

2011 State Teacher Policy Yearbook

Illinois

OVERALL GRADE

C

National Council on Teacher Quality

Acknowledgments

STATES

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Every state formally received a draft of the *Yearbook* in July 2011 for comment and correction; states also received a final draft of their reports a month prior to release. All but one state responded to our inquiries. While states do not always agree with the recommendations, their willingness to acknowledge the imperfections of their teacher policies is an important first step toward reform.

We also thank the many state pension boards that reviewed our drafts and responded to our inquiries.

FUNDERS

The primary funders for the 2011 *Yearbook* were:

- Bill and Melinda Gates Foundation
- Gleason Family Foundation
- Carnegie Corporation of New York
- The Joyce Foundation
- George Gund Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

STAFF

Sandi Jacobs, *Project Director*

Sarah Brody, *Project Assistant*

Kathryn M. Doherty, *Special Contributor*

Kelli Michele, *Lead Researcher*

Meagan Staffiere Comb, Trisha M. Madden and Stephanie T. Maltz, *Researchers*

Thank you to the team at CPS Gumpert for their design of the 2011 *Yearbook*. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original *Yearbook* design and ongoing technical support.

National Council on Teacher Quality

Executive Summary

For five years running, the National Council on Teacher Quality (NCTQ) has tracked states' teacher policies, preparing a detailed and thorough compendium of teacher policy in the United States on topics related to teacher preparation, licensure, evaluation, career advancement, tenure, compensation, pensions and dismissal.

The *2011 State Teacher Policy Yearbook* includes NCTQ's biennial, full review of the state laws, rules and regulations that govern the teaching profession. This year's report measures state progress against a set of 36 policy goals focused on helping states put in place a comprehensive framework in support of preparing, retaining and rewarding effective teachers. For the first time, the *Yearbook* includes a progress rating for states on goals that have been measured over time. An overall progress ranking is also included, showing how states compare to each other in moving forward on their teacher policies.

Overall Progress

Progress
ranking
among states

4th

Amount of
progress
compared to
other states

Very High

Highlights from recent progress in Illinois include:

- Evidence of student learning in teacher evaluations.
- State data system with the capacity to provide evidence of teacher effectiveness.
- Dismissal for classroom ineffectiveness

Area 1 Delivering Well Prepared Teachers

D

Policy Strengths

- Teacher candidates are required to pass a basic skills test as a criterion for admission to teacher preparation programs.
- All new teachers must pass a pedagogy test.

Policy Weaknesses

- Elementary teachers are not adequately prepared to teach the rigorous content associated with the Common Core Standards.
- Preparation programs are not required to address the science of reading, and candidates are not required to pass a test to ensure knowledge.
- Neither teacher preparation program nor licensure test requirements ensure that new elementary teachers are adequately prepared to teach mathematics.
- Middle school teachers are not sufficiently prepared to teach appropriate grade-level content.
- Although most secondary teachers must pass a content test to teach a core subject area, some secondary science and social studies teachers are not required to pass content tests for each discipline they intend to teach.
- The state offers a K-12 special education certification.
- Requirements for teacher preparation do not ensure a high-quality student teaching experience.
- The teacher preparation program approval process does not hold programs accountable for the quality of the teachers they produce.

Area 2 Expanding the Pool of Teachers

C

Policy Strengths

- There are no restrictions on alternate route usage or providers.
- Out-of-state teachers are appropriately required to meet the state's testing requirements, although there are additional obstacles that do not support licensure reciprocity.

Policy Weaknesses

- Admission criteria for alternate routes to certification are not sufficiently selective, although there is flexibility for nontraditional candidates.
- Alternate route preparation is not streamlined or geared toward the immediate needs of new teachers.
- The state does not offer a license with minimal requirements that would allow content experts to teach part time.

Area 3 Identifying Effective Teachers

C-

Policy Strengths

- The state data system has the capacity to provide evidence of teacher effectiveness.
- Evidence of teacher effectiveness is a factor in licensure advancement.

Policy Weaknesses

- Although objective evidence of student learning is a significant criterion of teacher evaluations, it is not the preponderant criterion.
- Although tenure decisions are connected to evidence of teacher effectiveness, it is not the preponderant criterion.
- Annual evaluations for all teachers are not required.
- No school-level data are reported that can help support the equitable distribution of teacher talent.

Area 4 Retaining Effective Teachers

D+

Policy Strengths

- Teachers receive feedback from their evaluations, although the state could do more to ensure that professional development for all teachers is aligned with findings from teachers' evaluations.
- Retirement benefits are determined by a formula that is neutral, meaning that pension wealth accumulates uniformly for each year a teacher works.

Policy Weaknesses

- All new teachers do not receive mentoring or other induction support.
- Although districts have the authority to establish pay scales, minimum salaries must be based on years of experience and advanced degrees.
- The state does not support performance pay or additional compensation for relevant prior work experience, working in high-need schools or teaching in shortage subject areas.
- Teachers are only offered a defined benefit pension plan as their mandatory pension plan, and pension policies are not portable, flexible or fair to all teachers.
- The pension system is significantly underfunded.

Area 5 Exiting Ineffective Teachers

A

Policy Strengths

- All teachers must pass all required subject-matter tests as a condition of initial licensure.
- Ineffective classroom performance is grounds for dismissal.
- Teachers who receive unsatisfactory evaluations are required to go on improvement plans and, if they do not improve, are eligible for dismissal.
- Performance is the top criterion for districts to consider when determining which teachers to lay off during reductions in force.

Policy Weaknesses

About the *Yearbook*

The National Council on Teacher Quality (NCTQ) has long argued that no educational improvement strategies states take on are likely to have a greater impact than policies that seek to maximize teacher effectiveness. In this fifth edition of the *State Teacher Policy Yearbook*, NCTQ provides a detailed examination of state laws, rules and regulations that govern the teaching profession, covering the full breadth of policies including teacher preparation, licensure, evaluation, career advancement, tenure, compensation, pensions and dismissal.

The *Yearbook* is a 52-volume compendium of customized state reports for the 50 states and the District of Columbia, as well as a national summary overview, measuring state progress against a set of 36 specific policy goals. All of the reports are available from NCTQ's website at www.nctq.org/stpy.

The 36 *Yearbook* goals are focused on helping states put in place a comprehensive policy framework in support of preparing, retaining and rewarding effective teachers. The goals were developed based on input and ongoing feedback from state officials, practitioners, policy groups and other education organizations, as well as from NCTQ's own nationally respected advisory board. These goals meet five criteria for an effective reform framework:

1. They are supported by a strong rationale, grounded in the best research available. The rationale and research citations supporting each goal can be found at www.nctq.org/stpy.
2. They offer practical rather than pie-in-the-sky solutions for improving teacher quality.
3. They take on the teaching profession's most pressing needs, including making the profession more responsive to the current labor market.
4. They are, for the most part, relatively cost neutral.
5. They respect the legitimate constraints that some states face so that the goals can work in all 50 states.

The need to ensure that all children have effective teachers has captured the attention of the public and policy-makers across the country like never before. The *Yearbook* offers state school chiefs, school boards, legislatures and the many advocates who press hard for reform a concrete set of recommendations as they work to maximize teacher quality for their students.

How to Read the Yearbook

NCTQ rates state teacher policy in several ways.

For each of the 36 individual teacher policy goals, states receive two ratings. The first rating indicates whether, or to what extent, a state has met the goal. NCTQ uses these familiar graphics to indicate the extent to which each goal has been met:

A new feature of this year's *Yearbook* is a progress rating for each goal NCTQ has measured over time. These ratings are intended to give states a meaningful sense of the changes in teacher policy since the 2009 *Yearbook* was published. Using the symbols below, NCTQ determines whether each state has advanced on the goal, if the state policy has remained unchanged, or if the state has actually lost ground on that topic.

Some goals are marked with this symbol , which indicates that the bar has been raised for this goal since the 2009 *Yearbook*. With many states making considerable progress in advancing teacher effectiveness policy, NCTQ raised the standards for some goals where the bar had been quite low. As this may have a negative impact on some states' scores, those goals are always marked with the above symbol.

States receive grades in the five goal areas under which the 36 goals are organized: 1) delivering well prepared teachers; 2) expanding the pool of teachers; 3) identifying effective teachers; 4) retaining effective teachers and 5) exiting ineffective teachers. States also receive an overall grade that summarizes state performance across the five goal areas, giving an overall perspective on how states measure up against NCTQ benchmarks. New this year, states also receive an overall progress ranking, indicating how much progress each state has made compared to other states.

As always, the *Yearbook* provides a detailed narrative accounting of the policy strengths and weaknesses in each policy area for each state and for the nation as a whole. Best practices are highlighted. The reports are also chock full of reader-friendly charts and tables that provide a national perspective on each goal and serve as a quick reference on how states perform relative to one another, goal by goal.

Another new feature this year makes it easier to distinguish strong policies from weaker ones on our charts and tables. The policies NCTQ considers strong practices or the ideal policy positions for states are capitalized. This provides a quick thumbnail for readers to size up state policies against the policy option that aligns with NCTQ benchmarks for meeting each policy goal. For example, on the chart below, "BEFORE ADMISSION TO PREP PROGRAM" is capitalized, as that is the optimal timing for testing teacher candidates' academic proficiency.

Goals

AREA 1: DELIVERING WELL PREPARED TEACHERS

PAGE 9

1-A: Admission into Preparation Programs

The state should require undergraduate teacher preparation programs to admit only candidates with good academic records.

1-B: Elementary Teacher Preparation

The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education, the necessary foundation for teaching to the Common Core Standards.

1-C: Teacher Preparation in Reading Instruction

The state should ensure that new elementary teachers know the science of reading instruction.

1-D: Teacher Preparation in Mathematics

The state should ensure that new elementary teachers have sufficient knowledge of the mathematics content taught in elementary grades.

1-E: Middle School Teacher Preparation

The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.

1-F: Secondary Teacher Preparation

The state should ensure that secondary teachers are sufficiently prepared to teach appropriate grade-level content.

1-G: Secondary Teacher Preparation in Science

The state should ensure that science teachers know all the subject matter they are licensed to teach.

1-H: Secondary Teacher Preparation in Social Studies

The state should ensure that social studies teachers know all the subject matter they are licensed to teach.

1-I: Special Education Teacher Preparation

The state should ensure that special education teachers know the subject matter they will be required to teach.

1-J: Assessing Professional Knowledge

The state should use a licensing test to verify that all new teachers meet its professional standards.

1-K: Student Teaching

The state should ensure that teacher preparation programs provide teacher candidates with a high-quality clinical experience.

1-L: Teacher Preparation Program Accountability

The state's approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.

AREA 2: EXPANDING THE POOL OF TEACHERS

PAGE 59

2-A: Alternate Route Eligibility

The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.

2-B: Alternate Route Preparation

The state should ensure that its alternate routes provide streamlined preparation that is relevant to the immediate needs of new teachers.

2-C: Alternate Route Usage and Providers

The state should provide an alternate route that is free from regulatory obstacles that limit its usage and providers.

2-D: Part Time Teaching Licenses

The state should offer a license with minimal requirements that allows content experts to teach part time.

2-E: Licensure Reciprocity

The state should help to make licenses fully portable among states, with appropriate safeguards.

Goals

AREA 3: IDENTIFYING EFFECTIVE TEACHERS

PAGE 81

3-A: State Data Systems

The state should have a data system that contributes some of the evidence needed to assess teacher effectiveness.

3-B: Evaluation of Effectiveness

The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.

3-C: Frequency of Evaluations

The state should require annual evaluations of all teachers.

3-D: Tenure

The state should require that tenure decisions are based on evidence of teacher effectiveness.

3-E: Licensure Advancement

The state should base licensure advancement on evidence of teacher effectiveness.

3-F: Equitable Distribution

The state should publicly report districts' distribution of teacher talent among schools to identify inequities in schools serving disadvantaged children.

AREA 4: RETAINING EFFECTIVE TEACHERS

PAGE 107

4-A: Induction

The state should require effective induction for all new teachers, with special emphasis on teachers in high-need schools.

4-B: Professional Development

The state should require professional development to be based on needs identified through teacher evaluations.

4-C: Pay Scales

The state should give local districts authority over pay scales.

4-D: Compensation for Prior Work Experience

The state should encourage districts to provide compensation for related prior subject-area work experience.

4-E: Differential Pay

The state should support differential pay for effective teaching in shortage and high-need areas.

4-F: Performance Pay

The state should support performance pay but in a manner that recognizes its appropriate uses and limitations.

4-G: Pension Flexibility

The state should ensure that pension systems are portable, flexible and fair to all teachers.

4-H: Pension Sustainability

The state should ensure that excessive resources are not committed to funding teachers' pension systems.

4-I: Pension Neutrality

The state should ensure that pension systems are neutral, uniformly increasing pension wealth with each additional year of work.

AREA 5: EXITING INEFFECTIVE TEACHERS

PAGE 149

5-A: Licensure Loopholes

The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.

5-B: Unsatisfactory Evaluations

The state should articulate consequences for teachers with unsatisfactory evaluations, including specifying that teachers with multiple unsatisfactory evaluations should be eligible for dismissal.

5-C: Dismissal for Poor Performance

The state should articulate that ineffective classroom performance is grounds for dismissal and ensure that the process for terminating ineffective teachers is expedient and fair to all parties.

5-D: Reductions in Force

The state should require that its school districts consider classroom performance as a factor in determining which teachers are laid off when a reduction in force is necessary.

Area 1: Delivering Well-Prepared Teachers

Goal A – Admission into Preparation Programs

The state should require undergraduate teacher preparation programs to admit only candidates with good academic records.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs.
2. All preparation programs in a state should use a common admissions test to facilitate program comparison, and the test should allow comparison of applicants to the general college-going population and selection of applicants in the top half of that population.
3. Programs should have the option of exempting candidates from this test who submit comparable SAT or ACT scores at a level set by the state.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 1

How States are Faring in Admission Requirements

Progress on this Goal Since 2009:

↑ : 6 ↔ : 45 ↓ : 0

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Illinois requires that approved undergraduate teacher preparation programs only accept teacher candidates who have passed a basic skills test. Although the state sets the minimum score for this test, it is normed just to the prospective teacher population.

Illinois does not allow teacher preparation programs to exempt candidates who demonstrate equivalent performance on a college entrance exam.

Supporting Research

Illinois Administrative Code Title 23, Section 25.720

RECOMMENDATION**■ Require preparation programs to use a common test normed to the general college-bound population.**

Illinois's basic skills test may be more rigorous than most analogous tests in other states. New regulations, which went into effect September 2010, raised the required scores needed to enter an education school in Illinois and only 22 percent of test takers passed all four sections of the test. While this is a dramatic shift, it does not indicate whether the test will lead to the selection of candidates who are in the top half of the college-going population. Requiring a common test normed to the general college population would accomplish this goal as well as facilitate program comparison.

■ Exempt candidates with comparable SAT or ACT scores.

Illinois should waive the basic skills test requirement for candidates whose SAT or ACT scores demonstrate that they are in the top half of their class.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that a study was conducted to compare Illinois's test results and the ACT. Results from this preliminary study indicate that candidates who passed all four parts of the test had an ACT score close to the top one-third of college-goers (mean ACT 25.70/26).

★ EXAMPLES OF BEST PRACTICE

Although there are a number of states that require teacher candidates to pass a basic skills test as a criterion for admission to a preparation program, **Texas** is the only state that requires a test of academic proficiency normed to the general college bound population rather than just to prospective teachers. In addition, the state's minimum scores for admission appear to be relatively selective when compared to other tests used across the country.

Figure 2

Do states require a test of academic proficiency that is normed to the general college-going population?

Figure 5

Do states measure performance in reading, mathematics and writing?

1. **Strong Practice:** Alabama, Alaska, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Jersey, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Washington, West Virginia, Wisconsin

2. California⁴, District of Columbia⁴, Hawaii⁴, Indiana, Iowa, Maine⁴, Maryland, New Hampshire⁴, New Mexico, New York, North Carolina, North Dakota⁵, Pennsylvania⁴, Rhode Island⁴, Vermont, Virginia

3. Arizona, Colorado, Idaho, Kansas, Kentucky, Montana, Ohio, South Dakota, Utah, Wyoming

4. Minimum score must be met in each section.

5. Composite score can only be used if passing score is met on two of three subtests.

Area 1: Delivering Well-Prepared Teachers

Goal B – Elementary Teacher Preparation

The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education, the necessary foundation for teaching to the Common Core Standards.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 36 credit hours to ensure appropriate depth in the core subject areas of English, science, social studies and fine arts. (Mathematics preparation for elementary teachers is discussed in Goal 1-D.)
2. The state should require elementary teacher candidates to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects.
3. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement also ensures that prospective teachers have taken higher level academic coursework.
4. Arts and sciences faculty, rather than education faculty, should in most cases teach liberal arts coursework to teacher candidates.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 6

How States are Faring in Elementary Teacher Preparation

Progress on this Goal Since 2009:

↑ : 3 ↔ : 44 ↓ : 4

**ANALYSIS**

Although Illinois has adopted the Common Core Standards, the state does not ensure that its elementary teacher candidates are adequately prepared to teach the rigorous content associated with these standards.

Illinois requires candidates to pass the Illinois Certification Testing System (ICTS) general elementary content test, which does not report teacher performance in each subject area, meaning that it may be possible to pass the test and still fail some subject areas.

Further, Illinois does not specify any coursework requirements for general education candidates but does require the completion of 32 semester hours leading to an elementary education major.

In addition, Illinois articulates teacher standards that address important areas such as U.S., world and children's literature; life and physical sciences; and U.S. and world history. However, the state's standards fail to mention some important areas such as world history, basic chemistry, American government and art history.

There are additional standards within the framework of the ICTS content test, such as Illinois, U.S. and world history. However, they still lack specific mention of important areas such as art history.

Finally, there is no assurance that arts and sciences faculty will teach liberal arts classes to elementary teacher candidates.

Illinois Certification Testing System

www.icts.nesinc.com

RECOMMENDATION

■ **Require a content test that ensures sufficient knowledge in all subjects.**

Illinois should ensure that its subject-matter test for elementary teacher candidates is well aligned with the Common Core Standards, which represent an effort to significantly raise the standards for the knowledge and skills American students will need for college readiness and global competitiveness.

Illinois should also require separate passing scores for each content area on its test because without them it is impossible to measure knowledge of individual subjects. Further, to be meaningful, Illinois should ensure that these passing scores reflect high levels of performance.

