference occurs 12 – 24 hours in advance of the observation as the final confirmation. **However, the minimum amount of lead time is not specifically mandated in the State Board of Education policy**

- **Unannounced** – There should be no communication around unannounced visits. Principals should not provide a “window” to teachers regarding the timeframe for unannounced visits. They are to be truly unannounced, with no notice from observer, as the law requires.

- **Pre-Conferences** – This should be a coaching conversation to obtain pertinent background about the lesson plan and students involved for additional context, and to address any potential areas of concern before the lesson. Therefore, pre-conferences should provide reasonable time before the observation to allow the teacher an opportunity to reflect and improve upon his or her instructional plan.

**The completion of pre-conferences for announced observation are a part of the process which can be grieved.**

- **Post-Conferences** – Post-conferences must occur within a week (or 5 instructional days) after observation per State Board of Education Policy. We recommend that teacher self-reflection on lesson scores/evidence, as well as reflection narrative, be collected by the observer within 2 – 3 days of observation date. This will aid the observer in the development of the post-conference plan. **The timeliness of post-conferences is a part of the process which means it can be grieved.**

- **Observer Certification** – All administrators, lead teachers, instructional coaches, and content supervisors should complete their observation certification by September 30, 2016. However, in NO circumstances is anyone without proper certification to conduct formal observations. **Observer certification status is a matter of process, which means it can be grieved.**

- **Categorized evidence** – Every observation post-conference should include a record of the evidence associated with every domain and indicator (as captured in the scripting notes via TOWER), as well as the final rating, which **should be shared with the educator** at the end of each post-conference.

- **Teacher Observation Report (Post-Conference Record)** – Every observation post-conference should include a copy of the Teacher Observation Report that details the Observer score and Teacher Self-Reflection scores via TOWER. The Teacher Observation Report should also include the reinforcement and refinement objective. **Knox County Schools will require a reflection narrative to be completed in those designated sections by both the Observer and the Teacher.**

- **Lesson Plans and Other Teacher Provided Documents** – The TEAM Taskforce has supplied a recommended Lesson Plan template. **However, teachers are not required to use this form.**
This is simply a tool. Any lesson plans and other documents collected from the teacher in support of the lesson observation (e.g. seating charts) should be included in the personnel file record. **Teachers are only required to provide a lesson plan for observations that include planning domain.** However, lesson plans are always to be accepted (and encouraged) to provide additional evidence for any observation for which the teacher chooses to provide the information. Moreover, it is acceptable for principals to express an expectation that lesson plans will be completed as a part of responsibilities in Professionalism Domain.

- **Scripting notes** – Scripting notes will be generated via the TOWER tool. This report should be shared with the teacher via the TOWER application.

**TNCompass** – The TDOE will provide all districts access to this internet-based application. However, there should be no observation data recorded directly in the TNCompass. All information captured via TOWER will be uploaded to TNCompass. Observers and teachers have access to the TNCompass to record and review the selections and outcomes for the 35% and 15% student data measures.

**Professionalism Report** – The professionalism rubric should be completed by the evaluator for the teacher at the end of the year, along with the ending of the observation cycle before April 30. The professionalism report should seek input from administrators at multiple schools where the teacher works, if appropriate, as well as input of content supervisor, if appropriate. The results of the Professionalism Report should be shared with the teacher during the End of the Year Conference prior to the end of the teacher contract in May.

**Summative Evaluation Report** – The summative evaluation report will include all observations, professionalism report, student growth data, and student achievement data. Final evaluation reports will not be available via the TEAM Data System until summer break due to the inclusion of student outcome data. However, all data from observations and the professionalism report should be communicated to teachers prior to the end of their contract for the current school year.

**Student Growth Data** – All teachers with individual TVAAS data will use their individual growth data for this 35% of evaluation report. The metric will be based on a 3-year rolling average. Teachers without individual TVAAS data will use 1-year school-wide composite. For instructional coaches and itinerants supporting multiple schools, they will be able use a weighted-average of the school-wide data of the schools they serve, or use the system-wide data for the appropriate grade level.

**Student Achievement Data** – The KCS Growth and Achievement Matrix provides the available options for the 15% other student achievement measure. Teachers and principals will then decide on the 15% “other student achievement data” component. If there is disagreement, the teacher has final say. In cases where TDOE identifies measure selections that are not appropriate, appropriate adjustments will be made. Teachers with individual TVAAS data of Level 3, 4, or 5 may elect to use that data for this portion of the summative evaluation as well. However, they are not required to do so. For teachers with Level 1 or Level 2 TVAAS, they must use another achievement measure. **These agreements must be completed by early November, per TDOE.**
**Final Summative Evaluation Rating** – The TDOE has provided guidelines for what score ranges will correlate with the 5-summative evaluation categories from significantly below to significantly above expectations. See table on next page:
Overall Score Calculation

♦ NIET Best Practices Portal – All returning teachers in TEAM schools have access to this portal. New teachers will be added by September 30. All teachers can reset their passwords with their @knoxschools email address via the NIET site (www.nietbestpractices.org). School leaders should encourage teachers to complete the relevant training modules in conjunction with after-school training sessions during the scrimmage period.

♦ Instructional Coaches – Instructional coaches will NOT participate in formal observation process. They will be certified observers and participate in the scrimmage period through the month of September and beyond. However, no instructional coaches, be they system-wide or full-time in a single school, regardless of funding source (Title I or otherwise), will be permitted to participate in the formal observation cycle. They should not be added to any schedules or planning for announced or unannounced observations as evaluators.

• Post-conference Support – Principals are encouraged to share reinforcement/refinement areas for teachers as appropriate with instructional coaches. This will allow coaches to offer their support in planning and modeling with teachers based on their specific needs. Instructional coaches must hold any observation information in strict confidence, as must all those who have access to teacher observation data.

♦ Lead Teachers – Lead teachers will be leveraged as the building administrators deem appropriate for the observation process. We encourage principals to utilize lead teachers to conduct lesson-length observations, as these teachers should have demonstrated the skill set to credibly do so.

• Performance/Accountability – Administrators should be certain to observe the initial pre- and post-conferences conducted by lead teachers and get feedback from the observed teachers on the quality of those discussions. If the lead teacher is not performing to expectations, the principal should consider the removal of the lead teacher from a position of conducting observations. It is critical to the successful implementation of the TEAM model that lead teachers who are not able to influence professional growth and objectively rate lessons do not remain in their positions for the duration of the school year.

• Substitute Resources – Each TEAM school will be able to schedule their Substitute Allocation via the Aesop tool. Principals should refer to instructions on using “First to the Top” vacancy profile in Aesop.
♦ **Administrators** – Administrators (principal or assistant principals) should see every teacher in the building for at least one observation. *No member of the teaching staff serving in a building full-time should have only lead teachers and/or content supervisors conduct all of their formal observations.* An administrator in the building must be a part of the observation cycles.

- **Best Practices** – These are just a sample of best practices from the field, and principals are free to make their own guidelines as appropriate.
  - Many principals have decided that they will be sure to participate in the observations of all apprentice license teachers in their building. Others have also indicated that they will make a point of participating in the observations of struggling teachers in their buildings.
  - Assistant principals may focus on professionally licensed teachers in terms of the observation cycle.
  - Many schools are beginning with unannounced observation as a formative tool to inform growth plan in first semester, and then completed announced observation in the spring.

♦ **Content/Specialty Supervisors Participation** – Content/Specialty supervisors will participate in the observation/evaluation process at outlined below.

- **AP3 License Teachers** – Content supervisors will participate in the formal observations of an AP3 (moving to professional licensure) teacher only at the request of the principal. Principals should coordinate with the appropriate supervisor if they have a specific concern about a teacher.
- **Special Education** – All special education teachers, regardless of license type, will have one lesson length observation completed by the appropriate supervisor or consultant.
- **Instructional Coaches and Itinerants Evaluation/Observation** – Content supervisors will also be responsible for the summative evaluation of instructional coaches and other itinerants in their respective areas.
  - **School Administrator Participation** – The District C&I Leadership has decided that all principals are expected to participate in the observation process for itinerants/pool positions who work in their building. At most, an itinerant will have half of their classroom observation visits completed by a building principal. The balance will be completed by the appropriate content supervisor. The Supervisor will also complete the Professionalism Report and Summative Conference for the itinerant/pool teacher in collaboration with the principals in the buildings served.
  - **School Services Personnel** – Itinerants who are school services personnel will follow the same outline process as all other itinerants. The Supervisor will also complete the Professionalism Report and Summative Conference for the itinerant/pool teacher in collaboration with the principals in the buildings served.
- Mentoring and Co-Teaching Coaches – All observations, professionalism report, and summative conference will be completed by Supervisor.
♦ **Teaching License Type Rosters** – Human Resources has posted the roster of Apprentice and other *non-* Professional License teachers to intranet site. The Office of Teacher Licensing has stated that all teachers on one-year renewable licenses and all other license types that must “advance” to regular Professional licensing must follow the apprentice license cycle.

♦ **Certified Educator Groups** – The state has specified a number of sub-groups for the annual evaluation process, including the specific instructional rubric to be used. The groups are currently being included and defined as follows for district purposes:

- **Standard Instructional Rubric**
  - **Teachers with TVAAS data**
    - Core Foundation Teachers Grades 1 – 5, self-contained
    - Core Foundation Teachers Grades 6 – 8, departmentalized (Math, Reading/Language Arts, Science, Social Studies)
    - Core Foundation Teachers Grades 9 – 12, departmentalized (English I, English II, Algebra I, Algebra II, Biology, US History)
  - **Teachers without TVAAS data**
    - Pre-K – K
    - Computer Technology
    - Physical education/Health/Wellness
    - Career and Technical Education
    - World Languages
    - English Language Learner
    - Special Education
    - High School Courses in English, Math, Science and Social studies without state EOC tests
    - JROTC
    - Instructional Coaches
    - Vision Teachers (not screeners)

- **School Services Rubric**
  - School Counselors
  - Instructional Coaches
  - School Psychologists
  - Social Workers
  - Graduation Coaches
  - Mentor Coaches
  - Child Find and Pre-k General Educators
  - Speech/Language Therapists
  - Occupational Therapists
  - Audiologists
  - Intervention Mentors
  - Co-teaching Coaches
  - Homebound teachers
  - Assistive Technology
  - Autism Support Team

- **Librarian Rubric**
  - Librarians or Media Specialists will use the entire Librarian/Media Specialists rubric.
Guidance on Overall Level of Effectiveness Calculations

Due to legislative changes made during the 2013 legislative sessions, the calculations for overall levels of effectiveness will depend on whether a teacher has an individual growth score or a school- or system-wide growth score. The examples below show how the overall level of effectiveness would be calculated for a tested teacher with individual growth or for a non-tested teacher with a school- or system-wide growth score. Please note that all teachers who receive an individual growth score must use their individual growth score. This guidance is for informational purposes only. The calculation of overall levels of effectiveness will be done automatically in CODE.

Calculations for Teachers with Individual Growth:

<table>
<thead>
<tr>
<th>Overall Level of Effectiveness Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Overall Observation Score*:</td>
</tr>
<tr>
<td>______ x 50 = _______</td>
</tr>
<tr>
<td>Growth Score:</td>
</tr>
<tr>
<td>______ x 35 = _______</td>
</tr>
<tr>
<td>Achievement Measure Score:</td>
</tr>
<tr>
<td>______ x 15 = _______</td>
</tr>
<tr>
<td>Total Score</td>
</tr>
<tr>
<td>100% 1-3</td>
</tr>
</tbody>
</table>

*This is the average of all scored indicators. Scores on the Professionalism Domain are included in the Overall Observation Score. This overall score is rounded to the hundredths place.

Calculations for Teachers with School- or System-Wide Growth:

<table>
<thead>
<tr>
<th>Overall Level of Effectiveness Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Overall Observation Score*:</td>
</tr>
<tr>
<td>______ x 60 = _______</td>
</tr>
<tr>
<td>Growth Score:</td>
</tr>
<tr>
<td>______ x 25 = _______</td>
</tr>
<tr>
<td>Achievement Measure Score:</td>
</tr>
<tr>
<td>______ x 15 = _______</td>
</tr>
<tr>
<td>Total Score</td>
</tr>
<tr>
<td>100% 1-3</td>
</tr>
</tbody>
</table>

*This is the average of all scored indicators. Scores on the Professionalism Domain are included in the Overall Observation Score. This overall score is rounded to the hundredths place.
- **Converting to Overall Level of Effectiveness:** For tested teachers with individual growth and non-tested teachers with school- or system-wide growth, the total score is then converted to an overall effectiveness rating using the following table:

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Overall Effectiveness Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;200</td>
<td>1</td>
</tr>
<tr>
<td>200-274.99</td>
<td>2</td>
</tr>
<tr>
<td>275-349.99</td>
<td>3</td>
</tr>
<tr>
<td>350-424.99</td>
<td>4</td>
</tr>
<tr>
<td>425-500</td>
<td>5</td>
</tr>
</tbody>
</table>

- **Example Calculation for a Tested Teacher with Individual Growth**

<table>

</tbody>
</table>

  Individual Growth Score: 5 x 25 = 125

  Achievement Score: 5 x 15 = 75

  Average Observation Score: 3.2 x 60 = 192

  Total Score: 392

  **Level of Effectiveness: 4**

Revised 5/14/13
Teacher Effectiveness Descriptors

**Significantly Above Expectations (425-500):** A teacher at this level exemplifies the instructional skills, knowledge, and responsibilities described in the rubric, and implements them without fail. He/she is adept at using data to set and reach ambitious teaching and learning goals. He/she makes a significant impact on student achievement and should be considered a model of exemplary teaching.

**Above Expectations (350-424.99):** A teacher at this level comprehends the instructional skills, knowledge, and responsibilities described in the rubric and implements them consistently. He/she is skilled at using data to set and reach appropriate teaching and learning goals and makes a strong impact on student achievement.

**At Expectations (275-349.99):** A teacher at this level understands and implements most of the instructional skills, knowledge, and responsibilities described in the rubric. He/she uses data to set and reach teaching and learning goals and makes the expected impact on student achievement.

**Below Expectations (200-274.99):** A teacher at this level demonstrates some knowledge of the instructional skills, knowledge, and responsibilities described in the rubric, but implements them inconsistently. He/she may struggle to use data to set and reach appropriate teaching and learning goals. His/her impact on student achievement is less than expected.

**Significantly Below Expectations (Under 200):** A teacher at this level has limited knowledge of the instructional skills, knowledge, and responsibilities described in the rubric, and struggles to implement them. He/she makes little attempt to use data to set and reach appropriate teaching and learning goals, and has little to no impact on student achievement.
{Intentionally left blank}
Team Educator Acceleration Model

50/60% Observation Process
{Intentionally left blank}
1) **Criteria for observer self-evaluation** for each observation and resulting evidence notes:

   a) Can someone read the evidence and have a “big picture” view of what happened in this lesson?

   b) Does the language in the evidence link to specific descriptors from the rubric?

   c) Can a teacher use this evidence to reflect on the descriptors from the rubric?

   d) Does the evidence speak to both the teacher and the students?

   e) Does the evidence provided validate the score with at least 3 – 5 pieces of evidence for each indicator?

2) **Fidelity to implementation of TEAM:**

   a) Every lesson, every day, every time must have a learning objective for which student mastery is assessed and determined. Observers cannot speculate about assessment results that are not demonstrated in current lesson.

   b) Student engagement and student mastery will have the greatest influence in determining if evidence meets the standard for scoring at a particular level in any given indicator. Evidence of mastery and alignment/contribution to learning objectives is the most important theme throughout the rubric. The rubric descriptors are not a checklist.

   c) All evidence must be captured during lesson observed, during pre-conference, and through teacher provided materials (such as lesson plans, exit tickets, etc.). There is no relevant or allowable speculation about prior or subsequent lessons beyond the lesson observed for the evaluation process. As such, there should be no references to other lessons (or to the overall course) in evidence notes.

   d) Once an observation is completed, there are no opportunities for a “do-over.” Teachers will be able to seek additional feedback and request “practice” observations with instructional coaches and others, but those will not count in the formal evaluation process.

3) **Inter-rater reliability and calibration:**

   a) All observers in a building, including lead teachers, will be required to jointly observe a lesson once a semester (once in the fall and once in the spring). The observer team will meet to review and discuss evidence and scores. C&I elementary and secondary directors/supervisors will establish a process for verifying and inspecting this practice.

   b) K-12 Principal meetings will be used to review and discuss evidence for a video lesson and/or provide feedback on completed evidence notes with other schools across the district.

   c) Lead teachers and administrators are encouraged to voluntarily share evidence notes among each other (being careful to remove teacher identification) to get a sense of consistency between buildings and across grade levels.
1) **Lead Teachers will have summative evaluation based on their performance as a classroom teacher.**
   
a) Duties as a lead teacher should only be reflected in formal evaluation as it would relate to the school responsibilities indicator on the professionalism domain.

2) **Principals should seek to separately assess teacher performance as a Lead Teacher, as this is an annually renewable position. The results of this assessment should guide the principal’s decision on whether or not to recognize the lead teacher’s contribution in this role on the APEX teacher leadership rubric. That assessment should include:**
   
a) Administrator completing at least once per semester an observation of a post-conference conducted by a lead teacher, scoring with the post-conference scoring rubric found on page 75 of the TEAM Handbook, which will be shared with the lead teacher.
   
b) Lead teacher participation in at least one joint observation per semester with members of the administrative staff and subsequent group discussion of evidence and scoring.
   
c) Administrator completing a sample review of evidence notes that the lead teacher prepares for observations.
   
d) Administrator completing a review of scoring that the lead teacher awards, with specific emphasis on calibration with administrators within the building (using data system reporting capabilities).

3) **The determination as to whether a lead teacher will continue to serve in the role will be based on the following criteria:**
   
a) Demonstrated ability to meet or exceed an average of 3.0 on the three domains of the TEAM instructional rubric. Moreover, ability to achieve a minimum summative evaluation rating of 300.00 or greater (based on the calculation for the teacher effectiveness rating).
   
b) Demonstrated ability to contribute to the professional growth of peers through the pre- and post-conference process.
If a teacher such as ELL or a coach (or any other itinerant category teacher) serves more than one school, how does he/she select which to use for growth scores?

Teachers that support multiple schools will use a composite measure for the 5/35% growth scores. This can be a weighted average or a home school. For the 15% achievement measure, the primary supervisor should meet with the teacher to establish a goal that is applicable to all schools in which the teacher works.

What are some examples of off the shelf assessments that can be used for the 15% achievement measure?

Pre K-12 diagnostic or achievement/attainment assessments commonly used throughout the state and/or nationally can be used for the achievement measure. During the 201-2014 school year, district and teacher created measures will not be acceptable; however, in upcoming years a process for submitting district created assessments for use will be available. Acceptable measures should assess the intended curriculum content and should be generally consistent in scoring and administration (SAT 10, Dibels, MAP, DRA, etc.).

Is it possible to earn "decimals" on the achievement measure?

The achievement measure will be reported as a whole number based on the scale established by the teacher and evaluator during the Fall meeting. The observation portion of the evaluation will be an average of all indicator scores and may contain decimals to the hundredths place.

Are Title I teachers included in the "Academic Interventionist" group?

If Title I teachers mainly work with students in an Interventionist role and do not have an individually assigned class, then yes.

If an interventionist does not teach students, but works with teachers, how will they be evaluated?