■ **Provide broad liberal arts coursework relevant to the elementary classroom.**

Illinois should either articulate a more specific set of standards or establish more comprehensive coursework requirements that are specifically geared to the areas of knowledge needed by PK-6 teachers. Further, the state should align its requirements for elementary teacher candidates with the Common Core Standards to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 36 credit hours in the core subject areas of English, science, social studies and fine arts.

■ **Require at least an academic concentration.**

An academic concentration, if not a full academic major, would not only enhance Illinois teachers' content knowledge, but it would also ensure that prospective teachers have taken higher-level academic coursework. Further, it would provide an option for teacher candidates unable to fulfill student teaching or other professional requirements to still earn a degree.

■ **Ensure arts and sciences faculty teach liberal arts coursework.**

Although an education professor is best suited to teach effective methodologies in subject instruction, faculty from the university's college of arts and sciences should provide subject-matter foundation.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that it has been meeting with stakeholders for the past few months to redefine elementary (K-5) and middle (6-8) levels. Newly passed legislation, awaiting the governor's signature, will move Illinois to a new licensure system, which will allow for programs specifically designed for these new levels.

Illinois also indicated that this group has developed literacy standards for teachers of elementary and middle grades that all teachers must meet. It is also completing standards for English/language arts, mathematics, science and social science. According to the state, this decision to change grade levels is based on the Common Core, and standards (in reading and math) have been aligned. Further, Illinois plans to develop new assessments once rules are in place, and the state will require passing scores for each subarea within the elementary contest test and separate content tests for middle grades.

LAST WORD

NCTQ looks forward to reviewing the state's progress in future editions of the *Yearbook*.

★ EXAMPLES OF BEST PRACTICE

Although no state meets this goal, three states have noteworthy policies. **Massachusetts's** testing requirements, which are based on the state's curriculum, ensure that elementary teachers are provided with a broad liberal arts education. **Indiana** and **Utah** are the first two states to adopt the new Praxis II "Elementary Education: Multiple Subjects" content test, which requires candidates to pass separately scored subtests in reading/language arts, mathematics, social studies and science.

Figure 7

Where do states set the passing score on elementary content licensure tests¹?

¹ Based on the most recent technical data that could be obtained; data not available for Arizona, California, Florida, Georgia, **ILLINOIS**, Michigan, Minnesota, New Mexico, New York, North Carolina, Oregon and Washington. Montana and Nebraska do not require a content test. Colorado score is for Praxis II, not PLACE. Indiana, Maryland, Nevada, South Carolina and Utah now require new Praxis tests for which the technical data are not yet available; analysis is based on previously required test.

Alabama, Alaska, Arizona, Arkansas, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Maryland, Minnesota, Montana, Nebraska, Nevada, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Washington, West Virginia, Wisconsin, Wyoming

Area 1: Delivering Well-Prepared Teachers

Goal C – Elementary Teacher Preparation in Reading Instruction

The state should ensure that new elementary teachers know the science of reading instruction.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. To ensure that teacher preparation programs adequately prepare candidates in the science of reading instruction, the state should require that these programs train teachers in the five instructional components shown by scientifically based reading research to be essential to teaching children to read.
2. The state should require that new elementary teachers pass a rigorous test of reading instruction in order to attain licensure. The design of the test should ensure that prospective teachers cannot pass without knowing the science of reading instruction.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 12

How States are Faring in Elementary Teacher Preparation in Reading Instruction

Progress on this Goal Since 2009:

↑ : 5 ↔ : 46 ↓ : 0

**ANALYSIS**

Illinois does not require that teacher preparation programs for elementary teacher candidates address the science of reading. The state has neither coursework requirements nor standards related to this critical area. Illinois does require that all teacher candidates meet a set of language arts standards; however, these standards do not explicitly require that teachers receive training in the five essential components of reading instruction.

Illinois also does not require teacher candidates to pass an assessment that measures knowledge of scientifically based reading instruction prior to certification or at any point thereafter.

RECOMMENDATION**■ Ensure that teacher preparation programs prepare elementary teaching candidates in the science of reading.**

Illinois should require that teacher preparation programs in the state train candidates in the five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension.

■ Require teacher candidates to pass a rigorous assessment in the science of reading instruction.

Illinois should require a rigorous reading assessment tool to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading, and if it is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that recently passed legislation, awaiting the governor's signature, requires a reading methods and a reading in the content course for all teachers.

Supporting Research

S.B. 1799

LAST WORD

Unfortunately, merely requiring reading methods offers no assurance that the science of reading will be taught. NCTQ's recent study of teacher preparation in Illinois found that less than 20 percent of programs addressed scientifically based reading instruction in required coursework.

★ EXAMPLES OF BEST PRACTICE

Eight states meet this goal by requiring that preparation programs for elementary teacher candidates address the science of reading and requiring that candidates pass comprehensive assessments that specifically test the five elements of instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Independent reviews of the assessments used by **Connecticut**, **Massachusetts** and **Virginia** confirm that these tests are rigorous measures of teacher candidates' knowledge of scientifically based reading instruction.

Figure 13

1. Based on the limited information available about the test on the state's website.

2. Test is under development and not yet available for review.

Area 1: Delivering Well-Prepared Teachers

Goal D – Elementary Teacher Preparation in Mathematics

The state should ensure that new elementary teachers have sufficient knowledge of the mathematics content taught in elementary grades.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher preparation programs to deliver mathematics content of appropriate breadth and depth to elementary teacher candidates. This content should be specific to the needs of the elementary teacher (i.e., foundations, algebra and geometry with some statistics).
2. The state should require elementary teacher candidates to pass a rigorous test of mathematics content in order to attain licensure.
3. Such test can also be used to test out of course requirements and should be designed to ensure that prospective teachers cannot pass without sufficient knowledge of mathematics.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 16

How States are Faring in Teacher Preparation in Mathematics

Progress on this Goal Since 2009:

↑ : 4 ↔ : 47 ↓ : 0

**ANALYSIS**

Illinois relies on its standards for teacher preparation programs and its subject-matter testing requirements as the basis for articulating its requirements for the mathematics content knowledge of elementary teacher candidates.

Illinois does not specify any coursework requirements regarding mathematics content. However, the state has articulated teaching standards that its approved teacher preparation programs must use to frame instruction in elementary mathematics content. Elementary teacher candidates must “demonstrate proficiency” in various mathematics concepts, including algebra, geometry and statistics. Unfortunately, these standards lack the specificity needed to ensure that teacher preparation programs deliver mathematics content of appropriate breadth and depth to elementary teacher candidates.

Illinois requires that all new elementary teachers pass a general subject-matter test from the Illinois Certification Testing System (ICTS). The test’s standards appropriately address content in mathematics foundations, but although they outline areas such as algebra, geometry and statistics, the standards are not specifically geared to meet the needs of elementary teachers. In addition, Illinois posts only a limited number of sample items, and a review of this material calls into question the test’s rigor; the test items representing elementary school content assess understanding at too superficial a level. Further, the state does not provide a specific mathematics passing score, so one can likely fail the mathematics portion and still pass the test.

Supporting Research

Illinois Administrative Code, IAC 23 Ch. I Section 26.330

ICTS <http://www.icts.nesinc.com/>

RECOMMENDATION

- **Require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers.**

Although Illinois requires some knowledge in key areas of mathematics, the state should require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers. This includes specific coursework in foundations, algebra and geometry, with some statistics.

- **Require teacher candidates to pass a rigorous mathematics assessment.**

Illinois should assess mathematics content with a rigorous assessment tool, such as the test required in Massachusetts, that evaluates mathematics knowledge beyond an elementary school level and challenges candidates’ understanding of underlying mathematics concepts. Such a test could also be used to allow candidates to test out of coursework requirements. Teacher candidates who lack minimum mathematics knowledge should not be eligible for licensure.

ILLINOIS RESPONSE TO ANALYSS

Illinois recognized the factual accuracy of this analysis. The state added that its new requirements for elementary and middle grades have specific content standards for mathematics that align to the Common Core. Additionally, when the stakeholders developed teacher standards, the goal was not only alignment, but also that teachers know expectations for their certified grade range as well as those above and below them. Hence, elementary teachers are required to know middle-level standards, and middle-level teachers are required to know elementary and high school standards.

Further, Illinois's new assessments will require passing scores for each subarea within the elementary content test and specific content-area tests for middle-level teachers. For example, a math endorsement will require that teachers pass a mathematics content test.

★ EXAMPLES OF BEST PRACTICE

Massachusetts is the only state that ensures that its elementary teachers have sufficient knowledge of mathematics content. As part of its general curriculum test, the state utilizes a separately scored mathematics subtest that covers topics specifically geared to the needs of elementary teachers.

Area 1: Delivering Well-Prepared Teachers

Goal E – Middle School Teacher Preparation

The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should encourage middle school candidates who intend to teach multiple subjects to earn minors in two core academic areas rather than earn a single major. Middle school candidates intending to teach a single subject area should earn a major in that area.
2. The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.
3. The state should require that new middle school teachers pass a licensing test in every core academic area they intend to teach.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 19

How States are Faring in Middle School Teacher Preparation

Progress on this Goal Since 2009:

↑ : 5 ↔ : 45 ↓ : 1

State Does Not Meet Goal

Progress Since 2009

ANALYSIS

Illinois allows middle school teachers to teach on a generalist K-9 license. Teachers with secondary certificates may also teach single subjects in middle school. All candidates must earn a major of 32 credit hours in either “elementary education, or a field of specialization, as applicable to the type of certificate sought.”

All new middle school teachers must also pass a general subject-matter test for elementary and middle grades from the Illinois Certification Testing System. This test reports teacher performance in each subject area for “descriptive” purposes only, meaning that it may be possible to pass the test and still fail some subject areas. Therefore, there is no assurance that these middle school teachers will have sufficient knowledge in each subject they teach.

Supporting Research

Illinois Administrative Code, IAC 23 Ch. I Section 25.25

<http://www.isbe.net/certification/>

<http://www.icts.nesinc.com/>

RECOMMENDATION

■ **Eliminate K-9 generalist license.**

Illinois should not allow middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers. These teachers are less likely to be adequately prepared to teach core academic areas at the middle school level because their preparation requirements are not specific to the middle or secondary levels and they need not pass a subject-matter test in each subject they teach. Adopting middle school teacher preparation policies for all such teachers will help ensure that students in grades 7-9 have teachers who are appropriately prepared to teach grade level content, which is different and more advanced than what elementary teachers teach.

■ **Strengthen middle school teachers' subject-matter preparation.**

Illinois should encourage middle school teachers who plan to teach multiple subjects to earn two minors in two core academic areas. Middle school candidates who intend to teach a single subject should earn a major in that area. Illinois's requirement of an elementary education major is particularly troublesome because it suggests that a middle school teacher needs only the same preparation as an elementary teacher. However, the state should retain its requirement for a subject-area major for secondary candidates who intend to teach a single subject.

■ **Require subject-matter testing for middle school teacher candidates.**

Illinois should require subject-matter testing for all middle school teacher candidates in every core academic area they intend to teach as a condition of initial licensure.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state reiterated its comments for the previous goals and added that it is moving in the direction of this particular goal. Illinois plans to write rules for a separate middle-level program and will also develop new assessments based on specific content-area teaching.

★ EXAMPLES OF BEST PRACTICE

Arkansas, Georgia and Pennsylvania ensure that all middle school teachers are sufficiently prepared to teach middle school-level content. Teachers are required to earn at least two content-area minors. Georgia and Pennsylvania also require passing scores on single-subject content tests, and Arkansas requires a subject-matter assessment with separate passing scores for each academic area.

	13	3	9	12	14

1. State does not explicitly require two minors, but it has equivalent requirements.

2. Pennsylvania has two options. One option requires a 30 credit concentration in one subject and nearly a minor (12 credits) in three additional subjects; the second option is 21 credits in two subject-area concentrations with 12 credits in two additional subjects.

Area 1: Delivering Well-Prepared Teachers

Goal F – Secondary Teacher Preparation

The state should ensure that secondary teachers are sufficiently prepared to teach appropriate grade-level content.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that secondary teachers pass a licensing test in every subject they intend to teach.
2. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 22

How States are Faring in Secondary Teacher Preparation

Progress on this Goal Since 2009:

New Goal

ANALYSIS

Illinois requires that its secondary teacher candidates pass a content test to teach any core secondary subjects. Unfortunately, Illinois permits a significant loophole to this important policy by allowing both general science and general social studies licenses, without requiring subject-matter testing for each subject area within these disciplines (see Goals 1-G and 1-H).

To add an endorsement to a secondary certificate, teachers in Illinois must also pass a content test. However, the state outlines specific guidelines for science and social studies endorsements. Secondary teachers who are adding an endorsement (e.g., broad-field social science) with a subject-specific designation (e.g., economics, history, psychology) in either of these fields who does not already hold that endorsement with one of its other available designations must pass a content test for the subject area to be added. Teachers may receive subsequent designations in the same general field by either passing a content test and completing 12 hours of coursework or completing a content-area major. Therefore, as stated above, Illinois cannot guarantee content knowledge in each specific subject for those secondary teachers who add general science or general social studies endorsements.

Supporting Research

Illinois Administrative Code, Title 23, Section 25.100, -.720

RECOMMENDATION

■ **Require subject-matter testing for all secondary teacher candidates.**

Illinois wisely requires subject-matter tests for most secondary teachers but should address any loopholes that undermine this policy (see Goals 1-G and 1-H). This applies to the addition of endorsements as well.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that this topic will be reviewed when it begins work on secondary programs.

★ EXAMPLES OF BEST PRACTICE

Not only do **Indiana** and **Tennessee** require that secondary teacher candidates pass a content test to teach any core secondary subjects, but these states also do not permit any significant loopholes to this important policy by allowing secondary general science or social studies licenses (see Goals 1-G and 1-H).

Area 1: Delivering Well-Prepared Teachers

Goal G – Secondary Teacher Preparation in Science

The state should ensure that science teachers know all the subject matter they are licensed to teach.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require secondary science teachers to pass a subject-matter test of each science discipline they intend to teach.
2. The state should require middle school science teachers to pass a subject-matter test designed to ensure that prospective teachers cannot pass without sufficient knowledge of science.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

 -  **12 States Do Not Meet Goal**
Alaska, California, Colorado, Iowa, Michigan, Montana, Nebraska, North Carolina, Oregon, Rhode Island, Texas, Wyoming

Progress on this Goal Since 2009:

New Goal

**ANALYSIS**

Illinois commendably requires secondary science teacher candidates to earn a specific subject-area designation (e.g., biology, physics) as part of the broad-field science endorsement. In addition to completing 32 semester hours of coursework, candidates must also pass the state's ICTS subject-specific content test. Regrettably, Illinois allows these candidates to teach all areas of science at the general level, regardless of the specific designation. However, to teach honors or AP classes, science teachers must have the designation in that particular area.

Middle school science teachers in Illinois must earn an endorsement in biological science, general science or physical science. They are required to complete at least 18 semester hours of coursework but are not required to pass a subject-specific content test. Further, Illinois allows middle school teachers to teach on a generalist K-9 license (see Goal 1-E).

Endorsements of Teacher Certificates

www.isbe.state.il.us/certification/requirements/section7.pdf

RECOMMENDATION

- **Require secondary science teachers to pass tests of content knowledge for each science discipline they intend to teach.**

Although Illinois's policy ensures that science teachers who teach upper-level courses possess adequate subject matter knowledge, it falls short when it comes to general-level courses. A biology teacher, having only passed the state's biology content test, could go on to teach chemistry and physics—just not at the honors or AP level. The state should ensure that all students, not only those in advanced classes, have teachers with sufficient and appropriate content knowledge.

- **Require middle school science teachers to pass a test of content knowledge that ensures sufficient knowledge of science.**

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that it is in the process of developing science standards for middle grades, and it will also require separate content tests for middle grades science once the new rules are written. Illinois plans to work with secondary programs once other areas are complete.

★ EXAMPLES OF BEST PRACTICE

New Jersey does not offer certification in general science for secondary teachers. Although the state allows a combination physical science certificate, it ensure adequate content knowledge in both chemistry and physics by requiring teacher candidates to pass individual content tests in chemistry, physics and general science. Further, middle school science teachers must pass a science-specific content test.

Figure 27

Do states ensure that middle school teachers have adequate preparation to teach science?

1. **Strong Practice:** Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Indiana, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, Missouri, New Jersey, Ohio, Pennsylvania, South Carolina, South Dakota, Vermont, Virginia, West Virginia

2. Maine, Minnesota, Nevada, New Hampshire, New Mexico, North Dakota, Oklahoma, Utah, Washington, Wisconsin

3. Alaska, Arizona, California, Colorado, Idaho, Illinois, Iowa, Michigan, Montana, Nebraska, New York, North Carolina, Oregon, Rhode Island, Tennessee, Texas, Wyoming

Area 1: Delivering Well-Prepared Teachers

Goal H – Secondary Teacher Preparation in Social Studies

The state should ensure that social studies teachers know all the subject matter they are licensed to teach.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require secondary social studies teachers to pass a subject-matter test of each social studies discipline they intend to teach.
2. The state should require middle school social studies teachers to pass a subject-matter test designed to ensure that prospective teachers cannot pass without sufficient knowledge of social studies.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 28

How States are Faring in Preparation to Teach Social Studies

Progress on this Goal Since 2009:

New Goal

**ANALYSIS**

Illinois commendably requires secondary social science teacher candidates to earn a specific subject-area designation (e.g., economics, history, psychology) as part of the broad-field social science endorsement. In addition to completing 32 semester hours of coursework candidates must also pass the state's ICTS subject-specific content test. Regrettably, Illinois allows these candidates to teach all areas of social science at the general level, regardless of the specific designation. However, to teach honors or AP classes, social science teachers must have the designation in that particular area.

Middle school social science teachers in Illinois must earn an endorsement in general geography or social science. They are required to complete at least 18 semester hours of coursework but are not required to pass a subject-specific content test. Further, Illinois allows middle school teachers to teach on a generalist K-9 license (see Goal 1-E).

Supporting Research

23 Illinois Administrative Code 25.100

Endorsements of Teacher Certificates

www.isbe.state.il.us/certification/requirements/section7.pdf

RECOMMENDATION

- **Require secondary social studies teachers to pass tests of content knowledge for each social studies discipline they intend to teach.**

Although Illinois's policy ensures that social science teachers who teach upper-level courses possess adequate subject matter knowledge, it falls short when it comes to general-level courses. An economics teacher, having only passed the state's economics content test, could go on to teach political science or anthropology—just not at the honors or AP level. More alarming, perhaps, is that a psychology teacher, having only passed the state's psychology assessment, could teach general-level history or geography. The state should ensure that all students, not only those in advanced classes, have teachers with sufficient and appropriate content knowledge.