Interventionists may model teach in their work with teachers and could be observed during this process. However, if they are not mainly instructing students, the School Services Personnel rubric may be used at the district’s discretion.

How will Pre-K teachers in non-school sites receive the assessment part of evaluation?

The 0/15% is an achievement measure chosen by the evaluator and the educator. There are approved measures in the matrix that could apply to Pre-K teachers including various statewide or nationally used “off the shelf” assessments. The growth score will be calculated in much the same way as K-2 schools, using feeder patterns to create a literacy and numeracy composite.
Are educators on long-term or short term leave still involved in the teacher evaluation process? Also, educators filling those leaves, are they expected to participate in the evaluation process?

If an educator works 120 days or less or is a contract employee, he/she is not required by statute to be evaluated using TEAM. If an educator’s leave creates a situation in which it is impossible to complete the observations, evaluation scores will be based on the observations completed.

Does a teacher on an JROTC license fall under the same guidelines as a professionally licensed teachers as far as observations?

A JROTC teacher will fall under the professionally licensed observation guidelines using the Standard Educator Rubric as long as the teacher has a valid JROTC license. Licenses considered professional licenses for evaluation are Professional License, Professional Occupational Education License, Professional School Service Personnel License, JROTC, and Adjunct License. All other license types are considered apprentice.

Can you pick more than one item for the 10-15% - for instance three items at 5% each?

Only one measure should be selected for the -15% achievement measure.

If the data from testing is not available until the summer, how will districts meet the May 15 deadline for non-renewal?

TDOE recommends evaluators hold an End of the Year conference with each teacher. At this conference, the 50% observation scores and the 15% achievement measure (if available) should be discussed and will give a preliminary picture of the teacher’s overall evaluation.

Would a teacher who goes to several school systems use value added from just one school system of their choice?

Similarly to teachers that work in multiple schools, this would depend on the amount of time the teacher spends in each district. The districts should collaborate to decide whether to use a “home” district score or some type of weighted average. This score would most likely have to be entered by the evaluator once scores are available. If they are a contract employee or work 120 days or less, they are not required to be evaluated.

When using the school-wide value added composite, is it a single year score or the 3 year average?

A 3 year average will be used when available and appropriate. Teachers and principals who have been at a school for one or two years will use the school-wide value added composite from those years.

Should the evaluator provide areas of refinement and reinforcement for the planning and environment post conferences with each teacher?

Areas of refinement and reinforcement should be provided during each post-conference.

For a teacher who is self contained & receives a value added score for each subject, will that score come from a composite of all subjects or only one?

This teacher’s individual TVAAS score would be a composite of all the subjects taught.

Team Educator Acceleration Model

15% Other Student Achievement Measure
{Intentionally left blank}
Performance Goals and Objectives for Achievement and Achievement Gap Closure (2016-17)

Step 1: Minimum Performance Goal
The minimum performance goal is designed to identify a limited number of districts that are not meeting the lowest acceptable threshold for improvement in math, English Language Arts (ELA), ACT, and Graduation Rate. A district that does not meet this goal is one whose students are regressing in most or all subjects/grade-level content areas for in any one of the three categories – achievement, TVAAS, or gap closure. These districts will be designated as In Need of Improvement.

Achievement
• In grades 3-8, the achievement pathway will measure the change in relative performance of the district in terms of percentile rank.
  o District performance will be judged based on the percentile rank of the district in terms of the percent of students at achievement level 3 or 4 (previously proficient or advanced) using 2015 assessment results compared to the percentile rank of the district on the same metric using 2017 assessment results.
  o In grades 9-12, the achievement goal will be determined by comparing the district performance on HS metrics in 2015-16 to performance in 2016-17.
  o High school EOC results will be determined and communicated to districts in early Fall 2016. These results will form the baseline data to which 2016-17 results will be compared.
• Districts that have met at least 25 percent of the targets for the applicable grade-level/content areas will meet the criteria to pass the achievement pathway of the minimum performance goal.

TVAAS
• In grades 3-8, TVAAS will reflect the transition to updated TCAP tests in 2016-17.
• TVAAS data may only be available for grades 5-8, due to the absence of test data for third grade students in 2015-16. In grades 9-12, TVAAS will be calculated for HS Math, HS ELA, and ACT as in previous years, using 2016-17 EOC data.
• Districts that have earned a level 3 or above on TVAAS in at least 25 percent of grade-level/content areas will meet the criteria to earn a pass on the TVAAS pathway of the minimum performance goal.

Gap Closure
• The gap closure pathway will consider only students in the super subgroup (Black/Hispanic/Native American, Economically Disadvantaged, English Language Learners and Students with Disabilities combined).
• For grades 3-8, district performance will be judged based on the percentile rank of the district in terms of the percent of students performing at achievement level 1 (lowest achievement level and previously below basic) using 2015 assessment results compared to the percentile rank of the district on the same metric using 2016 assessment results.
• For grades 9-12, the gap closure pathway will be determined by comparing the district performance on HS EOC tests in 2015-16 to performance in 2016-17.
  o District performance for HS Math and HS ELA will compare the percent of students performing at level 1 (lowest achievement level and previously below basic) using 2015-16 assessment results compared to the percent of students performing at achievement Level 1 using 2016-17 assessment results.
  o The ACT metric reflects the reduction in the percent of students earning a composite score of 18 or below, and the graduation rate metric reflects the reduction in the drop-out rate.
• Districts that have met at least 25 percent of the targets for the applicable grade-level/content areas will meet the criteria to earn a pass on the gap closure pathway of the minimum performance goal.

**Overall Goal:** At least 25% met At least 25% met At least 25% met

* High School ELA includes English I, English II, and English III
** High School Math includes Algebra I, Geometry, and Algebra II OR Integrated Math I, II, and III
*** ACT includes composite scores of same class used to calculate graduation rate, a lagging indicator based on the prior year cohort. ACT metric reflects percent of students earning a 21 or higher.

**Step 2: Achievement Performance Goal**

The AMO targets, relative performance and TVAAS pathways will determine the achievement performance goal during the 2016-17 school year. Districts will earn the higher of the scores under each pathway for the individual content area as defined below. The AMO pathway is only applicable to high school metrics, as only EOCs were administered in 2015-16 to establish baseline data.

<table>
<thead>
<tr>
<th>Points</th>

District Achievement Status: 2.38

Achievement status:
- **Progressing (>0 to <2.00)**: District is improving on average but falling short of growth expectation
- **Achieving (2.00 to <3.00)**: District is meeting growth expectation on average
- **Exemplary (3.00 and above)**: District is exceeding growth expectation on average

**Step 3: Gap Closure Performance Goal**

The gap closure status determination will have three pathways available in 2016-17 school year. The first pathway will be based on the relative rank of each of the district’s four underperforming subgroups: Black/Hispanic/Native American (BHN), Economically Disadvantaged (ED), English Language Learners (ELL) and Students with Disabilities (SWD). Performance will be compared to other districts across the state in terms of the percent of students in the subgroup who are level 3 or level 4 (previously proficient or advanced). The TVAAS pathway will be calculated for the subgroups. The AMO pathway for subgroups will only be applicable to high school, as EOC subjects have baseline data from the 2015-16 school year. Districts will earn the higher of the scores under each pathway for the individual content area for each subgroup as defined below.
<table>
<thead>
<tr>

| Subgroup Average | 1.286 | 1.429 | .500 | 1.286 |

**District Gap Closure Status**: 1.13
Gap Closure status:

- **Progressing (>0 to <2.00)**: District is improving on average but falling short of growth expectation
- **Achieving (2.00 to <3.00)**: District is meeting growth expectation on average
- **Exemplary (3.00 and above)**: District is exceeding growth expectation on average

**Step 4: Final District Determination**

To arrive at the final district determination, the average for the Achievement and Gap Closure goals is calculated and applied to the scale below.

<table>
<thead>
<tr>

Three Facts about TVAAS

1. TVAAS measures student growth, not whether the student is proficient on the state assessment. For example, a student who is behind academically may show significant academic growth but not be proficient on the end of year test. Another student may also not be proficient on the end of year test, but not show any growth. The teacher added a lot of value to the first student’s academic development (and increased their likelihood of being proficient in 6th grade), and little value to the second student’s academic development. TVAAS allows educators to consider their students’ achievement (their score on the end of year assessment), as well as their growth (the progress students make year to year).

2. Low-achieving students can grow and their teachers can earn strong TVAAS scores. When students grow more than expected, that growth is reflected in a teacher’s TVAAS score – regardless of whether the student earned below basic, basic, proficient or advanced on the state assessment. For example, Treadwell Middle School in Memphis had low entering achievement in middle school math (students performed in the 33rd percentile compared to their peers across the state), yet they were among the top 20% of schools in the state on growth in 7th and 8th grade math in 2013-14.

3. High-achieving students can grow and their teachers can earn strong TVAAS scores. Just as children grow in height each year, they also grow in academic ability. If a second grader is tall in relation to her peers, she will need to continue to grow each year to be tall relative to her peers in fifth grade. A tall second grader who does not continue to grow will soon be a short fifth grader. Likewise, our highest performing students still have room to grow academically and their teachers can still earn high TVAAS scores. Even students who consistently earn advanced scores can demonstrate growth. For example, Ravenwood High School in Williamson County had among the highest entering achievement in the state among their Chemistry I students. They also had strong growth, and made substantially more progress than the state average in Chemistry in 2013-14.

</thead>
<tbody>
<tr>
<td>Students are consistently well behaved and on task.</td>
</tr>
<tr>
<td>Teacher and students establish clear rules for learning and behavior.</td>
</tr>
<tr>
<td>The teacher overlooks inconsequential behavior.</td>
</tr>
<tr>
<td>The teacher deals with students who have caused disruptions rather than the entire class.</td>
</tr>
<tr>
<td>The teacher attends to disruptions quickly and firmly.</td>
</tr>
</tbody>
</table>

| Students are mostly well behaved and on task, some minor learning disruptions may occur. |
| Teacher establishes rules for learning and behavior. |
| The teacher uses some techniques, such as social approval, contingent activities, and consequences, to maintain appropriate student behavior. |
| The teacher oversees some inconsequential behavior, but at other times, stops the lesson to address it. |
| The teacher deals with students who have caused disruptions, yet sometimes he or she addresses the entire class. |

| Students are not well behaved and are often off task. |
| Teacher establishes few rules for learning and behavior. |
| The teacher uses few techniques to maintain appropriate student behavior. |
| The teacher cannot distinguish between inconsequential behavior and inappropriate behavior. |
| Disruptions frequently interrupt instruction. |

<table>
<thead>
<tr>
<th>Environment</th>
</tr>
</thead>
<tbody>
<tr>
<td>The classroom:</td>
</tr>
<tr>
<td>welcomes all members and guests,</td>
</tr>
<tr>
<td>is organized and understandable to all students,</td>

<th>At Expectations (3)</th>
<th>Significantly Below Expectations (1)</th>
</tr>
</thead>
</table>
|                          | Activities and materials include all of the following when appropriate:  
  - show accommodation of students' needs and differences,  
  - are appropriately varied and matched to lesson objective,  
  - are relevant to students' lives,  
  - incorporate multimedia and technology,  
  - incorporate quality resources (e.g., LMS/LIS made materials, manipulatives, resources from museums, cultural centers, etc.),  
  - address higher-order thinking skills, and  
  - sustain students' attention. | Activities and materials include most of the following when appropriate:  
  - show accommodation of students' needs and differences,  
  - are appropriately varied and matched to lesson objective,  
  - are relevant to students' lives,  
  - incorporate multimedia and technology,  
  - incorporate quality resources (e.g., LMS/LIS made materials, manipulatives, resources from museums, cultural centers, etc.),  
  - address higher-order thinking skills, and  
  - sustain students' attention. | Activities and materials include few of the following when appropriate:  
  - show accommodation of students' needs and differences,  
  - are appropriately varied and matched to lesson objective,  
  - are relevant to students' lives,  
  - incorporate multimedia and technology,  
  - incorporate quality resources (e.g., LMS/LIS made materials, manipulatives, resources from museums, cultural centers, etc.), and  
  - address higher-order thinking skills, and  
  - sustain students' attention. |
| Questioning              | LMS/LIS questions are varied and high quality, providing a balanced mix of question types:  
  - knowledge and comprehension,  
  - application and analysis, and  
  - creation and evaluation.  
  - Questions are consistently purposeful and coherent.  
  - A high frequency of questions is asked.  
  - Questions are consistently sequenced with attention to the instructional goals.  
  - Questions regularly require active responses (e.g., whole class signaling, choral responses, written and shared responses, or group and individual answers).  
  - Wait time (3-5 seconds) is consistently provided.  
  - The LMS/LIS calls on volunteers and non-volunteers and a balance of students based on ability and sex.  
  - Students generate questions that lead to further inquiry and self-directed learning. | LMS/LIS questions are varied and high quality, providing for some, but not all, question types:  
  - knowledge and comprehension,  
  - application and analysis, and  
  - creation and evaluation.  
  - Questions are usually purposeful and coherent.  
  - A moderate frequency of questions asked.  
  - Questions are sometimes sequenced with attention to the instructional goals.  
  - Questions sometimes require active responses (e.g., whole class signaling, choral responses, or group and individual answers).  
  - Wait time is sometimes provided.  
  - The LMS/LIS calls on volunteers and non-volunteers, and a balance of students based on ability and sex. | LMS/LIS questions are inconsistent in quality and include few question types:  
  - knowledge and comprehension,  
  - application and analysis, and  
  - creation and evaluation.  
  - Questions are random and lack coherence.  
  - A low frequency of questions is asked.  
  - Questions are rarely sequenced with attention to the instructional goals.  
  - Questions rarely require active responses (e.g., whole class signaling, choral responses, or group and individual answers).  
  - Wait time is inconsistently provided.  
  - The LMS/LIS mostly calls on volunteers and high-ability students. |
| Academic Feedback        | Feedback is consistently academically focused, frequent, and high quality.  
  - Feedback to students is in a timely manner and includes strengths as well as recommendations or suggestions for improvement.  
  - The LMS/LIS circulates to prompt student thinking, assess each student's progress, and provide individual feedback. | Feedback is mostly academically focused, frequent, and mostly high quality.  
  - Feedback to students is usually in a timely manner and includes strengths as well as recommendations or suggestions for improvement.  
  - The LMS/LIS circulates during instructional activities to support engagement, and monitor | The quality of feedback is inconsistent.  
  - Feedback to students is not given in a timely manner.  
  - The LMS/LIS fails to circulate during instructional activities.  
  - Feedback from students is not used to monitor or adjust instruction. |

| **LMS/LIS**  | • LMS/LIS sets high and demanding academic expectations for every student.  
               • LMS/LIS encourage students to learn from mistakes.  
               • LMS/LIS creates learning opportunities where all students can experience success.  
               • Students take initiative and follow through with their own work.  
               • LMS/LIS optimizes instructional time, teacher more material, and demands better performance from every student. | • LMS/LIS sets high and demanding academic expectations for every student.  
               • LMS/LIS encourages students to learn from mistakes.  
               • LMS/LIS creates learning opportunities where most students can experience success.  
               • Students complete their work according to LMS/LIS expectations. | • LMS/LIS expectations are not sufficiently high for every student.  
               • LMS/LIS creates an environment where mistakes and failure are not viewed as learning experiences.  
               • Students demonstrate little or no pride in the quality of their work. |
| Managing Student Behavior | • Students are consistently well behaved, and on task.  
                            • LMS/LIS and students establish clear rules for learning and behavior.  
                            • LMS/LIS uses several techniques such as social approval, contingent activities, and consequences to maintain appropriate student behavior.  
                            • LMS/LIS overlooks inconsequential behavior.  
                            • LMS/LIS deals with students who have caused disruptions rather than the entire class.  
                            • LMS/LIS attends to disruptions quickly and firmly. | • Students are mostly well behaved, and on task; some minor learning disruptions may occur.  
                            • LMS/LIS established rules for learning and behavior.  
                            • LMS/LIS uses some techniques such as social approval, contingent activities, and consequences to maintain appropriate student behavior.  
                            • LMS/LIS overlooks some inconsequential behavior, but at other times, stops the lesson to address it.  
                            • LMS/LIS deals with students who have caused disruptions, yet sometimes he or she addresses the entire class. | • Students are not well behaved and are often off task.  
                            • LMS/LIS establishes few rules for learning and behavior.  
                            • LMS/LIS uses few techniques to maintain appropriate student behavior.  
                            • LMS/LIS cannot distinguish between inconsequential behavior and inappropriate behavior.  
                            • Disruptions frequently interrupt instruction. |
| Environment | The library:  
              • welcomes all member and guests,  
              • is organized and understandable to all students,  
              • provides supplies, equipment, and resources that are easily and readily accessible,  
              • displays student work that frequently changes, and  
              • is arranged to promote individual and group learning. | The library:  
              • welcomes most members and guests,  
              • is organized and understandable to most students,  
              • provides supplies, equipment, and resources that are accessible,  
              • displays student work, and  
              • is arranged to promote individual and group learning. | The library:  
              • is somewhat cold and uninviting,  
              • is not well organized and understandable to students,  
              • has supplies, equipment, and resources that are difficult to access,  
              • does not display student work, and  
              • is not arranged to promote group learning. |
| Respectful Culture | • LMS/LIS-student interactions demonstrate caring and respect for one another.  
                             • Students exhibit caring and respect for one another.  
                             • LMS/LIS seeks out and is receptive to the interest and opinions of all students.  
                             • Positive relationships and interdependence characterize the library environment. | • LMS/LIS-student interactions are generally friendly but may reflect occasional inconsistencies, favoritism, or disregard for students' cultures.  
                             • Students exhibit respect for LMS/LIS and are generally polite to each other.  
                             • LMS/LIS is sometimes receptive to the interest and opinions of students. | • LMS/LIS-student interactions are sometimes authoritarian, negative, or inappropriate.  
                             • Students exhibit disrespect for LMS/LIS.  
                             • Student interaction is characterized by conflict, sarcasm, or put-downs.  
                             • LMS/LIS is not receptive to interests and opinions of students. |

## School Services Personnel Rubric: Delivery of Services

### Activities and Materials
- **Significantly Above Expectations (5)**
  - Activities and materials do most of the following as appropriate:
  - support the services and/or program,
  - challenge,
  - sustain student/stakeholder's attention,
  - elicit a variety of thinking,
  - provide time for reflection,
  - are relevant to students/stakeholders' lives,
  - provide students/stakeholders with choices,
  - incorporate multimedia and technology,
  - incorporate resources beyond the school curriculum, and
  - encourage self-direction and self-monitoring.

- **At Expectations (3)**
  - Activities and materials do several of the following as appropriate:
  - support the services and/or program,
  - challenge,
  - sustain student/stakeholder's attention,
  - elicit a variety of thinking,
  - provide time for reflection,
  - are relevant to students/stakeholders' lives,
  - provide students/stakeholders with choices,
  - incorporate multimedia and technology,
  - incorporate resources beyond the school curriculum, and
  - encourage self-direction and self-monitoring.

- **Significantly Below Expectations (1)**
  - Activities and materials do few of the following as appropriate:
  - support the services and/or program,
  - challenge,
  - sustain student/stakeholder's attention,
  - elicit a variety of thinking,
  - provide time for reflection,
  - are relevant to students/stakeholders' lives,
  - provide students/stakeholders with choices,
  - incorporate multimedia and technology,
  - incorporate resources beyond the school curriculum, and
  - encourage self-direction and self-monitoring.

### Communication
- **Significantly Above Expectations (5)**
  - Educator communications are consistently varied and high quality, providing for a balanced mix of communication methods including, but not limited to written, oral, electronic, etc.
  - Questions are consistently purposeful and coherent.
  - Communications methods often lead to further inquiry and self-directed learning.

- **At Expectations (3)**
  - Educator communications are often varied and high quality, providing for a balanced mix of communication methods including, but not limited to written, oral, electronic, etc.
  - Questions are usually purposeful and coherent.
  - Communications methods sometimes lead to further inquiry and self-directed learning.

- **Significantly Below Expectations (1)**
  - Educator communications are inconsistently varied and high quality, not providing for a balanced mix of communication methods including, but not limited to written, oral, electronic, etc.
  - Questions are rarely purposeful and coherent.
  - Communications methods seldom lead to further inquiry and self-directed learning.

### Consultation
- **Significantly Above Expectations (5)**
  - Consultation is consistently focused, frequent, and high quality.
  - Consultation is always appropriate to meet student/stakeholder needs.
  - Feedback is regularly used to monitor and adjust programs and services.

- **At Expectations (3)**
  - Consultation is mostly focused, frequent, and high quality.
  - Consultation is usually appropriate to meet student/stakeholder needs.
  - Feedback is often used to monitor and adjust programs and services.

- **Significantly Below Expectations (1)**
  - Consultation is not consistently focused, frequent, or high quality.
  - Consultation is inappropriate to meet student/stakeholder needs.
  - Feedback is rarely used to monitor and adjust programs and services.

### Developing Educational Plans for Students
- **Significantly Above Expectations (5)**
  - Educator regularly contributes to short- and long-term plans for individual students.
  - Educator regularly analyzes data to make recommendations for students' educational plan.
  - Educator regularly consults with stakeholders to assist in development and refinement of students' educational plans.

- **At Expectations (3)**
  - Educator sometimes contributes to short- and long-term plans for individual students.
  - Educator sometimes analyzes data to make recommendations for students' educational plan.
  - Educator sometimes consults with stakeholders to assist in development and refinement of students' educational plans.

- **Significantly Below Expectations (1)**
  - Educator seldom contributes to short- and long-term plans for individual students.
  - Educator seldom analyzes data to make recommendations for students' educational plan.
  - Educator seldom consults with stakeholders to assist in development and refinement of students' educational plans.

| **Educator** | • Educator always sets high expectations for every student.  
                • Educator always creates opportunities where all students/stakeholders can successfully participate.  
                • Most students/stakeholders take initiative to benefit from the service delivery plan.  
                • Educator always optimizes service delivery time, provides appropriate materials, and encourages better participation from every student/stakeholder. | • Educator usually sets high expectations for every student.  
                • Educator often creates opportunities where all students/stakeholders can successfully participate.  
                • Some students/stakeholders take initiative to benefit from the service delivery plan.  
                • Educator usually optimizes service delivery time, provides appropriate materials, and encourages better participation from every student/stakeholder. | • Educator rarely sets high expectations for every student.  
                • Educator rarely creates opportunities where all students/stakeholders can successfully participate.  
                • Few students/stakeholders take initiative to benefit from the service delivery plan.  
                • Educator rarely optimizes service delivery time, provides appropriate materials, and encourages better participation from every student/stakeholder. |

| Managing Student Behavior | Students are consistently well-behaved and on task.  
                           • Educator and students establish clear rules for behavior.  
                           • The educator uses a variety of effective techniques to maintain appropriate student behavior. | Students are mostly well-behaved and on task, although some minor distractions may occur.  
                           • Educator establishes clear rules for behavior.  
                           • The educator uses some techniques to maintain appropriate student behavior. | Students are not well-behaved and on task.  
                           • Educator establishes few rules for behavior.  
                           • The educator uses few techniques to maintain appropriate student behavior. |

| Environment | The workspace:  
              • welcomes all members and guests,  
              • is organized and understandable to all students/stakeholders,  
              • provides supplies, equipment, and resources that are easily and readily accessible, and  
              • is arranged to promote individual and group participation. | The workspace:  
              • welcomes most members and guests,  
              • is organized and understandable to most students/stakeholders,  
              • provides supplies, equipment, and resources that are accessible, and  
              • is arranged to promote individual and group participation. | The workspace:  
              • is somewhat cold and uninviting,  
              • is not well organized and understandable to students/stakeholders,  
              • has supplies, equipment, and resources that are difficult to access, and  
              • is not arranged to promote individual and group participation. |

| Respectful Culture | Educator-student/stakeholder interactions demonstrate caring and respect for one another.  
                    • Students/stakeholders exhibit caring and respect for one another.  
                    • Educator seeks out and is receptive to the interests and opinions of all students/stakeholders. | Educator-student/stakeholder interactions are generally friendly, but may reflect occasional inconsistencies, favoritism, or disregard for cultural differences.  
                    • Students/stakeholders exhibit respect for the educator and are generally polite to each other.  
                    • Educator is sometimes receptive to the interests and opinions of students/stakeholders. | Educator-student/stakeholder interactions are sometimes authoritarian, negative, or inappropriate.  
                    • Students/stakeholders exhibit disrespect for the educator.  
                    • Educator is not receptive to interests and opinions of students/stakeholders. |
Who is included?
The School Services Personnel Rubric shall be used for the qualitative 50% of the annual evaluation for the following educators:

- School Audiologist PreK-12
- School Counselor PreK-12
- School Social Worker PreK-12
- School Psychologist PreK-12
- Speech/Language Therapist

Additionally, the rubric may be used at the discretion of the local education agency for other educators who do not have direct instructional contact with students. Examples of these roles would include instructional coaches who work only with teachers, case managers whose responsibilities consist of teacher support and compliance assurance, and graduation coaches who do not have instructional responsibilities.

What constitutes an “observation”?
Tennessee’s new educator evaluation system requires multiple observations of all included personnel. For those educators to be evaluated using the School Services Personnel Rubric, however, an “observation” is likely to vary considerably from the traditional classroom observation. In some instances, the educator will not have direct student contact to observe, and in other cases, testing procedures or student confidentiality may preclude a traditional observation. For educators in these categories, observations will consist of conversations in which the evaluator will seek to understand the educator’s level of competency in delivery of services, planning of services, and environment. School services personnel will also be rated on the Professionalism Report, the same as all other educators. All observations are announced, since they will require scheduling within the day and may require the educator to gather requested evidence or artifacts.

Rather than dividing the observations into 15-minute or lesson-length, the length of observations for educators using this rubric shall be at the evaluator’s discretion. However, educators with a professional license must receive four observations, with a minimum of
60 minutes of contact time. Those with an apprentice license must receive six observations with a minimum of 90 minutes of contact time.

- The Planning Rubric should be the target of one observation, the Environment Rubric should be the target of one observation, and the Delivery of Services Rubric should be the target of two observations for professional level educators.
- The Planning Rubric should be the target of two observations, the Environment Rubric should be the target of two observations, and the Delivery of Services Rubric should be the target of three observations for apprentice level educators. The second Planning and Environment rubric observations should be conducted together in a single observation.

Adapting the Rubric for a Variety of Educator Roles
The School Services Personnel Rubric is divided into the following domains and indicators:

<table>
<thead>
<tr>
<th>Delivery of Services</th>
<th>Planning of Services</th>
<th>Environment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards and Objectives</td>
<td>Scope of Work</td>
<td>Expectations</td>
</tr>
<tr>
<td>Motivating Students</td>
<td>Analysis of Work Products</td>
<td>Managing Student Behavior</td>
</tr>
<tr>
<td>Delivery of Professional Services</td>
<td>Evaluation of Services or Programs</td>
<td>Environment</td>
</tr>
<tr>
<td>Service Structure and Planning</td>
<td></td>
<td>Respectful Culture</td>
</tr>
<tr>
<td>Activities and Materials</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Communication</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Consultation</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Developing Educational Plans for Students</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Professional Content Knowledge</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Knowledge of Students</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Organization of Services</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Problem Solving</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Each of the indicators is applicable across a variety of Student Services roles, although successful implementation of the indicators may look considerably different from one role to the next. As the evaluator considers the bulleted evidence items, however, he or she will need to adapt them as needed. Some items may not be applicable in a particular role. It is important to remember that the evaluator is not treating the bulleted items as a kind of checklist. Rather, the evaluator is seeking to determine what the preponderance of evidence reveals about the educator’s performance.

Team Educator Acceleration Model

TEAM Resources & Selected Reference

[Image]
Guidelines and Criteria

Local boards of education shall develop or adopt evaluation models for teachers and principals. To be approved, these evaluation models must meet the following guidelines and criteria.

General Guidelines

(1) The primary purpose of annual teacher and principal evaluations is to identify and support instruction that will lead to high levels of student achievement.

(2) Evaluations will be used to inform human capital decisions, including, but not limited to individual and group professional development plans, hiring, assignment and promotion, tenure and dismissal, and compensation.

(3) Annual evaluations will differentiate teacher and principal performance into five (5) effectiveness groups according to the individual educator’s evaluation results. The five effectiveness groups are: significantly above expectations (level 5), above expectations (level 4), at expectations (level 3), below expectations (level 2), and significantly below expectations (level 1). The Department of Education will monitor observation scores throughout the year and enforce consistent application of standards across districts. Upon the conclusion of the school year and relevant data collection, the department will publish evaluation results by district. Districts and schools that fall outside the acceptable range of results, subject to student achievement scores, will be subject to additional training and monitoring by the department as outlined in section (4).

(4) For the purposes of these guidelines, performance level discrepancies between individual student achievement growth scores and observation scores of three or more will be considered outside the acceptable range of results. The ten percent (10%) of schools with the highest percentage of teachers falling outside the acceptable range of results will be required to participate in additional training and support as determined by the department. Districts that have twenty (20%) percent or more of their teachers fall outside the acceptable range of results will, as determined by the commissioner, lose their ability to apply for or implement alternate evaluation models or TEAM Flexibility the following school year.

State Approved Evaluation Model (TEAM) Weighting Flexibility

The Tennessee Teaching Evaluation Enhancement Act of 2015 (Tenn. Code Ann. § 49-1-302) adjusted the weighting of student growth data in an educator’s evaluation to lessen the evaluation score impact of TNReady, as well as the social studies and science assessments. The Act established a phase-in approach for how TNReady assessments administered in school years 2015-16 through 2017-18 will be weighted in an educator’s evaluation. Additional flexibility was provided in Chapter 712 of the Tennessee Public Acts of 2016. Details of the weighting adjustments for the 2015-16 school year are contained in Appendix A.
State Approved Evaluation Model (TEAM)

Fifty percent (50%) of the evaluation criteria shall be comprised of student achievement data, including thirty-five percent (35%) based on student growth data and fifteen percent (15%) based on other measures of student achievement. The remaining fifty percent (50%) of the evaluation criteria shall be based on a rating using the qualitative appraisal instrument contained in each approved evaluation model.

(1) Fifty percent (50%) student achievement data. This portion of the evaluation model will use multiple data sources to evaluate educators’ effectiveness in affecting student learning growth.

(a) Thirty-five percent (35%) student growth measures.

1. For teachers with individual Tennessee Value Added Assessment System (TVAAS) scores, the student growth measures shall be comprised of TVAAS scores.
2. For teachers, librarians, counselors and other groups of educators who do not have individual TVAAS scores, LEAs will choose from a list of student growth portfolio models that have been shown capable of measuring student growth. The list of options will be approved by the Department of Education prior to the start of each school year. The current list of student growth portfolio models includes:
   a. 2nd Grade Assessment
   b. Fine Arts Student Growth Portfolio Model
   c. World Languages Student Growth Portfolio Model
   d. Physical Education Student Growth Portfolio Model
   e. Pre-K/Kindergarten Student Growth Portfolio Model
   f. 1st grade Student Growth Portfolio Model
3. In order to implement one of the student growth portfolio models above, LEAs must:
   a. Provide training to evaluators to assess whether the students instructed by the educator being evaluated have demonstrated sufficient growth for the chosen measure, and
   b. Implement the state’s multiple rating categories to measure levels of performance for the chosen measure.
4. For educators without individual growth measures who are not principals or school administrators, TVAAS school composite scores will be the standard student growth measure and shall account for fifteen percent (15%) of the overall evaluation score. The qualitative portion of the overall evaluation for these educators shall be increased to seventy percent (70%) and the other measures of student achievement shall account for fifteen percent (15%).
5. For principals and other school administrators who spend at least fifty percent (50%) of their time on administrative duties, the student growth measure will be school-level value-added scores.
6. Districts have the option to allow teachers who score a level 4 or 5 on individual growth to use their individual growth score for the entirety of their overall level of effectiveness.

(b) Fifteen percent (15%) other measures of student achievement.

1. Principals and assistant principals, classroom teachers, librarians and all other educators in grades kindergarten through 8 (K-8) and nine through twelve (9-12) will select, in collaboration with the evaluator, from the list of achievement measures included in Appendix D. The agreed-upon measure should be a measure aligned as closely as possible to the educator’s primary responsibility. If the two parties do not agree on a measure, the educator being evaluated will select a measure.

2. Principals and teachers may use a student growth measure of level 3, 4, or 5 in lieu of the achievement measure if it results in a higher overall score.

3. The Department of Education will continually monitor and make recommendations to the State Board of Education for revising the menu of achievement measures based on increasing availability of higher quality measures of performance.

(2) Fifty percent (50%) qualitative measure. This portion of the evaluation model will use multiple data sources to evaluate educator practice against the qualitative appraisal instrument contained in each approved evaluation model. One possible data source can be a State Board of Education approved student survey instrument weighted in accordance with the approved observation model. See Appendix B for the approval process for student survey instruments.

(a) All classroom teachers and non-instructional, certified staff (other than principals and assistant principals who spend at least fifty percent (50%) of their time on administrative duties) shall be evaluated with a State Board of Education approved qualitative appraisal instrument.

1. At least half of all observations shall be unannounced. The observation for teachers scoring level 5 on individual growth or overall evaluation shall be unannounced.

2. Evaluators shall provide written feedback within one (1) week of each observation visit to the educator, and schedule an in-person debrief with the educator within one (1) week of each observation visit. At the end of each school year, evaluators will rate educators based on the selected evaluation model using notes collected through observation visits, conferences, a review of progress made in relation to the prior year’s evaluation (when available) and other means.

3. Observation pacing for teachers shall meet the requirements included in the chart below:
<table>
<thead>
<tr>
<th>Licensure Status</th>
<th>Previous Individual Growth or Overall Evaluation Score</th>
<th>Minimum Required Observations*</th>
<th>Minimum Required Observations per Domain*</th>
<th>Minimum Number of Minutes per School Year</th>

<td>1 Instruction 1 Planning 1 Environment</td>
<td>60 minutes</td>
</tr>
</tbody>
</table>

*NOTE: An LEA may choose to allow principals to conduct an observation of the instruction domain in conjunction with an observation of either environment or planning domain provided the requisite minimum time, semester, distribution and notice (announced versus unannounced) are met.

(b) Principals and assistant principals who spend fifty percent (50%) or more of their time on administrative duties will be evaluated according to an approved evaluation model based on the Tennessee Instructional Leadership Standards (TILS) and approved by the State Board of Education. The evaluation process will also include:

2. School climate and/or teaching and learning conditions surveys.
3. Principals shall have at least two (2) onsite observations annually, conducted by the director of schools or designee. The Department of Education will provide user friendly, manageable standardized forms to document observation visits and/or personal conferences. The approved forms will provide space for feedback in enough detail to allow the
teacher or principal to understand specific areas of strength and areas for development. LEAs that elect to use an alternative appraisal instrument for evaluation must submit the observation recording forms to the Department of Education for approval.

(c) All evaluations shall be conducted by certified evaluators. To be certified, an evaluator must meet certification requirements as determined by the Department of Education.

Alternate Evaluation Models

(1) In lieu of the state evaluation model (TEAM), LEAs may select an alternate evaluation model from a State Board of Education approved list.

(a) The list of currently approved alternate teacher evaluation models includes:

1. The Teacher Instructional Growth for Effectiveness and Results (TIGER)
2. Project COACH
3. Teacher Effectiveness Model (TEM)
4. The Achievement Framework for Excellent Teaching (AFET)

(b) The list of currently approved alternate principal evaluation models includes:

1. Project COACH Administrator
2. Achievement School District Leadership Framework

(2) All alternate models must fall within the legal guidelines regarding evaluation and comply with the sections of this policy regarding the fifty percent (50%) quantitative data, including the achievement and growth measures.

(3) All alternate models must submit data into the state provided evaluation data system on an annual basis in compliance with timelines determined by the Department of Education.

(4) All alternate models must ensure that observations are conducted by certified evaluators. A plan describing the method for evaluator certification must be submitted with the pilot.

(5) All alternate models must contain a qualitative appraisal instrument that addresses the following domains: Planning, Environment, Professionalism, and Instruction. Qualitative instruments should be research based. All approved models shall include, but are not limited to: a review of prior evaluations, personal conferences to discuss strengths, weaknesses and remediation, and classroom or school observation visits.

(6) Alternate evaluation models may be proposed via the following process:

(a) A formal request to pilot a new evaluation model must be made to the Department of Education by June 1.

(b) The request to pilot must include the proposed instruments, the research base for the particular model, information about the proposed weighting of the model, a plan
for evaluator certification, and information regarding the numbers of teachers and schools to be involved in the pilot process.

(c) The Department of Education will review the proposed pilot and determine whether to grant approval to pilot.

(d) If approved, data regarding the outcome of the pilot must be submitted to the Department of Education no later than May 15.

(e) The Department of Education will review the pilot outcomes and determine whether to recommend the alternate evaluation model to the State Board of Education for approval.

(7) Alternate evaluation models are requested to submit the following documents to the Department of Education each year by June 1:

(a) Documents noting any proposed changes to the evaluation model for the following school year.

(b) An annual plan for ensuring all evaluators are certified.

(8) The approved evaluation model for non-public school teachers is the state’s evaluation framework used by all schools prior to 2011-12 school year.

(9) Charter schools and other state agency schools are also permitted to propose their own evaluation model and may submit an application for approval to the Department of Education. The Commissioner of Education shall have the authority to approve the use of the evaluation model. The State Board of Education must approve any evaluation models from which results will be used to inform licensure advancement.

**Local-Level Grievance Procedure**

(1) Purpose.

(a) T.C.A. § 49-1-302 requires, “the development of a local-level evaluation grievance procedure to provide a means for evaluated teachers and principals to challenge only the accuracy of the data used in the evaluation and the adherence to the evaluation policies adopted by the State Board of Education.”

1. “Accuracy of the data” means only that the data identified with a particular teacher is correct.
2. Minor procedural errors in implementing the evaluation model shall be resolved at the lowest possible step in the grievance procedure but shall not constitute grounds for challenging the final results of an evaluation. Minor procedural errors shall be defined as errors that do not materially affect or compromise the integrity of the evaluation results. The final results of an evaluation may only be challenged
if the person being evaluated can demonstrate, no later than during step II of the grievance procedure, that the procedural errors made could materially affect or compromise the integrity of the evaluation results. The Department of Education shall provide guidance on which procedural errors may materially effect or compromise the results of the evaluation.