- **Require middle school social science teachers to pass a test of content knowledge that ensures sufficient knowledge of social science.**

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that it is in the process of writing standards for middle level social science and will require a separate content test for middle level social science teachers.

★ EXAMPLES OF BEST PRACTICE

Not only does **Indiana** ensure that its secondary social studies teachers possess adequate content knowledge of all subjects they intend to teach—through both coursework and content testing—but the state's policy also does not make it overly burdensome for social studies teachers to teach multiple subjects. Other notable states include **Georgia** and **South Dakota**, which also do not offer secondary general social studies certifications.

Figure 30

Do states ensure that middle school teachers have adequate preparation to teach social studies?

1. **Strong Practice:** Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Indiana, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, New Jersey, Ohio, Pennsylvania, South Carolina, South Dakota, Vermont, Virginia, West Virginia

3. Alaska, Arizona, California, Colorado, Idaho, Illinois, Iowa, Massachusetts, Montana, Nebraska, New York, North Carolina, Oregon, Rhode Island, Tennessee, Texas, Utah, Wisconsin, Wyoming

Figure 29

1. Massachusetts does not offer a general social studies license, but offers combination licenses.

Area 1: Delivering Well-Prepared Teachers

Goal I – Special Education Teacher Preparation

The state should ensure that special education teachers know the subject matter they will be required to teach.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
2. All elementary special education candidates should have a broad liberal arts program of study that includes study in mathematics, science, English, social studies and fine arts and should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
3. The state should require that teacher preparation programs graduate secondary special education teacher candidates who are highly qualified in at least two subjects. The state should also customize a "HOUSE" route for new secondary special education teachers to help them achieve highly qualified status in all the subjects they teach.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 31

How States are Faring in Special Education Teacher Preparation

Progress on this Goal Since 2009:

↑ : 3 ↔ : 48 ↓ : 0

State Does Not Meet Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Regrettably, Illinois only offers a K-12 special education certification.

Supporting Research

Illinois Administrative Code 23 IAC 27.35

RECOMMENDATION

- **End licensure practices that fail to distinguish between the skills and knowledge needed to teach elementary grades and secondary grades.**

It is virtually impossible and certainly impractical for Illinois to ensure that a K-12 special education teacher knows all the subject matter he or she is expected to be able to teach, especially considering state and federal expectations that special education students should meet the same high standards as other students. While the broad K-12 umbrella may be appropriate for teachers of low-incidence special education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students, who are expected to learn grade-level content.

- **Provide a broad liberal arts program of study to elementary special education candidates, and require that they pass the same content test as general education teachers.**

Illinois should ensure that special education teacher candidates who will teach elementary grades possess knowledge of the subject matter at hand. Not only should the state require core-subject coursework relevant to the elementary classroom, but it should also require that these candidates pass the same subject-matter test required of all elementary teachers. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

- **Ensure that secondary special education teacher candidates graduate with highly qualified status in at least two subjects, and customize a HOUSSE route so that they can achieve highly qualified status in all subjects they plan to teach.**

To make secondary special education teacher candidates more flexible and better able to serve schools and students, Illinois should use a combination of coursework and testing to ensure that they graduate with highly qualified status in two core academic areas. A customized HOUSSE route can also help new secondary special education teacher candidates to become highly qualified in multiple subjects by offering efficient means by which they could gain broad overviews of specific areas of content knowledge, such as content-driven university courses. Such a route is specifically permitted in the 2004 reauthorization of the Individuals with Disabilities Education Act (IDEA).

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that its HOUSSE route does contain requirements for teachers to become highly qualified. Illinois also noted that special education is the next area it will begin to redefine.

LAST WORD

Although Illinois allows its new secondary special education teachers to use the HOUSSE route to gain highly qualified status in multiple subjects, the state has not yet phased out the use of its HOUSSE route for veteran teachers. Illinois is, therefore, encouraged to create a HOUSSE route specifically for new secondary special education teachers; IDEA specifically permits the use of HOUSSE in this way. Ideally these teachers will have graduated with highly qualified status in two core areas, but the state should also provide a practical and meaningful way for these teachers to achieve highly qualified status in all remaining core subjects once they are in the classroom.

★ EXAMPLES OF BEST PRACTICE

Unfortunately, NCTQ cannot highlight any state's policy in this area. Preparation of special education teachers remains a topic in critical need of states' attention. However, it is worth noting that three states—**Louisiana**, **Pennsylvania** and **Texas**—will no longer issue K-12 special education certifications. Only grade-level specific options will be available to new teachers.

Figure 33

Do states require subject-matter testing for elementary special education licenses?

1. **Strong Practice:** Alabama, Arkansas, Iowa, Kansas, Louisiana, Massachusetts, Michigan, Nebraska, New Jersey, New York, North Dakota, Oregon⁴, Pennsylvania⁵, Rhode Island, Texas, West Virginia, Wisconsin

2. Alaska, Georgia, Hawaii, Indiana, Maine, Maryland, Minnesota, Mississippi, Missouri, New Hampshire, South Dakota, Tennessee, Vermont, Washington, Wyoming

3. Arizona, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Kentucky, Montana, Nevada, New Mexico, North Carolina, Ohio, Oklahoma, South Carolina, Utah, Virginia

4. Although Oregon requires testing, the state allows an "alternative assessment" option for candidates who fail the tests twice to still be considered for a license.

5. In Pennsylvania, a candidate who opts for dual certification in elementary special education and as a reading specialist does not have to take a content test.

Figure 32

1. Beginning January 1, 2013

Area 1: Delivering Well-Prepared Teachers

Goal J – Assessing Professional Knowledge

The state should use a licensing test to verify that all new teachers meet its professional standards.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should assess new teachers' knowledge of teaching and learning by means of a pedagogy test aligned to the state's professional standards.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 34

How States are Faring in Assessing Professional Knowledge

Progress on this Goal Since 2009:

↑ : 1 ↔ : 49 ↓ : 1

State Meets Goal

Progress Since 2009

ANALYSIS

Illinois requires all new teachers to pass a pedagogy test based on its standards.

The state requires new teachers to pass its "Assessment of Professional Teaching" test, which assesses candidates on professional and pedagogical knowledge and skills.

Illinois is also part of the Teacher Performance Assessment (TPA) Consortium and began a pilot program in Spring 2011.

Supporting Research

http://www.icts.nesinc.com/IL15_testselection.asp

<http://aacte.org/index.php?/Programs/>

RECOMMENDATION

- **Ensure that performance assessments provide a meaningful measure of new teachers' knowledge and skills.**

While Illinois is commended for considering the use of a performance-based assessment, the state should proceed with caution until additional data are available on the Teacher Performance Assessment. Additional research is needed to determine how the TPA compares to other teacher tests as well as whether the test's scores are predictive of student achievement. The track record on similar assessments is mixed at best. The two states that currently require the Praxis III performance-based assessment report pass rates of about 99 percent. Given that it takes significant resources to administer a performance-based assessment, a test that nearly every teacher passes is of questionable value.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that by 2015, it will require a performance-based assessment for all teacher education programs; programs will begin to phase in starting in 2013. Illinois also noted that it continues to be part of the Teacher Performance Assessment Consortium (TPAC), with full implementation by 2015.

State Response Citation

S.B. 1799

★ EXAMPLES OF BEST PRACTICE

Twenty-three states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, it additionally commends the nine states (**Arizona, California, Florida, Illinois, Minnesota, New Mexico, New York, Oklahoma, Texas**) that utilize their own assessments to measure pedagogical knowledge and skills.

Figure 35

Do states measure new teachers' knowledge of teaching and learning?

1. **Strong Practice:** Arizona, Arkansas, California, District of Columbia, Florida, Illinois, Kansas, Kentucky, Louisiana, Maine, Minnesota, Mississippi, Nevada, New Mexico, New York, North Dakota, Ohio, Oklahoma, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, West Virginia

2. Connecticut, Idaho, Indiana, Maryland, Missouri, North Carolina, Pennsylvania, Utah⁴, Wyoming

3. Alabama, Alaska, Colorado, Delaware, Georgia, Hawaii, Iowa, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, Oregon, Vermont, Virginia, Washington, Wisconsin

4. Not required until teacher advances from a Level One to a Level Two license.

Area 1: Delivering Well-Prepared Teachers

Goal K – Student Teaching

The state should ensure that teacher preparation programs provide teacher candidates with a high-quality clinical experience.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that student teachers only be placed with cooperating teachers for whom there is evidence of their effectiveness as measured by consistent gains in student learning.
2. The state should require that teacher candidates spend at least 10 weeks student teaching.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 36

How States are Faring in Student Teaching

Progress on this Goal Since 2009:

New Goal

**ANALYSIS**

Illinois requires that student teaching credit be "structured as part of comprehensive field experiences and clinical practice." The state does not articulate any requirements for cooperating teachers.

Supporting Research

Illinois Administrative Code, Title 23, Subtitle A, Chapter I, Subchapter b, Part 25.620

RECOMMENDATION**■ Require teacher candidates to spend at least 10 weeks student teaching.**

Illinois should require a summative clinical experience for all prospective teachers. Student teaching should be a full-time commitment, as requiring coursework and student teaching simultaneously does a disservice to both. Alignment with a school calendar for at least 10 weeks ensures both adequate classroom experience and exposure to a variety of ancillary professional activities.

■ Ensure that cooperating teachers have demonstrated evidence of effectiveness as measured by student learning.

In addition to the ability to mentor an adult, cooperating teachers should also be carefully screened for their capacity to further student achievement. Research indicates that the only aspect of a student teaching arrangement that has been shown to have an impact on student achievement is the positive effect of selection of the cooperating teacher by the preparation program, rather than the student teacher or school district staff.

■ Explicitly require that student teaching be completed locally, thus prohibiting candidates from completing this requirement abroad.

Unless preparation programs can establish true satellite campuses to closely supervise student teaching arrangements, placement in foreign or otherwise novel locales should be supplementary to a standard student teaching arrangement. Outsourcing the arrangements for student teaching makes it impossible to ensure the selection of the best cooperating teacher and adequate supervision of the student teacher and may prevent training of the teacher on relevant state instructional frameworks.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that it is discussing changes that would require 15 weeks of student teaching for the elementary and middle grades. Illinois noted that it currently requires "intensive and extensive" student teaching experiences.

★ EXAMPLES OF BEST PRACTICE

Although no state has been singled out for “best practice” honors, **Florida** and **Tennessee** require teacher candidates to complete at least 10 weeks of full-time student teaching, and they have taken steps toward ensuring that cooperating teachers have demonstrated evidence of effectiveness as measured by student learning.

1. Candidates can student teach for less than 12 weeks if determined to be proficient.

Figure 38

Is the selection of the cooperating teacher based on some measure of effectiveness?

1. **Strong Practice:** Florida, Tennessee

2. Alabama, Connecticut, Indiana, Iowa, Kentucky, Nebraska, New Hampshire, New Jersey, North Dakota, Pennsylvania, Washington, Wisconsin

3. Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Illinois, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, West Virginia, Wyoming

Figure 39

Is the summative student teaching experience of sufficient length?

1. **Strong Practice:** Alabama, Arkansas, Connecticut, Florida, Hawaii, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Nebraska, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Washington, West Virginia⁵, Wisconsin

2. Idaho, Indiana, Louisiana, Massachusetts, Missouri, Nevada, New York, Virginia, Wyoming

3. Illinois, Maine, New Mexico, Utah

4. Alaska, Arizona, California, Colorado, Delaware, District of Columbia, Georgia, Maryland, Montana

5. Candidates can student teach for less than 12 weeks if determined to be proficient.

Area 1: Delivering Well-Prepared Teachers

Goal L – Teacher Preparation Program Accountability

The state's approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should collect value-added data that connects student achievement gains to teacher preparation programs.
2. The state should collect other meaningful data that reflects program performance, including some or all of the following:
 - a. Average raw scores of teacher candidates on licensing tests, including basic skills, subject matter and professional knowledge tests;
 - b. Number of times, on average, it takes teacher candidates to pass licensing tests;
 - c. Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;
 - d. Evaluation results from the first and/or second year of teaching;
 - e. Five-year retention rates of graduates in the teaching profession.
3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 40

How States are Faring in Teacher Preparation Program Accountability

Progress on this Goal Since 2009:

↑ : 4 ↔ : 44 ↓ : 3

State Meets a Small Part of Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Illinois's approval process for its traditional and alternate route teacher preparation programs does not hold programs accountable for the quality of the teachers they produce.

Most importantly, Illinois does not collect value-added data that connect student achievement gains to teacher preparation programs.

However, Illinois does rely on some objective, meaningful data to measure the performance of teacher preparation programs. Beginning in 2018, all teacher preparation programs in Illinois will be required to submit to the state data regarding performance evaluations.

Regrettably, Illinois fails to apply any transparent, measurable criteria for conferring program approval. The state collects programs' annual summary licensure test pass rates (80 percent of program completers must pass their licensure exams). However, the 80 percent pass-rate standard, while common among many states, sets the bar quite low and is not a meaningful measure of program performance.

Further, in the past three years, no programs in the state have been identified as low performing—an additional indicator that programs lack accountability.

Finally, Illinois requires each institution to make its pass rates readily available to the public, but it is not clear whether the state plans to publish them on its website.

Supporting Research

Illinois Administrative Code Title 23, Section 25.115

Report Cards

<http://www.isbe.state.il.us/certification/html/t2.htm>

RECOMMENDATION

■ **Collect data that connect student achievement gains to teacher preparation programs.**

To ensure that programs are producing effective classroom teachers, Illinois should consider academic achievement gains of students taught by the programs' graduates, averaged over the first three years of teaching.

■ **Gather other meaningful data that reflect program performance.**

In addition to knowing whether programs are producing effective teachers, other objective, meaningful data can also indicate whether programs are appropriately screening applicants and whether they are delivering essential academic and professional knowledge. In addition to its plans to collect evaluation ratings, Illinois should gather data such as the following: average raw scores of graduates on licensing tests, including basic skills, subject matter and professional knowledge tests; satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison; and five-year retention rates of graduates in the teaching profession. The state is also encouraged to develop more immediate plans to hold programs accountable than its current approach to begin limited data collection in 2018.

■ **Establish the minimum standard of performance for each category of data.**

Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval after appropriate due process.

■ **Publish an annual report card on the state's website.**

Even though institutions are required to make summary pass rates publicly available, Illinois should present all the data it collects on individual teacher preparation programs, in order to inform the public with meaningful, readily understandable indicators of how well programs are doing.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state noted a change in the continued program approval process. Illinois can now put programs on probation immediately if the State Teacher Certification Board makes that decision based on data or other concerns. Programs that have problems with submitted data are called before the Board to discuss their programs and possible probation.

State Response Citation

Illinois Administrative Code Title 23, Section 25.115

LAST WORD

NCTQ commends Illinois for its new policy that allows the State Board to act quickly in response to concerns about program performance. This policy would be strengthened, though, if there were clear minimum standards of performance for which programs were held accountable.

	25	5	14	17	2	10

1. Reported institutional data do not distinguish between candidates in the traditional and alternate route programs.

2. The posted data do not allow the public to review and compare program performance because data are not disaggregated by program provider.

★ EXAMPLES OF BEST PRACTICE

Florida connects student achievement gains to teacher preparation programs. The state also relies on other objective, meaningful data to measure the performance of teacher preparation programs, and it applies transparent, measurable criteria for conferring program approval. Florida also posts an annual report on its website.

1. According to information posted on NCATE's website.

Area 2: Expanding the Pool of Teachers

Goal A – Alternate Route Eligibility

The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. With some accommodation for work experience, alternate route programs should screen candidates for academic ability, such as requiring a minimum 2.75 overall college GPA.
2. All alternate route candidates, including elementary candidates and those having a major in their intended subject area, should be required to pass the state's subject-matter licensing test.
3. Alternate route candidates lacking a major in the intended subject area should be able to demonstrate subject-matter knowledge by passing a test of sufficient rigor.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 45

How States are Faring in Alternate Route Eligibility

Progress on this Goal Since 2009:

↑ : 12 ↔ : 32 ↓ : 7

State Nearly Meets Goal

Progress Since 2009

ANALYSIS

Illinois offers three alternate routes to certification: Alternative Certification, the Alternate Route to Certification and the Resident Teacher Certification Program.

Neither the Alternative Certification nor the Alternative Route to Teacher Certification programs requires candidates to demonstrate prior academic performance, such as a minimum GPA, as an entrance standard for the alternate route programs. The Resident Teacher Certification program requires that applicants have a minimum 3.0 GPA for admission.

All routes require candidates to pass a test of basic skills prior to admission. A subject-matter test is required for individuals to begin teaching in the classroom but not for initial entrance to the alternate route program.

Illinois also requires candidates to possess a minimum of five years' related work experience. Applicants planning to teach in Chicago public schools are exempt from the work-experience requirement. The Resident Teacher Certification program allows candidates to complete a year-long teacher preparation internship in lieu of the work-experience requirement.

Neither a major nor specific coursework is required; as a result there is no need for a test-out option

Supporting Research

105 ILCS 5/21-5b, 5c

Administrative Code Section 25.442

RECOMMENDATION

■ Screen all candidates for academic ability.

Illinois is commended for requiring Resident Teacher-Illinois Teacher Corps program candidates to show evidence of above-average academic performance. The state should require that candidates to all of its alternate routes provide some evidence of good academic performance. The standard should be higher than what is required of traditional teacher candidates, such as a GPA of 2.75 or higher. Alternatively, the state could require one of the standardized tests of academic proficiency commonly used in higher education for graduate admissions, such as the GRE.

■ Consider flexibility in work-experience requirement.

The state should consider using a candidate's years of experience as a factor in the admission process rather than as a requirement for admission. Requiring a minimum number of years' work experience may disqualify potentially talented candidates unnecessarily. Recent graduates, who may demonstrate high academic ability and strong content knowledge but lack the minimum years of experience, would be needlessly excluded from the alternate route programs under this requirement. While the state attempts to provide an exemption for this requirement in the Resident Teacher Certification program, a year-long preparation internship may also dissuade nontraditional candidates from pursuing a career in teaching.

■ Eliminate basic skills test requirement.