(b) To efficiently and fairly resolve grievances regarding procedural errors in the evaluation process, not to address disputes regarding employment actions taken based on the results of an evaluation. More significant due process rights are provided pursuant to state law to teachers when actual employment actions are taken.

(c) To ensure evaluations are fundamentally fair because correct procedures have been followed.

(d) To address grievances objectively, fairly, and expeditiously by resolving them at the lowest possible step in the procedure.

(e) To provide teachers and principals a process for resolving grievances without fear, discrimination, or reprisal.

(2) Responsibility.

(a) LEAs shall be responsible for the proper effectuation of this policy at the local level.

(b) Local Boards of Education shall charge Directors with the responsibility for ensuring that all teachers, principals, and administrators are aware of the provisions of this policy, including the identification of the administrator designated to conduct Step I of this procedure.

(3) Basic Standards.

(a) To resolve grievances as expeditiously as possible pursuant to section (1)(d) above, grievances may be filed at the end of each of the three components of the evaluation model – 1) qualitative appraisal; 2) student growth measures; and 3) other measures of student achievement. A grievance must be filed no later than fifteen (15) days from the date teachers and principals receive the results for each component, otherwise the grievance will be considered untimely and invalid. Nothing shall preclude a teacher or principal from filing a grievance at any time prior to the deadlines stated herein.

(b) The State Department of Education or LEAs may develop and make available to teachers standard grievance forms. No grievance may be denied because a standard form adopted by an LEA has not been used as long as the components required by this policy are included.
(c) At the informal hearing before the Director of Schools, an attorney or a representative of an employee may speak on behalf of the employee.

(d) An attorney may represent a grievant before the local board of education, which is the final step of this procedure. The grievant and the local board of education may have counsel present at discussions prior to the final step.

(e) Each grievance submitted at every step of the process provided below shall contain:

1. The teacher or principal’s name, position, school, and additional title, if any;
2. The name of the teacher or principal’s immediate supervisor;
3. The name of the evaluator/reviewer;
4. The date the challenged evaluation was received;
5. The evaluation period in question;
6. The basis for the grievance;
7. The corrective action desired by grievant; and
8. Sufficient facts or other information to begin an investigation.

(f) A failure to state specific reasons shall result in the grievance being considered improperly filed and invalid.

(g) All student achievement data used in evaluations must be made available to individual educators prior to the completion of their evaluations.

(4) Procedures. Grievances shall be processed by working through the three steps to finality as follows:

(a) Step I—Evaluator

1. Written grievance submitted to evaluator pursuant to the timeline listed in section (3)(a).
2. Administrative investigation and fact finding.
3. Decision clearly communicated in writing to grievant within fifteen (15) days of receipt of the complaint.
4. To allow disputes to be resolved at the lowest level possible, the evaluator may take any action necessary, based on the circumstances, to immediately correct any procedural errors made in the evaluation process.

(b) Step II—The Director of Schools or his/her designee who shall have had no input or involvement in the evaluation for which the grievance has been filed.

1. Written grievance and prior step decision submitted to the Director of Schools or his/her designee within fifteen (15) days of receipt of
decision from Step I. The designee cannot be used in cases involving a principal’s evaluation.
2. Informal discussion or hearing of facts, allegations, and testimony by appropriate witnesses as soon as practical.
3. Investigation, fact finding, and written final decision communicated to grievant in writing within fifteen (15) days of discussion.
4. To allow disputes to be resolved at the lowest level possible, the Director of Schools may take any action necessary, based on the circumstances, to immediately correct any procedural errors made in the evaluation process.

(c) Step III—Local Board of Education

1. Teachers and principals may request a hearing before the local board of education by submitting a written grievance and all relevant documentation to the local board of education within fifteen (15) days of receipt of decision from Step II.
2. The board of education, based upon a review of the record, may grant or deny a request for a full board hearing and may affirm or overturn the decision of the Director of Schools with or without a hearing before the board.
3. Any hearing granted by the board of education shall be held no later than thirty (30) days after receipt of a request for a hearing.
4. The local board of education shall give written notice of the time and place of the hearing to the grievant, Director of Schools and all administrators involved.
5. The local board of education’s decision shall be communicated in writing to all parties, no later than thirty (30) days after conclusion of the hearing.
6. The local board of education shall serve as the final step for all grievances.
Appendix A: Evaluation Flexibility

2015-16 School Year

For EOC educators who have prior individual TVAAS data:

New EOC educators or EOC educators without previous individual TVAAS data:
Middle and elementary school teachers teaching course with TNReady or TCAP:

- Option 1: Qualitative 70% Achievement 15%
- Option 2: Qualitative 85% Achievement 15%
- Option 3: Qualitative 50% Achievement 15%

* The individual scores from the two years will be weighted according to the number of students in each score. For teachers with no 2013-14 TVAAS data, their 2014-15 TVAAS data would be used. This would increase the amount by which the 2014-15 TVAAS data would factor into their score. Similarly, for teachers with no 2014-15 TVAAS data, which includes many social studies teachers, their 2013-14 TVAAS data would be used for the entirety of that portion.

SAT-10 teachers with previous individual TVAAS data

- Option 1: Qualitative 50% Achievement 15%
- Option 2: Qualitative 50% Achievement 15%
- Option 3: Qualitative 50% Achievement 15%

* The individual scores from the two years will be weighted according to the number of students in each score. For teachers with no 2013-14 TVAAS data, their 2014-15 TVAAS data would be used. This would increase the amount by which the 2014-15 TVAAS data would factor into their score. Similarly, for teachers with no 2014-15 TVAAS data, which includes many social studies teachers, their 2013-14 TVAAS data would be used for the entirety of that portion.
New SAT-10 teachers and those without previous individual TVAAS data:

Option 1:
- Qualitative 75%
- Achievement 15%
- 2015-16 SAT-10 10%

Option 2:
- Qualitative 50%
- Achievement 15%
- 2015-16 SAT-10 35%

Option 3:
- Qualitative 85%
- Achievement 15%

Teachers in non-tested grades and subjects (no student growth portfolio):

Option 1:
- Qualitative 70%
- Achievement 15%
- 2015-16 TVAAS School Composite 15%

Option 2:
- Qualitative 85%
- Achievement 15%

Teachers in non-tested grades and subjects (implementing student growth portfolio):

- Qualitative 50%
- Achievement 15%
- Portfolio growth model 35%
School administrators:

**Option 1:**
- Qualitative 50%
- Achievement 15%
- 2015-16 TVAAS School Composite 35%

**Option 2:**
- Qualitative 85%
- Achievement 15%
Appendix B: Student Surveys

Currently approved student survey instruments are:
- Tennessee School Climate Survey
- Tripod Survey
- My Student Survey
- Panorama

Additional surveys instruments may granted approval by the State Board of Education for use as part of an approved evaluation model via the following process:

- **Step 1**: Potential vendor secures an LEA to pilot their instrument.
- **Step 2**: Vendor works with TDOE to determine the appropriate number of survey administrations and/or pilot participants.
- **Step 3**: Vendor shares data generated from pilot with TDOE for analysis.
- **Step 4**: Vendor proposes rating scale based on pilot data.
- **Step 5**: TDOE reviews instrument, rating scale, and analyzes pilot data.
- **Step 6**: TDOE recommends survey vendors to State Board of Education for final approval.
- **Step 6**: LEAs may use the survey instrument for evaluative purpose in the following school year.
Appendix C: Achievement Measure Worksheet

**ACHIEVEMENT MEASURE WORKSHEET**

Team Educator Acceleration Model

Principal Evaluation
Overview
Principal Evaluation Summary

The Tennessee First to the Top Act requires annual evaluations for all Principals and Assistant Principals. The Tennessee Department of Education has designed a new principal evaluation system that is based in the *Tennessee Instructional Leadership Standards* (TILS) to meet this requirement.

Principal and Assistant Principal evaluation will be based on the following measures:

- **50% Qualitative:**
  - 35% - scores on a rubric that is based on the standards outlined in the *Tennessee Instructional Leadership Standards* (TILS).
  - 15% - assessment of the quality of teacher evaluations.

- **50% Quantitative:**
  - 35% - school-wide growth data.
  - 15% of a teacher’s summative score is from an achievement measure that was selected by that educator. If there is disagreement on the most appropriate measure for a teacher to use as their 15% achievement measure, the teacher has the final decision.
Administrator Evaluation Process

- Similar to teacher evaluation, but different
- Over time rather than a snapshot
- Many ways to collect evidence, observing is still important
- Feedback conversation rather than post-conferences
- Self-reflections and surveys
- Growth and achievement choices similar to teacher process

1st Semester

1. Evidence Collection
2. Growth and Achievement Choices
3. Self-reflection
4. Feedback Conversation and Scoring

2nd Semester

1. Evidence Collection
2. Surveys
3. Completion of Teacher Observations
4. Feedback Conversation and Scoring

Summer

1. Bridge Conference

Changes to Administrator Evaluation Process

- Scores entered in CODE after each feedback conversation, averaged for final observation average
- All indicators scored on 1-5 scale
- Self-reflection required prior to first feedback conversation
- Quality of Teacher Evaluation not weighted separately
- Bridge conference after student outcome data is returned
- Evidence collection occurs over time, must include at least one visit to school
- Removal of “Formative Assessment” component
- Teacher Perception Survey added as option for survey component

Emphasis on Evidence Collection

- Ongoing evidence collection
  - Practices, observations, outcomes
  - Intentional observation of specific activities
  - Focus on quality of results, not quantity of activity
- Have a plan for finding the information you need
Examples of Evidence Collection

- Conversation with stakeholders
- Intervention schedules and plan
- Formative assessment data
- Instructional practices changing in school
- Observations of teacher observation process
- Observations of PLCs

What is a Bridge Conference?

- A summative conference reviewing qualitative evaluation data and student outcome data
- A formative conference setting individual growth plans and school goals
- Should be combined with other summer meetings such as school improvement planning or goal-setting meetings.

Survey Menu of Options

- Teacher Perception Survey
- Local stakeholder survey
- Student engagement survey
- School climate survey
Team Educator Acceleration Model

Forms & Rubrics – Principal Evaluation
# Principal Evaluation Observation Form

**Tennessee Administrator Evaluation Model**

### Ratings Descriptors:
- **1** – Significantly Below Expectations – limited implementation and unsatisfactory knowledge
- **2** – Below Expectations – partial implementation and basic knowledge
- **3** – At Expectation – consistent implementation
- **4** – Above Expectation – consistent implementation with successful adaptation to school context
- **5** – Significantly Above Expectations – exemplary implementation with innovation that leads to dramatic gains in student outcomes

Overview

Tennessee Instructional Leadership Standards (TILS)
Recognizing the importance of engaging in a continuous improvement process, Tennessee seeks to transform what it means to be an effective instructional leader at all phases of a leader’s career. This aim is accomplished by setting high standards for effective leadership based upon research and best practices, supporting leaders to reach those standards, and empowering districts to build a network of exceptional instructional leaders who get results.

The Tennessee Instructional Leadership Standards (TILS) establish the structural framework of the Administrator Evaluation Rubric by defining a set of indicators and detailed descriptors that provide a clear set of expectations to schools and districts. The rubric is designed to help instructional leaders develop the type of leadership practices directly related to substantial gains in student achievement. Moreover, the leadership practices embedded in the indicators and descriptors are largely tied to the indirect, but vital, role and impact school leaders have on student achievement. Just as the TILS do not include separate areas to address ethical issues, the rubric does not separate these areas by indicator and descriptor. The premise is the same with the rubric as with the standards—attributes such as honesty, respect, sound judgment, commitment, fairness, compassion, work ethic, and a genuine belief that all children can learn and grow contribute to the foundation of ethical behavior connected to leadership.

The Administrator Evaluation Rubric is...
- Approved by the State Board of Education as a tool used to guide a fair and transparent administrator evaluation
- Developed to establish a culture of support for instructional leaders
- Intended to help engage educators in reflective dialogue among and between peers and evaluators to improve practice
- Used to support school leaders and those who support school leaders in acknowledging a leader’s effective practices and results
- Supportive of a leader’s opportunities for improvement, offering guidance on professional growth and learning for oneself and for other educators

The Administrator Evaluation Rubric is not...
- A checklist, but should be used to weigh the preponderance of evidence over time against the levels of practice defined in the indicators and descriptors
- Inclusive of all salient aspects of a school leader’s role, rather it focuses primarily on the dimensions of leadership most directly linked to managing teacher effectiveness and increasing student achievement
- Meant to address areas of performance related to personal conduct as described in district and state policies

Begin with the End in Mind: The Importance of Vision
In Tennessee, it is expected that the vision of the school, developed in collaboration with multiple partners and aligned with the district’s vision, will drive the actions demonstrated in the
indicators and descriptors in this rubric over time to increase student achievement. The vision provides a powerful communication and coalescing tool for all stakeholders in the school, creating a “word picture” of what is to be created and maintained. Crafting an exemplary vision requires asking an essential question: When a vision for continuous improvement, culture conducive to teaching and learning, and professional learning and growth (standards A, B, and C) has been developed and implemented, what will be different for: 

- your students?
- your teachers?
- your school?
- your parents?

An exemplary visioning process occurs when school leaders jointly develop a vision for continuous improvement, contextualized through a) a vision for a culture conducive to teaching and learning and b) a vision for professional learning and growth. The resulting overarching school vision thus exhibits and requires:

- collaboration with key partners to identify and enact clear, measurable, annual goals;
- linkage to goals that support student achievement, gap closure, and college and career readiness with evidence of growth;
- communication to nearly all stakeholders;
- modeling of personal commitment to continuous improvement and a culture conducive to teaching and learning; and
- modeling of school-wide beliefs in professional learning and growth

Research Supporting the Administrator Evaluation Rubric

In collaboration with the superintendents’, supervisors’ and principals’ study councils, the drafting process for the Administrator Evaluation Rubric was largely informed by administrators throughout the state whose suggestions, questions, and concerns regarding the rubric’s language were strongly considered during the development of all iterations of the draft. In addition to input from colleagues statewide, the following research supports the content of the rubric:

- American Institutes for Research’s *The Ripple Effect*, 2012
- Georgia Department of Education’s Leader Keys Effectiveness System, 2012
- Indiana Department of Education’s Principal Effectiveness Rubric, 2013
- ISLLC’s Educational Leadership Policy Standards, 2008
- James Stronge’s Principal Evaluation, 2012
- Tennessee’s Standards for Professional Learning, 2012
- McREL’s Principal Evaluation System, 2009
- New Leaders’ Urban Excellence Framework, 2011
- Stronge, Richard, and Catano’s *Qualities of Effective Principals*, 2008
- Tennessee’s Teacher Leader Standards, 2011
- Waters, Marzano, and McNulty’s Balanced Leadership: What 30 Years of Research Tells us about the Effect of Leadership on Student Achievement, 2003
**Standard A: Instructional Leadership for Continuous Improvement**

“Good leadership is not about you. It is about what you leave behind.... In the process of improvement, it is almost inevitable that significant barriers will arise. Great leaders learn to build trenches under barriers and find ladders to use to climb over them.”

—Joseph Murphy, Essential Lessons for School Leaders, 2011

Standard C: Professional Learning & Growth

“Highly effective principals work explicitly to improve instruction in the classroom in the form of conducting observations and giving feedback, leading professional development sessions, leading data-driven instruction teams and insisting on high expectations for all students. [They] provide ways for teachers to continuously grow in their careers. [Highly effective principals] arrange opportunities for staff to learn from one another, and they delegate leadership roles.”

Glossary of Terms

**Standard A1: Capacity Building**

**Build Capacity:** The term is also noted as “capacity building” in several descriptors of the rubric and refers to a school leader’s ability to develop the knowledge base and skill set of educators related to the specific indicator in which the term appears. Options and examples of how building capacity is measured are found in the rubric’s Possible Sources of Evidence column.

**Shared Leadership:** The term refers to the school leader’s ability to maximize all of the human resources in an organization by strategically developing and supporting individuals and giving them an opportunity to take leadership positions in their areas of expertise.

**Standard B1: Leveraging Educator Strengths**

**Extend Impact:** The term refers to a school leader’s ability to use the demonstrated skills and expertise of educators to support, not only the academic growth and achievement of their assigned students, but to also create conditions for educators to support the growth and learning of other educators. The goal of extending the impact or positive reach of all educators is to have school leaders appropriately distribute leadership across the school community as a way to create and/or sustain students’ ability to meet or exceed academic and or behavioral growth and achievement targets.

**Standard C2: Differentiated Professional Learning**

*Tennessee Standards for Professional Learning define the tenets for implementing and monitoring effective Differentiated Professional Learning. To see the standards in detail, go to* [http://www.tn.gov/sbe/policies.shtml](http://www.tn.gov/sbe/policies.shtml)

**Data:** Professional learning that increases educator effectiveness and results for all students, uses a variety of sources and types of student, educator, and system data to plan, assess, and evaluate professional learning. Examples include clearly articulating the critical link between increased student learning and educator professional learning.

**Leadership:** Professional learning that increases educator effectiveness and results for all students requires skillful leaders who develop capacity, advocate, and create support systems for professional learning. Examples include:

- Developing capacity for learning and leading at all levels support
- Providing constructive feedback to refine new practices
- Sustaining implementation of new educator practice and student learning through ongoing
- Facilitating implementation of knowledge and skills gained from professional learning activities
- Communicating expectations for implementing knowledge and skills gained from professional learning activities
- Monitoring implementation of knowledge and skills gained from professional learning activities

**Learning Communities:** Professional learning that increases educator effectiveness and results for all students occurs within learning communities committed to continuous improvement, collective responsibility, and goal alignment.
Team Educator Acceleration Model

APPENDIX

- Suggested Combined Observation Cycle
- TVAAS Overview & FAQ
- Special Groups Observation Guidance
- NIET Best Practices Website
{Intentionally left blank}
In November 2011, the state board updated its policy to allow districts added flexibility to combine observations in a single classroom visit, if they choose to do so. The following observation cycle is the recommendation for the Knox County Schools. However, there may be individual circumstances where the original observation sequence is maintained.

### Apprentice License or level 1 on previous Growth or Final Evaluation Score
For apprentice licensed teachers, the following is the **suggested** combined cycle for the year.

<table>
<thead>
<tr>
<th>Semester</th>
<th>Suggested Sequence</th>
<th>Type</th>
<th>Length</th>
<th>Rubric</th>
<th>Pre-Conference</th>
<th>Post-Conference Type</th>
</tr>
</thead>
<tbody>
<tr>

</table>

**Professional License, level 5 on previous Final Evaluation Score have a choice to have one formal unannounced observation visit and two walk-throughs, or to remain with the traditional observation structure.**
OBSERVATION GUIDANCE DOCUMENTS: Cover Sheet

BACKGROUND
Certain subgroups of educators, which are listed in the table below, operate in unique situations that may require additional attention to apply the TEAM evaluation model with fidelity and provide educators with meaningful feedback. As such, we have conducted numerous focus groups, with educators working in these areas, to develop additional guidance to support evaluation. The accompanying documents are meant to serve as an instructive, although not exhaustive, list of areas to which administrators should direct additional attention based on the unique instructional or service setting of the educator. These are meant to supplement, not replace, the TEAM evaluation rubric. Together, the pre-observation questions, key areas for gathering evidence, examples of evidence and artifacts, and examples of excellence present an evaluator with additional resources to use to conduct high-quality evaluations.