The state's requirement that alternate route candidates pass a basic skills test is impractical and ineffectual. Basic skills tests measure minimum competency—essentially those skills that a person should have acquired in middle school—and are inappropriate for candidates who have already earned a bachelor's degree. Passage of a basic skills test provides no assurance that the candidate has the appropriate subject-matter knowledge needed for the classroom. The state should eliminate the basic skills test requirement or, at a minimum, accept the equivalent in SAT, ACT or GRE scores.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of NCTQ's analysis and noted that SB 1799, which proposes changes such that the state will have one alternate route with additional requirements, is pending.

LAST WORD

NCTQ looks forward to reviewing the state's progress in future editions of the *Yearbook*.

Figure 47

Do states require alternate routes to be selective?

1. **Strong Practice:** Connecticut, District of Columbia, Illinois, Indiana, Iowa, Maryland, Michigan, Minnesota, New Jersey, New York, Pennsylvania, Rhode Island, Tennessee

2. Alabama, Alaska, Arkansas, Florida, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, North Carolina, Ohio, Oklahoma, South Carolina, South Dakota, Texas, West Virginia, Wyoming

3. Arizona, California, Colorado, Delaware, Georgia, Hawaii, Idaho, Maine, Massachusetts, Montana, Nevada, New Hampshire, New Mexico, Oregon, Utah, Vermont, Virginia, Washington, Wisconsin

4. North Dakota does not have an alternate route to certification.

Figure 48

Do states ensure that alternate route teachers have subject-matter knowledge?

1. **Strong Practice:** Alabama, Arizona, Arkansas, Connecticut⁴, District of Columbia, Florida, Illinois⁴, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Virginia, Washington, West Virginia

2. State does not require test at all, exempts some candidates or does not require passage until program completion. Alaska, California, Colorado, Delaware, Georgia, Hawaii, Idaho, Indiana, Iowa, Maine, Maryland, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, Oregon, Rhode Island, Tennessee, Texas, Utah, Vermont, Wisconsin, Wyoming

3. North Dakota does not have an alternate route to certification.

4. Required prior to entering the classroom.

Figure 46

1. North Dakota does not have an alternate route to certification.

★ EXAMPLES OF BEST PRACTICE

The **District of Columbia** and **Michigan** require candidates to demonstrate above-average academic performance as conditions of admission to an alternate route program, with both requiring applicants to have a minimum 3.0 GPA. In addition, neither state requires a content-specific major; subject-area knowledge is demonstrated by passing a test, making their alternate routes flexible to the needs of nontraditional candidates.

Figure 49

Do states accommodate the nontraditional background of alternate route candidates?

1. **Strong Practice:** Alabama, California, Colorado, Connecticut⁶, Florida, Georgia, Maine, Maryland, North Carolina, Oklahoma, Oregon, Rhode Island, Tennessee, Texas

2. **Strong Practice:** Arizona, Arkansas, District of Columbia, Illinois, Iowa, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Ohio, Virginia, Washington

3. Alaska, Delaware, Indiana, Kansas, Kentucky, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, West Virginia, Wyoming

4. Hawaii, Idaho, Nevada, New Mexico, Wisconsin

5. North Dakota does not have an alternate route to certification.

6. Test out option available to candidates in shortage areas only.

Area 2: Expanding the Pool of Teachers

Goal B – Alternate Route Preparation

The state should ensure that its alternate routes provide streamlined preparation that is relevant to the immediate needs of new teachers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that the amount of coursework it either requires or allows is manageable for a novice teacher. Anything exceeding 12 credit hours of coursework in the first year may be counterproductive, placing too great a burden on the teacher. This calculation is premised on no more than six credit hours in the summer, three in the fall and three in the spring.
2. The state should ensure that alternate route programs offer accelerated study not to exceed six (three credit) courses for secondary teachers and eight (three credit) courses for elementary teachers (exclusive of any credit for practice teaching or mentoring) over the duration of the program. Programs should be limited to two years, at which time the new teacher should be eligible for a standard certificate.
3. All coursework requirements should target the immediate needs of the new teacher (e.g., seminars with other grade-level teachers, training in a particular curriculum, reading instruction and classroom management techniques).
4. The state should ensure that candidates have an opportunity to practice teach in a summer training program. Alternatively, the state can require an intensive mentoring experience, beginning with a trained mentor assigned full time to the new teacher for the first critical weeks of school and then gradually reduced. The state should support only induction strategies that can be effective even in a poorly managed school: intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe effective teachers.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 50

How States are Faring in Alternate Route Preparation

Progress on this Goal Since 2009:

↑ : 8 ↔ : 42 ↓ : 1

**ANALYSIS**

Illinois does not ensure that its alternate route candidates will receive streamlined preparation that meets the immediate needs of new teachers.

Illinois requires candidates for Alternate Teacher Certification and Alternative Route to Teacher Certification to complete a course of study in education theory and instructional methods, but the state does not specify the amount of coursework required. Teachers in the Resident Teacher Certification program must complete a six-week intensive teacher preparation course the summer prior to entering the classroom and then work toward a master's degree while teaching.

Alternate Teacher Certification candidates have the opportunity for practice teaching, although the state does not provide guidance on this requirement. Candidates in the Alternative Route to Teacher Certification and the Resident Teacher Certification routes are mentored by a certified teacher assigned by the school district for the first year.

The state requires that alternate route programs require less time to complete than traditional programs. The current range for program completion is one and a half to two and a half years. However, teachers may apply for the Standard Teaching Certificate only after completing four years of teaching.

<http://www.isbe.state.il.us/profprep/PDFs/sec21-5c.pdf>

RECOMMENDATION

■ **Establish coursework guidelines for all alternate route preparation programs.**

Simply mandating coursework without specifying the purpose can inadvertently send the wrong message to program providers—that “anything goes” as long as credits are granted. However constructive, any course that is not fundamentally practical and immediately necessary should be eliminated as a requirement.

■ **Extend induction to all alternate route teachers.**

While Illinois is commended for requiring Alternative Route to Teacher Certification and the Resident Teacher Certification teachers to work with a mentor, Alternate Teacher Certification teachers should also receive this support. In addition, the state should consider providing sufficient guidelines to ensure that the induction program is structured for new teacher success. Effective strategies include practice teaching prior to teaching in the classroom, intensive mentoring with full classroom support in the first few weeks or months of school, a reduced teaching load and release time to allow new teachers to observe experienced teachers during each school day.

■ **Grant standard certification in less than four years.**

Although Illinois policy states that alternate route programs should be more streamlined than traditional preparation programs, the state should consider shortening the length of time it takes an alternate route teacher to earn standard certification. The route should allow candidates to earn full certification no later than the end of the second year of teaching.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of NCTQ's analysis but noted that SB 1799, which provides a two-year alternate route program with much closer mentoring the first year than the second, is pending. The state stated that it agreed with NCTQ that teachers needed more support the first year in the classroom.

LAST WORD

NCTQ looks forward to reviewing the state's progress in future editions of the *Yearbook*.

★ EXAMPLES OF BEST PRACTICE

Connecticut ensures that its alternate route provides streamlined preparation that meets the immediate needs of new teachers. The state requires a manageable number of credit hours, relevant coursework, a field placement and intensive mentoring. Other notable states include **Arkansas, Delaware, Georgia** and **New Jersey**. These states provide streamlined, relevant coursework with intensive mentoring.

1. Florida requires practice teaching or intensive mentoring.

2. North Dakota does not have an alternate route to certification.

Figure 52

Do states curb excessive coursework requirements?

1. **Strong Practice:** Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Maryland, Mississippi, New Jersey, Rhode Island, South Carolina, Virginia
2. Indiana, Nevada, Wyoming
3. Alaska, Arizona, California, District of Columbia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, West Virginia, Wisconsin
4. North Dakota does not have an alternate route to certification.

Figure 53

Do states require practice teaching or intensive mentoring?

1. **Strong Practice:** Arizona, Indiana, Iowa, Louisiana, Michigan, Nebraska, New Mexico, Ohio, Rhode Island, Vermont, Virginia
2. **Strong Practice:** Arkansas, Georgia, Kentucky, New Jersey, New York, West Virginia
3. **Strong Practice:** Alaska, Connecticut, Delaware, District of Columbia, Florida⁶, Maryland, Massachusetts
4. Alabama, California, Colorado, Hawaii, Idaho, Illinois, Kansas, Maine, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, North Carolina, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Washington, Wisconsin, Wyoming
5. North Dakota does not have an alternate route to certification.
6. Candidates are required to have one or the other, not both.

Area 2: Expanding the Pool of Teachers

Goal C – Alternate Route Usage and Providers

The state should provide an alternate route that is free from regulatory obstacles that limit its usage and providers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not treat the alternate route as a program of last resort or restrict the availability of alternate routes to certain subjects, grades or geographic areas.
2. The state should allow districts and nonprofit organizations other than institutions of higher education to operate alternate route programs.
3. The state should ensure that its alternate route has no requirements that would be difficult to meet for a provider that is not an institution of higher education (e.g., an approval process based on institutional accreditation).

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 54

How States are Faring in Alternate Route Usage and Providers

Progress on this Goal Since 2009:

↑ : 12 ↔ : 39 ↓ : 0

State Meets Goal

Progress Since 2009

ANALYSIS

Illinois does not limit the usage or providers of its alternate routes.

Illinois is commended for having no restrictions on the usage of its alternate routes with regard to subject, grade or geographic areas.

Illinois passed legislation that now allows nonprofits to operate alternative certification programs independently, where previously they had to partner with an institution of higher education. The state is commended for structuring its programs to allow a diversity of providers. A good diversity of providers helps all programs, both university- and non-university-based, to improve.

Supporting Research

Public Act 96-0862 Part 25.115

ILLINOIS RESPONSE TO ANALYSIS

Illinois was helpful in providing NCTQ with the facts necessary for this analysis.

★ EXAMPLES OF BEST PRACTICE

Twenty-six states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, it commends all states that permit both broad usage and a diversity of providers for their alternate routes.

Figure 56

Can alternate route teachers teach any subject or grade anywhere in the state?

Figure 55 and 56

1. Alabama offers routes without restrictions for candidates with master's degrees. The route for candidates with bachelor's degrees is limited to certain subjects.
2. North Dakota does not have an alternate route to certification.

Figure 57

Do states permit providers other than colleges or universities?

1. **Strong Practice:** Arizona, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Nevada, New Hampshire, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Tennessee, Texas, Virginia, Washington, Wisconsin
2. **Strong Practice:** California, Colorado, Georgia, North Carolina, Vermont⁵, West Virginia
3. Alabama, Alaska, Hawaii, Idaho⁶, Indiana, Iowa, Kansas, Maine, Minnesota, Mississippi⁶, Missouri⁶, Montana, Nebraska, New Jersey⁷, New Mexico, Oregon, South Carolina⁶, South Dakota, Utah⁶, Wyoming
4. North Dakota does not have an alternate route to certification.
5. Districts can run Peer Review programs only.
6. ABCTE is also an approved provider.
7. Permits school districts to provide programs without university partnerships in some circumstances.

Figure 58

1. North Dakota does not have an alternate route to certification.

Figure 58

Do states provide real alternative pathways to certification?

	GENUINE OR NEARLY GENUINE ALTERNATE ROUTE	Alternate route that needs significant improvements	Offered route is disingenuous
Alabama	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Alaska	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Arizona	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Area 2: Expanding the Pool of Teachers

Goal D – Part-Time Teaching Licenses

The state should offer a license with minimal requirements that allows content experts to teach part time.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. Either through a discrete license or by waiving most licensure requirements, the state should authorize individuals with content expertise to teach as part-time instructors.
2. All candidates for a part-time teaching license should be required to pass a subject-matter test.
3. Other requirements for this license should be limited to those addressing public safety (e.g., background screening) and those of immediate use to the novice instructor (e.g., classroom management training).

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 60

How States are Faring in Part Time Teaching Licenses

Progress on this Goal Since 2009:

New Goal

ANALYSIS

Illinois does not offer a license with minimal requirements that would allow content experts to teach part time.

RECOMMENDATION

■ **Offer a license that allows content experts to serve as part-time instructors.**

Illinois should permit individuals with deep subject-area knowledge to teach a limited number of courses without fulfilling a complete set of certification requirements. The state should verify content knowledge through a rigorous test and conduct background checks as appropriate, while waiving all other licensure requirements. Such a license would increase districts' flexibility to staff certain subjects, including many STEM areas, that are frequently hard to staff or may not have high enough enrollment to necessitate a full-time position.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

Arkansas offers a license with minimal requirements that allows content experts to teach part time. Individuals seeking this license must pass a subject-matter test and are also required to complete specially-designed pedagogy training that is not overly burdensome.

1. License has restrictions.

2. It appears that the state has a license that may be used for this purpose; guidelines are vague.

Area 2: Expanding the Pool of Teachers

Goal E – Licensure Reciprocity

The state should help to make licenses fully portable among states, with appropriate safeguards.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should offer a standard license to fully certified teachers moving from other states, without relying on transcript analysis or recency requirements as a means of judging eligibility. The state can and should require evidence of good standing in previous employment.
2. The state should uphold its standards for all teachers by insisting that certified teachers coming from other states meet the incoming state's testing requirements.
3. The state should accord the same license to teachers from other states who completed an approved alternate route program that it accords teachers prepared in a traditional preparation program.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 62

How States are Faring in Licensure Reciprocity

Progress on this Goal Since 2009:

↑ : 2 ↔ : 49 ↓ : 0

State Partly Meets Goal

Progress Since 2009

ANALYSIS

Illinois does not support licensure reciprocity for certified teachers from other states.

Commendably, Illinois no longer allows waivers for its licensing tests to out-of-state teachers who have passed tests in a previous state. All teachers must now meet the state's own passing scores on its content tests.

However, other aspects of the state's policy create obstacles for teachers from other states seeking licensure in Illinois. Teachers with valid out-of-state certificates may be eligible for Illinois's professional certificate. Illinois routinely reviews the college transcripts of licensed out-of-state teachers, an exercise that often leads the state to require additional coursework before it will offer an equivalent license. States that reach a determination about an applicant's licensure status on the basis of the course titles listed on the applicant's transcript may end up mistakenly equating the amount of required coursework with the teacher's qualifications.

Illinois is also a participant in the NASDTEC Interstate Agreement; however, the latest iteration of this agreement no longer purports to be a reciprocity agreement among states and thus is no longer included in this analysis.

Supporting Research

Illinois Administrative Code Title 23, Section 25.720

Illinois Compiled Statutes, 105 ILCS 5/Art.21

Information for Out-of-State Applicants

www.isbe.state.il.us/certification/html/prospective_outofstate.htm

RECOMMENDATION

■ Offer a standard license to certified out-of-state teachers, absent unnecessary requirements.

Illinois is urged to discontinue its practice of transcript analysis, for it is likely to result in additional coursework requirements, even for traditionally prepared teachers; alternate route teachers, on the other hand, may have to virtually begin anew, repeating some, most or all of a teacher preparation program in Illinois. Regardless of whether a teacher was prepared through a traditional or alternate route, all certified out-of-state teachers should receive equal treatment.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

Alabama and **Texas** appropriately support licensure reciprocity by only requiring certified teachers from other states to meet each state's own testing requirements and by not specifying any additional coursework or recency requirements to determine eligibility for either traditional or alternate route teachers.

Figure 63

Do states require all out-of-state teachers to pass their licensure tests?

Area 3: Identifying Effective Teachers

Goal A – State Data Systems

The state should have a data system that contributes some of the evidence needed to assess teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should establish a longitudinal data system with at least the following key components:
 - a. A unique statewide student identifier number that connects student data across key databases across years;
 - b. A unique teacher identifier system that can match individual teacher records with individual student records; and
 - c. An assessment system that can match individual student test records from year to year in order to measure academic growth.
2. Value-added data provided through the state's longitudinal data system should be considered among the criteria used to determine teachers' effectiveness.
3. To ensure that data provided through the state data system is actionable and reliable, the state should have a clear definition of "teacher of record" and require its consistent use statewide.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 66

How States are Faring in the Development of Data Systems

Progress on this Goal Since 2009:

↑ : 17 ↔ : 33 ↓ : 1

State Meets Goal

Progress Since 2009

ANALYSIS

Illinois has a data system with the capacity to provide evidence of teacher effectiveness.

Illinois has all three necessary elements of a student- and teacher-level longitudinal data system. The state has assigned unique student identifiers that connect student data across key databases across years and has assigned unique teacher identifiers that enable it to match individual teacher records with individual student records. It also has the capacity to match student test records from year to year in order to measure student academic growth.

Supporting Research

Data Quality Campaign

www.dataqualitycampaign.org

RECOMMENDATION

■ Develop a clear definition of "teacher of record."

Illinois has not yet established a definition of teacher of record, which is essential in order to use the student-data link for teacher evaluation and related purposes. To ensure that data provided through the state data system are actionable and reliable, Illinois should articulate a definition of teacher of record and require its consistent use throughout the state.

ILLINOIS RESPONSE TO ANALYSIS

Illinois was helpful in providing NCTQ with the facts necessary for this analysis. The state added that it is currently defining teacher of record, and developing a new system to connect teacher effectiveness data to preparation programs. Illinois is also working on the development of its longitudinal data system and, as of August 2011, began to link teachers to courses and students at the high school level.

★ EXAMPLES OF BEST PRACTICE

Although NCTQ has not singled out one state's policies for "best practice" honors, it commends the 35 states that have a data system with the capacity to provide evidence of teacher effectiveness.

Key

▣ indicates that the state assigns teacher identification numbers, but it cannot match individual teacher records with individual student records.

Area 3: Identifying Effective Teachers

Goal B – Evaluation of Effectiveness

The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should either require a common evaluation instrument in which evidence of student learning is the most significant criterion or specifically require that student learning be the preponderant criterion in local evaluation processes. Evaluation instruments, whether state or locally developed, should be structured to preclude a teacher from receiving a satisfactory rating if found ineffective in the classroom.
2. Evaluation instruments should require classroom observations that focus on and document the effectiveness of instruction.
3. Teacher evaluations should consider objective evidence of student learning, including not only standardized test scores but also classroom-based artifacts such as tests, quizzes and student work.
4. The state should require that evaluation instruments differentiate among various levels of teacher performance. A binary system that merely categorizes teachers as satisfactory or unsatisfactory is inadequate.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 68

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Illinois does not require that objective evidence of student learning be the preponderant criterion of its teacher evaluations.

The state requires that the use of data and indicators of student growth be "significant" factors in teacher evaluations.

Classroom observations are required, and by September 1, 2012, teachers must be rated as excellent, proficient, needs improvement or unsatisfactory

http://www.isbe.state.il.us/PEAC/pdf/PA096-0861_SB315.pdf

S.B. 7

105 ILCS 5/24A-7

RECOMMENDATION

- **Require instructional effectiveness to be the preponderant criterion of any teacher evaluation.**

Although Illinois's requirement of student growth is a step in the right direction, it falls short by failing to require that evidence of student learning be the most significant criterion. The state should either require a common evaluation instrument in which evidence of student learning is the most significant criterion, or it should specifically require that student learning be the preponderant criterion in local evaluation processes. This can be accomplished by requiring objective evidence to count for at least half of the evaluation score or through other scoring mechanisms, such as a matrix, that ensure that nothing affects the overall score more. Whether state or locally developed, a teacher should not be able to receive a satisfactory rating if found ineffective in the classroom.

- **Ensure that evaluations also include classroom observations that specifically focus on and document the effectiveness of instruction.**

Although Illinois commendably requires classroom observations as part of teacher evaluations, the state should articulate guidelines that focus classroom observations on the quality of instruction, as measured by student time on task, student grasp or mastery of the lesson objective and efficient use of class time.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

Figure 69

Do states consider classroom effectiveness as part of teacher evaluations?

★ EXAMPLES OF BEST PRACTICE

NCTQ has not singled out any one state for “best practice” honors. Many states have made significant strides in the area of teacher evaluation by requiring that objective evidence of student learning be the preponderant criterion. Because there are many different approaches that result in student learning being the preponderant criterion, all 10 states that meet this goal are commended for their efforts.

Figure 70

Using state data in teacher evaluations

States with Requirements for Student Achievement Data but Lacking Data System Capacity

Arizona, Colorado, Connecticut, Michigan, Nevada

States with Data System Capacity but No Student Achievement Requirements

Alabama, Hawaii, Iowa, Kansas, Kentucky, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, North Dakota, Pennsylvania, South Carolina, Washington, West Virginia, Wisconsin

Figure 69

1. District of Columbia Public Schools requires that student learning be the preponderant criterion of its teacher evaluations.

Figure 71

Sources of objective evidence of student learning

Many educators struggle to identify possible sources of objective student data. Here are some examples:

- Standardized test scores
- Periodic diagnostic assessments
- Benchmark assessments that show student growth
- Artifacts of student work connected to specific student learning standards that are randomly selected for review by the principal or senior faculty, scored using rubrics and descriptors
- Examples of typical assignments, assessed for their quality and rigor
- Periodic checks on progress with the curriculum coupled with evidence of student mastery of the curriculum from quizzes, tests and exams

Figure 72

Do states require more than two categories for teacher evaluation ratings?

1. State approval required.

2. The state model is presumptive; districts need state approval to opt out.

Area 3: Identifying Effective Teachers

Goal C – Frequency of Evaluations

The state should require annual evaluations of all teachers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that all teachers receive a formal evaluation rating each year.
2. While all teachers should have multiple observations that contribute to their formal evaluation rating, the state should ensure that new teachers are observed and receive feedback early in the school year.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 74

How States are Faring in Frequency of Evaluations

Progress on this Goal Since 2009:

↑ : 13 ↔ : 37 ↓ : 1

State Does Not Meet Goal

Progress Since 2009

ANALYSIS

Regrettably, Illinois does not ensure that all teachers are evaluated annually.

Nonprobationary teachers are evaluated once every two years. Those rated as either “needs improvement” or “unsatisfactory” must be evaluated at least once during the following school year. New teachers in Illinois must be evaluated annually. However, the state does not articulate when the evaluation must occur.

Supporting Research

Performance Evaluation Reform Act

http://www.isbe.state.il.us/PEAC/pdf/PA096-0861_SB315.pdf

RECOMMENDATION

■ **Require annual formal evaluations for all teachers.**

All teachers in Illinois should be evaluated annually. Rather than treated as mere formalities, these teacher evaluations should serve as important tools for rewarding good teachers, helping average teachers improve and holding weak teachers accountable for poor performance.

■ **Base evaluations on multiple observations.**

To guarantee that annual evaluations are based on an adequate collection of information, Illinois should require multiple observations for all teachers, even those who have nonprobationary status.

■ **Ensure that new teachers are observed and receive feedback early in the school year.**

It is critical that schools and districts closely monitor the performance of new teachers. Illinois should ensure that its new teachers get the support they need and that supervisors know early on which new teachers may be struggling or at risk for unacceptable levels of performance.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

Although not awarding “best practice” honors for frequency of evaluations, NCTQ commends all nine states that meet this goal not only by requiring annual evaluations for all teachers, but also for ensuring that new teachers are observed and receive feedback during the first half of the school year.

Figure 76

Do states require districts to evaluate all teachers each year?

Figures 75 and 76

1. Although highly effective teachers are only required to receive a summative evaluation once every two years, the student improvement component is evaluated annually.
2. All District of Columbia Public Schools teachers are evaluated at least annually.

Figure 77

Do states require classroom observations?

1. **Strong Practice:** Alabama, Alaska⁴, Arkansas, Colorado⁴, Delaware, Florida⁴, Georgia, Kentucky⁴, Maryland, Michigan, Missouri⁴, Nevada⁴, New York, North Carolina, Ohio, Oregon⁴, Rhode Island, Tennessee, Washington, West Virginia⁴

2. Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Illinois, Iowa, Louisiana, Maine, Massachusetts, Michigan, Mississippi, Missouri, Montana, New Hampshire, New Mexico, New York, North Carolina, Oregon, Pennsylvania, South Dakota, Texas, Utah, Vermont, Virginia, Wisconsin, Wyoming

Area 3: Identifying Effective Teachers

Goal D – Tenure

The state should require that tenure decisions are based on evidence of teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. A teacher should be eligible for tenure after a certain number of years of service, but tenure should not be granted automatically at that juncture.
2. Evidence of effectiveness should be the preponderant criterion in tenure decisions.
3. The state should articulate a process, such as a hearing, that local districts must administer in considering the evidence and deciding whether a teacher should receive tenure.
4. The minimum years of service needed to achieve tenure should allow sufficient data to be accumulated on which to base tenure decisions; five years is the ideal minimum.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 79

How States are Faring on Tenure

Progress on this Goal Since 2009:

↑ : 15 ↔ : 36 ↓ : 0

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Illinois could do more to connect tenure decisions to evidence of teacher effectiveness.

The state requires a four-year probationary period, after which a teacher is eligible for nonprobationary status, or contractual continued service. To qualify for nonprobationary status, teachers must receive four consecutive overall evaluation ratings consisting of at least “proficient” in the last term (school year) and at least “proficient” in either the second or third term. If at the end of four years, the teacher does not qualify for nonprobationary status, then he or she is dismissed.

Teachers in Illinois may also qualify for “accelerated” contractual continued service with three consecutive terms in which the teacher receives overall evaluation ratings of “excellent.”

Because Illinois’s teacher evaluation ratings are not centered primarily on evidence of student learning (see Goal 3-B), basing tenure decisions on these evaluation ratings ensures that classroom effectiveness is considered, but does not ensure it is the preponderant criterion.

Supporting Research

S.B. 7, amending Illinois Compiled Statutes 105:5/24-11

S.B. 7, amending Illinois Compiled Statutes 105:5/34-84

RECOMMENDATION**■ Ensure evidence of effectiveness is the preponderant criterion in tenure decisions.**

Illinois should make evidence of effectiveness, rather than the number of years in the classroom, the most significant factor when determining this leap in professional standing.

■ Ensure the probationary period is adequate.

Illinois should make certain its probationary period allows for a collection of sufficient data that reflect teacher performance.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

EXAMPLES OF BEST PRACTICE

Michigan has increased its probationary period to five years and requires that evidence of effectiveness be the primary criterion in awarding tenure.

Figure 82

How are tenure decisions made?

Figure 81

1. No state-level policy; however, the contract between DCPS and the teachers' union represents significant advancement in the area of teacher tenure.
2. The state has created a loophole by essentially waiving student learning requirements and allowing the principal of a school to petition for career-teacher status.

Area 3: Identifying Effective Teachers

Goal E – Licensure Advancement

The state should base licensure advancement on evidence of teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should base advancement from a probationary to a nonprobationary license on evidence of teacher effectiveness.
2. The state should not require teachers to fulfill generic, unspecified coursework requirements to advance from a probationary to a nonprobationary license.
3. The state should not require teachers to have an advanced degree as a condition of professional licensure.
4. Evidence of effectiveness should be a factor in the renewal of a professional license.

The components for this goal have changed since 2009. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 83

How States are Faring on Licensure Advancement

Progress on this Goal Since 2009:

↑ : 4 ↔ : 45 ↓ : 2

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2009

ANALYSIS

Illinois is on the right track when it comes to basing licensure advancement and renewal on evidence of teacher effectiveness.

In Illinois, to advance from an Initial Certificate to a Standard Certificate, the state requires four years of teaching on an Initial Certificate as well as the completion of one of the following 10 options: completion of an approved induction and mentoring program; completion of at least four semester hours of graduate level coursework on the assessment of one's own performance in relation to the Illinois Professional Teaching Standards; completion of at least four semester hours of graduate-level coursework addressing requirements for National Board for Professional Teaching Standards (NBPTS) certification; completion of at least 12 semester hours of graduate-level coursework toward an advanced degree; accumulation of 60 continuing professional development units; completion of a performance-based assessment; completion of the requirements for "highly qualified" teacher consideration; earning a post-baccalaureate, education-related certificate; completion of all activities pertaining to NBPTS certification; or earning a subsequent certificate or additional endorsement.

Teachers must renew their licenses every five years by completing approved professional development, including six semester hours of graduate credit or 120 clock hours of professional development aligned with Illinois standards.

Recent legislation allows the superintendent to suspend or revoke a certificate for incompetency, which is now defined as receiving an unsatisfactory rating on a performance evaluation for two or more school terms of service within a period of seven school terms of service. When determining action based on incompetency, the superintendent must consider factors that include the following: the time between the unsatisfactory ratings, the quality of the remediation plans and whether one of the unsatisfactory ratings occurred during the first year of a teaching assignment.

http://www.isbe.state.il.us/certification/html/experienced_teacher.htm

S.B. 7

RECOMMENDATION

■ **Require evidence of effectiveness as a part of teacher licensing policy.**

Although Illinois' new revocation policy is a step in the right direction, the state should also incorporate performance reviews into its license renewal policy.

■ **Discontinue licensure requirements with no direct connection to classroom effectiveness.**

While targeted requirements may potentially expand teacher knowledge and improve teacher practice, Illinois' general, nonspecific coursework requirements for license advancement and renewal merely call for teachers to complete a certain amount of seat time. These requirements do not correlate with teacher effectiveness.

■ **End license advancement tied to master's degrees.**

While an option (not a requirement) for advancement, Illinois should not emphasize obtaining a master's degree as a means of license advancement for teachers. Research is conclusive and emphatic that master's degrees do not have any significant correlation to classroom performance. Rather, advancement should be based on evidence of teacher effectiveness.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. However, the analysis was updated subsequent to the state's review. Illinois added that with the passage of S.B. 1799, it will now bring in stakeholders to consider legislative changes to license renewal.

Figure 84

★ EXAMPLES OF BEST PRACTICE

Rhode Island is integrating certification, certification renewal and educator evaluation. Teachers who receive poor evaluations for five consecutive years are not eligible to renew their certification. In addition, teachers who consistently receive 'highly effective' ratings will be eligible for a special license designation.

Figure 85

Do states require teachers to earn advanced degrees before conferring professional licensure?

1. Connecticut, Kentucky, Maryland, Michigan, Mississippi, Montana, New York and Oregon all require a master's degree or coursework equivalent to a master's degree

2. Illinois, Massachusetts, Missouri, Tennessee

3. Alabama, Hawaii, Indiana, Iowa, Nebraska, New Mexico, Ohio, South Carolina, Utah, Virginia, West Virginia

4. **Strong Practice:** Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Kansas, Louisiana, Maine, Minnesota, Nevada, New Hampshire, New Jersey, North Carolina, North Dakota, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Texas, Vermont, Washington, Wisconsin, Wyoming

Figure 84

- Illinois allows revocation of licenses based on ineffectiveness.
- Maryland uses some objective evidence through their evaluation system for renewal, but advancement to professional license is still based on earning an advanced degree.

2. **Strong Practice:** Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Wisconsin, Wyoming

Area 3: Identifying Effective Teachers

Goal F – Equitable Distribution

The state should publicly report districts' distribution of teacher talent among schools to identify inequities in schools serving disadvantaged children.

Goal Components

(The factors considered in determining the states' rating for the goal.)

The state should make the following data publicly available:

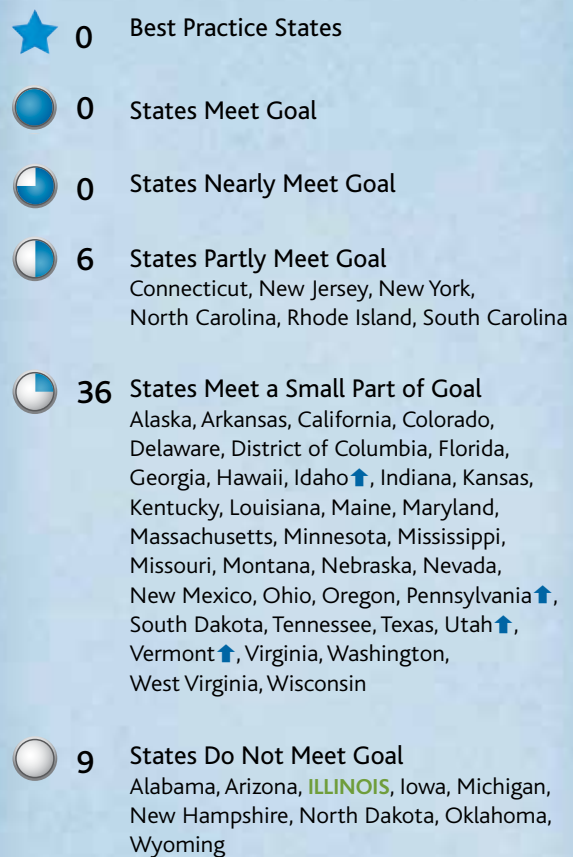

1. An "Academic Quality" index for each school that includes factors research has found to be associated with teacher effectiveness, such as:
 - a. percentage of new teachers;
 - b. percentage of teachers failing basic skills licensure tests at least once;
 - c. percentage of teachers on emergency credentials;
 - d. average selectivity of teachers' undergraduate institutions; and
 - e. teachers' average ACT or SAT scores;
2. The percentage of highly qualified teachers disaggregated by both individual school and by teaching area;
3. The annual teacher absenteeism rate reported for the previous three years, disaggregated by individual school;
4. The average teacher turnover rate for the previous three years, disaggregated by individual school, by district and by reasons that teachers leave.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 88

How States are Faring on Equitable Distribution

Progress on this Goal Since 2009:

↑ : 4 ↔ : 47 ↓ : 0

State Does Not Meet Goal

Progress Since 2009

ANALYSIS

Providing comprehensive reporting may be the state's most important role for ensuring the equitable distribution of teachers among schools. Illinois reports little school-level data that can help support the equitable distribution of teacher talent.

Illinois does not collect or publicly report most of the data recommended by NCTQ. The state does not provide a school-level teacher quality index that demonstrates the academic backgrounds of a school's teachers and the ratio of new to veteran teachers. Illinois also does not report teacher absenteeism or turnover rates.

Illinois does report on the percentage of teachers with emergency or provisional credentials as well as the percentage of highly qualified teachers. However, these data are reported at the district, rather than school, level. The state also reports on the average number of years of teacher experience at the school level. Illinois' Highly Qualified Teacher Plan, published in September 2006, compares the percentage of highly qualified teachers in high- and low-poverty schools statewide, but these data have not been updated.

Supporting Research

<http://iirc.niu.edu/ListSchools.aspx>

Illinois Highly Qualified Teacher Plan

http://www.isbe.state.il.us/nclb/pdfs/hqt_plan.pdf

RECOMMENDATION

■ **Use a teacher quality index to report publicly about each school.**

A teacher quality index, such as the one developed by the Illinois Education Research Council, with data including teachers' average SAT or ACT scores, the percentage of teachers failing basic skills licensure tests at least once, the selectivity of teachers' undergraduate colleges and the percentage of new teachers, can shine a light on how equitably teachers are distributed both across and within districts. Illinois should ensure that individual school report cards include such data in a manner that translates these factors into something easily understood by the public, such as a color-coded matrix indicating a school's high or low score.

■ **Publish other data that facilitate comparisons across schools.**

Illinois should collect and report other school-level data that reflect the stability of a school's faculty, including the rates of teacher absenteeism and turnover.

■ **Provide comparative data based on school demographics.**

Providing comparative data for schools with similar poverty and minority populations would yield an even more comprehensive picture of gaps in the equitable distribution of teachers.

■ **Ensure that data are current.**

It is important to keep data updated and current in order to provide the public with an accurate picture of teacher distribution across schools in districts. Illinois should update its comparison of the percentage of highly qualified teachers in high- and low-poverty schools statewide, as the state has not done so since 2006.

■ **Report data at the school level.**

Illinois should ensure that it is reporting all currently collected data at the school level, rather than aggregated by district.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. However, this analysis was updated subsequent to the state's review.

★ EXAMPLES OF BEST PRACTICE

No state has an outstanding record when it comes to public reporting of teacher data that can help to ameliorate inequities in teacher quality. However, **Connecticut, New Jersey, New York, North Carolina, Rhode Island** and **South Carolina** report more school-level data than other states.

1. Ideally, percentage of new teachers and percentage of teachers on emergency credentials would be incorporated into a teacher quality index.

Area 4: Retaining Effective Teachers

Goal A – Induction

The state should require effective induction for all new teachers, with special emphasis on teachers in high-needs schools.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that new teachers receive mentoring of sufficient frequency and duration, especially in the first critical weeks of school.
2. Mentors should be carefully selected based on evidence of their own classroom effectiveness and subject-matter expertise. Mentors should be trained, and their performance as mentors should be evaluated.
3. Induction programs should include only strategies that can be successfully implemented, even in a poorly managed school. Such strategies include intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe effective teachers.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 90

How States are Faring on Induction

Progress on this Goal Since 2009:

↑ : 4 ↔ : 44 ↓ : 3

State Partly Meets Goal

Progress Since 2009

ANALYSIS

Illinois provides a mentoring program for some of its new teachers. This program is offered by a single district or two or more school districts with approval from the Illinois State Board of Education in consultation with the State Teacher Certification Board. Schools may receive up to \$1,200 for each new teacher provided its plan assigns a mentor teacher to each new teacher for at least two years and aligns with the Illinois Professional Teaching Standards' content area standards and any applicable local school improvement and development plans. Participating schools must have a plan addressing the details of the teacher-mentor relationship.