COMPONENTS
The accompanying documents for each educator group are broken down into two components.

1. The Observation Document provides:
   - a quick glance at some guiding questions and overarching concerns for each educator group; and
   - examples of pre-observation questions, key areas to focus evidence gathering, and examples of appropriate evidence/artifacts the evaluator may collect.
     o NOTE: Key areas for evidence are not intended to replace the indicators in the TEAM evaluation model, but rather are more detailed guidelines for evaluating indicators that educators have identified as particularly tricky to observe.

2. The Observation Support provides:
   - additional context for the evaluator when considering the responsibilities of each educator,
   - detailed examples to illuminate some of the key indicators and areas for evidence, and
   - a platform for meaningful discussion between educators and evaluators around best practices.
     o NOTE: This can be especially useful for structuring pre-conference discussions.

GENERAL EDUCATOR RUBRIC | SCHOOL SERVICES PERSONNEL RUBRIC
--- | ---
Early Childhood | School Counselors
Special Education | School Audiologists
Career and Technical Education (CTE) | Speech/Language Pathologists (SSP)
Online Educators | School Social Workers (SSW)
Alternative Educators | Vision Specialists
Interventionists | School Psychologists
PRE-OBSERVATION QUESTIONS

1. How will students demonstrate mastery of the objectives the educator is teaching?
2. How will students represent their knowledge?
3. How will the actions and conversations be different in your classroom than in the classrooms of older children?
4. How will students know the goal or target for the activity or lesson?

KEY AREAS FOR EVIDENCE

1. Instruction—Questioning
   - Educator asks questions that are developmentally appropriate, varied, of high quality, and regularly require active responses.
   - Educator questions are scaffolded throughout the lesson to gauge the depth of comprehension and targeted to meet differentiated student needs.
   - Educator encourages a variety of active responses, including, but not limited to: whole class signaling, choral responses, individual responses, written responses (dictated to educator), etc.
   - Educator uses methods that demonstrate all students have mastered concepts. All students are accountable for answers.

2. Instruction—Academic Feedback
   - Educator’s oral feedback is consistently academically focused, frequent, and of high quality. Written feedback is minimally used given the developmental abilities of pre-K students.
   - Educator consistently uses student feedback to guide and adjust the level and pace of instruction.
   - Students are given age-appropriate feedback.

3. Instruction—Thinking
   - Educator thoroughly teaches two or more types of thinking, though evidence of each type may differ from older students’ demonstration (e.g., evidence may be given verbally, with pictures, through active motion, etc.).
   - With guidance, students can verbalize what they are learning, why they are learning it, and how it connects to previous learning.

4. Instruction—Problem-Solving
   - Educator effectively implements activities to teach and reinforce multiple problem-solving types, as age appropriate. Careful attention should be paid to the evidence of problem-solving skill development for young children.
   - Students can effectively identify a problem and generate potential solutions (NOTE: This process is often best observed in young children when they are engaged in a play environment, small group setting, or within the context of a story or discussion).

5. Instruction—Student Work
   - Students demonstrate their understanding and higher order thinking in a variety of ways, but extended written work is not appropriate for this age group (e.g., mastery may be demonstrated through oral response, visual representations, or other means).
   - Student work clearly demonstrates mastery of a specific learning goal or set of learning goals.

EXAMPLES OF EVIDENCE/ARTIFACTS

- Lesson plans and scope and sequence
- Student portfolios, including photographs
- Communication logs
- Annotated student work and rubrics
- Assessment data (social/emotional, literacy, and math)
- Centers plans
- Evidence of collaborative planning with assistants
- Evidence of routines and transition times
- Evidence of ongoing learning (e.g., objectives building over a unit and students revisiting prior work)
OBSERVATION SUPPORT: Early Childhood

The evaluator should consider that determining the rigor and appropriateness of questions may be more difficult with younger students and that written feedback may not be appropriate in early childhood education. Additionally, evidence of higher order thinking, problem-solving, and mastery may look very different than it would in classroom settings with older students.

I. INSTRUCTION

<table>
<thead>
<tr>
<th>EXAMPLE—QUESTIONING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Instruction—Questioning:</td>
</tr>
</tbody>
</table>

Educator shows students the cover of a book and asks them to turn to a partner and answer the question "What do you think will happen?" Students share with a partner and then with the class. Educator begins reading, pausing periodically to question students about what is happening (e.g., "Why did Franklin have to skip breakfast? What would happen if Franklin missed the school bus?"). Students discuss with partners and teacher randomly selects 2-3 students to share their answers by selecting popsicle sticks with students’ names from a jar. As the teacher finishes the story, he/she shows the students the cover again and asks students to share whether or not their predictions came true. They discuss their predictions and what clues they used to make those predictions.

Examples of possible questions for consideration as higher order when teaching young children may include:

In all situations:
- What would happen if...?
- Have you ever...?

In stories:
- How do you think (character) felt?
- Why did (character) do this?
- What would you have done if you were the...

To help with problem solving when using manipulatives or engaging in center activities:
- What can you change to fix this problem?
- What if you...?
- Why did you...

*Questions are primarily open ended. Educator provides "wait time" (3-5 seconds) and has a system to ensure all children have an opportunity to respond. Further information is given as needed to expand question.

<table>
<thead>
<tr>
<th>EXAMPLE—ACADEMIC FEEDBACK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Instruction—Academic Feedback:</td>
</tr>
</tbody>
</table>

Students are engaged in an activity where they are sorting shapes by size and type. Educator asks students individually to explain what they are doing. Appropriate student responses reflect understanding of the task at hand and the reasoning behind it. Educator has one-on-one conversations about the work and provides specific feedback as needed to guide students (e.g., "You counted the sides to decide if this was a triangle," "I think you missed a side when you were counting. Let's try again," "...not, "Good job!"). Students making errors are encouraged through feedback and questioning to correct mistakes (e.g., "This object looks smaller than the others. How could you fix this problem? Where would it go? You might compare the objects side-by-side to decide which ones are the same"). Educator has a plan in place to document responses and approaches to the learning activity.
EXAMPLE—THINKING
Instruction—Thinking:

After teaching the attributes of the triangle, educator explains that students will choose a shape from a bag and decide if it is a triangle or not by describing its attributes. Educator chooses a shape and clearly models the thought process by using out loud “self-talk” to describe his/her shape. Educator allows students to choose shapes and asks them to see if theirs have similar attributes. Students explore their shapes and talk with peers about what they observe. Educator asks students to explore what happens when two triangles are put together side-by-side, what happens when connecting three? four?, etc. Students discuss possibilities with their peers and share conclusions with the class. Following large group time, students are given several triangles of construction paper and allowed to create their own design with the shapes.

Examples of most common types of thinking for pre-K and kindergarten:

• *Practical*: After discussions on the weather, students can identify appropriate clothing to wear in warm or cold weather.
• *Creative*: Students use art materials, blocks, or other building materials to express ideas on a specific task.
• *Analytical*: After listening to the same book/story read over several occasions, students can respond to questions about the characters, setting, or plot of the story.

EXAMPLE—PROBLEM-SOLVING
Instruction—Problem-Solving:

Educator reads story in which the main character encounters a problem. Educator pauses during story to engage students in identifying the problem (e.g., TEACHER: “Why is Jenny upset?” STUDENTS: “Because her brothers won't let her play with them.”). After students have identified the problem, educator encourages them to identify some potential solutions (e.g., “What do you think Jenny should do to get her brothers to play with her?” STUDENTS: “She could teach them a neat trick. She could ask them nicely. She could talk to an adult, etc.”). Educator asks students to talk with a partner to decide what they think the best solution would be and what will happen if Jenny chooses that solution. Educator asks students to talk with a partner to decide what they think the best solution would be and what will happen if Jenny chooses that solution. Educator continues reading and students listen to see if Jenny chose the same solution as them. Educator leads students in a discussion of Jenny's choice, if it worked, and what she could have done differently.

EXAMPLE—STUDENT WORK
Instruction—Student Work:

Educator engages class in a book discussion and has students create a visual representation of an event in the story. As students work individually, educator asks them to verbally explain their choices and why they chose to draw/represent them in that way. Students justify answers verbally and educator journals responses. Students clearly demonstrate connections between learning and personal experiences. Educator reviews with students the goals they are working towards. This extended verbal response is the most valid descriptor with children of this age as it incorporates the use of language beyond the yes/no or multiple-choice type of answer or work.
OBSERVATION DOCUMENT: Special Education

**PRE-OBSERVATION QUESTIONS**

1. What is being brought to the classroom that would not be present otherwise?
2. In what ways do you plan with the regular educator? How do you plan using student data?
3. What strategies and modifications do you bring to the classroom?
4. What are the unique circumstances in the classroom setting where you will be observed (e.g., inclusion vs. resource vs. life skills)?
5. How are the indicator descriptors addressed and what they will look like (if modified) in the specific instructional setting?
6. What is the direct link between what is on individual students' IEPs and what will be observed in today's lesson?
7. How do you plan lessons in a way that fulfills the goals and objectives of multiple IEPs?
8. How did you plan for each student?
9. How did you plan for your teaching assistant (TA)?
10. What data are you collecting? How are you collecting this data? How will you use this data to drive your instruction?
11. What evidence will indicate mastery?
12. What is your next step for improving your instruction?
13. What do you do for your own professional development?

**KEY AREAS FOR EVIDENCE**

1. Instruction—Standards and Objectives
   - A clear connection between the state standard(s) or the IEP goals/objectives is evident.
   - The IEP goals are designed in a way to accelerate progress (close the gap).
   - Students with IEPs are made aware of the goals/objectives on their particular IEP.

2. Instruction—Questioning
   - Students are pushed to generate developmentally appropriate questions that lead to further inquiry and self-directed learning.
   - Questions are designed in a manner adapted to the students' particular learning styles.
   - Questions glean information from students that probably would have otherwise been unknown.

3. Instruction—Grouping of Students
   - Grouping of students maximizes the impact of specific activities during the lesson and deliberately takes into account diverse learning needs.
   - Group composition is flexible in order to be most beneficial for the individual needs of diverse learners.
   - Grouping strategies may be consistently the same depending on the nature of the special educator's role, but in each case the groups maximize student learning.
   - The grouping of students is directly connected to ongoing data collection, progress monitoring, and the needs of the students.

4. Planning—Instructional Plans
   - Goals are measurable and explicit, aligned to state standards or student IEPs, and designed to clearly identify the gap between present level of performance and grade level performance.
   - Goals and objectives are selected in a manner to address deficits, accelerate progress, and close the gap.
   - There is clear evidence that the plan provides regular opportunities to accommodate individual student needs (inclusion or pull-out).
   - Instructional plans are written in a concise, efficient manner that maximizes the amount of time spent with the student.
EXAMPLES OF EVIDENCE/ARTIFACTS

- Instructional plans
- "I can" statements
- IEPs
- List of objectives and sub-objectives
- Service logs for IEP implementation
- List of accommodations and modifications
- Special education specific assessments
- Self-assessments with rubric(s)
- TA schedule
- Data notebooks
- Student work products
- Data sheets

OBSERVATION SUPPORT: Special Education

The standards and objectives for special educators must be reframed and adapted within the framework of individual student IEPs. Special educators may use alternate standards for students with significant cognitive disabilities. Questioning must also be reframed according to the diverse needs of the specific populations served. Student grouping strategies do not always apply, depending on the nature of the service or instruction (e.g., grouping may be different in pull-out vs. inclusion). Given this unique setting, lesson plans should be based on and aligned with IEPs. When appropriate, plans should be lesson-specific as well as student-specific.

I. INSTRUCTION

EXAMPLE—STANDARDS AND OBJECTIVES

Instruction—Standards and Objectives:

Special educator instructs students based on their present level of performance while adding rigor to reach grade level standards. Standard-based IEP goals and objectives denote grade-level standards, and objectives denote present level of performance for current instruction. Students are clearly informed of which standards they are working on mastering and how they have been progressing towards those goals; however, it may be difficult for them to articulate these goals without guidance.

EXAMPLE—QUESTIONING

Instruction—Questioning (Inclusion):

Special educator follows up with individual students or small groups of students to ask additional clarifying questions and scaffold student thinking. Special educator structures questions for individuals and groups to engage in appropriate levels of rigorous problem-solving. The special educator knows his/her students so well that there is an intuitive exchange that gets at what the student knows to a greater degree. Students are frequently surprised by how much they do know. Students are able to generate questions that lead to further inquiry and self-directed learning.

Instruction—Questioning (Direct Instruction):

Questioning is within the parameters of the curriculum and all questions (forms and frequency) depend on the objective of the lessons. The teacher actively works to develop higher-order thinking skills in students. In order to foster and monitor this development, teacher establishes and maintains communication with students by asking questions.

- Teacher questions are varied and high-quality, providing a balanced mix of question types:
  - What's another way you might...?
  - What would it look like if...?
  - What do you think would happen if...?
  - How was...different from...?
- When have you done/experienced something like this before?

- Students ask specific questions:
  - Is this problem correct?
  - Could you show me the correct way to answer this?
  - Could you repeat the directions?
  - Should I complete the entire worksheet?
  - Can I go on to the next part?
  - What does this result mean?

---

**EXAMPLE— GROUPING OF STUDENTS**

Instruction—Grouping of Students:

Teacher develops instructional grouping arrangements (whole class, small group, pairs, individuals, learning style, etc.) to consistently maximize student understanding and learning. The students exhibit evidence of this learning through: group projects, visual presentations, demonstrations, the use of technology, and verbal, gestural, or written communication of their understanding. The teacher then collects data on the effectiveness of these grouping strategies through formative assessment tools. This data is used thoughtfully and effectively to drive future instruction and facilitate meaningful communication with relevant stakeholders.

---

**II. PLANNING**

**EXAMPLE— INSTRUCTIONAL PLANS**

Planning—Instructional Plans:

Teacher develops lesson plans that denote specific groups based on subject and ability to maximize learning for all students. Lesson plans will include grouping instruction for remediation, maintenance, and enrichment of skills. Lesson objectives are clearly scaffolded to build on prior knowledge and provide different levels of learning targeted to specific students’ needs.
OBSERVATION DOCUMENT: Career & Technical Education (CTE)

PRE-OBSERVATION QUESTIONS

1. What objectives will this lesson cover, and how is that aligned to course standards? How do these objectives fit in the scope and sequence of the current unit and course as a whole?
2. How will students demonstrate mastery of objectives?
3. How will students be grouped in this lesson? How does this maximize student learning?
4. How will you use questions to further each student’s understanding of the competencies aligned to the objectives? What questions do you have planned?
5. What types of problem-solving will you teach or reinforce throughout the lesson? What should I look for in individual student work?
6. What do you want students to accomplish by the end of this lesson?
7. What will modeling look like? What concepts need modeling?
8. What problems may students encounter as they complete this task?
9. How will you know that they have accomplished/mastered the skill?

KEY AREAS FOR EVIDENCE

1. Instruction—Questioning
   - Teacher consistently scaffolds toward higher order questioning even when working with students on a physical task and/or at the beginning of a multi-step project.
   - Questions in lab setting are intentionally structured and scaffolded to increase competency of students in practiced skills regardless of students’ current skill level.
   - Questions regularly require active responses (e.g., performing a physical skill).
   - Key questions are pre-planned with purpose.

2. Instruction—Grouping Students
   - Students are intentionally and appropriately grouped to maximize learning efficiency, student understanding, and student competency attainment.
   - In a lab setting, grouping may be constrained by number or size of available materials, physical structure of the lab, and/or the safety requirements.

3. Instruction—Problem-Solving
   - Teacher models and actively engages students in multiple types of problem-solving.
   - Students consistently employ different types of problem solving targeted to their level of mastery or their progress in producing a finished product.

4. Planning—Assessment
   - Assessment plans have clear measurement criteria, and allow students to demonstrate mastery in a variety of ways (e.g., creating projects, presentations, etc.).

EXAMPLES OF EVIDENCE/ARTIFACTS

- Lesson plans, unit plans, and scope & sequence
- Rubrics and checklists
- Prior student work
- List of questions to employ during lesson
- Finished student products
- Measures of student performance
- Rationale of grouping or other teaching strategies
- Rationale for types of problem-solving
- Student portfolios
- Computer module assessments
OBSERVATION SUPPORT: College, Career & Technical Education (CCTE)

CCTE teachers often work in laboratory settings with highly specialized content, and students often work independently on personal competency/skill attainment. Some lab settings are constructed to only allow for one grouping method or grouping options may be dictated by standardized safety or material requirements. Evaluators should probe to understand setting and rationale for grouping. Depending on where students are in the production process, some types of problem-solving may not be immediately evident or may be student-driven. Some forms of assessment in a CCTE lab may be unfamiliar to evaluators trained in traditional academic settings. Because of federal requirements to report on skill attainment, some competency assessments may be limited to specific methods of measuring student performance (e.g., creation of a product over a period of time).

I. INSTRUCTION

**EXAMPLE – QUESTIONING**

Instruction—Questioning:

Teacher asks a specific student to perform one step of a multi-step process involved in the day’s objective. Teacher questions student at a high level of rigor so that they reflect on their performance and how it may impact future steps of the process (e.g., in a cosmetology class: “What is the first step?” “Let me see you do it.” “Now that your left hand is here, are you ready for step two?” “What might happen if you do that with your right hand instead?” “What are you trying to accomplish using your left instead of right?” “How might you get a tighter twist with your hand?” “Why might a tighter twist matter for this style?”).

Teacher questions engage students in meaningful reflection of their personal work. Students draw conclusions about how a piece of knowledge or a skill could be applied in different ways. Teacher provides multiple opportunities for students to ask questions. Students are reflective about their work and its implications for their performance.

**EXAMPLE – GROUPING STUDENTS**

Instruction—Grouping Students:

Within a Business course, teacher allows students to pick their “business partner” which simulates a real life opportunity. Students may then join with another pair assigned by the teacher to create a diverse set of multiple roles/responsibilities to achieve a larger goal. Grouping is deliberate and based on areas of expertise, skill level, or learning style (e.g., groups created based on data from assessments or teacher’s prior knowledge). Teacher works with students to clearly establish expectations for roles within each group, time limits, outcomes for group, etc.

In a lab with a one-to-one ratio of students to computers, a teacher explains that students will be working in a whole group configuration. Teacher explains that this grouping scheme was chosen to take advantage of each student having a computer and being able to practice the skill because it is important to the unit goal that all students can accomplish the task individually.
EXAMPLE – PROBLEM-SOLVING

Instruction—Problem Solving:

Teacher guides students using inquiry, giving students time to problem solve independently or in groups through practice. Students are given ample time to reflect on work and independently troubleshoot technical issues in a lab setting. Teacher encourages students to use help tools available to solve individual technical problems within a lab setting. Students are given the opportunity to brainstorm ideas and evaluate possible solutions to a problem. Teachers build in activities such as small experiments, opportunities for design, and brainstorming sessions for students to engage in as they interact with new material. Students are able to effectively tap into prior knowledge to predict outcomes, create hypotheses for experiments, and improve on solutions to a given challenge.