Supporting Research

Induction and Mentoring Programs

http://www.isbe.state.il.us/certification/pdf/induction_mentoring.pdf

New Teacher Induction and Mentoring

<http://www.isbe.net/rules/archive/pdfs/65ARK.pdf>

RECOMMENDATION

- **Ensure that a high-quality mentoring experience is available to all new teachers, especially those in low-performing schools.**

Although Illinois does provide mentoring to some of its new teachers, the state should ensure that all new teachers—especially any teacher in a low-performing school—receive mentoring support, especially in the first critical weeks of school. Illinois should consider expanding its program throughout the state.

- **Set more specific parameters.**

To ensure that all teachers receive high-quality mentoring, the state should specify who selects the mentors and a method of performance evaluation.

- **Require induction strategies that can be successfully implemented, even in poorly managed schools.**

To ensure that the experience is meaningful, Illinois should guarantee that induction includes strategies such as intensive mentoring, seminars appropriate to grade level or subject area and a reduced teaching load and/or frequent release time to observe other teachers.

ILLINOIS RESPONSE TO ANALYSIS

Illinois stated that this requirement is based on funding being available. When funding has not been available, grants were given to districts, ROEs, and other entities working to provide induction and mentoring. The number of grants depended on the money available. Through the grant process Illinois developed standards for mentoring programs. Funding was not provided for the FY 2012 year. The state is still trying to support induction and mentoring through technical support as much as possible.

★ EXAMPLES OF BEST PRACTICE

South Carolina requires that all new teachers, prior to the start of the school year, be assigned mentors for at least one year. Districts carefully select mentors based on experience and similar certifications and grade levels, and mentors undergo additional training. Adequate release time is mandated by the state so that mentors and new teachers may observe each other in the classroom, collaborate on effective teaching techniques and develop professional growth plans. Mentor evaluations are mandatory and stipends are recommended.

Figure 92

Do states have policies that articulate the elements of effective induction?

1. **Strong Practice:** Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Oklahoma, Rhode Island, South Carolina, Utah, Virginia, West Virginia

2. Alaska, Arizona, Florida, Idaho, Illinois, Minnesota, Montana, New Mexico, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Tennessee, Texas, Washington, Wisconsin

3. District of Columbia, Georgia, Hawaii, Indiana, Louisiana, Nevada, New Hampshire, Vermont, Wyoming

Area 4: Retaining Effective Teachers

Goal B – Professional Development

The state should require professional development to be based on needs identified through teacher evaluations.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that evaluation systems provide teachers with feedback about their performance.
2. The state should direct districts to align professional development activities with findings from teachers' evaluations.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 93

How States are Faring on Professional Development

Progress on this Goal Since 2009:

New Goal

ANALYSIS

Illinois requires that a copy of the evaluation is included in the teacher's personnel file and that a copy is given to the teacher. In addition, the evaluation plan must include the specification of the teacher's strengths and weaknesses and supporting reasons for the comments made. The state also specifies that professional development activities for teachers with "needs improvement" or "unsatisfactory evaluations" must be aligned with findings from teacher evaluations.

Supporting Research

SB 0007

Illinois Compiled Statute, 105, Sec. 24A-5

RECOMMENDATION

■ **Ensure that professional development is aligned with findings from teachers' evaluations.**

While Illinois has taken steps to ensure that teachers with unsatisfactory evaluations receive coordinated professional development based on these findings, the state should strengthen this policy by requiring that all teachers receive professional development that is aligned with their evaluation results.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis. The state added that it will need to develop this as it moves forward with its evaluation system.

★ EXAMPLES OF BEST PRACTICE

Ten states meet this goal, and although NCTQ has not singled out one state's policies for "best practice" honors, **Louisiana** is commended for clearly articulating that the feedback provided to a teacher in a post-observation conference must include a discussion of a teacher's strengths and weaknesses.

Figure 94

Do teachers receive feedback on their evaluations?

1. **Strong Practice:** Arkansas, Connecticut, Delaware, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Massachusetts, Michigan, Mississippi, Missouri, New Jersey, New Mexico, New York, North Carolina, Oregon, Rhode Island, South Carolina, Tennessee, Texas, Washington, West Virginia, Wyoming

Figure 96

Do states require that teacher evaluations inform professional development?

1. **Strong Practice:** Arkansas, Connecticut, Delaware, Florida, Louisiana, Michigan, Minnesota, Missouri, North Carolina, Rhode Island, South Carolina, Wyoming

2. Colorado, Georgia, Illinois, Indiana, Texas

3. Alabama, Alaska, Arizona, California, District of Columbia, Hawaii, Idaho, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Mississippi⁴, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin

4. Mississippi requires professional development based on evaluation results only for teachers in need of improvement in school identified as at-risk.

Area 4: Retaining Effective Teachers

Goal C – Pay Scales

The state should give local districts authority over pay scales.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. While the state may find it appropriate to articulate teachers' starting salaries, it should not require districts to adhere to a state-dictated salary schedule that defines steps and lanes and sets minimum pay at each level.
2. The state should discourage districts from tying additional compensation to advanced degrees. The state should eliminate salary schedules that establish higher minimum salaries or other requirements to pay more to teachers with advanced degrees.
3. The state should discourage salary schedules that imply that teachers with the most experience are the most effective. The state should eliminate salary schedules that require that the highest steps on the pay scale be determined solely by seniority.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 97

How States are Faring in Pay Scales

Progress on this Goal Since 2009:

↑ : 3 ↔ : 48 ↓ : 0

ANALYSIS

Although Illinois gives local districts the authority for pay scales, the state requires minimum salaries based on teachers' years of experience and earned advanced degrees, in effect mandating how districts will pay teachers.

Supporting Research

105 Illinois Compiled Statutes (ILCS) 5/24-8; 5/10-20.7

RECOMMENDATION

■ **Give districts flexibility to determine their own pay structure and scales.**

While Illinois does not require local districts to adhere to a state-dictated schedule, it still mandates a minimum salary based on years of experience and earned advanced degree, thereby not giving full authority to districts. Furthermore, considering that the minimum salary requirements are based on the 1980 school year, it is questionable that they serve any purpose at all.

■ **Discourage districts from tying compensation to advanced degrees.**

While leaving districts the flexibility to establish their own pay scale, Illinois should articulate policies that definitively discourage districts from tying compensation to advanced degrees, in light of the extensive research showing that such degrees do not have an impact on teacher effectiveness.

■ **Discourage salary schedules that imply that teachers with the most experience are the most effective.**

Similarly, Illinois should articulate policies that discourage districts from determining the highest steps on the pay scale solely by seniority.

ILLINOIS RESPONSE TO ANALYSIS

Illinois commented that minimum salaries set in 1980 are not driving salary ranges. Districts negotiate directly to determine salary for teachers. The state is not involved in setting salaries. It is local control.

★ EXAMPLES OF BEST PRACTICE

Florida and **Indiana** allow local districts to develop their own salary schedules while preventing districts from focusing on elements not associated with teacher effectiveness. In Florida, local salary schedules must ensure that the most effective teachers receive salary increases greater than the highest annual salary adjustment available. Indiana requires local salary scales to be based on a combination of factors and limits the years of teacher experience and content-area degrees to account for no more than one-third of this calculation.

	3	32	16

1. Rhode Island requires local district salary schedules to include teacher "training".

2. Texas has a minimum salary schedule based on years of experience. Compensation for advanced degrees is left to district discretion.

Area 4: Retaining Effective Teachers

Goal D – Compensation for Prior Work Experience

The state should encourage districts to provide compensation for related prior subject-area work experience.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should encourage districts to compensate new teachers with relevant prior work experience through mechanisms such as starting these teachers at an advanced step on the pay scale. Further, the state should not have regulatory language that blocks such strategies.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 100

How States are Faring in Compensation for Prior Work Experience

Progress on this Goal Since 2009:

↑ : 0 ↔ : 51 ↓ : 0

State Does Not Meet Goal

Progress Since 2009

ANALYSIS

Illinois does not encourage local districts to provide compensation for related prior subject-area work experience. However, the state does not seem to have regulatory language blocking such strategies.

RECOMMENDATION

■ **Encourage local districts to compensate new teachers with relevant prior work experience.**

While still leaving districts with the flexibility to determine their own pay scales, Illinois should encourage districts to incorporate mechanisms such as starting these teachers at a higher salary than other new teachers. Such policies would be attractive to career changers with related work experience, such as in the STEM subjects.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

North Carolina compensates new teachers with relevant prior-work experience by awarding them one year of experience credit for every year of full-time work after earning a bachelor's degree that is related to their area of licensure and work assignment. One year of credit is awarded for every two years of work experience completed prior to earning a bachelor's degree.

Figure 101

Do states direct districts to compensate teachers for related prior work experience?

1. **Strong Practice:** California, Delaware, Georgia, North Carolina, Texas, Washington

2. Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, District of Columbia, Florida, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, West Virginia, Wisconsin, Wyoming

Area 4: Retaining Effective Teachers

Goal E – Differential Pay

The state should support differential pay for effective teaching in shortage and high-need areas.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support differential pay for effective teaching in shortage subject areas.
2. The state should support differential pay for effective teaching in high-need schools.
3. The state should not have regulatory language that would block differential pay.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 102

How States are Faring on Differential Pay

Progress on this Goal Since 2009:

↑ : 2 ↔ : 45 ↓ : 4

ANALYSIS

Illinois does not support differential pay by which teachers can earn additional compensation by teaching certain subjects. However, the state has no regulatory language preventing districts from providing such differential pay.

Illinois supports incentives for those teaching in high-needs schools. Teachers working in "hard-to-staff" schools are eligible for \$25,000 in forgivable loans for direct expenses associated with teacher preparation programs. Loans are fully forgiven after five years of service; partial forgiveness is given for shorter periods of service.

Supporting Research

110 Illinois Compiled Statutes (ILCS) 48/5

23 Illinois Administrative Code 60.100

Illinois Teaching Excellence Program - Public Law 095-0996

RECOMMENDATION

- **Support differential pay initiatives for effective teachers in shortage subject areas.**

Illinois should encourage districts to link compensation to district needs. Such policies can help districts achieve a more equitable distribution of teachers.

- **Expand differential pay initiatives for teachers in high-needs schools.**

Although the state's loan forgiveness program is a desirable recruitment and retention tool for teachers early in their careers, Illinois should expand its program to include those already part of the teaching pool. A salary differential is an attractive incentive for every teacher, not just those with education debt.

ILLINOIS RESPONSE TO ANALYSIS

Illinois was helpful in providing NCTQ with facts that enhanced this analysis.

	21	7	17	11	17

1. Connecticut offers mortgage assistance and incentives to retired teachers working in shortage subject areas.

2. Maryland offers tuition reimbursement for teacher retraining in specified shortage subject areas and offers a stipend for alternate route candidates teaching in shortage subject areas.

3. South Dakota offers signing bonuses and scholarships to fill shortages in high-need schools.

4. Shortage subject area differential pay is limited to the Middle School Teacher Corps program.

★ EXAMPLES OF BEST PRACTICE

Georgia supports differential pay by which teachers can earn additional compensation by teaching certain subjects. The state is especially commended for its new compensation strategy for math and science teachers, which moves teachers along the salary schedule rather than just providing a bonus or stipend. The state also supports differential pay initiatives to link compensation more closely with district needs and to achieve a more equitable distribution of teachers. Georgia's efforts to provide incentives for National Board Certification teachers to work in high-need schools are also noteworthy.

Figure 104

Do states support differential pay for teaching in high need schools and shortage subjects?

1. **Strong Practice:** Arkansas, California, Florida, Georgia, Kentucky, Louisiana, Massachusetts, Nevada, New York, Ohio, Oklahoma, Tennessee, Texas, Virginia

2. Colorado, Hawaii, Maryland, North Carolina, Washington, Wisconsin, Wyoming

3. Idaho, Pennsylvania, Utah

4. Alabama, Alaska, Arizona, Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Vermont, West Virginia

Area 4: Retaining Effective Teachers

Goal F – Performance Pay

The state should support performance pay but in a manner that recognizes its appropriate uses and limitations.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support performance pay efforts, rewarding teachers for their effectiveness in the classroom.
2. The state should allow districts flexibility to define the criteria for performance pay provided that such criteria connect to evidence of student achievement.
3. Any performance pay plan should allow for the participation of all teachers, not just those in tested subjects and grades.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 105

How States are Faring on Performance Pay

Progress on this Goal Since 2009:

↑ : 11 ↔ : 37 ↓ : 3

State Does Not Meet Goal

Progress Since 2009

ANALYSIS

Illinois does not support performance pay. The state does not have any policies in place that offer teachers additional compensation based on evidence of effectiveness.

RECOMMENDATION

- **Support a performance pay plan that recognizes teachers for their effectiveness.**

Whether it implements the plan at the state or local level, Illinois should ensure that performance pay structures thoughtfully measure classroom performance and connect student achievement to teacher effectiveness. The plan must be developed with careful consideration of available data and subsequent issues of fairness.

- **Consider piloting performance pay in a select number of school districts.**

This would provide an opportunity to discover and correct any limitations in available data or methodology before implementing the plan on a wider scale.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

An increasing number of states are supporting performance pay initiatives. **Florida** and **Indiana** are particularly noteworthy for their efforts to build performance into the salary schedule. Rather than award bonuses, teachers' salaries will be based in part on their performance in the classroom.

Figure 106

Do states support performance pay?

1. Nebraska's initiative does not go into effect until 2016.

Area 4: Retaining Effective Teachers

Goal G – Pension Flexibility

The state should ensure that pension systems are portable, flexible and fair to all teachers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. Participants in the state's pension system should have the option of a fully portable pension system as their primary pension plan by means of a defined contribution plan or a defined benefit plan that is formatted similar to a cash balance plan.
2. Participants in the state's pension system should be vested no later than the third year of employment.
3. Defined benefit plans should offer teachers the option of a lump-sum rollover to a personal retirement account upon termination of employment that includes, at minimum, the teacher's contributions and accrued interest at a fair interest rate. In addition, withdrawal options from either defined benefit or defined contribution plans should include funds contributed by the employer.
4. Defined benefit plans should allow teachers to purchase time for unlimited previous teaching experience at the time of employment. Teachers should also be allowed to purchase time for all official leaves of absence, such as maternity or paternity leave.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 107

How States are Faring on Pension Flexibility

Progress on this Goal Since 2009:

↑ : 2 ↔ : 39 ↓ : 10

**ANALYSIS**

Illinois only offers a defined benefit pension plan to its teachers as their mandatory pension plan. This plan is not fully portable, does not vest until year 10, and does not provide full employee contributions or any employer contribution for teachers who choose to withdraw their account balances when leaving the system. It also limits flexibility by restricting the ability to purchase years of service.

Vesting in a defined benefit plan guarantees a teacher's eligibility to receive lifetime monthly benefit payments at retirement age. Nonvested teachers do not have a right to later retirement benefits; they may only withdraw the portion of their funds allowed by the plan. Illinois teachers who entered the pension system on or after January 1, 2010, vest at 10 years of service, which is very late and limits the options of teachers who leave the system prior to this point. Teachers who entered prior to this point vest at five years of service.

Many teachers will leave the system before they reach 10 years of service. Teachers who choose to withdraw their contributions upon leaving may withdraw only about 90 percent of their mandatory contribution plus interest (see Goal 4-H). This means that those who withdraw their funds accrue fewer benefits than what they might have earned contributing to basic savings accounts. Therefore, teachers leaving the pension system would have saved significantly below the level conventionally recommended by retirement advisers for individuals not also contributing to Social Security. While Illinois's mandatory contribution rate allows for flexibility in teachers' retirement savings, it also means that the state needs to educate teachers on what happens if they leave the system and encourage savings in other portable supplemental plans. Further, teachers who remain in the field of education but enter another pension plan (such as in another state) will find it difficult to purchase the time equivalent to their prior employment in the new system because they are not entitled to any employer contribution.

Illinois limits teachers' flexibility to purchase years of service. The ability to purchase time is important because defined benefit plans' retirement eligibility and benefit payments are often tied to the number of years a teacher has worked. Illinois's plan allows teachers to purchase time for previous teaching experience, up to 10 years. Teachers must have earned five years of service credit in Illinois after their out-of-state teaching before purchasing prior service, and the total amount purchased may not exceed two-fifths of their total service in Illinois. While better than not allowing any purchase at all, this provision disadvantages teachers who move to Idaho with more teaching experience. In addition, the mandatory five years of service before purchasing previous service makes the purchase cost more expensive. The state's plan also allows for the purchase of leaves of absence, as long as they return to service for at least a year or the length of the absence, whichever is less.

Supporting Research

Member Guide, for Tier II Members, August, 2011

<http://trs.illinois.gov/subsections/members/pubs/memborguide/TierIIMemberGuide.pdf>

RECOMMENDATION

■ Offer teachers a pension plan that is fully portable, flexible and fair.

Illinois should offer teachers for their mandatory pension plan the option of either a defined contribution plan or a fully portable defined benefit plan, such as a cash balance plan. A well-structured defined benefit plan could be a suitable option among multiple plans. However, as the sole option, defined benefit plans severely disadvantage mobile teachers and those who enter the profession later in life. Because teachers in Illinois do not participate in Social Security, they have no fully portable retirement benefits that would move with them in the event they leave the system.

■ Increase the portability of its defined benefit plan.

If Illinois maintains its defined benefit plan, it should allow teachers that leave the system to withdraw their full employee contribution plus matching employer contributions. The state should also allow teachers to purchase their full amount of previous teaching experience and decrease the vesting requirement to year three. A lack of portability is a disincentive to an increasingly mobile teaching force.

■ Offer a fully portable supplemental retirement savings plan.

If Illinois maintains its defined benefit plan, the state should at least offer teachers the option of a fully portable supplemental defined contribution savings plan, with employers matching a percentage of teachers' contributions.

ILLINOIS RESPONSE TO ANALYSIS

The Teachers' Retirement System of the State of Illinois declined to respond to NCTQ's analyses related to teacher pensions.

Figure 108
Pension Glossary

Accrued Liability: The value of a pension plan's promised benefits calculated by an actuary (actuarial valuation), taking into account a set of investment and benefit assumptions to a certain date.

Actuarial Valuation: In a pension plan, this is the total amount needed to meet promised benefits. A set of mathematical procedures is used to calculate the value of benefits to be paid, the funds available and the annual contribution required.