II. PLANNING

EXAMPLE – ASSESSMENT

Planning—Assessment:

In a Business Technology class, a student must use software applications to complete a project. Within the project requirements, students must correctly use software tools to accomplish the task. Throughout lesson, teacher employs several strategies (e.g., choral response, random selection of students to respond to questions, written reflection, etc.) to determine pacing and identify areas for re-teaching. Teacher formatively assesses student production through observation and questioning that is aligned to a rubric. Students may be working independently at varying levels based on differentiated instruction. Students demonstrate a task or skill using provided rubric to influence work and self-score final product. Students show teacher how to use a layer mask or editing feature in Photoshop, and the teacher summatively assesses students' ability using a rubric that was shared during the introduction of the project.
OBSERVATION DOCUMENT: Online Educators

**PRE-OBSERVATION QUESTIONS**

1. How do you modify and supplement curriculum, and why?
2. What types of communication do you use? With whom? How do you decide which medium to use?
3. How do you monitor pacing and ensure students stay on track?
4. How do you address issues of academic integrity and “netiquette”?
5. How do you assist struggling learners?
6. What is your connection with other online educators?

**KEY AREAS FOR EVIDENCE**

1. Instruction—Presenting Instructional Content and Lesson Structure and Pacing
   - Online educator strategically augments or modifies content and activities to meet individual needs of students.
   - Online educator implements instructional design best practices (see iNACOL best practices – [www.inacol.org](http://www.inacol.org)) when augmenting or modifying course content.

2. Instruction—Questioning, Thinking and Problem Solving
   - Student work clearly displays a high level of questioning, thinking, and problem-solving.
   - Online educator provides effective prompts in web-based communications and adds/modifies content based on student feedback and performance in order to enhance student learning.

3. Instruction—Grouping
   - When appropriate, small groups are used to maximize student learning.
   - There are clearly established norms and procedures for working in groups that students can easily articulate.

4. Instruction—Academic Feedback and Motivating Students
   - Feedback may be given synchronously (real-time) or asynchronously (delayed) via message boards, text messages, social media, phone calls, e-mails, etc. while complying with each LEA’s internet safety policy.
   - Feedback is consistently differentiated, models appropriate conversational tone and “netiquette,” and encourages student participation.

5. Planning—Instructional Plans, Student Work, and Assessment
   - Online educator provides alternate means of assessment, instructional plans, or student work when necessary to meet the needs of diverse learners.
   - Instructional plans, student work, and assessments are easily accessible to students, parents, and administration within a secure system (NOTE: Security of the system is a system-wide responsibility, and as such, teacher should be held responsible for the accessibility of work, not the security of the site).

6. Environment—Respectful culture
   - Online educator appropriately uses content-specific terminology, maintains appropriate instructor-to-student conversational tone, and conforms to appropriate digital “netiquette.”
   - Students appropriately mirror educator actions to maintain a culture of respect.

**EXAMPLES OF EVIDENCE/ARTIFACTS**

- Discussion boards
- Messages (to students and parents)
- Content and content modifications
- Grade book
- Announcements
- Syllabus/pacing guides
- Feedback on assignments
- Social media (course wikis, blog comments)
- Additional references or links to resources
- Posted office hours
- Communication logs
- Synchronous class meetings via video, chat room, face-to-face
- Creation of review paths and re-teaching tools
- Online learning environment norms
OBSERVATION SUPPORT: Online Educators

Most of the content and structure are produced by the curriculum provider, and there is no physical classroom. Evidence of student learning is not always readily apparent in the lessons or modules and may take further exploration to identify (e.g., speaking with online educator or students). Opportunities for grouping may depend on enrollment policies and may include use of social media, collaborative projects, etc. Feedback is individualized and is provided through digital communications rather than face-to-face.

I. INSTRUCTION

**EXAMPLE—PRESENTING INSTRUCTIONAL CONTENT/LESSON STRUCTURE AND PACING**

Instruction—Presenting Instructional Content/Lesson Structure and Pacing:

Online educator creates an online lecture for students that they are able to sign in to. Online educator has detailed script for lecture that features high-level checks for understanding, focused standards-based content, and ample opportunity for student engagement and thought. Online educator incorporates online assignments that align with lesson objectives, course instructional content, and assessments. Online educator requires timely student response but ensures students are given a suitable amount of time to complete and submit assignments at their own pace depending on their specific needs. Students respond to checks for understanding and ask clarifying questions via community message boards that allow them to meaningfully engage with their virtual classmates. Online educator appropriately adjusts future instruction based on data gathered from formative assessment.

**EXAMPLE—QUESTIONING/THINKING/PROBLEM-SOLVING**

Instruction—Questioning/Thinking/Problem Solving:

Online educator bases a part of students’ grades on participation in online discussion boards or social media networks designed to facilitate discussion. Online educator creates moderated online forum for questions and responses. Students post questions and reflections based on readings or activities and respond to instructor and peer communications. Online educator evaluates student postings to ensure higher levels of understanding. Online educator provides additional prompts as needed to promote higher levels of learning.

**EXAMPLE—GROUPING**

Instruction—Grouping:

Online educator assigns group projects that require teamwork, communication, and collaboration, but that do not always require in-person contact. Educator forms groups based on like interests, learning styles, personalities, etc. Educator outlines explicit rules for group work (e.g., communicating via email, professionalism, respect, humility, etc.). Students work to come up with an action plan for their group work that they submit to online educator; this allows them to come up with a pacing plan that suits their individual needs. Online educator checks in with students periodically and asks targeted questions to help students improve the quality of their work. Educator responds to students’ questions quickly and thoroughly via systematically approved digital communications. Online educator provides students with appropriate support and time to successfully complete group projects. Online educator provides students with the opportunity to evaluate the performance of their fellow group members and uses student group evaluation feedback to improve the effectiveness of group project guidelines and procedures.
EXAMPLE—ACADEMIC FEEDBACK AND MOTIVATING STUDENTS

Instruction—Academic Feedback and Motivating Students:

Online educator consistently provides clear, targeted, and rigorous written feedback for all students on a variety of assignments ranging across instructional styles. This commentary is often provided using track changes and comments to edit student work. Online educator allows appropriate time for students to internalize commentary and feedback and request clarification as needed. When appropriate, online educator allows students to revise assignments in order to improve student learning.

II. PLANNING

EXAMPLE—INSTRUCTIONAL PLANS/STUDENT WORK/ASSESSMENT

Planning—Instructional Plans/Student Work/Assessment:

Online educator implements instructional plans that allow for instructional differentiation based on individual student needs throughout all phases of the lesson. Online educator implements assessments that are aligned to state standards but include alternate means of assessment when necessary to meet the needs of diverse learners. Online educator clearly aligns assessment to student work and independent/guided practice. Online educator implements standards and rigor in the construction of individual lesson plans. Online educator utilizes an online system for students, parents, and administration to access student work, assessments, and grades.

III. ENVIRONMENT

EXAMPLE—RESPECTFUL CULTURE

Environment—Respectful Culture:

Within a “Getting Started” announcement, discussion forum, or other digitally approved method of communication readily available to all students, online educator defines communication, “netiquette,” and internet safety procedures. Online educator effectively facilitates an open discussion of these norms with students.
OBSERVATION DOCUMENT: Alternative Educators

PRE-OBSERVATION QUESTIONS

1. How do you ensure that your instruction addresses the individualized behavior and curricular goals/objectives of students?
2. How do you actively engage students in learning?
3. What are the engagement strategies (individual and whole group) that you use?
4. How do you communicate expectations for student behavior?
5. What do you do to reinforce and reward student effort?
6. How do you reinforce a respectful culture?
7. What techniques do you use to encourage students to treat one another with respect?
8. How do you decide which objectives are appropriate for students?
9. When did your students arrive?
10. Are there any special circumstances in your classroom that I should know about?
11. How do you assure a safe environment in your classroom for medically fragile students? How do you follow safety plans for at-risk youth?

KEY AREAS FOR EVIDENCE

1. Instruction—Standards and Objectives
   - Alternative educator can clearly and explicitly state objectives or content standard goals for students; although the individualized nature of student work means that whole class objectives are not consistent and generally not posted.
   - There is clear evidence that most students are progressing towards mastery of objectives; although the evaluator may need to speak with individual students to determine progression toward mastery.
   - Students are engaged in the process of mastering objectives.

2. Instruction—Lesson Structure and Pacing
   - Alternative educator clearly and deliberately uses individualized strategies to deliver lessons to students (NOTE: Students in alternative classrooms vary greatly in age, grade level, subject matter focus, etc. and as such, group work or partnering may be very minimal given the lack of overlap in instructional needs).
   - Alternative educator paces individual learning activities to align with the needs of students and scaffolds instruction to meet individual needs.
   - Routines are evident and can be articulated by students.

3. Instruction—Grouping
   - The instructional group arrangement may vary based on student behavior plans and/or individual goals but will consistently maximize student understanding and learning efficiency.
   - Instructional group composition may be varied based on the individualized needs/plans of the student instead of on factors such as race, gender, ability, and age, and are composed in the best interest of the student in order to accomplish the goals of the lesson.

EXAMPLES OF EVIDENCE/ARTIFACTS

- Conversations with students
- Daily assignment sheets, journals, and notebooks
- Behavior plans/contracts
- IEP
- Medical assistance plan
- Contraband document
- Student assessments
- Daily goal sheets and behavior point sheets
- Progress/data monitoring charts
- Student projects
- Safety sweep documents/checklist
OBSERVATION SUPPORT: Alternative Educators

The evaluator may need to look more broadly at the alternative educator, as the alternative educator often delivers lessons in a “non-traditional” manner given individual student needs. Similarly, instructional plans are not limited to “traditional” teacher weekly plans, and as such, evaluators may find it necessary to speak or interact with students to determine if learning and thinking are taking place. Finally, student work is individualized, so standards and objectives for the whole class are not consistent and generally not posted.

I. INSTRUCTION

**EXAMPLE—STANDARDS AND OBJECTIVES**

Instruction—Standards and Objectives:

In the classroom, all standards and objectives may not be visibly displayed. The evaluator circulates around the room and stops to speak with individual students. The students are able to articulate which standards and objectives they are working on mastering and how their current activity helps them to meet those goals. There is also evidence of prior student work that demonstrates significant progress towards meeting their individual goals. Similarly, the alternative educator can clearly state the learning goals for individual students and differentiates instruction to meet various learning needs, styles, and strengths. Although students may be in a variety of configurations, such as students standing, lying down, working in isolation, etc., they are actively focused on their instructional tasks.

**EXAMPLE—LESSON STRUCTURE AND PACING**

Instruction—Lesson Structure and Pacing:

In order to meet various learning needs, educator may divide students into several small groups and assign specific tasks. Students transition with minimal loss of instructional time. Throughout the instructional time, alternative educator maintains a flexible schedule that allows him/her to address learning in the moment and adjust course based on academic performance and behavior. This may not look like a typical classroom with blocks of time devoted to solely one subject, as students have a plethora of learning goals in a range of different subjects. Simultaneous instruction is rare due to the level of differentiation needed by this particular group of students.

**EXAMPLE—GROUPING**

Instruction—Grouping:

Alternative educator creates groups based on what is appropriate for the individual students and what will maximize student understanding and learning efficiency. The grouping arrangement considers student behavior plans, individual student goals, and developmental appropriateness. Some groups may be composed of either individual students or an individual student paired with the alternative educator and will be focused on what is in the best interest of the student. Throughout the instructional time, the alternative educator continuously measures the classroom climate and makes grouping adjustments as necessary. All students know their roles, responsibilities, and work expectations, and are working toward accomplishing the goals of the lesson.
# OBSERVATION DOCUMENT: Interventionists

## PRE-OBSERVATION QUESTIONS

1. In what area are you providing intervention? How do you identify area(s) of need? What data did you use to determine area(s) of need?
2. What is the length of the intervention?
3. What strategies and materials are you using to provide intervention?
4. Is this a lesson you have planned yourself or is this a scripted program?
5. How did you use data to make decisions about your instructional choices (e.g., meeting with data teams, reviewing data, etc.)?
6. How long have you been working with this group of students? Is this a static or fluid group?
7. How have you collaborated with peers (e.g., classroom teacher, data teams, other interventionists, etc.) to prepare for instruction based on student need?
8. Are there any students who need differentiated supports in your intervention class? If so, what are the supports and which student behaviors or needs are you responding to?

## KEY AREAS FOR EVIDENCE

1. **Instruction—Standards and Objectives**
   - Learning objectives will be tied to an area of deficit instead of a state content standard.
   - Sub-objectives identify the specific area of focus within a skill deficit (e.g., consonant blending).
   - Students will be working toward mastery of a specific skill, rather than mastery of a standard.

2. **Instruction—Activities and Materials**
   - Student-to-student interaction may be limited.
   - Adult-to-student interaction must be apparent.
   - Multimedia and technology may not always be appropriate and should be used to support an intervention provided by the teacher.
   - Time for reflection may not be appropriate or observed.
   - Student choices may be limited due to the focused nature of the lesson.

3. **Instruction—Questioning**
   - Higher-order questioning may not always be appropriate, but students should be engaged in learning and responding to questions.
   - Citing specific evidence may not be appropriate, depending on the focus skill.

4. **Instruction—Grouping**
   - Interventionist should maximize student understanding and learning efficiency by placing students in pairs or small groups; however, the intervention composition or program may limit the ability of grouping.

5. **Environment—Environment**
   - Interventionist may not have a dedicated classroom, and thus displaying student work may not be expected.
   - The classroom is arranged to support the skill-based activities.

6. **Planning—Instructional Plans**
   - Plans will be aligned to areas of deficit, rather than state content standards.
   - Evidence of differentiation strategies, detailed sequencing to build mastery, and clear purpose for the lesson should be evidence in the lesson plan.
   - Plans may not integrate other disciplines, depending on the skill focus.

7. **Planning—Student Work**
   - Engagement and conversation should be encouraged, but assignments may not lead to higher-order thinking, as repetition and focus on skill mastery are essential.

8. **Planning—Assessment**
   - Assessments will be aligned to areas of deficit, rather than state content standards.
   - Extended written tasks and portfolio-based assessments may not be appropriate.
EXAMPLES OF EVIDENCE/ARTIFACTS

- Progress monitoring data
- Notes from data team or collaborative meetings
- Other sources of data
- Learning plans
- Instructional plans (scripted or otherwise)
- Student data folders
- Lesson objectives
- Anecdotal documentation of monitoring

OBSERVATION SUPPORT: Interventionist

The evaluator may need to look more broadly at the interventionist than other educators delivering instruction, as the interventionist is tasked with supporting student learning outside the core instructional setting. Interventionist routines may vary at each school, and as such, the pace and structure of instruction may differ among school sites.

I. INSTRUCTION

EXAMPLE—STANDARDS AND OBJECTIVES

Instruction—Standards and Objectives:

The interventionist starts with the objective of the lesson, leading students to understand what their goal is while working through the sequence of the lesson (e.g., “Today we will be focusing on ____, we must have this skill to be able to _____.”). The interventionist then demonstrates what is expected. Students repeat expectations and move into the lesson. Activities are modeled before moving in depth into the lesson, and visuals are available.

EXAMPLE—ACTIVITIES AND MATERIALS

Instruction—Activities and Materials:

The interventionist presents the focus of the lesson, which is on word patterns, specifically words with ‘at’ (e.g., cat, bat, hat, etc.). The interventionist presents the reader that will be used for the lesson. Students are asked to hold up the reader and point to the words as they read “The Bat in a Hat”. The interventionist engages in the lesson with the student, focusing on the overall objective of the lesson. Students read and practice with a peer. The interventionist also has manipulatives, such as word tiles, available for students who need additional support.

EXAMPLE—QUESTIONING

Instruction—Questioning:

The focus of the lesson is on decoding CVC words. The interventionist asks the student to locate the vowel in the word “dog”. She then follows up with questions such as, “Is this a short or long sound? Let’s look at the surrounding consonants. What is the beginning/initial sound? What is the ending/final sound?” Throughout this questioning, the interventionist provides ample wait time, and uses tiles for visuals and actual manipulation. The questions and manipulations of sounds continue based on the level of need of each student.
## II. PLANNING

### EXAMPLE—INSTRUCTIONAL PLANS

**Planning—Instructional Plans:**

The interventionist creates an instructional plan that is aligned to the student's area of deficit. There is a clear objective stated, and the lesson is sequenced to build mastery. The interventionist has clearly outlined the essential vocabulary and skills needed to work towards mastery of the lesson. There is clear evidence of how the interventionist will differentiate support for each student.

### EXAMPLE—STUDENT WORK

**Planning—Student Work:**

In a lesson about word patterns, students are asked to underline consonants and delete/add different beginning and ending sounds. The interventionist also provides opportunities for repetition. For example, the interventionist may say the word “bat” and ask the student to say another word with the same pattern. This repetition may occur throughout the lesson to ensure the student is working towards mastery of the specific area of deficit.

### EXAMPLE—ASSESSMENT

**Planning—Assessment:**

The assessment requires a student to manipulate syllables or word parts. The interventionist has a rubric/checklist to mark off as the student works through the assessment. Prior to this assessment, the interventionist uses white boards to quickly assess understanding. The interventionist has a clear method of organizing anecdotal notes based on student responses. This method helps guide instructional decisions, but it also serves as evidence of the effectiveness of the intervention.
# OBSERVATION DOCUMENT: School Counselors

## PRE-OBSERVATION QUESTIONS

1. How do you coordinate services for students and families?
2. How do you keep the school and your stakeholders aware of changes to the counseling program?
3. What system of consultation do you use?
4. In what ways do you ensure that the counseling program is personally meaningful to stakeholders?
5. What type of data do you use in planning and delivering your comprehensive school counseling program?
6. How does your comprehensive school counseling program impact student achievement?
7. In what ways do you deliver a comprehensive school counseling program?

## KEY AREAS FOR EVIDENCE

1. **Delivery of Services—Communication**
   - Counselor communications with students/stakeholders are easily observable, occur on a regular basis, and are consistently varied and of high quality.
   - Counselor utilizes a balanced mix of communication methods, including but not limited to, written, oral, electronic, etc. that is targeted to specific student/stakeholder needs.
   - Counselor asks questions that frequently lead to further inquiry and self-directed learning.

2. **Delivery of Services—Consultation**
   - Counselor delivers consultation that is consistently focused, frequent, and of high quality.
   - Counselor effectively collaborates with the stakeholders, including outside agencies (e.g., DCS, therapists, psychiatrists, psychologists, etc.), to address issues and facilitate a participatory problem-solving process.
   - Counselor limits consultation to topics that are most appropriate to meet students' needs.
   - Counselor creates a consistent feedback loop that is used to monitor and continuously improve the quality and impact of programs and services.

3. **Delivery of Services—Service Structure and Pacing**
   - Counselor has targeted the pace and structure of services to align with the culture and norms of the school site while also considering the differentiated needs of specific students.
   - Counselor services are provided in a consistent manner with a deliberate beginning, middle, and end, as well as a time for reflection.
   - Counselor has strong, consistent routines for dissemination of materials and/or information.

4. **Delivery of Services—Knowledge of Students**
   - Counselor practices regularly incorporate student interests and cultural heritage.
   - Counselor exhibits a strong familiarity with and responsiveness to the needs of the student body as a whole, as well as specific individuals on his/her caseload.

5. **Environment—Managing Student Behavior**
   - Counselor has worked with students to develop clear rules and expectations for behavior that hold students accountable for their actions.
   - Counselor attends to disruptions quickly and firmly using a variety of techniques that are targeted to specific student needs.

## EXAMPLES OF EVIDENCE/ARTIFACTS

- Portfolios
- Behavior assessments
- Behavior intervention plans
- Service plans
- IEPs
- Individual student portfolios
- Post-secondary/graduation plans
- Training agendas
- Parent contact logs
- Written/electronic communication
- School improvement plan
- Group session outlines
OBSERVATION SUPPORT: School Counselors

The evaluator will need to look more broadly at the school counselor than the classroom teacher, as the counselor is tasked with serving hundreds of students/stakeholders in a unique service setting. Counselor routines may vary at each school, and as such, the pace and structure of services may differ among school sites.

I. DELIVERY OF SERVICES

### EXAMPLE—COMMUNICATION
Delivery of Services—Communication:

The counselor leads a parent meeting in a professional manner by hosting the meeting in a comfortable atmosphere, modeling expected behavior, presenting parents with updated documents, and maintaining a calm demeanor. The counselor stays on task throughout the meeting and deftly redirects the focus of the conversation to the topic at hand. The counselor pushes students and parents to actively participate in the problem-solving process and encourages thoughtful reflection. If a parent or student becomes upset, the counselor handles the situation calmly and professionally. Before ending the meeting, the counselor works with students and parents to come up with an actionable plan for next steps that is mutually agreeable.

### EXAMPLE—CONSULTATION
Delivery of Services—Consultation:

A parent contacts the counselor to discuss recent changes in their child's behavior. The counselor pulls attendance, academic, and discipline information to help the parent determine if the issue is occurring at school, home, or both. The counselor shares child development information with the parent and works with the parent to come up with potential areas of discord that may be triggering the misbehavior. Throughout the meeting, the counselor makes sure that the parent is actively engaged in problem solving to ensure investment in the agreed upon strategies that will be used to address the issue. The counselor makes the parent aware of services that are available to the student in school as well as community resources and services that may be beneficial. The counselor works with the parent to come up with an action plan and schedules a concrete date for follow-up. The counselor follows up with the parent to provide any additional support and/or information as needed. All of these communications are clearly noted in a parent contact log.

### EXAMPLE—SERVICE STRUCTURE AND PACING
Delivery of Services—Service Structure and Pacing:

A teacher contacts the counselor to let him/her know about a student with an immediate need. The counselor promptly pulls relevant information (e.g., attendance data, behavior records, previous contact, etc.) and arranges a meeting with that student as soon as possible. The counselor is able to utilize a variety of targeted intervention strategies to help address the issues facing the specific student. The counselor is able to connect the student's family to community resources and sets up a time for a meeting with the student and family. The student is able to leave the initial consultation with concrete, actionable next steps and a plan to effectively address the crisis. Highly effective pacing allows the counselor to meet the immediate stakeholder needs.
EXAMPLE—KNOWLEDGE OF STUDENTS

Delivery of Services—Knowledge of Students:

Counselor assists in interpreting student records to identify appropriate and targeted interventions for specific students on his/her caseload. Counselor makes numerous concerted efforts to better understand the cultural background, home life, and other relevant contextual factors of students with which he/she works on a regular basis (e.g., this may include attending cultural diversity workshops, poverty simulations, or other similar trainings to increase sensitivity to specific needs). As a result, students are able to receive specific feedback that aligns with their individual needs. Additionally, counselor works diligently to understand the student body as a whole and develop programming and services to best meet their needs. This overall knowledge allows students to have an increased level of comfort and will improve the chances of their seeking help from the counselor in the future.

II. ENVIRONMENT

EXAMPLE—MANAGING STUDENT BEHAVIOR

The School Environment—Managing Student Behavior:

The counselor receives a referral from a teacher regarding student behavior. The counselor does informal observation in class for a baseline of behaviors. The counselor meets with the student to discuss problematic behavior and engage in a participatory problem-solving process to generate possible solutions to help the student. Based on this discussion, the counselor works with the student and teacher to devise a behavior contract that is mutually agreeable to all parties. The student meets with the teacher, parents, and the counselor to review and sign the contract and discuss implementation of the behavior plan. The counselor follows up several times with the student, the teacher, and the parents in order to ensure that the contract is being implemented with fidelity. The counselor thoughtfully uses this feedback to make adjustments where necessary. The counselor provides additional resources for both the classroom teacher and the parent.
**OBSERVATION DOCUMENT: School Audiologists**

### PRE-OBSERVATION QUESTIONS
1. How do you consult, collaborate and communicate with parents, school staff, and healthcare providers in delivering services and the IEP/504 Plan process?
2. What are some of the ways you keep current in your field?
3. How do you determine the type of audiological evaluation that is needed?
4. What is your role in the state mandated hearing screening program?

### KEY AREAS FOR EVIDENCE

1. **Delivery of Services—Delivery of Professional Services**
   - Audiologist provides services to support high expectations for the educational success of all students.
   - Audiologist uses a variety of materials, methods and strategies to remove barriers to learning and promote active student participation.
   - Audiologist actively assists in the development and implementation of specialized programs for students and families.

2. **Delivery of Services—Consultation/Support in the School Environment**
   - Audiologist develops highly effective consultative and collaborative relationships that facilitate timely and effective service delivery.
   - Audiologist provides regular and consistent education, support, and training to students, teachers, parents, and other relevant stakeholders in order to improve student achievement.
   - Audiologist facilitates the efficient and effective delivery of services to maximize learning.
   - Audiologist works to create a consistent feedback loop with relevant stakeholders in order to continuously improve the quality and impact of services offered.

3. **Planning—Service Plans**
   - Audiologist consistently implements best practices for specialty area.
   - Audiologist uses data to develop, plan, and prioritize services/programs in order to meet the specific needs of individual students and the school community as a whole.
   - Audiologist demonstrates deep knowledge of specialty area within the educational setting.

### EXAMPLES OF EVIDENCE/ARTIFACTS

- Audiology evaluation report
- Written/electronic communications
- Hearing loss PowerPoints for faculty
- Planning and scheduling calendars
- License/certification
- Record of continuing education in audiology
- Phone contact logs
- Working files for hearing impaired students
- Equipment inventory lists
- Sample IEPs/504 Plans
OBSERVATION SUPPORT: School Audiologists

Services may look different for audiologists as they operate in a unique environment. Audiologists regularly consult with a wide variety of students with vastly different needs. Audiologist routines may vary at each school, and as such, the pace and structure of services may differ among school sites.

I. INSTRUCTION

**EXAMPLE—DELIVERY OF PROFESSIONAL SERVICES**

Instruction—Delivery of Professional Services:

The audiologist collaborates with students, teachers, school staff, and healthcare professionals regarding hearing loss and its impact on learning. He/she monitors and participates in the state mandated hearing screening program. The audiologist maintains clear and concise audiological data and records. He/she implements numerous different strategies for hearing impaired students to access the learning environment. The audiologist actively participates in the development of the IEP or 504 Plan for students with hearing loss and continuously monitors its implementation to ensure that it is driving student achievement. The audiologist provides identification, eligibility determination, and management for students with hearing loss as well as providing and maintaining assistive technology for hearing impaired students.

**EXAMPLE—CONSULTATION/SUPPORT IN THE SCHOOL ENVIRONMENT**

School Environment—Consultation/Support in the School Environment:

There is evidence that the audiologist consistently communicates with staff, students, parents, and outside agencies regarding issues that may impact learning for the student with auditory difficulties in a professional manner (e.g., noted in a communication log). Information is conveyed in an easy to understand language and is formatted for target audiences (e.g., parents, school staff, outside agencies). The audiologist regularly reviews and writes reports, as well as responds to emails, voicemails, written requests, and verbal requests in a timely and courteous manner. The audiologist continuously develops resource materials for parents and staff regarding hearing loss.

II. PLANNING

**EXAMPLE—SERVICE PLANS**

Planning—Service Plans:

There is evidence that the audiologist manages facilities, materials, and equipment necessary for the delivery of audiological services. This includes developing and monitoring a state mandated hearing screening program, as well as inventorying and maintaining testing equipment and assistive technologies in an efficient manner. The audiologist develops clear priorities and uses those priorities to create a schedule that makes the best use of audiological time and resources. The audiologist deftly adapts and manages services based on district resources and procedures. The audiologist plans collaboratively with other professionals and regularly reviews outside audiological information in order to develop and implement IEPs/504 Plans that are appropriate for diverse learners.
**OBSERVATION DOCUMENT: Speech/Language Pathologists (SLP)**

**PRE-OBSERVATION QUESTIONS**

1. How do you ensure that therapy sessions or assessment tasks address the individualized needs and/or IEP goals of students, and, if applicable, how do you do so within a heterogeneous group?
2. How do you frame lessons within a broader scope and sequence?
3. How do you construct and manage systems to ensure services are delivered in a responsive and timely manner (e.g., IEPs, evaluations, eligibility requirements, parent/teacher conferences, etc.)?
4. How do you consult, collaborate, and communicate with classroom teachers, other stakeholders, and special education teachers in delivering services and in the IEP process?
5. What are some examples of appropriate materials and activities that you use to augment planned services and what are you doing to evaluate the effectiveness of these materials and activities?
6. How do you use data to develop IEPs and document IEP progress?
7. How does this lesson relate to what is being taught in the general education curriculum?
8. How will this lesson help your students make progress toward the standard?
9. How did you select the materials you are using for this lesson?
10. How are you using prior knowledge in your lesson?

**KEY AREAS FOR EVIDENCE**

1. Delivery of Services—Delivery of Professional Services
   - SLP provides services to support high expectations for the educational success of all students.
   - SLP uses a variety of materials, methods, and strategies that are differentiated based on individual student needs to remove learning barriers and promote active student participation.
   - SLP actively seeks out opportunities to assist in the development and implementation of specialized programs for students and families.

2. Delivery of Services—Communication
   - SLP utilizes a balanced mix of communication methods, including but not limited to, graphic, pictorial, cued, signed, written, oral, electronic, etc. that are targeted to specific needs.
   - SLP consistently asks purposeful and coherent questions and uses feedback to improve the quality and impact of programs and services offered.
   - SLP actively communicates with students, parents, teachers, and other relevant stakeholders about assessment results, service provision, and/or program goals to ensure that services are meeting the differentiated needs of students and their IEPs.

3. Delivery of Services—Knowledge of Students
   - SLP uses the one-on-one, small group, diagnostic, or therapeutic setting to gain a deep understanding of students' individual strengths, weaknesses, and needs.
   - SLP regularly tailors assessment, instruction, and activities to include student interests and cultural heritage in order to increase the level of student interest.
   - SLP consistently utilizes differentiated strategies to ensure that students' individual needs are being met.

4. Environment—Environment
   - The workspace is organized, welcoming, and encourages learning.
   - The workspace is deliberately designed to promote individual and group participation.
   - Supplies, equipment, and resources are readily accessible and offer numerous opportunities for differentiated learning.

**EXAMPLES OF EVIDENCE/ARTIFACTS**

<table>
<thead>
<tr>

</tr>
<tr>
<td>Speech/language evaluation reports</td>
<td>Parent contact logs</td>
</tr>
<tr>
<td>Yearly scope and planning calendar</td>
<td>RTI² documentation</td>
</tr>
</tbody>
</table>
OBSERVATION SUPPORT: Speech/Language Pathologists (SLP)

The evaluator may need to look more broadly at the SLP than other school services personnel, as the SLP is tasked with assessing and/or serving students and stakeholders in a unique setting. SLP routines may vary at each school (e.g., push-in, pull-out, mobile classroom, etc.), and as such, the pace and structure of services may differ among school sites.

I. DELIVERY OF SERVICES

EXAMPLE—DELIVERY OF PROFESSIONAL SERVICES

Delivery of Services—Delivery of Professional Services:

The SLP has a thirty minute session scheduled with a kindergartener with language difficulties. As children at this age are only able to focus on specific tasks for short increments of time, the SLP facilitates a series of several age-appropriate and developmentally appropriate activities targeted at individual student needs. The SLP carefully balances play-based activities (e.g., pretend play) with more structured activities (e.g., flashcards, worksheets, matching tasks, etc.) to ensure the student stays engaged throughout the session. As the session proceeds, the SLP seamlessly inserts several checks for understanding and adjusts further instruction based on level of mastery. At the end of the session, the SLP briefly summarizes the session's activities to further ensure internalization of strategies practiced. The SLP reports results of observations and assessment in a timely manner, giving examples to support understanding. The SLP provides ideas and recommendations to teachers and parents about strategies to support the student in his/her educational program.

EXAMPLE—COMMUNICATION

Delivery of Services—Communication:

After collaborating with relevant stakeholders to develop IEP goals, the SLP provides timely and appropriate feedback to teachers and parents on the student’s progress towards IEP goals. The SLP presents the teacher and parent with samples of activities and/or strategies used in the individual sessions and guides them through any questions they may have about implementing these strategies in the classroom or home environment. The SLP communicates with kindness and clarity the results of observations and assessments and makes recommendations to the teacher and parents about strategies which could be used to support the work of the SLP with the student. The SLP actively seeks input from the teacher and parents about historic and current skills, as well as progress they have seen with the student and any stumbling blocks they have encountered. The SLP keeps a clear and detailed record of these communications in a contact log and is able to reference it easily to track discussion and concerns throughout the year.
EXAMPLE—KNOWLEDGE OF STUDENTS

Delivery of Services—Knowledge of Students:

The SLP works with students and other relevant stakeholders to develop specific and differentiated learning goals for each student. Within these goals, the SLP continuously strives to target activities to student interests. For example, if the IEP goal is targeted at working with a student to increase fluency, the SLP may have the student read passages about dinosaurs or another topic of particular interest to that particular student in order to increase the student's overall level of engagement. The SLP uses guidelines for specific populations effectively, including standard error of measurement and information on racial/ethnic differences. The SLP is also able to demonstrate how activities are monitored and adjusted as needed to meet individual student needs. The SLP has a clear way to evaluate if the student is making progress based on the student work products, and the student can clearly articulate how he/she is being evaluated.

II. Environment

EXAMPLE—ENVIRONMENT

Environment—Environment:

The SLP has created an instructional area that is conducive to learning and makes students feel intellectually stimulated and safe to take risks (e.g., there are posters, examples of student work, etc. prominently displayed). The SLP provides a calm and safe environment for assessment of individual students and administers test protocols in a manner that promotes optimum student performance. The SLP works with students to set high expectations, which are clearly displayed in the learning space. These expectations are upheld and reinforced through both verbal and non-verbal communication with teachers, students, and parents. Supplies and materials are clearly labeled and organized, and are easily accessible to students of all ages and ability levels. There are visibly delineated spaces for different types of activities that can be easily identified by students.
# OBSERVATION DOCUMENT: School Social Workers (SSW)

## PRE-OBSERVATION QUESTIONS

1. How do you plan your services for the year?
2. How do you use data to inform services?
3. How do you remain involved in developing students’ educational plans?
4. How do you communicate expectations and services to students, parents, and faculty?

## KEY AREAS FOR EVIDENCE

1. **Delivery of Services—Professional Content Knowledge**
   - SSW has a comprehensive understanding of available school and community resources.
   - SSW provides clear, consistent, and timely information to students, parents, and faculty regarding available resources (e.g., food bank, clothing, homeless shelters, mental health counseling, free health clinics, etc.).
   - SSW purposefully uses data (e.g., behavior reports, attendance records, free/reduced lunch status, etc.) to determine the needs of students who may require additional support and resources outside of the school setting.

2. **Delivery of Services—Service Structure and Pacing**
   - Services are strategically targeted to meet the needs of diverse audiences (e.g., students, parents, teachers, etc.).
   - SSW frequently follows up with relevant stakeholders to ensure that they are able to access all necessary services.
   - Pacing and timing provide opportunities for the individual needs of diverse audiences (e.g., students, parents, teachers, etc.).
   - Services are provided in a timely and appropriate manner to limit intrusion on instructional time.

3. **School Environment—Managing Student Behavior**
   - SSW does the following when working with students directly:
     - collaborates with students to establish clear rules for behavior,
     - uses various techniques targeted to individual needs to maintain appropriate behavior,
     - overlooks inconsequential behavior, and
     - attends to disruptions quickly and firmly.
   - When not working with students directly, SSW uses a variety of resources to assist teachers and parents with managing disruptive behavior.

4. **School Environment—Environment/Workspace**
   - SSW creates a warm and welcoming environment regardless of workspace.*
   - SSW has clearly established organizational structures that allow him/her to effectively and efficiently maintain client caseload regardless of physical space provided (e.g., this could look like a rolling cart with clearly labeled case files, resource information, etc.).

*Many SSWs do not have a dedicated workspace at their delivery site.

## EXAMPLES OF EVIDENCE/ARTIFACTS

- Behavior contracts
- Behavior incentive programs
- Age-appropriate materials
- Behavior plans
- Behavior data
- Community resource contact lists
- Planning calendar
- Schedule
- Written behavior reports
- Attendance data
- Contact logs
- Pamphlets/handouts about community resources
Observation Support: School Social Workers (SSW)

SSWs usually work one-on-one with students and families to make referrals and provide community resources, and as such, consultation meetings may be fluid. Many SSWs work on behalf of students rather than directly with students. Therefore, management of student behavior may look different for some SSWs. Many SSWs do not have a dedicated workspace at their delivery site.

I. Delivery of Services

Example—Professional Content Knowledge

Delivery of Services—Professional Content Knowledge:

A teacher refers a student to the SSW concerning the student coming to school in dirty, torn clothes as well as for stealing snacks out of other students' desks. The SSW pulls relevant data to identify any trends before speaking with the student (e.g., attendance records, behavior reports, prior referrals, etc.). The SSW immediately schedules a meeting with the student and asks him to tell her about what is going on at home. The SSW learns that the student lives with only mom who recently lost her job. The student tells the SSW that mom is very sad and doesn't do laundry or grocery shop anymore. The SSW schedules a meeting with mom, during which she creates a comfortable and respectful meeting environment. The SSW gives mom a packet of information with community resources (e.g., free mental health counseling, career counseling, local food bank information, clothing bank information, etc.). The SSW works with mom to develop a plan for next steps and follow up.

Example—Service Structure and Pacing

Designing and Planning Services—Service Structure and Pacing:

The structure and pacing of the services provided by the SSW are timely and directly aligned to the individual needs of students and families. The SSW uses the Early Warning Data System to run regular reports to determine students who may be most at-risk (e.g., discipline reports, attendance reports, course credit/grades, teacher referral forms, etc.). A clear plan is in place for how to address students with multiple warning indicators. The SSW works closely with school administrators, teachers, students, and parents to implement interventions based on data and individual student needs. The SSW has a clear plan for following up with school administrators, teachers, students and parents to assess progress.
II. THE SCHOOL ENVIRONMENT

EXAMPLE—MANAGING STUDENT BEHAVIOR

The School Environment—Managing Student Behavior:

A teacher has referred a student to the SSW due to the increasing number and intensity of angry outbursts by the student. The SSW works with the teacher to schedule times to come in and observe the student in the classroom environment. The SSW also meets with the student to gather more information as to why the student is having a hard time controlling his/her behavior. The SSW works with teacher to identify issues in the classroom environment which may trigger the student’s angry outbursts. The SSW also schedules individual sessions to work with the student on healthy strategies for managing behavior and controlling impulsive outbursts. The SSW includes the teacher, student, and parents in creating a behavior plan. The SSW also works with parents to provide information about outside counseling resources which could help the family with the root causes of the impulsive behaviors. Once a behavior plan is in place, the SSW frequently follows up with relevant stakeholders to ensure that it is being implemented with fidelity and is meeting the individual needs of the student. The SSW makes changes to the behavior plan as needed.