Amortization Period: The gradual elimination of a liability, such as a mortgage, in regular payments over a specified period of time.

Benefit Formula: Formula used to calculate the amount teachers will receive each month after retirement. The most common formula used is (years of service x final average salary x benefit multiplier). This amount is divided by 12 to calculate monthly benefits.

Benefit Multiplier: Multiplier used in the benefit formula. It, along with years of service, determines the total percentage of final average salary that a teacher will receive in retirement benefits. In some plans, the multiplier is not constant, but changes depending upon retirement age and/or years of service.

Defined Benefit Plan: Pension plan that promises to pay a specified amount to each person who retires after a set number of years of service. Employees contribute to them in some cases; in others, all contributions are made by the employer.

Defined Contribution Plan: Pension plan in which the level of contributions is fixed at a certain level, while benefits vary depending on the return from investments. Employees make contributions into a tax-deferred account, and employers may or may not make contributions. Defined contribution pension plans, unlike defined benefit pension plans, give the employee options of where to invest the account, usually among stock, bond and money market accounts.

Lump-sum Withdrawal: Large payment of money received at one time instead of in periodic payments. Teachers leaving a pension plan may receive a lump-sum distribution of the value of their pension.

Normal Cost: The amount necessary to fund retirement benefits for one plan year for an individual or a whole pension plan.

Pension Wealth: The net present value of a teacher's expected lifetime retirement benefits.

Purchasing Time: A teacher may make additional contributions to a pension system to increase service credit. Time may be purchased for a number of reasons, such as professional development leave, previous out-of-state teaching experience, medical leaves of absence or military service.

Service Credit/Years of Service: Accumulated period of time in years or partial years for which a teacher earned compensation subject to contributions.

Supplemental Retirement Plan: An optional plan to which teachers may voluntarily make tax-deferred contributions in addition to their mandatory pension plans. Employees are usually able to choose their rate of contribution up to a maximum set by the IRS; some employers also make contributions. These plans are generally in the form of 457 or 403(b) programs.

Vesting: Right an employee gradually acquires by length of service to receive employer-contributed benefits, such as payments from a pension fund.

EXAMPLES OF BEST PRACTICE

Alaska provides a fair and flexible defined contribution pension plan for all teachers. This plan is also highly portable, as teachers are entitled to 100 percent of employer contributions after five years of service. **South Dakota's** defined benefit plan has some creative provisions, which makes it more like a defined contribution plan. Most notably, teachers are able to withdraw 85 percent of their employer contributions after three years of service. In addition, **Florida, Ohio, South Carolina** and **Utah** are noteworthy for offering teachers a choice between a defined benefit or hybrid plan and a defined contribution plan.

1. A hybrid plan has components of both a defined benefit plan and a defined contribution plan.
2. California offers a small cash balance component but ended most of the funding to this portion as of January 1, 2011.
3. Indiana also offers a supplemental defined contribution plan.
4. Ohio also offers the option of a hybrid plan and offers a supplemental defined contribution plan.
5. Oregon also offers a supplemental defined contribution plan.
6. South Carolina also offers a supplemental defined contribution plan.
7. Utah offers a choice between a defined contribution or a hybrid plan.
8. Washington offers a choice between a defined benefit or a hybrid plan.

Figure 110

Do states offer teachers an option other than a nonportable defined benefit plan?

1. **Strong Practice:** Alaska, Florida, Indiana, Michigan, Ohio, Oregon, South Carolina, South Dakota, Utah, Washington

2. Alabama, Arizona, Arkansas, California, Colorado³, Connecticut, Delaware, District of Columbia, Georgia, Hawaii³, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Pennsylvania, Rhode Island, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, Wyoming

3. Although not fully portable, the state's defined benefit plan has some notable portability provisions.

Figure 111

- For teachers who join the system on or after January 1, 2012.
- Florida's defined benefit plan does not vest until year eight; teachers vest in the state's defined contribution plan after one year.
- For teachers who join the system on or after July 1, 2012.
- Ohio's defined benefit plan does not vest until year five; teachers vest in the state's defined contribution plan after one year.
- Oregon offers a hybrid plan in which teachers vest immediately in the defined contribution component and vest in the defined benefit component after five years.
- South Carolina's defined benefit plan does not vest until year five; teachers vest immediately in the state's defined contribution plan.
- Based on Washington's Plan 2. The state also offers a hybrid plan in which teachers vest immediately in the defined contribution component and vest in the defined benefit component after 10 years.

	4	5	34	6	1

1. States' withdrawal policies may vary depending on a teacher's years of service. Year five is used as a common point of comparison.

2. As of July 1, 2006, Alaska only offers a defined contribution plan to new members, which allows teachers leaving the system after five years to withdraw 100 percent of the employer contribution.

3. California has a defined benefit plan with a small cash balance component, which allows exiting teachers to withdraw their contributions and any employer contributions plus earnings from their cash balance component, regardless of their actions regarding their defined benefit account.

4. Once vested, Iowa teachers may withdraw an employer match equal to one-thirtieth of their years of service. Effective July 1, 2012 teachers vest at seven years of service, so a teacher leaving at year five would not be entitled to any employer contribution.

5. Michigan only offers a hybrid plan. Exiting teachers may withdraw their own contributions and accrued earnings immediately and the employer contributions to the defined contribution component once vested at year four. Michigan teachers may withdraw their own contributions and accrued interest from the defined benefit component but may not withdraw the employer contribution.

6. Most teachers in Nevada fund the system by salary reductions or forgoing pay raises and thus do not have direct contributions to withdraw. The small minority that are in a contributory system may withdraw their contributions plus interest.

7. Ohio has two other pension plans. Ohio's defined contribution plan allows teachers with at least one year of service who are leaving the system to withdraw 100 percent of the employer contribution. Exiting teachers with at least five years of experience in Ohio's combination plan may withdraw their employee-funded defined contribution component and the present value of the benefits offered in the defined benefit component.

8. Oregon only has a hybrid retirement plan, which allows exiting teachers to withdraw their contributions plus earnings from their defined contribution component; they still receive the employer-funded defined benefit payments at retirement age.

9. South Carolina also has a defined contribution plan, which allows exiting teachers to withdraw 100 percent of their contributions and employer contributions, plus earnings.

10. Utah offers a hybrid pension plan, which only has employee contributions when the costs exceed the guaranteed employer contribution. When costs are less than the employer contribution, the excess is contributed to the employee account and refundable after vesting.

11. Washington also has a hybrid plan, which allows exiting teachers to withdraw their contributions plus earnings from their defined contribution component; they still receive the employer-funded defined benefit payments at retirement age.

Figure 113

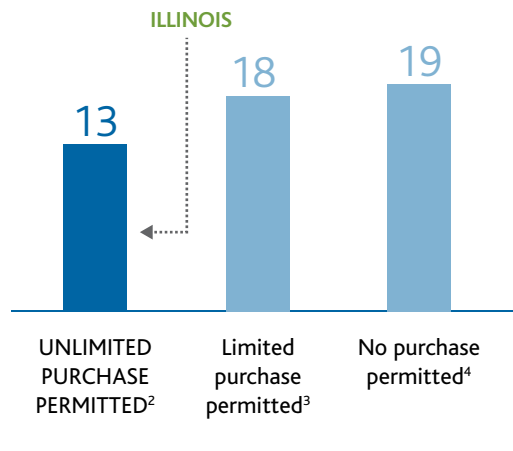

Do states permit teachers to purchase time for previous teaching experience?¹

1. Purchasing time does not apply to defined contribution plans. In states that offer multiple plans or a hybrid plan, the graph refers to the state's defined benefit plan or the defined benefit component of its hybrid plan. Alaska only offers a defined contribution plan and is not included.
2. **Strong Practice:** California, Iowa, Kansas, Louisiana, New Hampshire, North Dakota, South Carolina, South Dakota, Utah
3. Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Idaho, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Mississippi, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
4. Hawaii, Michigan, Minnesota, New York, Oregon

Figure 114

Do states permit teachers to purchase time for leaves of absence?¹

1. Purchasing time does not apply to defined contribution plans. In states that offer multiple plans or a hybrid plan, the graph refers to the state's defined benefit plan or the defined benefit component of its hybrid plan. Alaska only offers a defined contribution plan and is not included.
2. **Strong Practice:** Alabama, California, Delaware, Illinois, Iowa, Maryland, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Carolina, South Dakota
3. Arizona, Connecticut, District of Columbia, Florida, Idaho, Indiana, Kentucky, Louisiana, Massachusetts, Montana, New Jersey, North Carolina, Oklahoma, Rhode Island, Vermont, Virginia, Washington, Wyoming

Area 4: Retaining Effective Teachers

Goal H – Pension Sustainability

The state should ensure that excessive resources are not committed to funding teachers' pension systems.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that its pension system is financially sustainable, without excessive unfunded liabilities or an inappropriately long amortization period.
2. Mandatory employer and employee contribution rates should not be unreasonably high, as they reduce teachers' paychecks and commit district resources that could otherwise be spent on salaries or incentives.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 115

How States are Faring on Pension Sustainability

Progress on this Goal Since 2009:

↑ : 2 ↔ : 20 ↓ : 29

State Meets a Small Part of Goal

Progress Since 2009

ANALYSIS

As of June 30, 2010, the most recent date for which an actuarial valuation is available, Illinois's pension system for teachers is 48.4 percent funded and has a 35-year amortization period. This means that if the plan earns its assumed rate of return and maintains current contribution rates, it would take the state 35 years to pay off its unfunded liabilities. Neither the state's funding ratio nor its amortization period meets conventional standards, and the state's system is not financially sustainable according to actuarial benchmarks.

Illinois does not currently commit excessive resources toward its teachers' retirement system. The mandatory employee contribution rate to the defined benefit plan is 9.4 percent, and the current employer contribution rate is 12.73 percent. Both rates are reasonable, considering that teachers and local districts are not also contributing to Social Security.

The employer contribution rate is paid by the state and determined according to statutory requirements, which mandate that contribution increases are phased in until they meet actuarially determined levels with the goal that the system is 90 percent funded by 2045. However, the state altered this phase-in to allow a two-year funding reduction of 50 percent for fiscal years 2006 and 2007, but the schedule has been resumed.

Supporting Research

Comprehensive Annual Financial Report, for the fiscal year ended June 30, 2010

<http://trs.illinois.gov/subsections/pubs/cafr/cafr.htm>

RECOMMENDATION

■ Ensure that the pension system is financially sustainable.

The state would be better off if its system was over 95 percent funded and had an amortization period of less than 30 years to allow more protection during financial downturns. However, Illinois should consider ways to improve its funding level without raising the contributions of school districts and teachers. In fact, the state should work to decrease employer contributions. Committing excessive resources to pension benefits can negatively affect teacher recruitment and retention. Improving funding levels necessitates, in part, systemic changes in the state's pension system. Goals 4-G and 4-I provide suggestions for pension system structures that are both sustainable and fair.

ILLINOIS RESPONSE TO ANALYSIS

The Teachers' Retirement System of the State of Illinois declined to respond to NCTQ's analyses related to teacher pensions.

★ EXAMPLES OF BEST PRACTICE

South Dakota, Tennessee and **Wisconsin** provide financially sustainable pension systems without committing excessive resources. The systems in these states are fully funded without requiring excessive contributions from teachers or school districts.

Figure 117

Are state pension systems financially sustainable?¹

1. Cannot be determined for Michigan or Utah, which recently opened new systems.

2. **Strong Practice:** Alaska, Delaware, District of Columbia, Florida, Georgia, Indiana⁴, Nebraska, New York, North Carolina, Oregon, South Dakota, Tennessee, Washington, Wisconsin

3. Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, New Jersey, New Mexico, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, Virginia, West Virginia, Wyoming

4. Based on Indiana's current plan only.

Figure 116

1. The amortization period is set to be under 30 years; however, the amortization period is not determined because the state is not meeting its annual required contribution.
2. Michigan opened a new system in July 2010.
3. Utah opened a new system in July 2011.

Figure 118

Real Rate of Return

The pension system funding levels reported here are based on each state's individual actuarial valuation, which use a series of varying assumptions. One of these assumptions concerns rate of return, which greatly affects a system's funding level. If investment returns fall short of assumptions, the fund will have a deficit; if returns are greater than expected, the fund will have a surplus. Higher assumed rates involve more risk, while rates closer to inflation (typically in the 3-5 percent range) are safer.

Most state pension funds assume a rate between 7.5 percent and 8.25 percent. A state using a 7.5 percent rate will report a lower funding level than if it had used 8.25 percent, even though its liabilities remain the same. Many states report that they do meet or exceed an eight percent rate of return over the life of the plan.

However, some economists argue that states' assumed rates of return are too high, and should instead be closer to four percent. They caution that the risk associated with states' higher rates is borne by taxpayers, with the result that tax rates rise to fund pension deficits. A rate closer to four percent would make the vast majority of the nation's pension systems less than 50 percent funded. In light of the current market situation, the debate over the rate of return is particularly timely. With no current consensus by experts or policymakers, NCTQ used states' self-reported numbers rather than recalculate all funding levels based on a standard rate of return. Considering how many states' systems NCTQ found in questionable financial health without using the lower rates some economists prefer, it is clear this is an issue that demands policymakers' attention.

Figure 119

How well funded are state pension systems?

	Funding Level
Alaska ¹	N/A
District of Columbia	118.3%

West Virginia	46.5%

Figure 119

1. Alaska has only a defined contribution pension system.

2. Indiana's current plan is 94.7 percent funded. However, when the current plan is combined with its closed plan, the funding level drops to 44.3 percent.

Figure 120

What is a reasonable rate for pension contributions?

- 4-7 percent each for teachers and districts in states participating in Social Security
- 10-13 percent each for teachers and districts in states not participating in Social Security

Analysts generally agree that workers in their 20's with no previous retirement savings should save, in addition to Social Security contributions, about 10-15 percent of their gross income in order to be able to live during retirement on 80 percent of the salary they were earning when they retired. While the recommended savings rate varies with age and existing retirement savings, NCTQ has used this 10-15 percent benchmark as a reasonable rate for its analyses. To achieve a total savings of 10-15 percent, teacher and employer contributions should each be in the range of 4-7 percent. In states where teachers do not participate in Social Security, the total recommended retirement savings (teacher plus employer contributions) is about 12 percent higher to compensate for the fact that these teachers will not have Social Security income when they retire. In order to achieve the appropriate level of total savings, teacher and employer contributions in these states should each be in the range of 10-13 percent.

<https://personal.vanguard.com/us/insights/retirement/saving/set-retirement-goals>

Figure 121

1. The employer contribution rate includes the contributions of both school districts and state governments, where appropriate.
2. The contribution rate is set to increase in future years. Some school districts in Georgia do not contribute to Social Security.
3. The contribution rate is set to increase in future years.
4. Michigan opened a new system in July 2010 and employer contributions are not yet reported.
5. New Jersey reports its contributions as a flat dollar amount, and a percentage could not be calculated.
6. The contribution rate is set to increase in future years. Most, but not all, school districts in Rhode Island contribute to Social Security.
7. The contribution rate is set to decrease in 2012.

Figure 121

What are the current employer¹ contribution rates to state pension systems?

Figure 122

Do states require excessive contributions to their pension systems?

1. **Strong Practice:** Alaska, California, Colorado, District of Columbia, Florida, Illinois, Indiana, Minnesota, Nevada, New Jersey⁵, South Dakota, Tennessee, Texas, Vermont, Wisconsin, Wyoming
2. Alabama, Arkansas, Connecticut, Delaware, Georgia, Idaho, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Montana, New Hampshire, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, Utah, Virginia, Washington, West Virginia
3. Michigan⁶
4. Arizona, Hawaii, Mississippi, Missouri, Nebraska, New Mexico, Pennsylvania, Rhode Island
5. While not excessive, the employer and state contribution are quite low. The most recent total employer contribution was only 5.4 percent of the actuarially-determined annual required contribution.
6. Employer contribution rates to Michigan's new system have not yet been reported.

Figure 123

1. The contribution rate is set to increase in future years.
2. Teachers contribute 9.4 percent to the defined benefit component and are automatically enrolled to contribute 2 percent to the defined contribution component; teachers may change the latter rate.
3. The contribution rate is set to increase in 2012 and decrease in 2014.
4. Teachers share in the employer contribution through salary reductions or foregoing equivalent pay raises.
5. For teachers hired after July 1, 2011, the contribution ranges from 7.5-12.3 based on a variety of factors.
6. Teachers in the hybrid plan must make a mandatory contribution if the employer contribution does not cover system costs.
7. For the defined benefit plan; the rate varies for the defined contribution plan from a minimum of 5 percent.

Figure 123

How much do state pension systems require teachers to contribute?

Area 4: Delivering Well-Prepared Teachers

Goal I – Pension Neutrality

The state should ensure that pension systems are neutral, uniformly increasing pension wealth with each additional year of work.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The formula that determines pension benefits should be neutral to the number of years worked. It should not have a multiplier that increases with years of service or longevity bonuses.
2. The formula for determining benefits should preserve incentives for teachers to continue working until conventional retirement ages. Eligibility for retirement benefits should be based on age and not years of service.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 124

How States are Faring on Pension Neutrality

Progress on this Goal Since 2009:

↑ : 10 ↔ : 40 ↓ : 1

State Meets Goal

Progress Since 2009

ANALYSIS

Illinois's pension system is based on a benefit formula that is neutral for members hired as of January 1, 2011, meaning that each year of work accrues pension wealth in a uniform way until reaching age 67.

Teachers' retirement wealth is determined by their monthly payments and the length of time they expect to receive those payments. Monthly payments are usually calculated as final average salary multiplied by years of service multiplied by a set multiplier (such as 1.5). Higher salary, more years of service or a greater multiplier increases monthly payments and results in greater pension wealth. Earlier retirement eligibility with unreduced benefits also increases pension wealth, because more payments will be received.

To qualify as neutral, a pension formula must utilize a constant benefit multiplier and an eligibility timetable based solely on age, rather than years of service. Basing eligibility for retirement on years of service creates unnecessary and often unfair peaks in pension wealth, while allowing unreduced retirement at a young age creates incentives to retire early. Plans that change their multipliers for various years of service do not value each year of teaching equally. Therefore, plans with a constant multiplier and that base retirement on an age in line with Social Security are likely to create the most uniform accrual of wealth.

Illinois's pension plan is commended for utilizing a constant benefit multiplier of 2 percent and for recently enacting legislation to allow standard retirement based solely on age, regardless of years of service. Teachers must be vested at age 67, approximately Social Security's retirement age, to receive unreduced benefits.

ILLINOIS RESPONSE TO ANALYSIS

The Teachers' Retirement System of the State of Illinois declined to respond to NCTQ's analyses related to teacher pensions.

Figure 125

Do states base retirement eligibility on age, which is fair to all teachers?¹

1. This only refers to determining retirement eligibility, not retirement benefits.

2. **Strong Practice:** Alaska, Illinois, Louisiana, Maine, Michigan, Minnesota, New Hampshire, New Jersey

3. Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, Washington, Wisconsin, Wyoming

Figure 126

- All calculations are based on a teacher who starts teaching at age 22, earns a starting salary of \$35,000 that increases 3 percent per year, and retires at the age s/he is first eligible for unreduced benefits. The calculations use states' current benefit formulas and do not include cost of living increases. The final average salary was calculated as the average of the highest three years of salary, even though a few states may vary from that standard. Age 65 was used as a point of comparison because it is the minimum eligibility for unreduced Social Security benefits.
- Does not apply to Alaska's defined contribution plan.
- Minnesota provides unreduced retirement benefits at the age of full Social Security benefits or age 66, whichever comes first.
- California's formula has many options for retirement. A teacher with 40 years of experience at age 62 would reach California's maximum allowable multiplier of 2.4 percent.
- Age 60 is the earlier teachers hired on or after July 1, 2012 may retire. Teachers hired prior to this point may retire at age 55.
- Massachusetts's formula has many options for retirement. A teacher with 35 years of experience at age 57 would reach Massachusetts's maximum allowable benefit of 80 percent.

Figure 126

How much do states pay for each teacher that retires with unreduced benefits at an early age?¹

State	Total amount in benefits paid per teacher from the time of retirement until age 65	Earliest retirement age that a teacher who started teaching at age 22 may receive unreduced benefits
Alaska ²		
ILLINOIS	\$0	67
Maine	\$0	65
Minnesota ³	\$0	66
New Hampshire	\$0	65
New Jersey	\$0	65
Washington	\$0	65
Tennessee	\$238,654	52

Missouri	\$789,343	51
Kentucky	\$791,679	49

Figure 127

What kind of multiplier do states use to calculate retirement benefits?¹

1. Alaska has a defined contribution plan, which does not have a benefit multiplier.

2. **Strong Practice:** Alabama, Arkansas, Colorado, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Illinois, Indiana, Kansas, Louisiana, Maine, Maryland, Michigan, Minnesota, Montana, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin

3. Arizona, California, Connecticut, Florida, Iowa, Kentucky, Massachusetts, Mississippi, Missouri, New Hampshire, New York, Ohio, Rhode Island, Vermont, Wyoming

★ EXAMPLES OF BEST PRACTICE

Alaska offers a defined contribution pension plan that is neutral, with pension wealth accumulating in an equal way for all teachers for each year of work. In addition, **Illinois**, **Minnesota** and **New Jersey** offer a defined benefit plan with a formula multiplier that does not change relative to years of service and does not allow unreduced benefits for retirees below age 65. **Illinois** and New Jersey are further commended for ending their previous practices of allowing teachers to retire well before Social Security age without a reduction in benefits.

Figure 128

Double-Dipping: Cure the Disease, Not the Symptom

Benefit recipients in teacher pension plans have recently been under scrutiny for “double-dipping,” when individuals receive a pension and salary at the same time. This can occur when teachers reach retirement eligibility, yet wish to keep working without losing pension wealth. Teachers can retire, start receiving their monthly benefits and then return to teaching. The restrictions on a teacher’s ability to return to work vary from state to state. Policies can include waiting periods, limitations on earnings or restrictions to working in difficult-to-fill positions.

Some descriptions portray teachers working while collecting their pensions as greedy or somehow taking advantage, when in fact they are just following the system that is in place. When a teacher reaches retirement eligibility in a defined benefit system, her pension wealth peaks and, after that, wealth accrual slows or even decreases because every year a teacher delays retirement, she loses a year of pension benefits. For example, if a teacher could retire with 60 percent of her salary at age 56, then every year she teaches past that point she is, in effect, working for only 40 percent of her pay because she is not receiving her pension. This puts relatively young teachers and the districts who wish to retain them in a difficult position. Districts want to keep effective teachers in schools, but the financial reality for teachers is hard to pass up.

Retirees returning to work are also an issue for defined benefit pension system funding because contributions are not being made to the system that would be made if those positions were held by non-retirees. This adds to the funding imbalances that many states’ defined benefit systems face.

Some states have created Deferred Retirement Option Plans (DROP) in which retirees can have their benefits placed in a savings account while they return to work and, once they retire again, they can receive the lump sum in their DROP accounts and resume their monthly benefits.

Returning to work would not be a large policy issue if systems did not allow teachers to retire with unreduced benefits at such relatively young ages and if pension wealth accrual were more neutral. An effective teacher should be able to keep teaching and at the same time know that her pension wealth will not erode. More systemic fixes—like the ones outlined in the *Yearbook*—are needed. Calls to prohibit double-dipping are not addressing the real problem.

Area 5: Exiting Ineffective Teachers

Goal A – Licensure Loopholes

The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. Under no circumstances should a state award a standard license to a teacher who has not passed all required subject-matter licensing tests.
2. If a state finds it necessary to confer conditional or provisional licenses under limited and exceptional circumstances to teachers who have not passed the required tests, the state should ensure that requirements are met within one year.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 129

How States are Faring on Closing Licensure Loopholes

Progress on this Goal Since 2009:

↑ : 5 ↔ : 46 ↓ : 0

Best Practice State

Progress Since 2009

ANALYSIS

In Illinois, new legislation requires that all applicants seeking a state license must pass a subject-matter test, without exception. "No candidate shall be allowed to student teach, serve as the teacher of record, or begin an internship or residency required for licensure until he or she has passed the applicable content area test."

S.B. 1799

105 ILCS 5/21B-20; 21B-30

ILLINOIS RESPONSE TO ANALYSIS

Illinois was helpful in providing NCTQ with facts necessary for this analysis.

★ EXAMPLES OF BEST PRACTICE

Colorado, Illinois, Mississippi, and New Jersey require all new teachers to pass all required subject-matter tests as a condition of initial licensure.

Figure 130

Do states still award emergency licenses?¹

1. Not applicable to Montana and Nebraska, which do not require subject matter testing.

2. Alabama, Alaska, Arkansas, California, Connecticut, Delaware, District of Columbia, Florida, Georgia, Idaho, Iowa, Kansas, Kentucky, Maryland, Massachusetts, New Hampshire, New York, North Carolina, North Dakota⁵, Ohio⁵, Oklahoma, Oregon, Rhode Island, Vermont, Washington, West Virginia, Wyoming

3. Arizona, Hawaii, Indiana, Louisiana, Maine, Michigan, Minnesota, Missouri, Pennsylvania, South Dakota, Tennessee, Texas, Wisconsin

4. **Strong Practice:** Colorado, **ILLINOIS**, Mississippi, Nevada, New Jersey, New Mexico, South Carolina, Utah, Virginia

5. License is renewable, but only if licensure tests are passed.

Figure 131

1. Iowa only requires subject-matter testing for elementary teachers.

2. Montana does not require subject-matter testing.

3. Nebraska does not require subject-matter testing.

4. There is a potential loophole in Utah, as alternate route teachers appear able to delay passage of subject-matter tests.

5. Wyoming only requires subject-matter testing for elementary and social studies teachers.

Area 5: Exiting Ineffective Teachers

Goal B – Unsatisfactory Evaluations

The state should articulate consequences for teachers with unsatisfactory evaluations, including specifying that teachers with multiple unsatisfactory evaluations should be eligible for dismissal.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that all teachers who receive a single unsatisfactory evaluation be placed on an improvement plan, whether or not they have tenure.
2. The state should require that all teachers who receive two consecutive unsatisfactory evaluations or two unsatisfactory evaluations within five years be formally eligible for dismissal, whether or not they have tenure.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 132

How States are Faring on Consequences for Unsatisfactory Evaluations

Progress on this Goal Since 2009:

↑ : 15 ↔ : 35 ↓ : 1

Best Practice State

Progress Since 2009

ANALYSIS

Illinois requires that teachers who receive an unsatisfactory evaluation be placed on a “remediation plan” within 30 days of the completed evaluation. Teachers are evaluated three times during the 90-day remediation period, and those who receive an unsatisfactory evaluation at its conclusion are formally eligible for dismissal.

In addition, new legislation in Illinois requires that for any teacher who successfully completes a remediation plan but then receives an “unsatisfactory” rating in the next 36-month period, the school district “may forego remediation and seek dismissal.”

Supporting Research

SB 0007

Illinois Compiled Statute, 105, Sec. 24A-5

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

	27	17	8	17

1. Teachers could face nonrenewal based on evaluation results, but it is not clear that a teacher is eligible for dismissal after multiple unsatisfactory evaluations.
2. While results of evaluations may be used in dismissal decisions, there are no specific criteria for a teacher's eligibility for dismissal.
3. Improvement plans are only used for teachers in identified "Schools At Risk." Those same teachers are also eligible for dismissal for multiple unsatisfactory evaluations.
4. A teacher reverts to probationary status after two consecutive years of unsatisfactory evaluations, but it is not clear that a teacher is eligible for dismissal.
5. Teachers in low performing schools can be dismissed after one negative rating.
6. Local school boards must include procedures for using evaluation results for the removal of poorly performing teachers.

★ EXAMPLES OF BEST PRACTICE

Illinois and **Oklahoma** both require that teachers who receive unsatisfactory evaluations be placed on improvement plans. Teachers in Illinois are then evaluated three times during a 90-day remediation period and are eligible for dismissal if performance remains unsatisfactory. In addition, new legislation in Illinois allows districts to dismiss a teacher without going through the remediation process if that teacher has already completed a remediation plan but then receives an unsatisfactory rating within the next three years. Oklahoma's improvement plan may not exceed two months, and if performance does not improve during that time, teachers are eligible for dismissal.

Figure 134

Do states specify that all teachers with multiple unsatisfactory evaluations are eligible for dismissal?

1. **Strong Practice:** Alaska, Arkansas, Colorado, Delaware, Florida, Hawaii, **ILLINOIS**, Indiana, Louisiana, Michigan, New Mexico, New York, Oklahoma, Pennsylvania, Rhode Island, Tennessee, Washington

2. Alabama, Arizona, California, Connecticut, District of Columbia, Georgia, Idaho³, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada⁴, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Oregon, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, West Virginia, Wisconsin, Wyoming

3. Teachers could face nonrenewal based on evaluation results, but it is not clear that a teacher is eligible for dismissal after multiple unsatisfactory evaluations.

4. A teacher reverts to probationary status after two consecutive years of unsatisfactory evaluations, but it is not clear that a teacher is eligible for dismissal.

Area 5: Exiting Ineffective Teachers

Goal C – Dismissal for Poor Performance

The state should articulate that ineffective classroom performance is grounds for dismissal and ensure that the process for terminating ineffective teachers is expedient and fair to all parties.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should articulate that teachers may be dismissed for ineffective classroom performance.
2. A teacher who is terminated for poor performance should have an opportunity to appeal. In the interest of both the teacher and the school district, the state should ensure that this appeal occurs within a reasonable time frame.
3. There should be a clear distinction between the process and accompanying due process rights for teachers dismissed for classroom ineffectiveness and the process and accompanying due process rights for teachers dismissed or facing license revocation for felony or morality violations or dereliction of duties.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 135

How States are Faring in Dismissal for Poor Performance

Progress on this Goal Since 2009:

↑ : 16 ↔ : 35 ↓ : 0

State Nearly Meets Goal

Progress Since 2009

ANALYSIS

New legislation in Illinois specifically identifies classroom ineffectiveness as grounds for dismissal. For teachers placed on remediation plans for poor performance who receive a subsequent “unsatisfactory” performance rating within three years, “the school district may forego remediation and seek dismissal.”

The state also distinguishes the due process rights of teachers dismissed for ineffective performance from those facing other charges commonly associated with license revocation such as a felony and/or morality violations.

For teachers that have received an “unsatisfactory” performance evaluation and failed to complete a remediation with a rating of “proficient” or better, there is an “optional alternative evaluative dismissal process.” The teacher must receive written notice of dismissal within 30 days of the final remediation evaluation. Each party has two days to present evidence at a hearing before a hearing officer. The hearing officer must have completed a pre-qualification program designed for performance evaluators, which involves rigorous training and “an independent observer’s determination that the evaluator’s ratings properly align to the requirements established by the State Board.” The hearing officer must issue “findings of fact and recommendation” within 30 days of the hearing’s close to the State Board of Education, which then issues a decision within 45 days. An additional appeal to the appellate court—for judicial review—is also permitted within 35 days. The cost of this appeal is borne by the teacher.

Supporting Research

SB 0007

105 ILCS 5/24-16.5

RECOMMENDATION

- **Ensure that the appeal process occurs within a reasonable time frame and that due process rights are distinguished between dismissal for classroom ineffectiveness and dismissal for morality violations, felonies, or dereliction of duty.**

Illinois is commended for differentiating due process rights between loss of employment and issues with far-reaching consequences that could permanently impact a teacher’s right to practice through its new “optional alternative evaluative dismissal process.” However, by making this dismissal process “optional” and an “alternative,” districts have the potential to opt out of this more expedient process. In addition, Illinois should ensure that the opportunity to appeal occurs only once and only at the district level.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

Oklahoma clearly articulates that teacher ineffectiveness in the classroom is grounds for dismissal and has taken steps to ensure that the dismissal process for teachers deemed to be ineffective is expedited. Teachers facing dismissal have only one opportunity to appeal.

Figure 137

Do states allow multiple appeals of teacher dismissals?

1. **Strong Practice:** Florida, Louisiana, Oklahoma, Wisconsin

2. Teachers in these states revert to probationary status following ineffective evaluation ratings, meaning that they no longer have the due process right to multiple appeals: Colorado, Indiana, Tennessee

3. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Georgia, Hawaii, Idaho, **ILLINOIS**⁵, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Virginia, Washington, West Virginia, Wyoming

4. District of Columbia, Maine, Nebraska, Nevada⁶, Utah, Vermont

5. The teacher is responsible for the cost of the second appeal.

6. Though a teacher returns to probationary status after two consecutive unsatisfactory ratings, the state does not articulate clear policy about its appeals process.

Figure 136

1. It is left to districts to define "inadequacy of classroom performance."

2. A teacher reverts to probationary status after two consecutive years of unsatisfactory evaluations, but it is not articulated that ineffectiveness is grounds for dismissal.

3. Dismissal policy includes dismissal for unsatisfactory evaluations, but the state's evaluation system does not measure teacher effectiveness (see Goal 3-B).

Area 5: Exiting Ineffective Teachers

Goal D – Reductions in Force

The state should require that its school districts consider classroom performance as a factor in determining which teachers are laid off when a reduction in force is necessary.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that districts consider classroom performance and ensure that seniority is not the only factor used to determine which teachers are laid off.

Background

A detailed rationale and supporting research for this goal can be found at www.nctq.org/stpy.

Figure 138

How States are Faring in Reductions in Force

Progress on this Goal Since 2009:

New Goal

**ANALYSIS**

In Illinois, new legislation considers teacher performance—measured by a performance evaluation—as the top criterion for districts to use in determining which teachers are laid off during reductions in force.

Each teacher is categorized in one of four groups according to their evaluation ratings. Grouping 1 includes probationary teachers that have not received performance evaluation ratings; Grouping 2 includes teachers who have received “needs improvement” or “unsatisfactory” on either of their previous two ratings; Grouping 3 consists of teachers who have received “satisfactory” or “proficient” on both of their previous two ratings; Grouping 4 consists of teachers who have received two “excellent” ratings in either the last two or three ratings, so long as the third rating was “satisfactory” or “proficient.”

The new legislation states that “among teachers qualified to hold a position, teachers must be dismissed in the order of their Groupings, with teachers in Grouping 1 dismissed first and teachers in Grouping 4 dismissed last.” If teachers within Groupings 2, 3 or 4 have the same performance rating, the teacher with the least seniority is dismissed first, unless an alternative method is established by the district.

However, this policy applies only to school districts with fewer than 500,000 inhabitants. For Chicago, the district with more than 500,000 inhabitants, the state’s code requires that teachers’ qualifications, certifications, experience, performance ratings or evaluations, and any other factors relating to an employee’s job performance, be taken into account in determining who is laid off during reductions in force.

Supporting Research

SB0007

RECOMMENDATION**■ Consider whether groupings sufficiently prioritize classroom performance.**

Illinois has developed sound policy for incorporating classroom performance into reduction-in-force decisions. To achieve its overall goals in districts with fewer than 500,000 inhabitants, the state may want to consider further dividing Grouping 2. Laying off teachers with a single needs-improvement rating before teachers with more seniority, but perhaps with multiple unsatisfactory ratings, may run counter to the state’s intentions.

ILLINOIS RESPONSE TO ANALYSIS

Illinois recognized the factual accuracy of this analysis.

EXAMPLES OF BEST PRACTICE

Colorado, Florida and **Indiana** all specify that in determining which teachers to lay off during a reduction in force, classroom performance is the top criterion. These states also articulate that seniority can only be considered after a teacher's performance is taken into account.

Figure 140

Do districts have to consider performance in determining which teachers are laid off?

1. **Strong Practice:** Colorado, Florida, **ILLINOIS**, Indiana, Michigan, Missouri, Oklahoma, Rhode Island, Tennessee, Texas, Utah

2. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio³, Oregon, Pennsylvania, South Carolina, South Dakota, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

3. Tenure is considered first.

Figure 141

Do states prevent districts from overemphasizing seniority in layoff decisions?

1. **Strong Practice:** Arizona, Colorado, Florida, **ILLINOIS**, Indiana, Maine, Michigan, Missouri⁶, Nevada, New Hampshire, Ohio⁶, Oklahoma, Rhode Island, Tennessee, Texas

2. **Strong Practice:** Idaho, Utah

3. Hawaii, New York, Pennsylvania, West Virginia, Wisconsin⁷

4. California, Kentucky, Louisiana, Minnesota, New Jersey, Oregon

5. Alabama, Alaska⁶, Arkansas, Connecticut, Delaware, District of Columbia, Georgia⁶, Iowa, Kansas, Maryland, Massachusetts⁶, Mississippi, Montana, Nebraska⁶, New Mexico, North Carolina, North Dakota, South Carolina, South Dakota, Vermont, Virginia, Washington, Wyoming

6. Nontenured teachers are laid off first.

7. Only for counties with populations of 500,000 or more and for teachers hired before 1995.