EXAMPLE—ENVIRONMENT/WORKSPACE

The School Environment—Environment/Workspace:

The SSW intentionally plans an environment/workspace that is safe and supportive of working with teachers, parents, and students. The workspace has resources easily accessible to teachers, students, and parents. There is a clear routine in place to refer students and/or make an appointment with the SSW.
OBSERVATION DOCUMENT: Vision Specialists

PRE-OBSERVATION QUESTIONS

1. How do you ensure that vision services address the individualized IEP goals/objectives of students, and how do you do so within a heterogeneous group? How do you frame lessons within a broader scope and sequence?
2. How do you construct and manage systems to ensure that vision services are delivered in a responsive and timely manner (e.g., IEPs, evaluations, eligibility requirements, parent/teacher conferences, etc.)?
3. How do you consult, collaborate, and communicate with classroom teachers, special education teachers, and other stakeholders in delivering services and in the IEP process?
4. What are some examples of appropriate materials and activities that you use to augment planned services and what are you doing to evaluate the effectiveness of these materials and activities?
5. How do you use data to develop IEPs and document IEP progress?

KEY AREAS FOR EVIDENCE

1. Delivery of Services—Delivery of Professional Services
   - Vision specialist provides services to support high expectations for the educational success of all students.
   - Vision specialist uses a variety of materials, methods, and strategies to remove barriers to learning and promote active student participation.
   - Vision specialist actively assists in the development and implementation of specialized programs for students, families, and staff.

2. Delivery of Services—Communication
   - Vision specialist utilizes a balanced mix of communication methods, including but not limited to, written, oral, electronic, etc. that is targeted to specific student/stakeholder needs.
   - Vision specialist consistently communicates with stakeholders about service/program goals to ensure progress towards goals and improve the delivery and impact of programs/services.
   - Vision specialist communicates regularly with others in professional field to ensure that he/she is up-to-date on available resources, strategies, etc.

3. Delivery of Services—Knowledge of Students
   - Practices display deep understanding of each student’s individual needs, as demonstrated through the consistent use of differentiated strategies to meet diverse learning goals.
   - Vision specialist regularly incorporates student interests and cultural heritage into activities/consultations to improve the quality and impact of services provided.

4. Environment—Environment
   - Vision specialist creates a warm and welcoming environment regardless of physical workspace.
   - Vision specialist has clearly established organizational structures that allow him/her to effectively and efficiently maintain caseload regardless of physical space provided (e.g., this could look like a rolling cart with clearly labeled student files, resource information, eye charts, etc.).

EXAMPLES OF EVIDENCE/ARTIFACTS

- Test data
- Progress reports
- Eligibility reports
- Sample activities/materials and lesson plans
- IEPs
- Vision reports
- Professional development for faculty
- Parent workshop meetings
- Disability monitoring standards reference sheet
- School team records/referral documentation
- Communication logs
- RTI documentation
- Data collection logs
- Needs assessments and surveys
OBSERVATION SUPPORT: Vision Specialists

Services may look different for vision specialists because they work one-on-one with students, and as such, they must have a deeper knowledge of their students’ individual needs. Vision specialists must be able to effectively facilitate communication between teachers, parents, students, and outside agencies to specifically target IEP goals.

I. DELIVERY OF SERVICES

<table>
<thead>
<tr>
<th>EXAMPLE—DELIVERY OF PROFESSIONAL SERVICES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery of Services—Delivery of Professional Services:</td>
</tr>
</tbody>
</table>

The vision specialist collaborates with students, teachers, other school staff, and healthcare professionals regarding visual disabilities and their impact on learning. He/she monitors and participates in the state mandated vision screening program and maintains clear and concise data and records on student vision, which are used to make referrals to service providers. The vision specialist implements numerous different strategies to ensure that visually impaired students are able to access the learning environment. The vision specialist actively participates in the development of the IEP or 504 Plan for students with visual disabilities and continuously monitors its implementation to ensure that it is driving student achievement. The vision specialist provides identification, certification, and management for students with visual disabilities and also provides and maintains a list of community vision resources for parents and students.

<table>
<thead>
<tr>
<th>EXAMPLE—COMMUNICATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery of Services—Communication:</td>
</tr>
</tbody>
</table>

The vision specialist provides timely and appropriate feedback to teachers and parents on the progress of the IEP goals, as well as consulting with relevant stakeholders to determine if proper actions have been taken to assist visually impaired students. The vision specialist presents the teacher and parent with samples of activities and/or strategies used in the individual sessions and makes recommendations to the teacher and parent on strategies that could be used in the classroom or at home to support the work of the specialist with the student. The vision specialist also communicates with medical personnel as needed to assist with the evaluation process.

<table>
<thead>
<tr>
<th>EXAMPLE—KNOWLEDGE OF STUDENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery of Services—Knowledge of Students:</td>
</tr>
</tbody>
</table>

The vision specialist provides a variety of sample activities used to target specific IEP goals of students. For example, if the IEP goal is targeted at working with a student to increase Braille fluency, the specialist may provide samples of developmentally appropriate student activities that encompass multiple learning styles. The vision specialist is able to show consistent and measurable student progress based on the progression of activities and vision services. The vision specialist is also able to clearly demonstrate how activities are monitored and adjusted as needed to meet individual student needs. The vision specialist has a clear way to evaluate if the student is making progress based on student work products.
OBSERVATION DOCUMENT: School Psychologists

PRE-OBSERVATION QUESTIONS

1. What factors do you take into account when conducting an evaluation?
2. How do you effectively communicate with school staff and parents?
3. What types of evidence do you have to support that you follow state standards and criteria during evaluations? Where is this documented?
4. Describe your role in a consultation session (e.g., data team, behavior planning, school wide analysis, etc.).
5. Walk me through the intervention process and discuss relevant information that is used when making problem solving decisions through intervention tiers leading to a referral and evaluation for special education.

KEY AREAS FOR EVIDENCE

1. Delivery of Service—Standards and Objectives
   - During the pre-referral, referral, and assessment processes, the school psychologist follows prescribed standards by the state and these standards are documented in the evaluation reports.
   - School psychologist uses Tennessee state standards in order to determine eligibility (checklists utilized for completing required testing components).
   - School psychologist’s screenings and evaluations are aligned with state standards and national best practice and match referral questions.
   - School psychologist will check for understanding of outcomes evidenced by signatures of agreement on pre-referral and eligibility paperwork by parent and teachers and/or by meeting notes.
   - Expectations for student outcomes will be identified within student plans such as behavior plans (i.e., replacement behaviors, data collection methods, reinforcement schedules), evaluation reports (e.g., CBM data, norm comparisons), data team information (e.g., goal setting, intervention planning), eligibility statements/report summaries.

2. Delivery of Service—Consultation
   - School psychologist shares information regarding disabilities, research, special education process, and interventions with school staff and parents.
   - During team meetings, school psychologist focuses on student needs, data analysis, and intervention recommendations that are research-based.
   - School psychologist works toward building trust by reinforcing implementation of teacher and parent strategies that are effective.
   - School psychologist asks stakeholders for their perspectives, and proposes recommendations respectfully and in appropriate contexts.
   - School psychologist sustains contact with stakeholders to review data on interventions to determine if those interventions are meeting students’ needs.
   - School psychologist assists with the development and/or delivery of staff professional development.

3. Delivery of Service—Communication
   - School psychologist communicates information to parents, teachers, and students frequently in a way that is understandable to all parties involved.
   - School psychologist asks meaningful questions that garner necessary and helpful information from staff and parents and show interest and desire to help the student.
   - School psychologist provides recommendations which are relevant and presented respectfully with regard to the dignity of the student and parent.
   - School psychologists provide resources for self-learning.

4. Planning of Service—Analysis of Work Products
II. Environment

<table>
<thead>
<tr>
<th>EXAMPLE—ENVIRONMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environment:</td>
</tr>
</tbody>
</table>

Vision specialist provides an environment conducive to learning when working individually with students on IEP goals. This includes multiple different manipulatives and resources that are easily accessible to students. The vision specialist has high expectations for all students that are clearly exhibited in verbal and non-verbal communication with teachers, students, and parents.
• School Psychologist conducts special education evaluations to inform eligibility, service, and programming decisions.
• School Psychologist effectively communicates evaluation findings to school staff through written reports and conferences.
• School Psychologist conducts evaluations that are appropriate for the student being evaluated.
• School Psychologist conducts evaluations that are informative for instructional and/or programming purposes.

5. Planning of Service—Evaluation of Services and/or Program
• School Psychologist contributes to school-wide assessment and data-based practices for academic, social-emotional, and behavioral domains.
• School Psychologist collects or assists with collection of student data to inform core curriculum and instructional practices.
• School Psychologist conducts evaluations of school-wide practices and programs to ensure effectiveness and guide continuous improvements.

6. Environment—Respectful Culture
• School Psychologist effectively engages in consultation and collaboration with school staff, parents, and families in a respectful manner.
• School Psychologist works well with others as part of a team (e.g., intervention team, multi-disciplinary team, etc.).
• School Psychologist addresses parent and teacher concerns and assists with identifying intervention strategies.
• School Psychologist clearly explains data and intervention strategies.
• School Psychologist utilizes facilitation and conflict resolution skills and strategies.

EXAMPLES OF EVIDENCE/ARTIFACTS
• Psycho-educational Evaluation Reports
• Recommendation resources
• Behavior Intervention Plans
• Evaluation assessment checklists
• Evaluation/Screening logs
• Training materials
• Re-evaluation packets
• Communication logs
OBSERVATION SUPPORT: School Psychologists

The evaluator will need to look more broadly at the school psychologist than the classroom teacher as the school psychologist often serves students in multiple schools and the roles they fulfill vary depending on the needs of each school.

I. DELIVERY OF SERVICES

**EXAMPLE—STANDARDS AND OBJECTIVES**

*Delivery of Services—Standards and Objectives:*

The School Psychologist is invited to a referral meeting. The School Psychologist reviews materials and helps the team determine if all pre-referral requirements have been met. If there are areas which still need to be addressed, the School Psychologist is able to identify them based on state standards and provides recommendations to the team. When determining evaluation needs, the School Psychologist refers to Tennessee criteria, and determines appropriate assessments that need to be completed focusing on areas of identified weakness. The School Psychologist ensures all parties understand presented information and are able to provide informed consent.

**EXAMPLE—CONSULTATION**

*Delivery of Services—Consultation:*

A School Psychologist is asked to attend a data intervention team meeting as a participant. During the meeting, the School Psychologist provides meaningful input in regards to the student's progress, or lack thereof, and assists the team in making appropriate decisions regarding movement in tiered intervention process. Recommendations are based on RTI² plan requirements and NASP standards for best practice, which are research-based. If more information is needed from the interventionist or teacher, the School Psychologist asks meaningful questions that provide further clarification of the student's needs. Resources and information provided to the team reflect specific grade level and/or student need.

**EXAMPLE—COMMUNICATION**

*Delivery of Services—Communication:*

If asked to consult prior to meetings, the School Psychologist communicates with staff and/or parents in a timely manner (via email, phone, or in person) and documents contact attempts appropriately. When providing information to teachers and parents, the School Psychologist does so in a way that is easily understood by all parties. When providing evaluation results, the School Psychologist provides a written copy and verbally explains results to parents and teachers in a professional manner (i.e., verbal and nonverbal language is respectful and addresses concerns presented) that clearly explains evaluation findings following special education evaluation. Discussions reflect awareness of others’ feelings and perceptions, elicit questions for clarity, and allow for all parties to address their concerns.
II. PLANNING OF SERVICES

EXAMPLE—ANALYSIS OF WORK PRODUCTS
Planning of Services—Analysis of Work Products:

The School Psychologist receives a referral to conduct a comprehensive psycho-educational evaluation. The School Psychologist determines appropriate assessment tools, which are sensitive to cultural and/or environmental factors and that address the area(s) of concern. The evaluation components meet the state standards for evaluation procedures and are sufficient for determining eligibility for special education services. The evaluation utilizes multiple sources of data that are used to inform instruction. The School Psychologist compiles the evaluation data into a written report and presents the information to the IEP team. The School Psychologist interprets the report and is able to answer questions related to the evaluation. The School Psychologist includes recommendations based on student evaluation data.

EXAMPLE—EVALUATION OF SERVICES AND/OR PROGRAM
Planning of Services—Evaluation of Services and/or Program

The School Psychologist participates in school-wide assessment procedures to collect academic, social-emotional, and/or behavior data through benchmark or universal screenings. The School Psychologist consults with school teams to interpret benchmark data to evaluate the effectiveness of core instruction and identify at-risk students. The School Psychologist consults with school personnel to identify appropriate, targeted interventions for students identified as at-risk. Based on the effectiveness of core instruction or program, the School Psychologist may facilitate suggestions for improved instructional practices. The School Psychologist analyzes progress monitoring and/or behavioral data to evaluate the effectiveness of interventions and consults with school teams on possible changes to interventions.

III. ENVIRONMENT

EXAMPLE—RESPECTFUL CULTURE
Environment—Respectful Culture:

The School Psychologist participates in a student's IEP meeting as part of a multi-disciplinary team. The School Psychologist utilizes active listening strategies to facilitate discussions and to address the concerns of all parties. The School Psychologist encourages participation from all members of the team and treats each member with respect. If a parent or team member becomes upset, the School Psychologist handles the situation calmly and professionally. The School Psychologist limits jargon when interpreting information and ensures understanding from all parties.
<table>
<thead>
<tr>
<th>Indicator</th>
<th>What it looks like in CDC-A classrooms</th>
</tr>
</thead>
</table>
| Standards and Objectives  | • Standards displayed are: IEP objectives, TCAP-Alt Alternative Performance Indicators (APIs), State Standards, and/or from Common Core  
  • Standards communicated with objects, photos, icons, and/ or words which are “student friendly”  
  • Evidence of mastery through data or permanent product  
  • Previous learning connected to objectives through use of objects, photos, pictures, icons and/or verbally  
  • Expectations for performance are supported through the use of visual strategies, modeling, prompting strategies, and classroom routines. |
| Motivating Students       | • Behavior systems or point systems to reinforce effort and positive behavior  
  a) Token system and token boards  
  b) First_____, then _____ board  
  c) Individual reinforcement may include food, toys, objects, breaks  
  d) Positive verbal and gestural (high five) reinforcement  
  • Functional and meaningful skills being taught (communication, cooking, laundry, cleaning, grooming, job skills, etc.) |
| Presenting Instructional Content | • Visuals using real world objects, photos, icons, combined with words to establish purpose  
  • Differentiating Communication  
  a) Gestures, point cues, length of directions (number of words) to the student  
  b) Object, picture, augmentative (device), and verbal communication systems by the student  
  • Logical sequencing and segmenting lesson using task analysis and/or chaining strategies  
  • Use of research based instructional strategies:  
  a) Trial and error, errorless learning, repeated practice, discrete trial, and time delay  
  • Use of prompting strategies:  
  a) Decreasing prompt hierarchy (full physical, partial physical, model, gesture, verbal)  
  b) System of least prompts (verbal, gesture, model, partial physical, full physical) |
| Lesson Structure and Pacing | • Classroom schedule includes subject/activity, student and staff assignments, is posted and followed  
  • Students are provided multiple opportunities to achieve mastery of objective  
  • During transitions, students may receive instruction from staff to follow personal schedules  
  • Students may be working on different objectives  
  • Visual strategies used to increase predictability of lesson |
| Activities and Materials  | • Hands-on, real world materials and/or objects used in activities  
  • Materials based on students’ present levels and IEP goals and objectives  
  • Community-based instruction, simulations, and games can be used to teach the objectives  
  • Technology (SMART Board, digital camera, computer, iPod and communication device)  
  • Student choice of materials, location, whom to work with, when to work, and reinforcers (TCAP-Alt choices) |
**Questioning**
- Responses may be verbal and/or supported by communication devices, gestures, pictures, icons, or student demonstration of skill
- All students called on to respond, demonstrate, or participate
- Extended wait time for some students
- Higher incidence of knowledge and comprehension questions
- Application questions may include: What would happen if ____? or How would you use the ____?
- Analysis questions may include: Can you tell me the parts of ____? or What do you do with (function of) ____?
- Evaluation questions usually justify, assess, and/or provide student a means to self monitor, i.e. What would be better?

**Academic Feedback**
- Specific, immediate feedback to student pertaining to lesson objective (praise or correction)
- Review data sheet with student (i.e. You worked great with co-workers today, or You measured the milk just right, or You got 6 right today but yesterday you got 8 right)
- Use of video modeling (digital camera) for student to see performance paired with verbal and tied to objective.
- Modeling, photos, pictures, and/or icons may be used to give feedback to students on how they performed

**Grouping Students**
- IEP Summary Sheet is utilized to develop groups and classroom schedule
- Classroom schedule includes subject/activity, student and staff assignments, is posted and followed
- Classroom is arranged (zoned) according to IEP goals and objectives and subjects (functional academics, cooking, recreation/leisure, etc.) for small groups to receive instruction in the same area every day
- Teaching assistants assigned to small groups to deliver instruction on IEP objectives
- Instructional groups vary according to activity and IEP objectives
- Groups working on similar goals may have a variety of abilities, ages, and communication styles
- Students grouped for community-based instruction according to IEP goals and objectives
- A specific schedule is developed for CBI and implemented consistently
- Small group activities typically outnumber large group activities
- Individual student schedules indicate to students which area of the classroom to transition to next

**Teacher Content Knowledge**
- Research-based instructional strategies consistently implemented
  a) Trial and Error Teaching
     (1) Standard Error Correction Procedure
     (2) Repeated Practice
     (3) System of Least Prompts
  b) Errorless Learning Teaching Strategies
     (1) Time Delay

**APPENDIX**
Important Websites

Below are some important websites that you may find helpful.

- **Tennessee Department of Education**
- **Tennessee State Board of Education** - learn about the standards review process and other initiatives, and access copies of state rules and policies.
- **TNCompass** - view previous scores and licensure information here.
- **TVAAS** - view your TVAAS score here.
- **NIET Best Practices Portal** - take your certification test for evaluation or view best practice videos here.
- **Classroom Chronicles** - read about the inspiring work happening every day in Tennessee classrooms here.
- **GLADiS** - create online portfolios here.
- **TNCORE** - learn more about Tennessee state standards and assessments here.
- **Tennessee Promise** – become a mentor or guide students to apply for Tennessee Promise here.
Providing Powerful Technology Resources to Improve Educator Skills

How to navigate the site to support individual needs
The portal is designed to support each teacher’s individual needs. Teachers can access hundreds of hours of video taped lessons spanning pre-kindergarten through 12th grade. They can also access training modules on any aspect of the TAP Teaching Performance Standards including detailed explanations and examples of practice on a particular indicator.

For example, after a classroom observation, a teacher can look at the resources on the portal in order to focus on a specific indicator such as “lesson structure and pacing.” If a teacher wanted to find additional information on lesson structure and pacing they could view a training module that contains research, video clip examples and evidence, quizzes, coaching questions, and reflective questions about this indicator. The steps for accessing a training module to learn about lesson structure and pacing are below.

Accessing a Training Module: Lesson Structure and Pacing (example)
Select Instruction from the Training Modules Menu and click on Lesson Structure and Pacing from the File Names listed:

Several options are available including:

Training module on Lesson Structure and Pacing:
