National Council on Teacher Quality

Acknowledgments

STATES

State education agencies remain our most important partners in this effort, and their gracious cooperation has helped to ensure the factual accuracy of the final product. Every state formally received a draft of the *Yearbook* in July 2013 for comment and correction; states also received a final draft of their reports a month prior to release. All but two states responded to our inquiries. While states do not always agree with our recommendations, their willingness to engage in dialogue and often acknowledge the imperfections of their teacher policies is an important step forward.

FUNDERS

The primary funders for the 2013 *Yearbook* were:

- Bill and Melinda Gates Foundation
- Carnegie Corporation of New York
- Gleason Family Foundation
- The Joyce Foundation
- The Walton Family Foundation

The National Council on Teacher Quality does not accept any direct funding from the federal government.

STAFF

Sandi Jacobs, *Project Director*

Adrienne S. Davis, *Project Assistant*

Kathryn M. Doherty, *Special Contributor*

Kelli Lakis, *Lead Researcher*

Stephanie T. Maltz and Lisa N. Staresina, *Researchers*

Phil Lasser, *Research Assistant*

Special thanks to Leigh Zimmisky, Brittany Atkinson and Justin Rakowski at CPS Gumpert for their design of the 2013 *Yearbook*. Thanks also to Colleen Hale and Jeff Hale at EFA Solutions for the original *Yearbook* design and ongoing technical support.

Executive Summary

The 2013 *State Teacher Policy Yearbook* includes the National Council on Teacher Quality's (NCTQ) full review of the state laws, rules and regulations that govern the teaching profession. This year's report measures state progress against a set of 31 policy goals focused on helping states put in place a comprehensive framework in support of preparing, retaining and rewarding effective teachers.

Alaska at a Glance

Overall 2013 Yearbook Grade

Overall 2011 Yearbook Grade: D

Area Grades	2013	2011
Area 1 <i>Delivering Well-Prepared Teachers</i>	F	F
Area 2 <i>Expanding the Teaching Pool</i>	D	D+
Area 3 <i>Identifying Effective Teachers</i>	D+	D-
Area 4 <i>Retaining Effective Teachers</i>	D	D ¹
Area 5 <i>Exiting Ineffective Teachers</i>	D-	D

Goal Breakdown	2013
★ Best Practice	0
● Fully Meets	1
◐ Nearly Meets	0
◑ Partially Meets	6
◒ Meets Only a Small Part	4
○ Does Not Meet	20

Progress on Goals Since 2011	
↑ Progress has increased	3
↔ No change in progress	27
↓ Progress has decreased	1

¹ State teacher pension policy is no longer included in the State Teacher Policy Yearbook. So that Area 4 grades can be compared, 2011 grades have been recalculated to exclude the pension goals. Overall 2011 grades were not recalculated, as the impact was negligible.

Area 1: Delivering Well-Prepared Teachers

Page 5

Admission into Teacher Preparation	<input type="radio"/>	Secondary Teacher Preparation in Science	<input type="radio"/>
Elementary Teacher Preparation	<input type="radio"/>	Special Education Teacher Preparation	<input type="radio"/>
Teacher Preparation in Reading Instruction	<input type="radio"/>	Assessing Professional Knowledge	<input type="radio"/>
Teacher Preparation in Mathematics	<input checked="" type="radio"/>	Student Teaching	<input type="radio"/>
Middle School Teacher Preparation	<input type="radio"/>	Teacher Preparation Program Accountability	<input type="radio"/>
Secondary Teacher Preparation	<input type="radio"/>		

Policy Weaknesses

- Teacher candidates are not required to pass a test of academic proficiency as a criterion for admission to teacher preparation programs.
- Elementary teacher candidates are not required to pass a content test with individually scored subtests in each of the core content areas, including mathematics.
- Elementary teacher candidates are not required to pass a science of reading test, and preparation programs are not required to address this critical area.
- Middle school teachers are allowed to teach on a K-8 generalist license.
- Secondary teachers are not required to pass a content test as a condition of initial licensure, and some secondary science and social studies teachers are not required to pass content tests for each discipline they are licensed to teach.
- The state offers a K-12 special education certification and does not require any content testing for special education teacher candidates.
- A pedagogy test is not required as a condition of licensure.
- There are no specific requirements for student teaching.
- The teacher preparation program approval process does not hold programs accountable for the quality of the teachers they produce.

Area 2: Expanding the Pool of Teachers

Page 57

Alternate Route Eligibility	<input type="radio"/>	Part-Time Teaching Licenses	<input type="radio"/>
Alternate Route Preparation	<input checked="" type="radio"/>	Licensure Reciprocity	<input checked="" type="radio"/>
Alternate Route Usage and Providers	<input type="radio"/>		

Policy Weaknesses

- Admission criteria for the alternate route to certification are not sufficiently selective and do not provide flexibility for nontraditional candidates.
- More could be done to ensure that alternate route programs provide efficient preparation.
- Usage and providers of alternate routes are restricted.
- The state does not offer a license with minimal requirements that would allow content experts to teach part time.
- Although out-of-state teachers are appropriately required to meet the state's testing requirements, there are additional obstacles that do not support licensure reciprocity.

Area 3: Identifying Effective Teachers

Page 77

State Data Systems		Tenure	
Evaluation of Effectiveness		Licensure Advancement	
Frequency of Evaluations		Equitable Distribution	

Policy Strengths

- Objective evidence of student learning is the preponderant criterion of teacher evaluations.

Policy Weaknesses

- Although the state has established a data system with the capacity to provide evidence of teacher effectiveness, it has not taken other meaningful steps to maximize the system's efficiency and potential.
- Annual evaluations for all teachers are not required.
- Tenure decisions are not connected to evidence of teacher effectiveness.
- Licensure advancement and renewal are not based on teacher effectiveness.
- Little school-level data are reported that can help support the equitable distribution of teacher talent.

Area 4: Retaining Effective Teachers

Page 107

Induction		Compensation for Prior Work Experience	
Professional Development		Differential Pay	
Pay Scales		Performance Pay	

Policy Strengths

- Districts are given full authority for how teachers are paid, although they are not discouraged from basing salary schedules solely on years of experience and advanced degrees.

Policy Weaknesses

- All new teachers do not receive mentoring or other induction support.
- Professional development is not aligned with findings from teachers' evaluations, and teachers who receive unsatisfactory evaluations are not placed on structured improvement plans.
- The state does not support performance pay or additional compensation for relevant prior work experience, working in high-need schools or teaching in shortage subject areas.

Area 5: Exiting Ineffective Teachers

Page 131

Extended Emergency Licenses		Reductions in Force	
Dismissal for Poor Performance			

Policy Weaknesses

- Teachers can teach for up to three years before having to pass required subject-matter tests.
- Although ineffectiveness is grounds for dismissal, the state allows multiple appeals for teachers who are dismissed.
- Performance is not considered in determining which teachers to lay off during reductions in force.

Area 1: Delivering Well-Prepared Teachers

› Goal A – Admission into Teacher Preparation

The state should require teacher preparation programs to admit only candidates with strong academic records.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher candidates to pass a test of academic proficiency that assesses reading, writing and mathematics skills as a criterion for admission to teacher preparation programs.
2. All preparation programs in a state should use a common admissions test to facilitate program comparison, and the test should allow comparison of applicants to the general college-going population. The selection of applicants should be limited to the top half of that population.

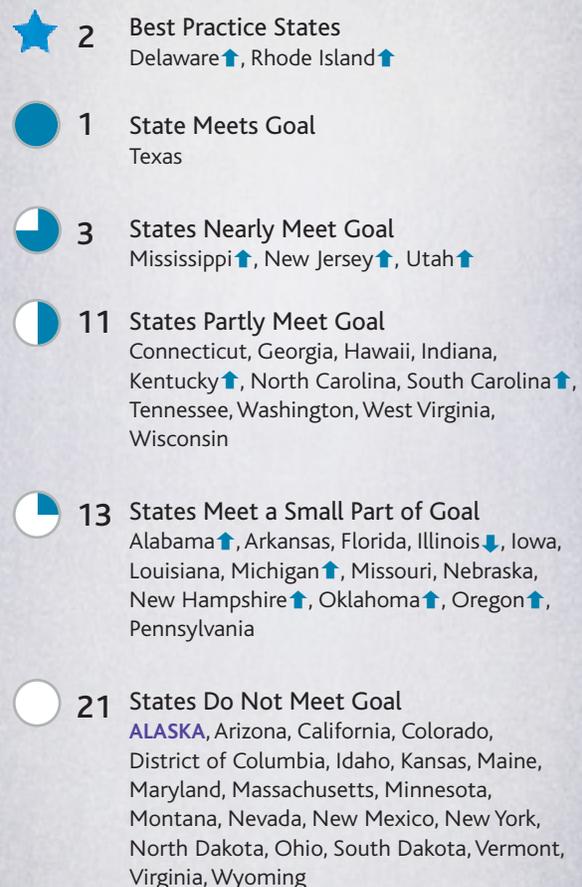

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 1

How States are Faring in Admission Requirements

Progress on this Goal Since 2011:

↑ : 12 ↔ : 38 ↓ : 1

1-A Analysis: Alaska

State Does Not Meet Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Rather than requiring aspiring teachers to pass a test of academic proficiency as a criterion for admission to teacher preparation programs, Alaska delays its basic skills assessment until teacher candidates are ready to apply for licensure.

Supporting Research

Alaska Statutes 14.20.020

RECOMMENDATION

- **Require that teacher preparation programs screen candidates for academic proficiency prior to admission.**

Teacher preparation programs that do not screen candidates invest considerable resources in individuals who may not be able to successfully complete the program and pass licensing tests. Candidates in need of additional support should complete remediation before entering the program to avoid the possibility of an unsuccessful investment of significant public tax dollars. Alaska should require candidates to pass a test of academic proficiency that assesses reading, mathematics and writing prior to program admission.

- **Require preparation programs to use a common test normed to the general college-bound population.**

Alaska should require an assessment that demonstrates that candidates are academically competitive with all peers, regardless of their intended profession. Requiring a common test normed to the general college population would allow for the selection of applicants in the top half of their class, as well as facilitate program comparison.

- **Consider requiring candidates to pass subject-matter tests as a condition of admission into teacher programs.**

In addition to ensuring that programs require a measure of academic performance for admission, Alaska might also want to consider requiring content testing prior to program admission as opposed to at the point of program completion. Program candidates are likely to have completed coursework that covers related test content in the prerequisite classes required for program admission. Thus, it would be sensible to have candidates take content tests while this knowledge is fresh rather than wait two years to fulfill the requirement, and candidates lacking sufficient expertise would be able to remedy deficits prior to entering formal preparation.

ALASKA RESPONSE TO ANALYSIS

Alaska stated that in all state-approved teacher preparation programs, teacher candidates must take and pass the ETS-administered Praxis I exam before they are admitted to the teacher preparation program. The Praxis I Pre-Professional Skills Tests (PPST) measures basic skills in reading, writing and mathematics. Alaska added that the timelines of its approved programs require all candidates to satisfy the basic competency requirement prior to student teaching.

Supporting Research

Alaska Pacific University Teacher Preparation Program Requirements

http://catalog.alaskapacific.edu/preview_program.php?catoid=4&poid=123&returnto=74#

LAST WORD

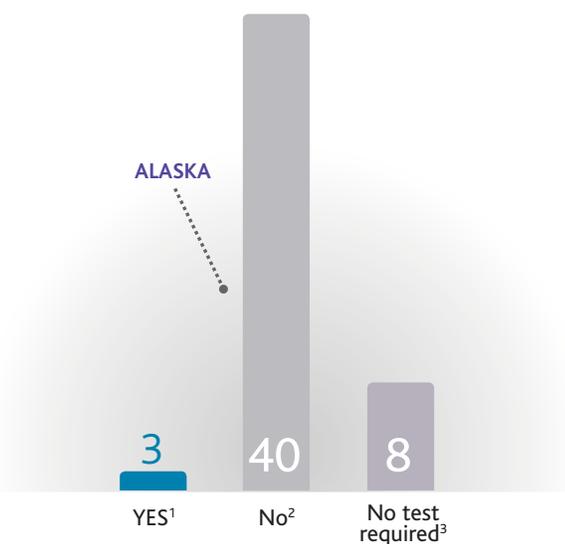

It is not clear from Alaska's response whether the state is contending that the Praxis I is used for program admission or whether some programs delay the requirement until student teaching. This lack of clarity is precisely why clear policy from the state is needed. Even if all programs do require the Praxis I for admissions, Alaska should still codify this requirement rather than leave it to programs' discretion. Without state policy, there is no assurance that programs will maintain this requirement in the future.

★ EXAMPLES OF BEST PRACTICE

For admission to teacher preparation programs, **Rhode Island** and **Delaware** require a test of academic proficiency normed to the general college-bound population rather than a test that is normed just to prospective teachers. Delaware also requires teacher candidates to have a 3.0 GPA or be in the top 50th percentile for general education coursework completed. Rhode Island also requires an average cohort GPA of 3.0, and beginning in 2016, the cohort mean score on nationally-normed tests such as the ACT, SAT or GRE must be in the top 50th percentile. In 2020, the requirement for the mean test score will increase from the top half to the top third.

1. Candidates in Oklahoma also have the option of gaining admission with a 3.0 GPA.

Figure 5

Do states require a minimum GPA for admission to teacher prep?

1. **Strong Practice:** Delaware, Mississippi⁶, New Jersey⁶, Oklahoma⁷, Pennsylvania⁸, Rhode Island⁶, Utah
2. Kentucky, Texas
3. Alabama, Arkansas, Connecticut⁹, Florida, Georgia, Michigan, South Carolina, South Dakota, Wisconsin¹⁰
4. Louisiana
5. Alaska, Arizona, California, Colorado, District of Columbia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Tennessee, Vermont, Virginia, Washington, West Virginia, Wyoming
6. The 3.0 GPA requirement is a cohort average; individual candidates must have a 2.75 GPA.
7. Candidates in Oklahoma also have the option of gaining admission by passing a basic skills test.
8. Students can also be admitted with a combination of a 2.8 GPA and qualifying scores on the basic skills test or SAT/ACT.
9. Connecticut requires a B- grade point average for all undergraduate courses.
10. The GPA admission requirement is 2.5 for undergraduate and 2.75 for graduate programs.

Area 1: Delivering Well-Prepared Teachers

› Goal B – Elementary Teacher Preparation

The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education, providing the necessary foundation for teaching to the Common Core or similar state standards.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require all elementary teacher candidates, including those who can teach elementary grades on an early childhood license, to pass a subject-matter test designed to ensure sufficient content knowledge of all core subjects.
2. The state should require that its approved teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework. An adequate curriculum is likely to require approximately 36 credit hours to ensure appropriate depth in the core subject areas of English, science, social studies and fine arts. (*Mathematics preparation for elementary teachers is discussed in Goal 1-D.*)
3. The state should require elementary teacher candidates to complete a content specialization in an academic subject area. In addition to enhancing content knowledge, this requirement ensures that prospective teachers have taken higher level academic coursework.

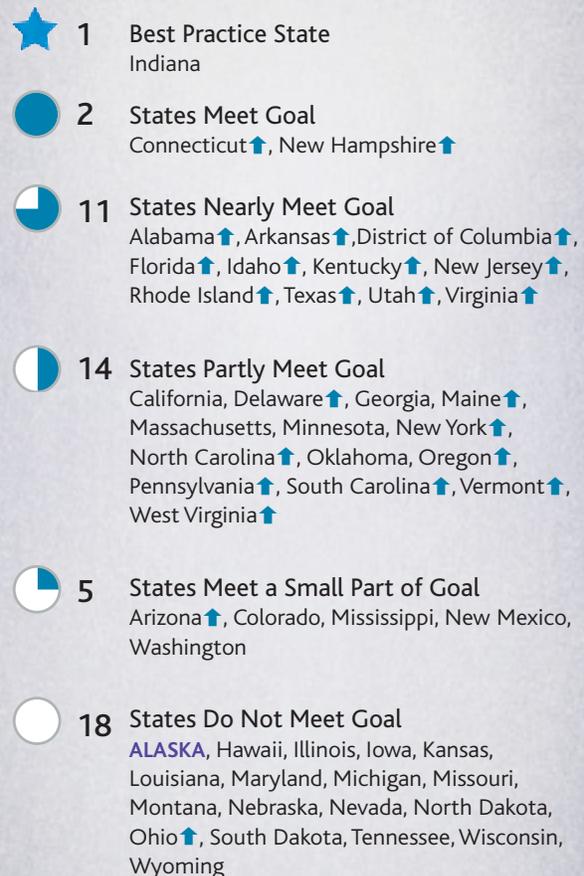

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 6

How States are Faring in Elementary Teacher Preparation

Progress on this Goal Since 2011:

↑ : 24 ↔ : 27 ↓ : 0

1-B Analysis: Alaska

State Does Not Meet Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska does not ensure that its elementary teacher candidates are adequately prepared to teach a broad range of elementary content geared to college and career-readiness standards.

Alaska requires candidates to pass the Praxis II general elementary content test but not until after they have taught for three years. The state's test does not report teacher performance in each subject area, meaning that it is possible to pass the test and still fail some subject areas, especially given the state's low passing score for the test.

In addition, Alaska does not require its elementary teacher candidates to earn an academic content specialization.

Supporting Research

Praxis Test Requirement

www.ets.org

Alaska Administrative Code 4 AAC 12.305

www.acei.org

RECOMMENDATION

- **Require elementary teacher candidates to pass a subject-matter test designed to ensure sufficient content knowledge of all subjects.**

Alaska should require both a rigorous content test as a condition of initial certification and separate, meaningful passing scores for each area on the test. Use of a composite passing score offers no assurance of adequate knowledge in each subject area. A candidate may achieve a passing score and still be seriously deficient in a particular subject area.

- **Ensure that teacher preparation programs deliver a comprehensive program of study in broad liberal arts coursework.**

Alaska should either articulate a more specific set of standards or establish comprehensive coursework requirements for elementary teacher candidates to ensure that candidates will complete coursework relevant to the common topics in elementary grades. An adequate curriculum is likely to require approximately 36 credit hours in the core subject areas of English, science, social studies and fine arts. Alaska does not specify any coursework requirements for elementary teacher candidates, except for coursework in Alaska studies and either multicultural education or cross-cultural communications. The state relies on NCATE/CAEP standards, suggesting that the state uses the Association for Childhood Education International (ACEI) standards for approving its elementary programs. Unfortunately, ACEI standards fall far short of the mark by offering no mention of world and American history; world, British and American literature; American government; or grammar and composition. ACEI standards do mention important topics in science, but even in those areas, the standards consist mainly of extremely general competencies that programs should help teacher candidates to achieve.

- **Require elementary teacher candidates to complete a content specialization in an academic subject area.**

In addition to enhancing content knowledge, this requirement would ensure that prospective teachers in Alaska take higher-level academic coursework. The requirement also provides an important safeguard in the event that candidates are unable to successfully complete clinical practice requirements. With an academic concentration (or better still a major or minor), candidates who are not ready for the classroom and do not pass student teaching can still be on track to complete a degree.

- **Close the loophole that allows teachers to add elementary grade levels to an existing license without demonstrating content knowledge.**

Alaska allows teachers to add new grade levels to certificates based only on institutional recommendation. The state is urged to require that all teachers who add the elementary grade levels to their certificates pass a rigorous subject-matter test to ensure content knowledge of all subject areas before they are allowed in the elementary classroom. Of particular concern is the fact that teachers already teaching at other grade levels may only be prepared to teach a single subject and not the multiple subjects required at the elementary level.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that all approved elementary teacher preparation programs are aligned to ACEI standards, which require teacher candidates to demonstrate content knowledge and teaching proficiency in literacy, math, science (life, physical and earth), social studies, physical education, health, and the arts.

The state also contended that all approved elementary teacher preparation programs require candidates to pass the Praxis II content test in order to qualify for an institutional recommendation, which is needed for licensure. Alaska's approved endorsement programs use the Praxis II series as a condition of completion and as a prerequisite for issuing of an institutional recommendation.

Alaska added that all districts must ensure that employed teachers are highly qualified, and the only path for a new elementary teacher to gain a highly qualified designation is to take the Praxis II Elementary Education exam.

The state also included a statement from the University of Alaska reiterating the information articulated above in the state's response.

Supporting Research

4 AAC 04.210

Alaska Pacific University

http://catalog.alaskapacific.edu/preview_program.php?catoid=4&poid=123&returnto=74#

LAST WORD

If it is the case that all state programs require passage of the content test before recommending candidates for licensure, it is unclear why Alaska would maintain the allowance that these tests need not be passed for three years. Waiting until professional licensure to demonstrate content knowledge puts students at risk of having teachers with inadequate knowledge of the subjects they teach.

Figure 7

★ EXAMPLE OF BEST PRACTICE

Indiana ensures that all candidates licensed to teach the elementary grades possess the requisite subject-matter knowledge before entering the classroom. Not only are elementary teacher candidates required to pass a content test comprised of independently scored subtests, but the state also requires its early childhood education teachers—who are licensed to teach up through grade 3—to pass a content test comprised of four subtests. Elementary teacher candidates in Indiana must also earn either a major or minor in an academic content area.

1. Alaska does not require testing for initial licensure.
2. The required test is a questionable assessment of content knowledge, instead emphasizing methods and instructional strategies.
3. Massachusetts and North Carolina require a general curriculum test that does not report scores for each elementary subject. A separate score is reported for math.
4. Only teachers of grades 4 and 5 are required to pass content test.

Figure 8
Do states require early childhood teachers who teach elementary grades to pass a content knowledge test?

	CONTENT TEST WITH SUBSCORES FOR EACH SUBJECT	Content test with composite score	Test with little to no content	No test required	Not applicable ¹

	6	12	16	4	13

1. These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.
 2. May pass either multiple subjects (subscores) or content knowledge (no subscores) test.

Figure 9

Do states expect elementary teachers to have in-depth knowledge of core content?

2. **Strong Practice:** Indiana, Mississippi, New Hampshire, Oklahoma

3. California, Connecticut, Iowa, Maryland, Michigan, Missouri, New Jersey, New York, Tennessee, Texas, Vermont, Virginia
These states require a major, minor or concentration but there is no assurance it will be in an academic subject area.

4. Alabama, Alaska, Arizona, Arkansas, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maine, Minnesota, Montana, Nebraska, Nevada, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Washington, West Virginia, Wisconsin, Wyoming

Area 1: Delivering Well-Prepared Teachers

› Goal C – Elementary Teacher Preparation in Reading Instruction

The state should ensure that new elementary teachers know the science of reading instruction.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that new elementary teachers, including those who can teach elementary grades on an early childhood license, pass a rigorous test of reading instruction in order to attain licensure. The design of the test should ensure that prospective teachers cannot pass without knowing the five instructional components shown by scientifically based reading research to be essential to teaching children to read.
2. The state should require that teacher preparation programs prepare candidates in the science of reading instruction.

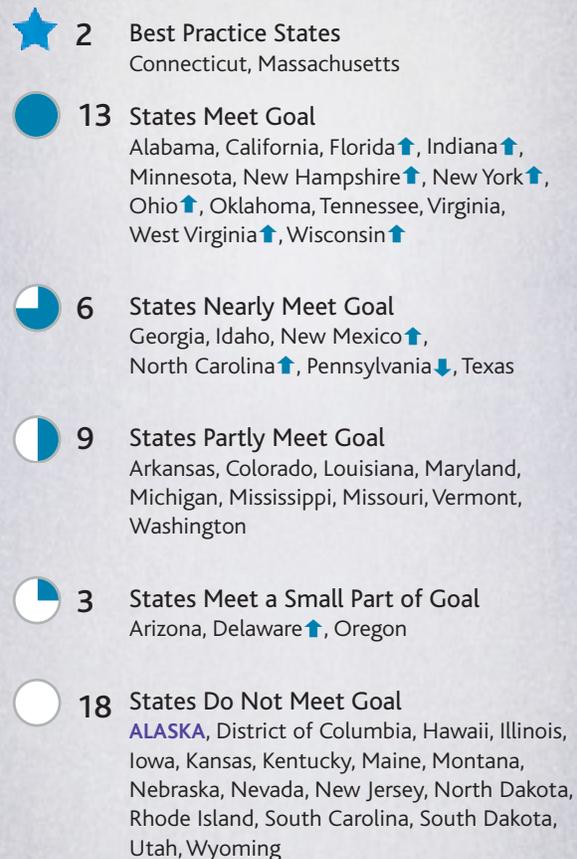

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 12

How States are Faring in Elementary Teacher Preparation in Reading Instruction

Progress on this Goal Since 2011:

↑ : 10 ↔ : 40 ↓ : 1

1-C Analysis: Alaska

State Does Not Meet Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska does not require teacher candidates to pass an assessment that measures knowledge of scientifically based reading instruction prior to certification or at any point thereafter.

Alaska also does not require that teacher preparation programs for elementary teacher candidates address the science of reading. The state has neither coursework requirements nor standards related to this critical area.

RECOMMENDATION

- **Require teacher candidates to pass a rigorous assessment in the science of reading instruction.**

Alaska should require a rigorous reading assessment tool to ensure that its elementary teacher candidates are adequately prepared in the science of reading instruction before entering the classroom. The assessment should clearly test knowledge and skills related to the science of reading, and address all five instructional components of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. If the test is combined with an assessment that also tests general pedagogy or elementary content, it should report a subscore for the science of reading specifically. Elementary teachers who do not possess the minimum knowledge in this area should not be eligible for licensure.

- **Ensure that teacher preparation programs prepare elementary teaching candidates in the science of reading instruction.**

Alaska should require teacher preparation programs in the state to train candidates in scientifically based reading instruction.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that all elementary education teacher candidates are required by their state-approved teacher preparation programs to take and pass foundations in reading as well as reading methodology coursework.

The state also included a statement from the University of Alaska reiterating this information and added that rigorous assessment is a part of each of these courses. Further, candidates must take and pass the Praxis II content test before being recommended for licensure.

LAST WORD

NCTQ's *Teacher Prep Review* has shown that most teacher preparation programs across the country, including those in Alaska, fail to train elementary teachers to be effective reading teachers. To ensure that elementary teacher candidates are adequately prepared in the science of reading instruction, Alaska is encouraged to formalize a policy requiring all elementary candidates to pass a rigorous reading assessment prior to entering the classroom. The Praxis II elementary content test is not an adequate test of reading pedagogy.

★ **EXAMPLES OF BEST PRACTICE**

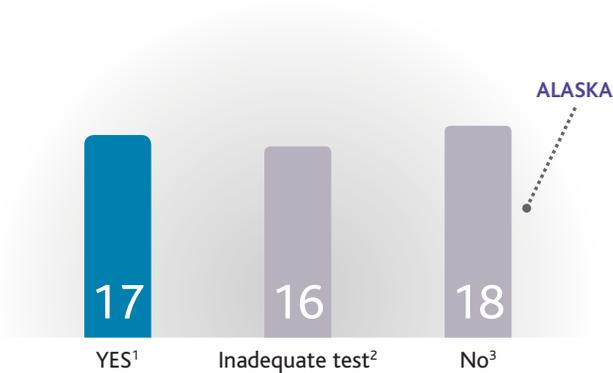

Fifteen states meet this goal by requiring that all candidates licensed to teach the elementary grades pass comprehensive assessments that specifically test the five elements of scientifically based reading instruction: phonemic awareness, phonics, fluency, vocabulary and comprehension. Independent reviews of the assessments used by **Connecticut** and **Massachusetts**, confirm that these tests are rigorous measures of teacher candidates' knowledge of scientifically based reading instruction.

1. Alabama's reading test spans the K-12 spectrum.

2. Teachers have until their second year to pass the reading test.

Figure 14

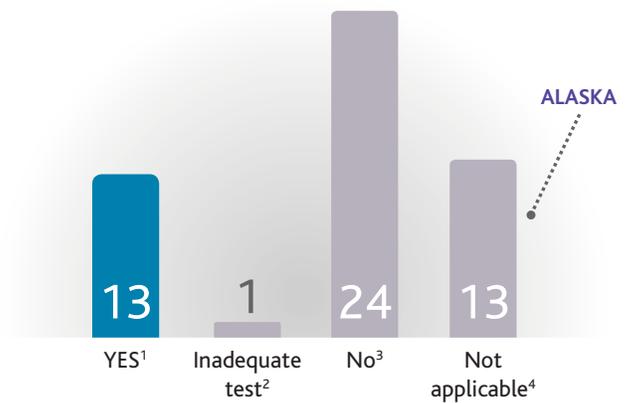

Do states measure new elementary teachers' knowledge of the science of reading?

- Strong Practice:** Alabama⁴, California, Connecticut, Florida, Indiana, Massachusetts, Minnesota, New Hampshire, New Mexico, New York, North Carolina⁵, Ohio, Oklahoma, Tennessee, Virginia, West Virginia, Wisconsin
- Arizona, Arkansas, Delaware, District of Columbia, Georgia, Idaho, Kentucky, Maine, New Jersey, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont
- Alaska, Colorado, Hawaii, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, North Dakota, South Dakota, Washington, Wyoming
- Alabama's reading test spans the K-12 spectrum.
- Teachers have until their second year to pass the reading test.

Figure 15

Do states measure knowledge of the science of reading for early childhood teachers who can teach elementary grades?

- Strong Practice:** Alabama⁵, Connecticut, Florida, Indiana, Massachusetts, Minnesota, New Hampshire, New York, Oklahoma, Tennessee, Virginia, West Virginia, Wisconsin
- Idaho
- Arizona, Colorado, Delaware, District of Columbia, Hawaii, Illinois, Iowa, Kansas, Louisiana, Maine, Maryland, Missouri, Nebraska, Nevada, New Jersey, New Mexico, North Dakota, Rhode Island, South Carolina, South Dakota, Utah, Vermont, Washington, Wyoming
- Alaska, Arkansas, California, Georgia, Kentucky, Michigan, Mississippi, Montana, North Carolina, Ohio, Oregon, Pennsylvania, Texas
These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.
- Alabama's reading test spans the K-12 spectrum

Area 1: Delivering Well-Prepared Teachers

› Goal D – Elementary Teacher Preparation in Mathematics

The state should ensure that new elementary teachers have sufficient knowledge of the mathematics content taught in elementary grades.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require teacher preparation programs to deliver mathematics content of appropriate breadth and depth to elementary teacher candidates. This content should be specific to the needs of the elementary teacher (i.e., foundations, algebra and geometry with some statistics).
2. The state should require elementary teacher candidates, including those who can teach elementary grades on an early childhood license, to pass a rigorous test of mathematics content in order to attain licensure.
3. Such test can also be used to test out of course requirements and should be designed to ensure that prospective teachers cannot pass without sufficient knowledge of mathematics.

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 16

How States are Faring in Teacher Preparation in Mathematics

Progress on this Goal Since 2011:

↑ : 20 ↔ : 30 ↓ : 1

1-D Analysis: Alaska

State Meets a Small Part of Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska requires that all new elementary teachers pass a general subject-matter test, the Praxis II, but not until they have taught for three years. This commercial test lacks a specific mathematics subscore, so one can fail the mathematics portion and still pass the test. Further, while this test does cover important elementary school-level content, it barely evaluates candidates' knowledge beyond an elementary school level, does not challenge their understanding of underlying concepts and does not require candidates to apply knowledge in nonroutine, multistep procedures.

Alaska does not specify coursework requirements regarding mathematics content. The state relies on NCATE/CAEP standards, suggesting that it uses Association for Childhood Education International (ACEI) standards for approving its elementary programs. ACEI standards address content in mathematics foundations, but these standards lack the specificity needed to ensure that teacher preparation programs deliver other mathematics content of appropriate breadth and depth to elementary teacher candidates.

Supporting Research

Praxis Test Requirement

www.ets.org

4 AAC 12.305

RECOMMENDATION

- **Require teacher candidates to pass a rigorous mathematics assessment as a condition of initial licensure.**

Alaska should assess mathematics content with a rigorous assessment tool, such as the test required in Massachusetts that evaluates mathematics knowledge beyond an elementary school level and challenges candidates' understanding of underlying mathematics concepts. Such a test could also be used to allow candidates to test out of coursework requirements. Teacher candidates who lack minimum mathematics knowledge should not be eligible for licensure.

- **Require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers.**

Alaska must ensure that new teachers are prepared to teach the mathematics content required by college and career-readiness standards. Although ACEI standards require some knowledge in key areas of mathematics, Alaska should require teacher preparation programs to provide mathematics content specifically geared to the needs of elementary teachers. This includes specific coursework in foundations and algebra and geometry, with some statistics coursework.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that approved elementary education programs require all candidates to pass the Praxis I exam, which measures reading, writing and mathematics, and to complete general education requirements for proficiency in math. Candidates must also pass additional mathematics foundations and pedagogy coursework required for completion of the programs.

The state included a statement from the University of Alaska that reiterated these points and added that a grade of C or better is required for the additional math foundations and pedagogy coursework.

Supporting Research

Alaska Pacific University

http://catalog.alaskapacific.edu/preview_program.php?catoid=4&poid=123&returnto=74#

LAST WORD

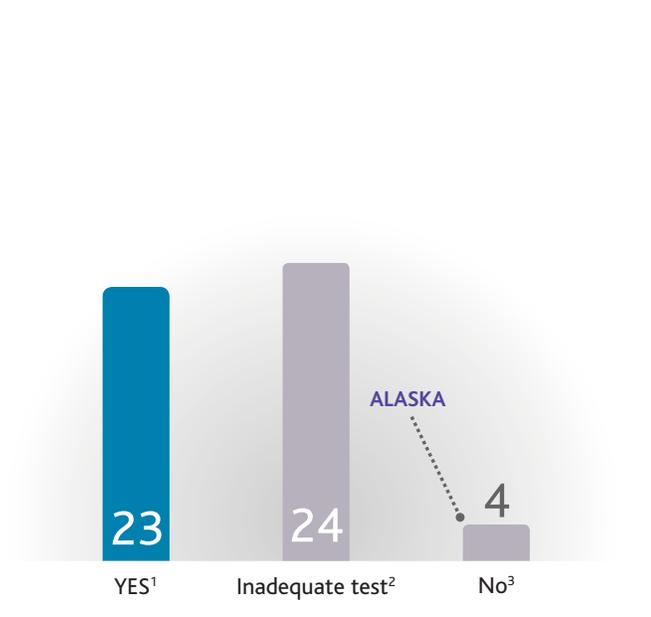

The Praxis I assessment is a basic skills test. It is not intended to be a licensing test but rather an assessment to be used at the point of admission into a teacher preparation program (see Goal 1-A). Such tests generally assess middle school-level skills. To ensure elementary teachers' mathematics knowledge—which includes the critical areas of numbers and operations; algebra; and, to a lesser degree, data analysis and probability—Alaska should require a rigorous math test, such as the one required in Massachusetts, which challenges candidates' understanding of underlying mathematics concepts.

★ EXAMPLES OF BEST PRACTICE

Eight states meet this goal by requiring that all candidates licensed to teach the elementary grades earn a passing score on an independently scored mathematics subtest. **Massachusetts's** MTEL mathematics subtest continues to set the standard in this area by evaluating mathematics knowledge beyond an elementary school level and challenging candidates' understanding of underlying mathematics concepts.

Figure 17

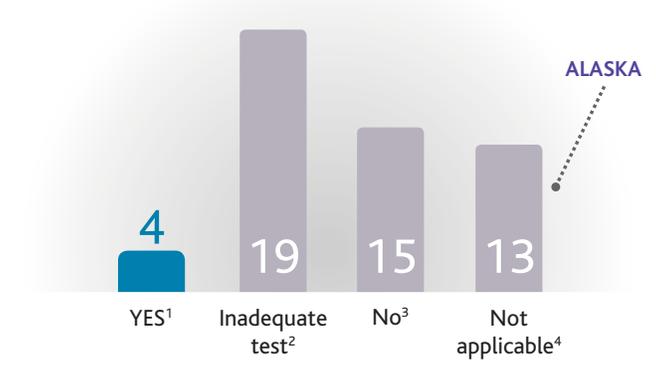

Do states measure new elementary teachers' knowledge of math?

- Strong Practice:** Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Idaho, Indiana, Kentucky, Maine, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, Texas⁴, Utah, Vermont, Virginia, West Virginia
- Arizona, California, Colorado, Georgia, Illinois, Iowa, Kansas, Louisiana, Maryland, Michigan, Mississippi, Missouri, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Washington, Wisconsin, Wyoming
- Alaska⁵, Hawaii, Montana, Ohio⁶
- Test is not yet available for review.
- Testing is not required for initial licensure.
- Only teachers of grades 4 and 5 are required to pass an adequate content test.

Figure 18

Do states measure knowledge of math of early childhood teachers who can teach elementary grades?

- Strong Practice:** Florida, Indiana, New York, Virginia

These states do not offer a standalone early childhood certification that includes elementary grades or the state's early childhood certification is the de facto license to teach elementary grades.

Area 1: Delivering Well-Prepared Teachers

› Goal E – Middle School Teacher Preparation

The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that new middle school teachers pass a licensing test in every core academic area that they are licensed to teach.
2. The state should not permit middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers.
3. The state should encourage middle school candidates who are licensed to teach multiple subjects to earn minors in two core academic areas rather than earn a single major. Middle school candidates licensed to teach a single subject area should earn a major in that area.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 19

How States are Faring in Middle School Teacher Preparation

Progress on this Goal Since 2011:

↑ : 5 ← : 45 ↓ : 1

1-E Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Regrettably, Alaska allows middle school teachers to teach on a generalist K-8 license.

Alaska offers, but does not require, middle school endorsements (grades 5-8). In addition, the state does not explicitly require a major or minor in the subject areas that candidates plan to teach.

Middle school teachers in Alaska are not required to pass a subject-matter test to attain licensure. Subject-matter tests are only required for professional certification, which occurs after three years of teaching.

Supporting Research

Praxis Test Requirement
www.ets.org

Application for Initial Licensure
<http://education.alaska.gov/TeacherCertification/forms/initial.pdf>
4 AAC 12.305

RECOMMENDATION

■ **Require content testing in all core areas.**

Alaska should require subject-matter testing for all middle school teacher candidates in every core academic area they intend to teach as a condition of initial licensure. To ensure meaningful middle school content tests, the state should set its passing scores to reflect high levels of performance.

■ **Eliminate the generalist license.**

Alaska should not allow middle school teachers to teach on a generalist license that does not differentiate between the preparation of middle school teachers and that of elementary teachers. These teachers are less likely to be adequately prepared to teach core academic areas at the middle school level because their preparation requirements are not specific to the middle or secondary levels, and they need not pass a subject-matter test in each subject they teach. Adopting middle school teacher preparation policies for all such teachers will help ensure that students in grades 7 and 8 have teachers who are appropriately prepared to teach grade-level content, which is different and more advanced than what elementary teachers teach.

■ **Encourage middle school teachers licensed to teach multiple subjects to earn two subject-matter minors.**

This would allow candidates to gain sufficient knowledge to pass state licensing tests, and it would increase schools' staffing flexibility. However, middle school candidates in Alaska who intend to teach a single subject should earn a major in that area.

■ **Close the loophole that allows teachers to add middle grade levels to an existing license without demonstrating content knowledge.**

Alaska allows teachers to add new grade levels to certificates with only institutional recommendation. The state is urged to require that all teachers who add the middle grade levels to their certificates pass a rigorous subject-matter test to ensure content knowledge of all subject areas before they are allowed in the classroom.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that while it does not prohibit a teacher endorsed in elementary K-8 from teaching in a middle school setting, the state's highly qualified regulations ensure that middle school teachers must demonstrate subject-area knowledge. Each district must ensure that its teachers are highly qualified, and highly qualified status is tied directly to the subject being taught. Middle school teachers must earn a highly qualified designation in each subject area using the following options:

- Passing the appropriate middle or high school subject-area Praxis II exam
- Having a bachelor's or graduate degree in the subject area, or
- Completing 30 semester hours or 45 quarter hours in the subject area from a regionally accredited college.

Districts are required to track the "highly qualified" status of their teachers and report to the state each October.

Alaska also included a statement from the University of Alaska pointing out that all teachers in its secondary licensure programs are required to pass Praxis II exams in their content area. Further, all interns/student teachers are required to teach/facilitate content lessons and observe teachers at the middle school level regardless of whether they are placed in middle schools or high schools.

<http://education.alaska.gov/TeacherCertification/hq.html>

LAST WORD

Alaska takes a significant risk by relying on federal HQT provisions rather than articulating in its own certification requirements that teachers must demonstrate subject-matter knowledge. The state is putting the burden on districts to ensure that their teachers are HQT instead of making this part of licensure. In addition, while a degree in a subject area is certainly indicative of knowledge of that, it offers no assurance that an individual has studied the specific content he or she will be required to teach.

★ EXAMPLES OF BEST PRACTICE

Georgia, Mississippi, New Jersey and South Carolina ensure that all middle school teacher candidates are adequately prepared to teach middle school-level content. None of these states offers a K-8 generalist license and all require passing scores on subject-specific content tests. Georgia, Mississippi and South Carolina explicitly require at least two content-area minors, and New Jersey requires a content major along with a minor for each additional area of certification.

1. Offers 1-8 license.
 2. California offers a K-12 generalist license for all self-contained classrooms.
 3. With the exception of mathematics.
 4. Oregon offers 3-8 license.

1. Alaska does not require content tests for initial licensure.
2. Candidates teaching multiple subjects only have to pass the elementary test. Single-subject credential does not require test.
3. For K-8 license, Idaho also requires a single-subject test.
4. Maryland allows elementary teachers to teach in departmentalized middle schools if not less than 50 percent of the teaching assignment is within the elementary education grades.
5. For nondepartmentalized classrooms, generalist in middle childhood education candidates must pass new assessment with three subtests.
6. Teachers may have until second year to pass tests, if they attempt to pass them during their first year.
7. Candidates opting for middle-level endorsement may either complete a major or pass a content test.

Area 1: Delivering Well-Prepared Teachers

› Goal F – Secondary Teacher Preparation

The state should ensure that secondary teachers are sufficiently prepared to teach appropriate grade-level content.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that secondary teachers pass a licensing test in every subject they are licensed to teach.
2. The state should require secondary social studies teachers to pass a subject-matter test of each social studies discipline they are licensed to teach.
3. The state should require that secondary teachers pass a content test when adding subject-area endorsements to an existing license.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 22

How States are Faring in Secondary Teacher Preparation

Progress on this Goal Since 2011:

↑ : 6 ← : 44 ↓ : 1

1-F Analysis: **Alaska**

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Regrettably, Alaska does not require content tests for initial licensure; such tests are only mandated once candidates apply for the professional license, usually after three years.

Further, Alaska also allows both general science and general social studies licenses and does not require subject-matter testing for each subject area within these disciplines. At the time of professional licensure, Alaska requires secondary social studies teachers to pass the Praxis II Social Studies content test. Teachers with this license are not limited to teaching general social studies but rather can teach any of the topical areas. (For the state's science loophole, see Goal 1-G.)

Secondary teachers in Alaska may add content areas to the five-year professional certificate in one of three ways: an institutional recommendation, including transcripts showing pertinent coursework; a posted degree, major or minor; or a passing score on a Praxis II content test.

Supporting Research

Praxis Testing Requirements

www.ets.org

4 AAC 12.305

Addition or Removal of Endorsements

<http://www.eed.state.ak.us/teachercertification/Endorsements.pdf>

RECOMMENDATION

■ **Require subject-matter testing for secondary teacher candidates.**

As a condition of licensure, Alaska should require its secondary teacher candidates to pass a content test in each subject area they plan to teach to ensure that they possess adequate subject-matter knowledge and are prepared to teach grade-level content.

■ **Require secondary social studies teachers to pass a content test for each discipline they are licensed to teach.**

By allowing a general social studies certification—and only requiring a general knowledge social studies exam—Alaska is not ensuring that its secondary teachers possess adequate subject-specific content knowledge. The state's required assessment combines all subject areas (e.g., history, geography, economics) and does not report separate scores for each subject area. Further, Alaska should require content tests as a condition of initial licensure.

■ **Require subject-matter testing when adding subject-area endorsements.**

Alaska should require passing scores on subject-specific content tests, regardless of other coursework or degree requirements, for teachers who are licensed in core secondary subjects and wish to add another subject area, or endorsement, to their licenses. While coursework may be generally indicative of background in a particular subject area, only a subject-matter test ensures that teachers know the specific content they will need to teach.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that to complete an approved secondary teacher preparation program, candidates must pass the Praxis II subject-area exam in the area that will appear on their institutional recommendation. The state included a statement from the University of Alaska that reiterated this information.

Alaska noted that while teaching candidates could gain endorsements in general science or social studies, they would be required to demonstrate specific subject-area knowledge when employed to teach in an Alaska school district.

All districts must ensure that employed teachers are highly qualified, and highly qualified status is tied directly to the subject being taught by the educator. Depending on a secondary school teacher's subject areas, a new teacher would need to gain highly qualified designation through one of the following options:

- Passing the appropriate high school subject area Praxis II exam
- Having a bachelor's or graduate degree in the subject area, or
- Completing 30 semester hours or 45 quarter hours in the subject area from a regionally accredited college.

Alaska added that in the case of social studies, there are distinct exams for each distinguishable subject area. A teacher who is teaching economics, geography, government, political science, U.S. history or world history must be highly qualified in the specific subject area by one of the three methods outlined above.

Alaska also noted that a highly qualified designation is not included on the teaching certificate as an endorsement, and districts are required by regulations to track highly qualified status of their teachers and report to the state each October.

<http://education.alaska.gov/TeacherCertification/hq.html>

LAST WORD

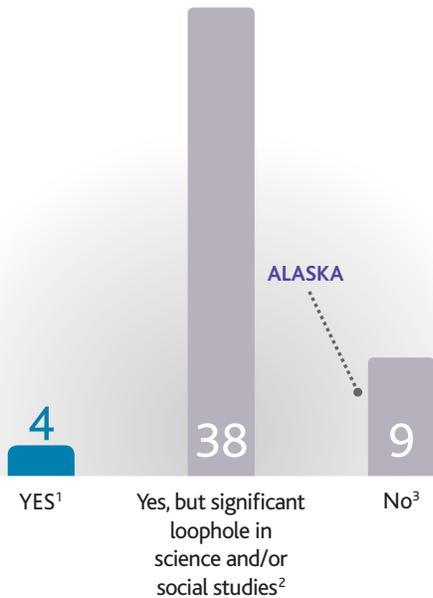

Alaska takes significant risk by relying on federal HQT provisions rather than articulating in its own certification requirements that teachers must demonstrate subject-matter knowledge. The state is putting the burden on districts to ensure that their teachers are HQT instead of making this part of licensure. In addition, while a degree in a subject area is certainly indicative of knowledge of that, it offers no assurance that an individual has studied the specific content he or she will be required to teach.

★ EXAMPLES OF BEST PRACTICE

Georgia, Indiana and Tennessee require that all secondary teacher candidates pass a content test to teach any core secondary subject—both as a condition of licensure and to add an additional field to a secondary license. Further, none of these states offers secondary certification in general social studies; all teachers must be certified in a specific discipline. Also worthy of mention is **Missouri**, which now requires its general social studies teachers to pass a multi-content test with six independently scored subtests.

Figure 23

Does a secondary teacher have to pass a content test in every subject area for licensure?

4. Minnesota's test for general social studies is divided into two individually scored subtests.

5. Oklahoma offers combination licenses.

Area 1: Delivering Well-Prepared Teachers

› Goal G – Secondary Teacher Preparation in Science

The state should ensure that secondary science teachers know all the subject matter they are licensed to teach.

Goal Components

(The factors considered in determining the states' rating for the goal.)

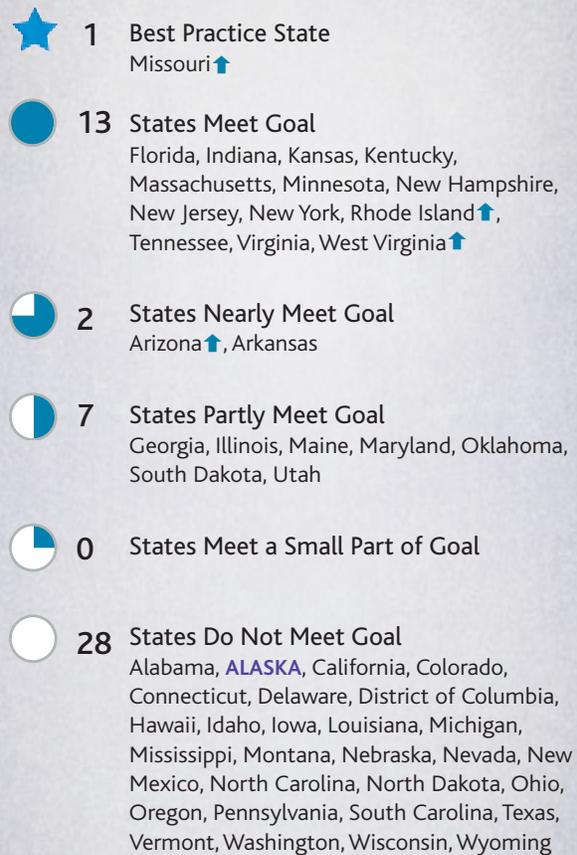

1. The state should require secondary science teachers to pass a subject-matter test in each science discipline they are licensed to teach.
2. If a general science or combination science certification is offered, the state should require teachers to pass a subject-matter test in each science discipline they are licensed to teach under those certifications.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 26

How States are Faring in Preparation to Teach Science

Progress on this Goal Since 2011:

↑ : 4 ↔ : 47 ↓ : 0

1-G Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Secondary science teachers in Alaska have the option of an endorsement in general science. The state does not require content tests for initial licensure; such tests are only mandated once candidates apply for the professional license, usually after three years. At that point, the state requires the Praxis II General Science content test. Teachers with this license are not limited to teaching general science but rather can teach any of the topical areas.

Supporting Research

Praxis Testing Requirements
www.ets.org

RECOMMENDATION

- **Require secondary science teachers to pass a content test for each discipline they are licensed to teach.**

By allowing a general science certification—and only requiring a general knowledge science exam—Alaska is not ensuring that these secondary teachers possess adequate subject-specific content knowledge. The state's required assessment combines all subject areas (e.g., biology, chemistry, physics) and does not report separate scores for each area. Therefore, candidates could answer many—perhaps all—chemistry questions, for example, incorrectly yet still be licensed to teach chemistry to high school students. Further, Alaska should require content tests as a condition of initial licensure.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that while it doesn't require a Praxis II exam in order to gain initial certification, there are provisions within its systems to ensure that teachers have a minimum competency in the subject areas they teach. For example, in order to complete an approved secondary teacher preparation program in Alaska, candidates are required to pass the Praxis II subject-area exam in the area that will appear on their institutional recommendation. The state included a statement from the University of Alaska that reiterated this requirement.

Alaska added that while a teaching candidate could gain an endorsement on their teaching certificate in general science, they would be required to demonstrate specific subject-area content knowledge when employed to teach in an Alaska school district. All districts must ensure that employed teachers are highly qualified, and highly qualified status is tied directly to the subject being taught by the educator. Depending on a secondary school teacher's subject areas, a new teacher would need to gain highly qualified designation through one of the following options:

- Passing the appropriate high school subject area Praxis II exam
- Having a bachelor's or graduate degree in the subject area, or
- Completing 30 semester hours or 45 quarter hours in the subject area from a regionally accredited college.

Districts must track highly qualified status of their teachers and report to the state each October.

Alaska also noted that in the case of science, there are distinct exams for each distinguishable subject area. A teacher who is teaching biology, chemistry, earth science, physical science or physics must be highly qualified using one of the three methods outlined above. The state reiterated that all teachers must be highly qualified in the subject areas in which they provide instruction, and that a highly qualified designation is not included on the teaching certificate as an endorsement.

★ EXAMPLE OF BEST PRACTICE

Missouri ensures that its secondary science teachers know the content they teach by taking a dual approach to general secondary science certification. The state offers general science certification but only allows these candidates to teach general science courses. Missouri also offers an umbrella certification—called unified science—that requires candidates to pass individual subtests in biology, chemistry, earth science and physics. These certifications are offered in addition to single-subject licenses.

1. Teachers with the general science license may only teach general science courses.
 2. Georgia's science test consists of two subtests.

Area 1: Delivering Well-Prepared Teachers

› Goal H – Special Education Teacher Preparation

The state should ensure that special education teachers know the subject matter they are licensed to teach.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not permit special education teachers to teach on a K-12 license that does not differentiate between the preparation of elementary teachers and that of secondary teachers.
2. All elementary special education candidates should be required to pass a subject-matter test for licensure that is no less rigorous than what is required of general education candidates.
3. The state should ensure that secondary special education teachers possess adequate content knowledge.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 28

How States are Faring in Preparation to Teach Social Studies

Progress on this Goal Since 2011:

↑ : 9 ↔ : 39 ↓ : 3

1-H Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska only offers a K-12 special education certification.

The state does not require content testing for any of its special education candidates as a condition of initial certification.

Supporting Research

Alaska Administrative Code 4 AAC 04.212(g), 12.305, -.330

RECOMMENDATION

- **End licensure practices that fail to distinguish between the skills and knowledge needed to teach elementary and secondary grades.**

It is virtually impossible and certainly impractical for Alaska to ensure that a K-12 special education teacher knows all the subject matter he or she is expected to be able to teach, especially considering state and federal expectations that special education students should meet the same high standards as other students. While the broad K-12 umbrella may be appropriate for teachers of low-incidence special education students, such as those with severe cognitive disabilities, it is deeply problematic for the overwhelming majority of high-incidence special education students, who are expected to learn grade-level content.

- **Require that elementary special education candidates pass a rigorous content test as a condition of initial licensure.**

To ensure that special education teacher candidates who will teach elementary grades possess sufficient knowledge of the subject matter at hand, Alaska should require a rigorous content test that reports separate passing scores for each content area. Alaska should also set these passing scores to reflect high levels of performance. Failure to ensure that teachers possess requisite content knowledge deprives special education students of the opportunity to reach their academic potential.

- **Ensure that secondary special education teachers possess adequate content knowledge.**

Secondary special education teachers are frequently generalists who teach many core subject areas. While it may be unreasonable to expect secondary special education teachers to meet the same requirements for each subject they teach as other teachers who teach only one subject, Alaska's current policy of requiring no subject-matter testing is problematic and will not help special education students to meet rigorous learning standards. To provide a middle ground, Alaska should consider a customized HOUSSSE route for new secondary special education teachers and look to the flexibility offered by the Individuals with Disabilities Education Act (IDEA), which allows for a combination of testing and coursework to demonstrate requisite content knowledge in the classroom.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that although it offers K-12 special education, to do otherwise would exacerbate an already difficult situation, given the demographics of the state and the fact that special education is a critical shortage area. Alaska's geography creates a challenging environment that demands unique responses in order to ensure that each child receives a quality education. The state included a statement from the University of Alaska that reiterated this information and added that it would be difficult for a Washington, D.C.-based agency to fully understand the complexity of education in Alaska's rural and remote school districts.

Alaska also noted that all teachers must be highly qualified in the subject areas they teach. Highly qualified designation is not included on the teaching certificate as an endorsement. Districts must track highly qualified status of their teachers and report to the state each October.

Alaska added that highly qualified status is tied directly to the subject being taught by the educator. If a special education teacher is providing instruction in an academic subject area, the teacher must be highly qualified in that subject area. A high school or a middle school special education teacher has the following options:

- Passing the appropriate high school subject area Praxis II exam
- Having a bachelor's or graduate degree in the subject area, or
- Completing 30 semester hours or 45 quarter hours in the subject area from a regionally accredited college.

If the special education teacher is providing instruction in an elementary education setting, the teacher must pass the Praxis II exam to be highly qualified in elementary education.

<http://education.alaska.gov/TeacherCertification/hq.html>

4 AAC 04.210

LAST WORD

It is certainly understandable that rural and remote districts appreciate the flexibility offered by the K-12 license, but the state must consider whether it really meets the needs of special education students. A significant number of states have moved away from the K-12 license, recognizing that it represents an anachronistic view of special education in which little academic progress was expected of students with disabilities. In order for special education students, especially those with high-incidence learning disabilities, to meet the same high standards as typical students, they must have teachers with grade-appropriate knowledge and skills.

★ **EXAMPLES OF BEST PRACTICE**

Unfortunately, NCTQ cannot award “best practice” honors to any state’s policy in the area of special education. However, two states—**New York** and **Rhode Island**—are worthy of mention for taking steps in the right direction in ensuring that all special education teachers know the subject matter they are required to teach. Both states require that elementary special education candidates pass the same elementary content tests, which are comprised of individual subtests, as general education elementary teachers. Secondary special education teachers in New York must pass a newly developed multisubject content test for special education teachers comprised of three separately scored sections. Rhode Island requires its secondary special education teachers to hold certification in another secondary area.

Figure 30

Which states require subject-matter testing for special education teachers?

Elementary Subject-Matter Test	
Required for an elementary special education license	Alabama, Iowa, Louisiana, Massachusetts, New Jersey, New York, Pennsylvania ¹ , Rhode Island, Texas, West Virginia ² , Wisconsin
Required for a K-12 special education license	Colorado, Idaho, North Carolina
Secondary Subject-Matter Test(s)	
Tests in all core subjects required for secondary special education license	New York ³
Test in at least one subject required for secondary special education license	Louisiana, New Jersey, Pennsylvania ¹ , Rhode Island, West Virginia ²
Required for a K-12 special education license	None

1. In Pennsylvania, a candidate who opts for dual certification in elementary or secondary special education and as a reading specialist does not have to take a content test.
2. West Virginia also allows elementary special education candidates to earn dual certification in early childhood, which would not require a content test. Secondary special education candidates earning a dual certification as a reading specialist are similarly exempted.
3. New York requires a multi-subject content test specifically geared to secondary special education candidates. It is divided into three subtests.

Figure 29:

1. Although New Jersey does issue a K-12 certificate, candidates must meet discrete elementary and/or secondary requirements.

Area 1: Delivering Well-Prepared Teachers

› Goal I – Assessing Professional Knowledge

The state should use a licensing test to verify that all new teachers meet its professional standards.

Goal Component

(The factor considered in determining the states' rating for the goal.)

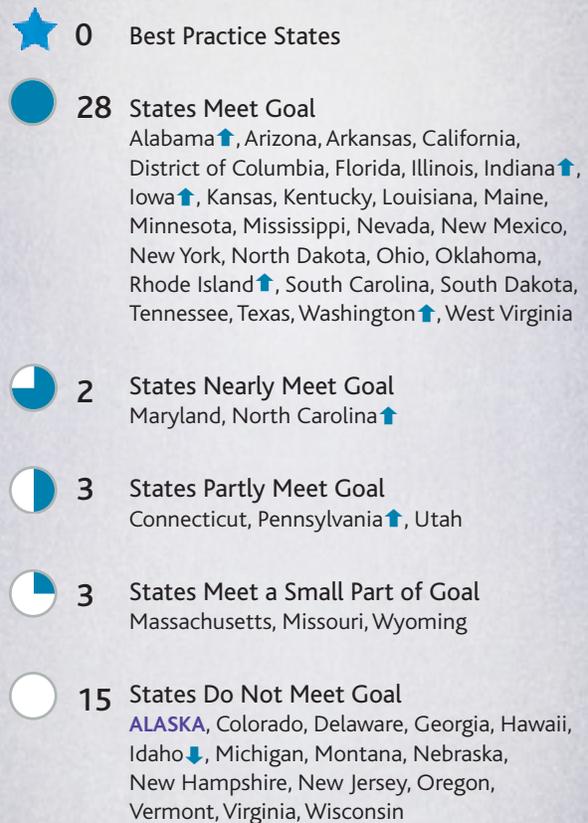

1. The state should assess new teachers' knowledge of teaching and learning by means of a pedagogy test aligned to the state's professional standards.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 31

How States are Faring in Special Education Teacher Preparation

Progress on this Goal Since 2011:

↑ : 7 ↔ : 43 ↓ : 1

1-I Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not currently require new teachers to pass a test of pedagogy in order to attain licensure.

The state requires elementary teachers to pass either a Praxis content knowledge test or a combination content/pedagogy test. Secondary teachers are not required to pass a test of pedagogy.

Supporting Research

<http://www.ets.org/praxis/ak>

RECOMMENDATION

■ Require that all new teachers pass a pedagogy test.

Alaska should verify that all new teachers meet professional standards through a test of professional knowledge.

ALASKA RESPONSE TO ANALYSIS

Alaska noted that while it is true that the state does not require a nationally recognized test of pedagogy, all of its approved teacher preparation programs require candidates to take and pass the Praxis II exam in their content area before being recommended for licensure, and the teacher preparation programs consider and use the internships and student teaching experience as a “real-world” demonstration of the candidate’s grasp of pedagogy.

LAST WORD

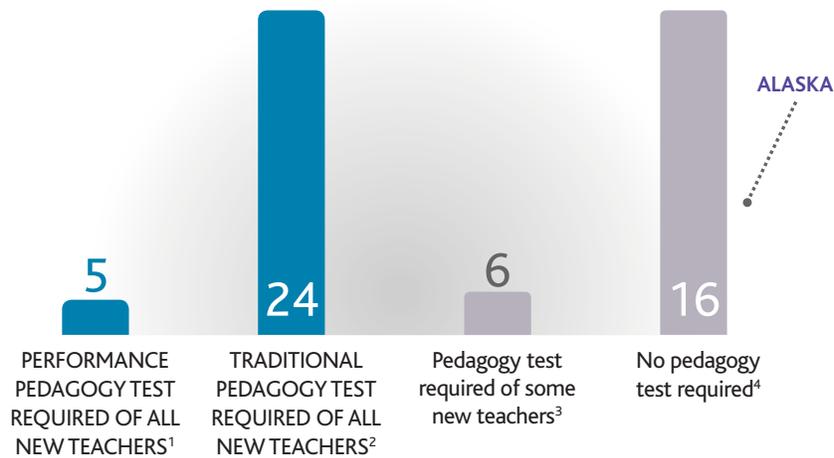

There are certainly advantages to assessing teacher candidates’ pedagogy knowledge and skill through “real world demonstrations.” But the state should not assume that this is occurring in its programs and should require a mechanism by which this essential knowledge and skill can be verified as a condition of licensure.

★ **EXAMPLES OF BEST PRACTICE**

Although NCTQ has not singled out one state's policies for "best practice" honors, it commends the many states that require a pedagogy assessment to verify that all new teachers meet professional standards.

Figure 32

Do states measure new teachers' knowledge of teaching and learning?

1. **Strong Practice:** California, Illinois⁵, New York, Tennessee⁶, Washington

2. **Strong Practice:** Alabama, Arizona, Arkansas, District of Columbia, Florida, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Minnesota, Mississippi, Nevada, New Mexico, North Carolina⁷, North Dakota, Ohio, Oklahoma, Rhode Island, South Carolina, South Dakota, Texas, West Virginia

3. Connecticut, Maryland, Missouri, Pennsylvania, Utah⁸, Wyoming

4. Alaska, Colorado, Delaware, Georgia, Hawaii, Idaho, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, Oregon, Vermont, Virginia, Wisconsin

5. Beginning in 2015.

6. Teachers may pass either the edTPA or a Praxis pedagogy test.

7. Teachers have until their second year to pass if they attempt to pass during their first year.

8. Not required until teacher advances from a Level One to a Level Two license.

Area 1: Delivering Well-Prepared Teachers

› Goal J – Student Teaching

The state should ensure that teacher preparation programs provide teacher candidates with a high quality clinical experience.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should require that student teachers only be placed with cooperating teachers for whom there is evidence of their effectiveness as measured by consistent gains in student learning.
2. The state should require that teacher candidates spend at least 10 weeks student teaching.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 33

How States are Faring in Student Teaching

Progress on this Goal Since 2011:

↑ : 8 ↔ : 42 ↓ : 1

1-J Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not articulate specific requirements for student teaching. The state also does not articulate requirements for cooperating teachers.

Supporting Research

4 AAC 30.020

RECOMMENDATION

- **Ensure that cooperating teachers have demonstrated evidence of effectiveness as measured by student learning.**

In addition to the ability to mentor an adult, cooperating teachers in Alaska should also be carefully screened for their capacity to further student achievement. Research indicates that the only aspect of a student teaching arrangement that has been shown to have an impact on student achievement is the positive effect of selection of the cooperating teacher by the preparation program, rather than the student teacher or school district staff.

- **Use evidence from the state's teacher evaluation system to select cooperating teachers.**

Alaska requires objective measures of student growth to be the preponderant criterion of its teacher evaluations. The state should therefore utilize its evaluation results, which provide evidence of effectiveness in the classroom, in the selection of effective cooperating teachers.

- **Require teacher candidates to spend at least 10 weeks student teaching.**

Alaska should require a summative clinical experience for all prospective teachers. Student teaching should be a full-time commitment, as requiring coursework and student teaching simultaneously does a disservice to both. Alignment with a school calendar for at least 10 weeks ensures both adequate classroom experience and exposure to a variety of ancillary professional activities.

- **Explicitly require that student teaching be completed locally, thus prohibiting candidates from completing this requirement abroad.**

Unless preparation programs can establish true satellite campuses to closely supervise student teaching arrangements, placement in foreign or otherwise novel locales should be supplementary to a standard student teaching arrangement. Outsourcing the arrangements for student teaching makes it impossible to ensure the selection of the best cooperating teacher and adequate supervision of the student teacher and may prevent training of the teacher on relevant state instructional frameworks.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that a student teacher must be under the general supervision of an Alaska certified teacher. Further, while regulations do not specify the length of time required for student teaching or set additional requirements for selection of cooperating teachers, all approved teacher preparation programs have very specific and rigorous requirements for student teaching and internships. The state included a statement from the University of Alaska that reiterated this point.

The University of Alaska also offered a discussion of NCTQ's past review of the student teacher experience nearly three years ago. In this review, NCTQ's national recommendations were to shrink the pipeline

of elementary teachers into the profession and make the role of cooperating teacher a more attractive proposition to classroom teachers. Although the first recommendation is not relevant because Alaska continues to have a shortage of teachers trained in the state, the University of Alaska stated that the second recommendation is a valid one and will look into ways it can increase both monetary and professional development compensation for cooperating teachers in Alaska schools.

Supporting Research

4 AAC 30.020

Alaska Pacific University

http://catalog.alaskapacific.edu/preview_program.php?catoid=4&poid=123&returnto=74#

LAST WORD

The point about “shrinking the pipeline” of elementary teachers was a general one; across the country, there is typically a significant oversupply of elementary teachers. This may well not be the case in Alaska. Whether or not the quantity of student teachers should be reconsidered, the need for placements with effective teachers remains.

3. Illinois, New Hampshire, Utah
4. Alaska, Arizona, California, Colorado, District of Columbia, Maryland, Montana
5. West Virginia allows candidates to student teach for less than 12 weeks if determined to be proficient.

Area 1: Delivering Well-Prepared Teachers

› Goal K – Teacher Preparation Program Accountability

The state’s approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.

Goal Components

(The factors considered in determining the states’ rating for the goal.)

1. The state should collect data that connects student achievement gains to teacher preparation programs. Such data can include value added or growth analyses conducted specifically for this purpose or evaluation ratings that incorporate objective measures of student learning to a significant extent.
2. The state should collect other meaningful data that reflect program performance, including some or all of the following:
 - a. Average raw scores of teacher candidates on licensing tests, including academic proficiency, subject-matter and professional-knowledge tests;
 - b. Number of times, on average, it takes teacher candidates to pass licensing tests;
 - c. Satisfaction ratings by school principals and teacher supervisors of programs’ student teachers, using a standardized form to permit program comparison and
 - d. Five-year retention rates of graduates in the teaching profession.
3. The state should establish the minimum standard of performance for each category of data. Programs should be held accountable for meeting these standards, with articulated consequences for failing to do so, including loss of program approval.
4. The state should produce and publish on its website an annual report card that shows all the data the state collects on individual teacher preparation programs.
5. The state should retain full authority over its process for approving teacher preparation programs.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 37

How States are Faring in Teacher Preparation Program Accountability

Progress on this Goal Since 2011:

↑ : 13 ↔ : 38 ↓ : 0

1-K Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska's approval process for its traditional and alternate route teacher preparation programs does not hold programs accountable for the quality of the teachers they produce.

Most importantly, Alaska does not collect or report data that connect student achievement gains to teacher preparation programs.

The state also fails to collect other objective, meaningful data to measure the performance of teacher preparation programs, and it does not apply any transparent, measurable criteria for conferring program approval.

Further, in the past three years, no programs in the state have been identified as low performing—an additional indicator that programs lack accountability.

Alaska's website also does not include a report card that allows the public to review and compare program performance.

There is some overlap of accreditation and state approval. Review teams are comprised solely of NCATE/CAEP members, and the state has delegated its program review process to NCATE/CAEP. Programs must substantially meet NACTE/CAEP standards. According to the NCATE/CAEP website, Alaska requires national accreditation; however, this requirement is not articulated in the regulations.

Supporting Research

4 AAC 12.308

Title II State Reports

<https://title2.ed.gov>

www.ncate.org

RECOMMENDATION

■ Collect data that connect student achievement gains to teacher preparation programs.

As one way to measure whether programs are producing effective classroom teachers, Alaska should consider the academic achievement gains of students taught by programs' graduates, averaged over the first three years of teaching. Data that are aggregated to the institution (e.g., combining elementary and secondary programs) rather than disaggregated to the specific preparation program are not useful for accountability purposes. Such aggregation can mask significant differences in performance among programs.

■ Gather other meaningful data that reflect program performance.

Although measures of student growth are an important indicator of program effectiveness, they cannot be the sole measure of program quality for several reasons, including the fact that many programs may have graduates whose students do not take standardized tests. The accountability system must therefore include other objective measures that show how well programs are preparing teachers for the classroom, such as:

1. Evaluation results from the first and/or second year of teaching;
2. Satisfaction ratings by school principals and teacher supervisors of programs' student teachers, using a standardized form to permit program comparison;

3. Average raw scores of teacher candidates on licensing tests, including academic proficiency, subject matter and professional knowledge tests;
4. Number of times, on average, it takes teacher candidates to pass licensing tests; and
5. Five-year retention rates of graduates in the teaching profession.

■ **Establish the minimum standard of performance for each category of data.**

Merely collecting the types of data described above is insufficient for accountability purposes. The next and perhaps more critical step is for Alaska to establish precise minimum standards for teacher preparation program performance for each category of data. Programs should then be held accountable for meeting these standards, and there should be consequences for failing to do so, including loss of program approval.

■ **Publish an annual report card on the state's website.**

Alaska should produce an annual report card that shows all the data the state collects on individual teacher preparation programs, which should be published on the state's website at the program level for the sake of public transparency. Data should be presented in a manner that clearly conveys whether programs have met performance standards.

■ **Maintain full authority over teacher preparation program approval.**

Alaska should ensure that it is the state that considers the evidence of program performance and makes the decision about whether programs should continue to be authorized to prepare teachers.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis. The state also included a statement from the University of Alaska Fairbanks (UAF) asserting that this is a fairly new development in the field of education and that states throughout the United States are struggling with how to fairly implement a program that would hold programs accountable for the quality of their graduates. At UAF, teachers and administrators are surveyed regarding the quality of the teachers produced by the UAF secondary licensure program. Alaska's district superintendents and district representatives as stakeholders are gathered and surveyed regarding the quality of the UAF trained administrators and teachers.

LAST WORD

While some states have recently focused more attention on teacher preparation program accountability, it is not a new development. In addition to federal requirements in this area, all states authorize institutions to offer teacher preparation programs and have always had a responsibility to make that authorization meaningful.

★ EXAMPLES OF BEST PRACTICE

NCTQ is not awarding “best practice” honors to any state’s policy in the area of teacher preparation program accountability. However, the following states should be commended for collecting data that connect student achievement gains to teacher preparation programs: **Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee and Texas.**

Figure 39

Do states connect student achievement data to teacher preparation programs?

1. Strong Practice: Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee, Texas
2. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia³, Hawaii³, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland³, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York³, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
3. Included in state’s Race to the Top plan, but not in policy or yet implemented.

1. For traditional preparation programs only.
 2. State does not distinguish between alternate route programs and traditional preparation programs in public reporting.
 3. For alternate routes only.

Figure 40

Which states collect meaningful data?	
STUDENT LEARNING GAINS	Colorado, Delaware, Florida, Georgia, Louisiana, North Carolina, Ohio, Rhode Island, Tennessee, Texas
EVALUATION RESULTS FOR PROGRAM GRADUATES	Alabama, Arizona, Florida, Illinois, Massachusetts, North Carolina, South Carolina, Tennessee, Texas
AVERAGE RAW SCORES ON LICENSING TESTS	Alabama, Indiana, Kentucky, Louisiana, Michigan, New Jersey, Ohio, Tennessee, Texas, Washington, West Virginia

1. National accreditation can be substituted for state approval.
 2. For institutions with 2,000 or more full-time equivalent students

Area 2 Summary

How States are Faring in Expanding the Pool of Teachers

State Area Grades

Topics Included In This Area

2-A: Alternate Route Eligibility

2-B: Alternate Route Preparation

2-C: Alternate Route Usage and Providers

2-D: Part-Time Teaching Licenses

2-E: Licensure Reciprocity

Area 2: Expanding the Teaching Pool

› Goal A – Alternate Route Eligibility

The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. With some accommodation for work experience, alternate route programs should set a rigorous bar for program entry by requiring that candidates take a rigorous test to demonstrate academic ability, such as the GRE.
2. All alternate route candidates, including elementary candidates and those having a major in their intended subject area, should be required to pass the state's subject-matter licensing test.
3. Alternate route candidates lacking a major in the intended subject area should be able to demonstrate subject-matter knowledge by passing a test of sufficient rigor.

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Progress on this Goal Since 2011:

↑ : 2 ↔ : 49 ↓ : 0

2-A Analysis: Alaska

State Does Not Meet Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska Transition to Teaching (AKT2) requires that candidates have a minimum GPA of 2.5 and are able to pass Praxis I, a basic skills test. Candidates must have a degree in an endorsable content area. The state does not allow AKT2 candidates to test out of degree requirements.

Applicants are not required to pass a subject-matter test for admission; however, candidates must pass a content test as part of the program before providing any classroom instruction.

Supporting Research

Alaska Transition to Teaching Eligibility

<http://www.eed.state.ak.us/akt2/eligible.html>

Alaska Transition to Teaching Overview

<http://education.alaska.gov/AKT2/overview.html>

RECOMMENDATION

■ Raise academic requirements for admission.

While a minimum GPA requirement is a first step toward ensuring that candidates are of good academic standing, the current standard of 2.5 does not serve as a sufficient indicator of past academic performance. The standard should be higher than what is required of traditional teacher candidates, such as a GPA of 3.0 or higher. Some accommodation in this standard may be appropriate for career changers. A rigorous test appropriate for candidates who have already completed a bachelor's degree, such as the GRE, would be ideal.

■ Require applicants to pass a subject-matter test for admission.

The concept behind alternate routes is that the nontraditional candidate is able to concentrate on acquiring professional knowledge and skills because he or she has strong subject-area knowledge. Teachers without sufficient subject-matter knowledge place students at risk.

■ Offer flexibility in fulfilling coursework requirements.

Alaska should allow any candidate who already has the requisite knowledge and skills to demonstrate such by passing a rigorous test. Exacting coursework requirements could dissuade talented individuals who lack precisely the right courses from pursuing a career in teaching.

■ Eliminate basic skills test requirement.

The state's requirement that alternate route candidates pass a basic skills test is impractical and ineffectual. Basic skills tests measure minimum competency—essentially those skills that a person should have acquired in middle school—and are inappropriate for candidates who have already earned a bachelor's degree. A test designed for individuals who already have a bachelor's degree, such as the GRE, would be a much more appropriate measure of academic standing. At a minimum, the state should eliminate the basic skills test requirement or accept the equivalent in SAT or ACT scores.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

■ For some alternate routes ■ For most or most widely used alternate routes ★ For all alternate routes

★ EXAMPLES OF BEST PRACTICE

The **District of Columbia** and **Michigan** require candidates to demonstrate above-average academic performance as a condition of admission to an alternate route program, with both requiring applicants to have a minimum 3.0 GPA. In addition, neither requires a content-specific major; subject-area knowledge is demonstrated by passing a test, making their alternate routes flexible to the needs of nontraditional candidates.

Figure 44

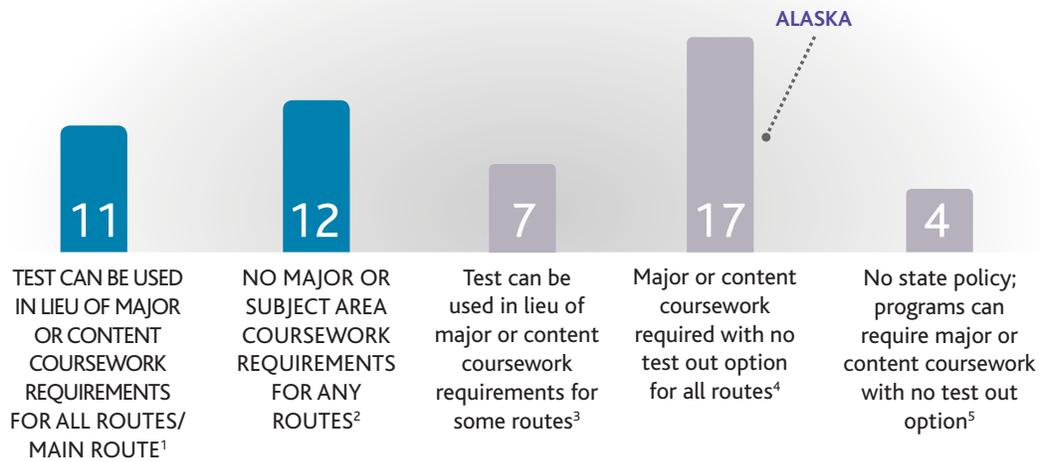

Do states require alternate routes to be selective?

- Strong Practice:** Connecticut, District of Columbia, Michigan, Minnesota, New Jersey, Rhode Island
- Alabama, Illinois⁵, Indiana, Kentucky⁶, New York, Pennsylvania
- Alaska, Arkansas, California, Colorado, Delaware, Florida, Georgia, Iowa, Kansas, Louisiana, Maryland, Massachusetts, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, North Carolina, Ohio, Oklahoma, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
- Arizona, Hawaii, Idaho, Maine, Montana, New Mexico, North Dakota, Oregon, South Carolina, Utah
- Illinois' routes are in the process of converting to a single new license.
- Only one of Kentucky's eight alternate routes has a 3.0 GPA requirement.

Figure 45

Do states accommodate the nontraditional background of alternate route candidates?

1. **Strong Practice:** Alabama, California, Colorado, Florida, Georgia, Maine, North Carolina, Oklahoma, Rhode Island, Tennessee, Texas

2. **Strong Practice:** Arizona, Arkansas, District of Columbia, Illinois, Iowa, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Ohio, Washington

3. Connecticut, Delaware, Kentucky, Maryland, Oregon, Pennsylvania, Virginia

4. Alaska, Indiana, Kansas, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, South Carolina, South Dakota, Utah, Vermont, West Virginia, Wisconsin, Wyoming

5. Hawaii, Idaho, New Mexico, North Dakota

Area 2: Expanding the Teaching Pool

› Goal B – Alternate Route Preparation

The state should ensure that its alternate routes provide efficient preparation that is relevant to the immediate needs of new teachers, as well as adequate mentoring and support.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should ensure that the amount of coursework it either requires or allows is manageable for a novice teacher. Anything exceeding 12 credit hours of coursework in the first year may be counterproductive, placing too great a burden on the teacher. This calculation is premised on no more than 6 credit hours in the summer, three in the fall and three in the spring.
2. The state should ensure that alternate route programs offer accelerated study not to exceed six (three credit) courses for secondary teachers and eight (three credit) courses for elementary teachers (exclusive of any credit for practice teaching or mentoring) over the duration of the program. Programs should be limited to two years, at which time the new teacher should be eligible for a standard certificate.
3. All coursework requirements should target the immediate needs of the new teacher (e.g., seminars with other grade-level teachers, training in a particular curriculum, reading instruction, classroom management techniques).
4. The state should require intensive induction support, beginning with a trained mentor assigned full time to the new teacher for the first critical weeks of school and then gradually reduced over the course of the entire first year. The state should support only induction strategies that can be effective even in a poorly managed school: intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe effective teachers. Ideally, candidates would also have an opportunity to practice teach in a summer training program.

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Figure 46

How States are Faring in Alternate Route Preparation

Progress on this Goal Since 2011:

↑ : 0 ↔ : 51 ↓ : 0

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

2-B Analysis: Alaska

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska Transition to Teaching (AKT2) candidates must complete a set of courses based on Charlotte Danielson's *Essentials of Effective Teaching* prior to teaching. While completing this coursework, candidates must also make ten 45- to 60-minute classroom observations. This preservice training occurs during the spring while candidates are not yet employed in a school.

AKT2 candidates also complete an intensive six-week field experience and cultural workshop during the summer. Throughout their first two years as teachers, candidates are paired with a mentor from the Alaska Statewide Mentor Project, which uses the New Teacher Center model.

Candidates can complete course requirements in two years and earn standard certification at that time.

Supporting Research

Alaska Transition to Teaching

<http://www.eed.state.ak.us/akt2/overview.html>

RECOMMENDATION

■ Ensure that new teachers are not burdened by excessive requirements.

While requiring some preparation prior to entering the classroom is important, Alaska requires alternate route candidates to complete a considerable amount of coursework before they begin teaching, much of which is more typically associated with a traditional preparation program. All coursework requirements should be manageable for career changers and other nontraditional candidates and should contribute to the immediate needs of new teachers. Appropriate coursework should include grade-level or subject-level seminars, methodology in the content area, classroom management, assessment and scientifically based early reading instruction. Requiring candidates to complete considerable coursework prior to employment in a school, when they are likely to be employed in a noneducation field, is unreasonable.

ALASKA RESPONSE TO ANALYSIS

Alaska was helpful in providing NCTQ with facts that enhanced this analysis.

★ EXAMPLES OF BEST PRACTICE

Delaware and **New Jersey** ensure that alternate routes provide efficient preparation that meets the needs of new teachers. Both states require a manageable number of credit hours, relevant coursework, a field placement and intensive mentoring.

◐ For some alternate routes ■ For most or most widely used alternate routes ★ For all alternate routes

Area 2: Expanding the Teaching Pool

› Goal C – Alternate Route Usage and Providers

The state should provide an alternate route that is free from limitations on its usage and allows a diversity of providers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should not treat the alternate route as a program of last resort or restrict the availability of alternate routes to certain subjects, grades or geographic areas.
2. The state should allow districts and nonprofit organizations other than institutions of higher education to operate alternate route programs.
3. The state should ensure that its alternate route has no requirements that would be difficult to meet for a provider that is not an institution of higher education (e.g., an approval process based on institutional accreditation).

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 48

How States are Faring in Alternate Route Usage and Providers

Progress on this Goal Since 2011:

↑ : 1 ↔ : 47 ↓ : 3

2-C Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska limits the usage and providers of its alternate route.

Alaska's Transition to Teaching (AKT2) program is only available for candidates seeking certification at the secondary level. AKT2 candidates must be employed in one of the 15 high-need partnering school districts.

This state-run program is the only authorized alternate route; consequently, the state does not support a diversity of providers.

Supporting Research

Alaska Transition to Teaching

<http://www.eed.state.ak.us/akt2/overview.html>

RECOMMENDATION

■ Broaden alternate route usage.

Alaska should reconsider grade-level and geographic restrictions on its alternate route. Alternate routes should not be programs of last resort for hard-to-staff subjects, grade levels or geographic areas but rather a way to expand the teacher pipeline throughout the state.

■ Encourage diversity of alternate route providers.

Alaska should specifically authorize alternate route programs run by local school districts and non-profits, as well as institutions of higher education. A good diversity of providers helps all programs, both university- and nonuniversity-based, to improve.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

☑ For some alternate routes ☐ For most or most widely used alternate routes ★ For all alternate routes

Area 2: Expanding the Teaching Pool

› Goal D – Part-Time Teaching Licenses

The state should offer a license with minimal requirements that allows content experts to teach part time.

Goal Components

(The factors considered in determining the states' rating for the goal.)

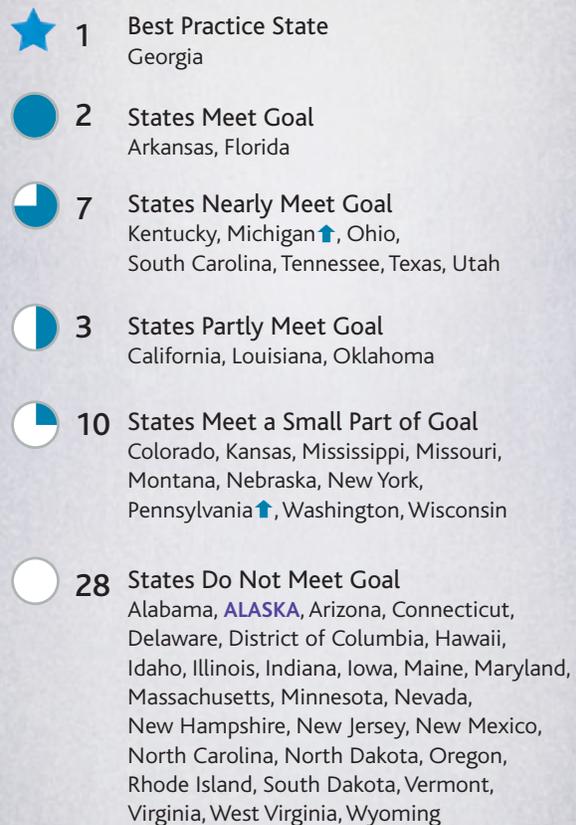

1. Either through a discrete license or by waiving most licensure requirements, the state should license individuals with content expertise as part-time instructors.
2. All candidates for a part-time teaching license should be required to pass a subject-matter test.
3. Other requirements for this license should be limited to those addressing public safety (e.g., background screening) and those of immediate use to the novice instructor (e.g., classroom management training).

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 52

How States are Faring in Part Time Teaching Licenses

Progress on this Goal Since 2011:

↑ : 2 ↔ : 49 ↓ : 0

2-D Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not offer a license with minimal requirements that would allow content experts to teach part time.

RECOMMENDATION

- **Offer a license that allows content experts to serve as part-time instructors.**

Alaska should permit individuals with deep subject-area knowledge to teach a limited number of courses without fulfilling a complete set of certification requirements. The state should verify content knowledge through a rigorous test and conduct background checks as appropriate, while waiving all other licensure requirements. Such a license would increase districts' flexibility to staff certain subjects, including many STEM areas, that are frequently hard to staff or may not have high enough enrollment to necessitate a full-time position.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

 **EXAMPLE OF BEST PRACTICE**

Georgia offers a license with minimal requirements that allows content experts to teach part time. Individuals seeking this license must pass a subject-matter test and will be assigned a mentor.

Area 2: Expanding the Teaching Pool

› Goal E – Licensure Reciprocity

The state should help to make licenses fully portable among states, with appropriate safeguards.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should offer a standard license to fully certified teachers moving from other states, without relying on transcript analysis or recency requirements as a means of judging eligibility. The state can and should require evidence of effective teaching in previous employment.
2. The state should uphold its standards for all teachers by insisting that certified teachers coming from other states meet its own testing requirements.
3. The state should accord the same license to teachers from other states who completed an approved alternate route program as it accords teachers prepared in a traditional preparation program.
4. Consistent with these principles of portability, state requirements for online teachers based in other states should protect student interests without creating unnecessary obstacles for teachers.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 54

How States are Faring in Licensure Reciprocity

Progress on this Goal Since 2011:

↑ : 5 ↔ : 45 ↓ : 1

2-E Analysis: Alaska

State Partly Meets Goal

Progress Since 2011

ANALYSIS

Commendably, Alaska requires all teachers to meet its passing scores on licensing tests, and out-of-state teachers are allowed one year to meet these testing requirements.

However, other aspects of the state's policy create obstacles for teachers from other states seeking licensure in Alaska. Teachers with valid out-of-state certificates are eligible for Alaska's professional teaching license, but they must submit a transcript showing that six additional semester hours of credit have been earned within the past five years. Further, Alaska requires three credit hours each in Alaska studies and multicultural coursework, and the state does not offer a test-out option for either of these coursework requirements.

Although transcripts are required for all applicants, it is not clear whether the state analyzes these transcripts to determine whether a teacher was prepared through a traditional or alternate route or whether additional coursework will be required.

Alaska is also a participant in the NASDTEC Interstate Agreement, which outlines which other states' certificates will be accepted by the receiving state. This agreement is not a collection of two-way reciprocal acceptances, nor is it a guarantee that all certificates will be accepted by the receiving state, and is therefore not included in this analysis.

The state does not articulate specific certification requirements for out-of-state teachers who teach online courses to Alaska students.

Alaska Administrative Code 4 AAC 12.305(b)

Professional Teacher Certification

<http://education.alaska.gov/TeacherCertification/prof.html>

RECOMMENDATION

- **Offer a standard license to certified out-of-state teachers, absent unnecessary requirements.**

The state should offer standard licenses to certified out-of-state teachers rather than restricting them to provisional ones until they meet Alaska's requirements. Although the state's Alaska studies and multicultural communications coursework requirements are reasonable, it should offer out-of-state teachers a test-out option. The state should also reconsider its recency requirement as a means to judge licensure eligibility. Recent coursework is unlikely to positively affect a teacher's effectiveness, and such a requirement may deter experienced, effective teachers from applying for licensure in the state.

- **Accord the same license to out-of-state alternate route teachers as would be accorded to traditionally prepared teachers.**

Alaska should consider discontinuing its requirement for the submission of transcripts. Transcript analysis is likely to result in additional coursework requirements, even for traditionally prepared teachers; alternate route teachers, on the other hand, may have to virtually begin anew, repeating some, most or all of a teacher preparation program in Alaska. Regardless of whether a teacher was prepared through a traditional or alternate route, all certified out-of-state teachers should receive equal treatment.

- **Require evidence of effective teaching when determining eligibility for full certification.**

Rather than rely on transcripts to assess credentials, Alaska should instead require that evidence of teacher effectiveness be considered for all out-of-state candidates. Such evidence is especially important for candidates who come from states that make student growth at least a significant factor of a teacher evaluation (see Goal 3-B).

- **Ensure that requirements for online teachers are equal in rigor to those for in-state teachers.**

Alaska should ensure that online teachers based in other states are at least equally as qualified as those who teach in the state. However, Alaska should balance the interests of its students in having qualified online instructors with making certain that these requirements do not create unnecessary obstacles for out-of-state teachers.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that it requires all teachers to pass a basic competency exam, and that it accepts some state-specific basic competency exams. The state also has requirements that out-of-state teachers must meet for professional certification.

Further, Alaska added that it requires transcripts to establish that the applicant for teacher certification has completed at least a bachelor's degree from a regionally accredited university. In the case of an individual completing a traditional university program, the transcript is also used to verify the information provided on the institutional recommendation. Alaska also certifies teachers who have completed a state-approved alternate route to certification in another state. The state recommendation form is used to document satisfactory completion of all elements of the state-approved program.

Alaska noted that if a public school district is employing an out-of-state teacher to provide instruction in an online classroom, the teacher must hold an Alaska teacher certificate.

Supporting Research

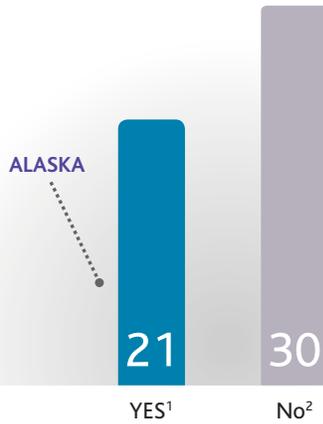

Alaska Statute 14.20.010

LAST WORD

The submission of transcripts should be unnecessary for certified out-of-state teachers, unless the state has some reason to suspect that the certifying state routinely licenses teachers who do not have a degree.

Figure 55

Do states require all out-of-state teachers to pass their licensure tests?

★ **EXAMPLES OF BEST PRACTICE**

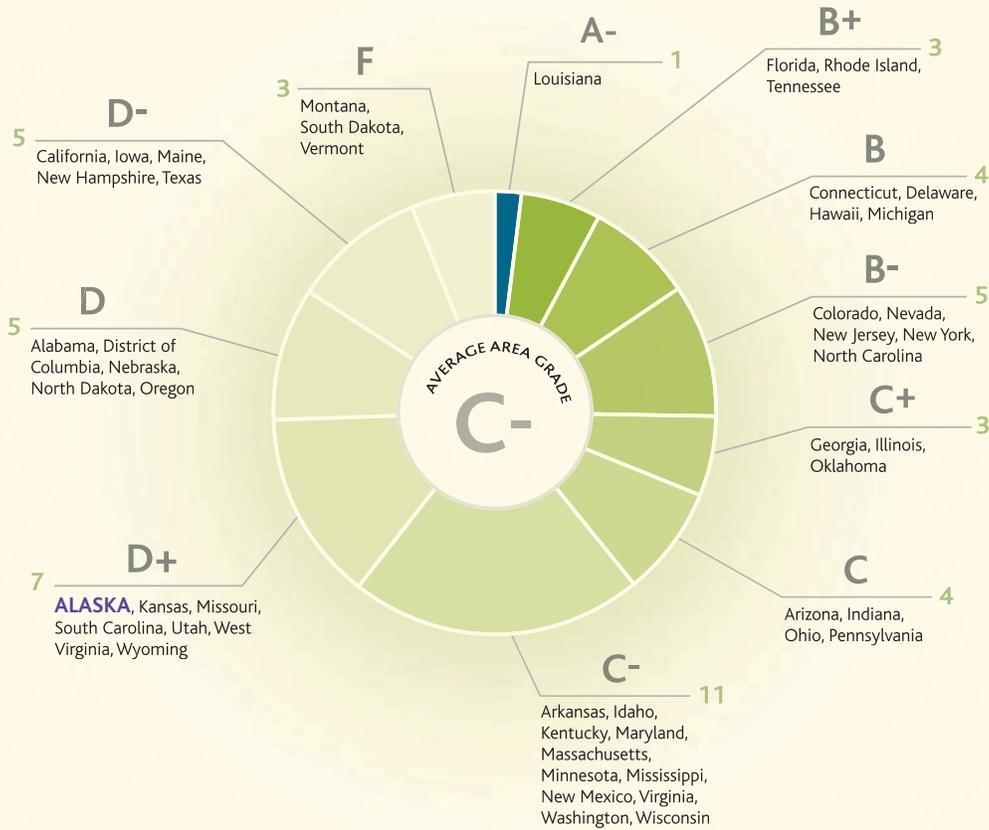

Alabama and **Texas** appropriately support licensure reciprocity by requiring that certified teachers from other states meet Alabama’s and Texas’s own testing requirements, and by not specifying any additional coursework or recency requirements to determine eligibility for either traditional or alternate route teachers. Also worthy of mention is **Delaware** for its reciprocity policy that limits the evidence of “successful” experience it will accept to evaluation results from states with rigorous requirements similar to its own.

Area 3 Summary

How States are Faring in Identifying Effective Teachers

State Area Grades

Topics Included In This Area

3-A: State Data Systems

3-B: Evaluation of Effectiveness

3-C: Frequency of Evaluations

3-D: Tenure

3-E: Licensure Advancement

3-F: Equitable Distribution

Area 3: Identifying Effective Teachers

› Goal A – State Data Systems

The state should have a data system that contributes some of the evidence needed to assess teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should establish a longitudinal data system with at least the following key components:
 - a. A unique statewide student identifier number that connects student data across key databases across years;
 - b. A unique teacher identifier system that can match individual teacher records with individual student records and
 - c. An assessment system that can match individual student test records from year to year in order to measure academic growth.
2. Student growth or value-added data provided through the state's longitudinal data system should be considered among the criteria used to determine teachers' effectiveness.
3. To ensure that data provided through the state data system is actionable and reliable, the state should have a clear definition of "teacher of record" and require its consistent use statewide.
4. Data provided through the state's longitudinal data system should be used to publicly report information on teacher production.

The components for this goal have changed since 2011. In light of state progress on this topic, the bar for this goal has been raised.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 58

How States are Faring in State Data Systems

Progress on this Goal Since 2011:

↑ : 13 ↔ : 36 ↓ : 2

3-A Analysis: Alaska

State Partly Meets Goal

Bar Raised for this Goal

Progress Since 2011

ANALYSIS

Alaska has a data system with the capacity to provide evidence of teacher effectiveness.

Alaska has all three necessary elements for a student- and teacher-level longitudinal data system. The state has assigned unique student identifiers that connect student data across key databases across years and has assigned unique teacher identifiers that enable it to match individual teacher records with individual student records. It also has the capacity to match student test records from year to year in order to measure student academic growth.

Alaska defines teacher of record as a candidate who completes preservice learning and finds employment in a partner district. The state's teacher-student data link cannot connect more than one educator to a particular student in a given course, and it does not have in place a process for teacher roster verification.

Alaska does not publish data on teacher production that connects program completion, certification and hiring statistics.

Supporting Research

Data Quality Campaign

www.dataqualitycampaign.org

RECOMMENDATION

- **Develop a definition of "teacher of record" that can be used to provide evidence of teacher effectiveness.**

To ensure that data provided through the state data system are actionable and reliable, Alaska should articulate a definition of teacher of record and require its consistent use throughout the state. The state's definition should reflect instruction rather than grading, and Alaska should develop a process for teacher roster verification as well as an ability to link more than one educator to a particular student.

- **Publish data on teacher production.**

From the number of teachers who graduate from preparation programs each year, only a subset are certified, and only some of those certified are actually hired in the state. While it is certainly desirable to produce a big enough pool to give districts a choice in hiring, the substantial oversupply in some teaching areas is not good for the profession. Alaska should look to Maryland's "Teacher Staffing Report" as a model whose primary purpose is to determine teacher shortage areas, while also identifying areas of surplus. By collecting similar hiring data from its districts, Alaska will form a rich set of data that can inform policy decisions.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that for 2012-2013, all districts were required to report the Alaska Teacher Identifier (ATI) of the teacher of record in the areas of reading, writing, math and science for each student enrolled in grades 3 through 12. Teacher of record is defined in the Participation Rate Handbook as "the certified teacher who has been assigned the primary responsibility for the instruction and assessment of the student in the specific content area."

★ EXAMPLES OF BEST PRACTICE

Hawaii and **New York** have all three necessary elements of a student- and teacher-level longitudinal data system. Both states have developed definitions of “teacher of record” that reflect instruction. Their data links can connect multiple teachers to a particular student, and there is a process for teacher roster verification. In addition, Hawaii and New York publish teacher production data. Also worthy of mention is **Maryland** for its “Teacher Staffing Report,” which serves as a model for other states. The report’s primary purpose is to determine teacher shortage areas, while also identifying areas of surplus.

Area 3: Identifying Effective Teachers

› Goal B – Evaluation of Effectiveness

The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.

Goal Components

(The factors considered in determining the states' rating for the goal.)

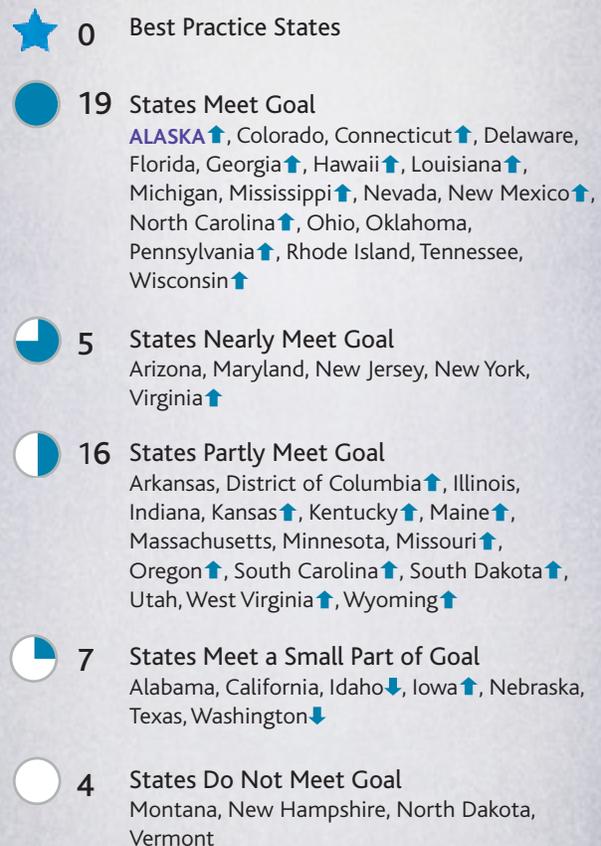

1. The state should either require a common evaluation instrument in which evidence of student learning is the most significant criterion or should specifically require that student learning be the preponderant criterion in local evaluation processes. Evaluation instruments, whether state or locally developed, should be structured so as to preclude a teacher from receiving a satisfactory rating if found ineffective in the classroom.
2. Evaluation instruments should require classroom observations that focus on and document the effectiveness of instruction.
3. The state should encourage the use of student surveys, which have been shown to correlate strongly with teacher effectiveness.
4. The state should require that evaluation instruments differentiate among various levels of teacher performance. A binary system that merely categorizes teachers as satisfactory or unsatisfactory is inadequate.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 62

How States are Faring in Evaluation of Effectiveness

Progress on this Goal Since 2011:

↑ : 22 ↔ : 27 ↓ : 2

3-B Analysis: **Alaska**

State Meets Goal

Progress Since 2011

ANALYSIS

Commendably, Alaska requires evidence of student growth to be the preponderant criterion of its teacher evaluations. Districts develop evaluation systems based on criteria set forth by the state.

Teachers in Alaska will now be evaluated on seven content standards and on student growth. When measuring student growth, districts must use two to four measurements, such as test results, portfolios, essays and/or open-ended projects. Only when a state assessment is directly relevant to the grade and subject taught by the teacher must it be included as one of the measurements.

For 2015-2016 and 2016-2017, student growth data will comprise 20 percent of teacher evaluations, and for 2017-2018, it will count for 35 percent. As of 2018-2019, 50 percent of teacher evaluations will be based on student growth data.

The following four rating categories must be used: exemplary, proficient, basic and unsatisfactory.

Evaluations must include observations, as well as information from parents, students and other teachers

Figure 65

Do states require more than two categories for teacher evaluation ratings?

1. **Strong Practice:** Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming

2. Alabama, California, Idaho, Montana, Nebraska, New Hampshire, North Dakota, Vermont

1. Input from students, teachers and peers is required, but there is no explicit indication that this must come from surveys.
 2. Explicitly allowed but not required.
 3. Requires parent or peer surveys; whole-school student learning or student surveys.

★ **EXAMPLES OF BEST PRACTICE**

NCTQ has not singled out any one state for “best practice” honors. Many states continue to make significant strides in the area of teacher evaluation by requiring that objective evidence of student learning be the preponderant criterion. Because there are many different approaches that result in student learning being the preponderant criterion, all 19 states that meet this goal are commended for their efforts.

Figure 66

Do states direct how teachers should be evaluated?

1. Maryland requires multiple observers for ineffective teachers.

2. Multiple evaluators are explicitly allowed but not required.

Area 3: Identifying Effective Teachers

› Goal C – Frequency of Evaluations

The state should require annual evaluations of all teachers.

Goal Components

(The factors considered in determining the states' rating for the goal.)

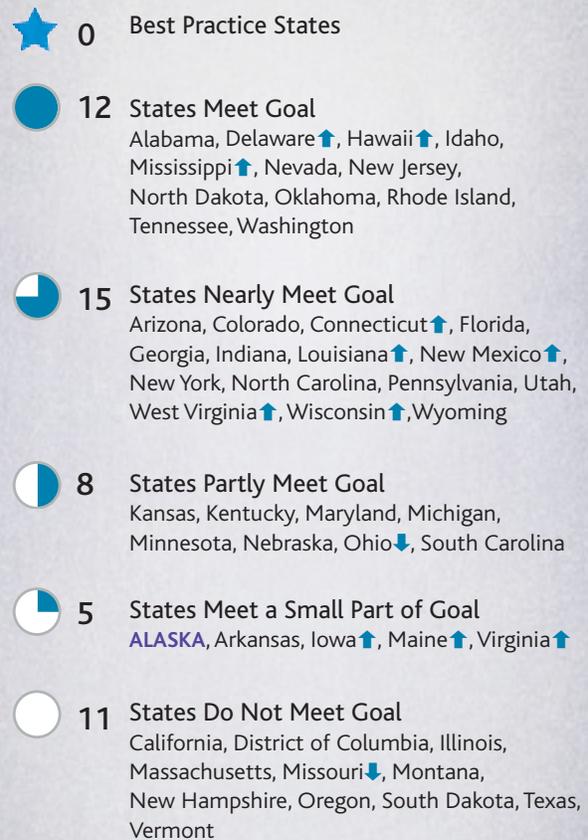

1. The state should require that all teachers receive a formal evaluation rating each year.
2. While all teachers should have multiple observations that contribute to their formal evaluation rating, the state should ensure that new teachers are observed and receive feedback early in the school year.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 68

How States are Faring in Frequency of Evaluations

Progress on this Goal Since 2011:

↑ : 11 ← : 38 ↓ : 2

3-C Analysis: Alaska

State Meets a Small Part of Goal

Progress Since 2011

ANALYSIS

Regrettably, Alaska does not ensure that all teachers are evaluated annually.

Although Alaska requires at least annual evaluations for all teachers who “met the district performance standards during the previous year,” the state allows districts to limit the evaluation of nonprobationary teachers who consistently exceed the district performance standards to one evaluation every two years.

Annual evaluations for probationary teachers in Alaska must include two classroom observations. However, there appears to be no indication from the state when these observations should occur or if teachers are offered any immediate feedback regarding their performance.

Supporting Research

Alaska Statue 14.20.149

RECOMMENDATION

■ **Require annual formal evaluations for all teachers.**

All teachers in Alaska should be evaluated annually, even those who consistently exceed district performance standards. Rather than treated as mere formalities, these teacher evaluations should serve as important tools for rewarding good teachers, helping average teachers improve and holding weak teachers accountable for poor performance. While it may be practical to reduce the number of observations for the highest performing teachers, eliminating the evaluation completely denies these teachers feedback while also suggesting that an annual evaluation is punitive in nature.

■ **Base evaluations on multiple observations.**

To guarantee that annual evaluations are based on an adequate collection of information, Alaska should require multiple observations for all teachers, even those who have nonprobationary status.

■ **Ensure that new teachers are observed and receive feedback early in the school year.**

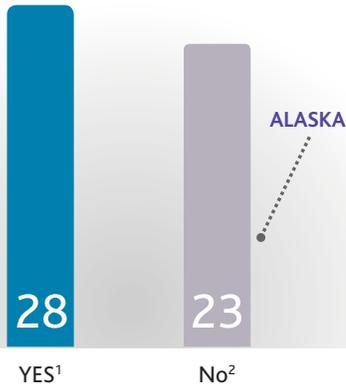

It is critical that schools and districts closely monitor the performance of new teachers. Alaska should ensure that its new teachers get the support they need and that supervisors know early on which new teachers may be struggling or at risk for unacceptable levels of performance.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

Figure 71

Do states require multiple classroom observations?

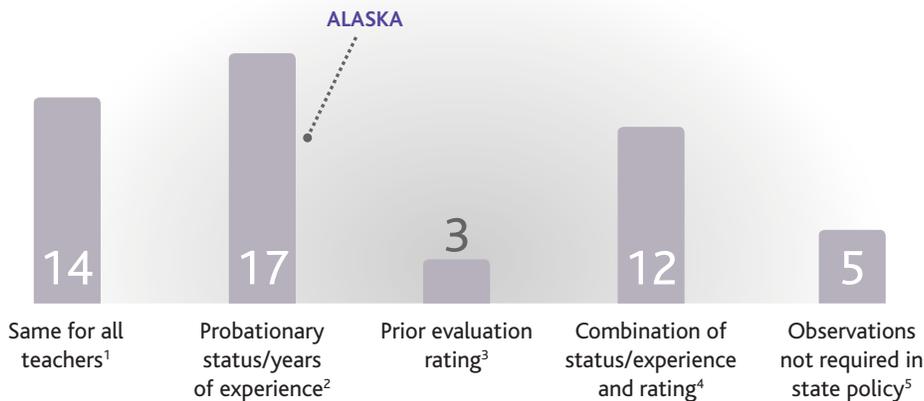

1. **Strong Practice:** Alabama, Arkansas, Connecticut, Georgia, Hawaii, Idaho, Indiana, Mississippi, New Jersey, New Mexico, New York, North Carolina, Rhode Island, Tennessee, Washington

2. Alaska, Arizona, Colorado, Delaware, Florida, Illinois, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Nebraska, Nevada, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Virginia, West Virginia, Wisconsin

3. California, District of Columbia, Iowa, Maine, Massachusetts, Missouri, Montana, New Hampshire, North Dakota, South Dakota, Texas, Utah, Vermont, Wyoming

Figure 72

What is the determining factor for frequency of observations?

1. Alabama, District of Columbia⁶, Georgia, Hawaii, Idaho, Indiana, Iowa, Maine, Mississippi, Missouri, New Jersey, New Mexico, New York, Rhode Island

2. Alaska, Arkansas⁷, California⁷, Colorado, Florida, Kansas⁷, Minnesota⁷, Nebraska, North Carolina, Oklahoma⁷, Oregon, Pennsylvania⁷, South Carolina, South Dakota⁷, Utah⁷, Washington, West Virginia⁸

3. Louisiana, Michigan, Ohio

4. Arizona⁹, Connecticut, Delaware, Illinois, Kentucky, Maryland, Massachusetts⁷, Nevada, Tennessee, Texas⁷, Virginia⁷, Wisconsin⁷

5. Montana, New Hampshire, North Dakota, Vermont, Wyoming

6. Depends on LEA requirements.

7. Frequency is based on evaluation cycle, not year.

8. No observations required after year 5.

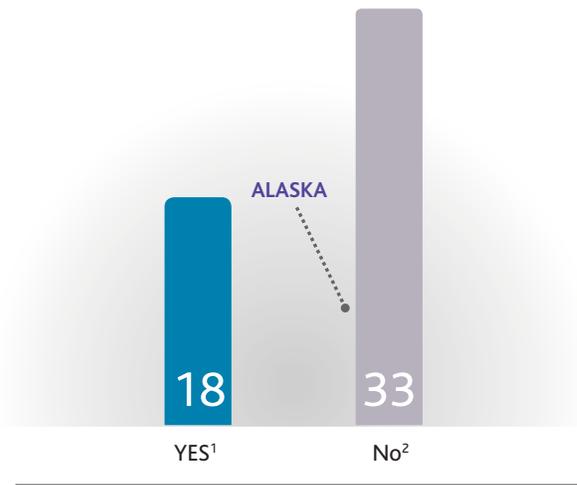

9. Second observation may be waived for tenured teachers with high performance on first observation.

★ **EXAMPLES OF BEST PRACTICE**

NCTQ is not awarding “best practice” honors for frequency of evaluations but commends **Alabama, Hawaii, Idaho, Mississippi, New Jersey, Tennessee** and **Washington**. These states not only require annual evaluations and multiple observations for all teachers, but they also ensure that new teachers are observed and receive feedback during the first half of the school year.

Figure 73

Do states require that new teachers are observed early in the year?

1. **Strong Practice:** Alabama, Delaware, Hawaii, Idaho, Kansas, Kentucky, Minnesota, Mississippi, Nebraska, Nevada, New Jersey, North Dakota³, Oklahoma, Rhode Island, South Carolina, Tennessee, Washington, West Virginia

2. Alaska, Arizona, Arkansas, California, Colorado, Connecticut, District of Columbia, Florida, Georgia, Illinois, Indiana, Iowa, Louisiana, Maine, Maryland, Massachusetts, Michigan, Missouri, Montana, New Hampshire, New Mexico, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Dakota, Texas, Utah, Vermont, Virginia⁴, Wisconsin, Wyoming

3. New teachers must be evaluated early in the year; observations not explicit.

4. Teachers in their first year are informally evaluated early in the year.

Area 3: Identifying Effective Teachers

› Goal D – Tenure

The state should require that tenure decisions are based on evidence of teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

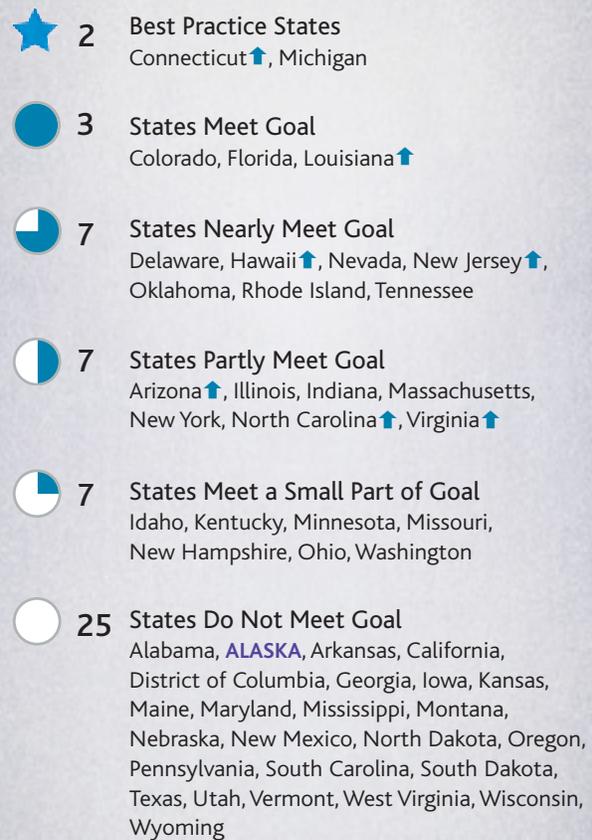

1. A teacher should be eligible for tenure after a certain number of years of service, but tenure should not be granted automatically at that juncture.
2. Evidence of effectiveness should be the preponderant criterion in tenure decisions.
3. The minimum years of service needed to achieve tenure should allow sufficient data to be accumulated on which to base tenure decisions; four to five years is the ideal minimum.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 74

How States are Faring in Tenure

Progress on this Goal Since 2011:

↑ : 7 ↔ : 44 ↓ : 0

3-D Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not connect tenure decisions to evidence of teacher effectiveness.

Teachers in Alaska are awarded tenure automatically after a three-year probationary period, absent an additional process that evaluates cumulative evidence of teacher effectiveness.

A bill was struck down earlier this year that would have extended the probationary period to five years for new teachers.

Supporting Research

Alaska Statute 14.20.150

HB 162 (2013)

RECOMMENDATION

■ End the automatic awarding of tenure.

The decision to grant tenure should be a deliberate one, based on consideration of a teacher's commitment and actual evidence of classroom effectiveness.

■ Ensure evidence of effectiveness is the preponderant criterion in tenure decisions.

Alaska should make evidence of effectiveness, rather than the number of years in the classroom, the most significant factor when determining this leap in professional standing.

■ Articulate a process that local districts must administer when deciding which teachers get tenure.

Alaska should require a clear process, such as a hearing, to ensure that the local district reviews a teacher's performance before making a determination regarding tenure.

■ Require a longer probationary period.

Alaska should extend its probationary period, ideally to five years. This would allow sufficient time to collect data that adequately reflect teacher performance.

ALASKA RESPONSE TO ANALYSIS

Alaska asserted that the award of tenure is contingent on an evaluation under the district's evaluation system stating that the teacher's performance meets the district performance standards.

Supporting Research

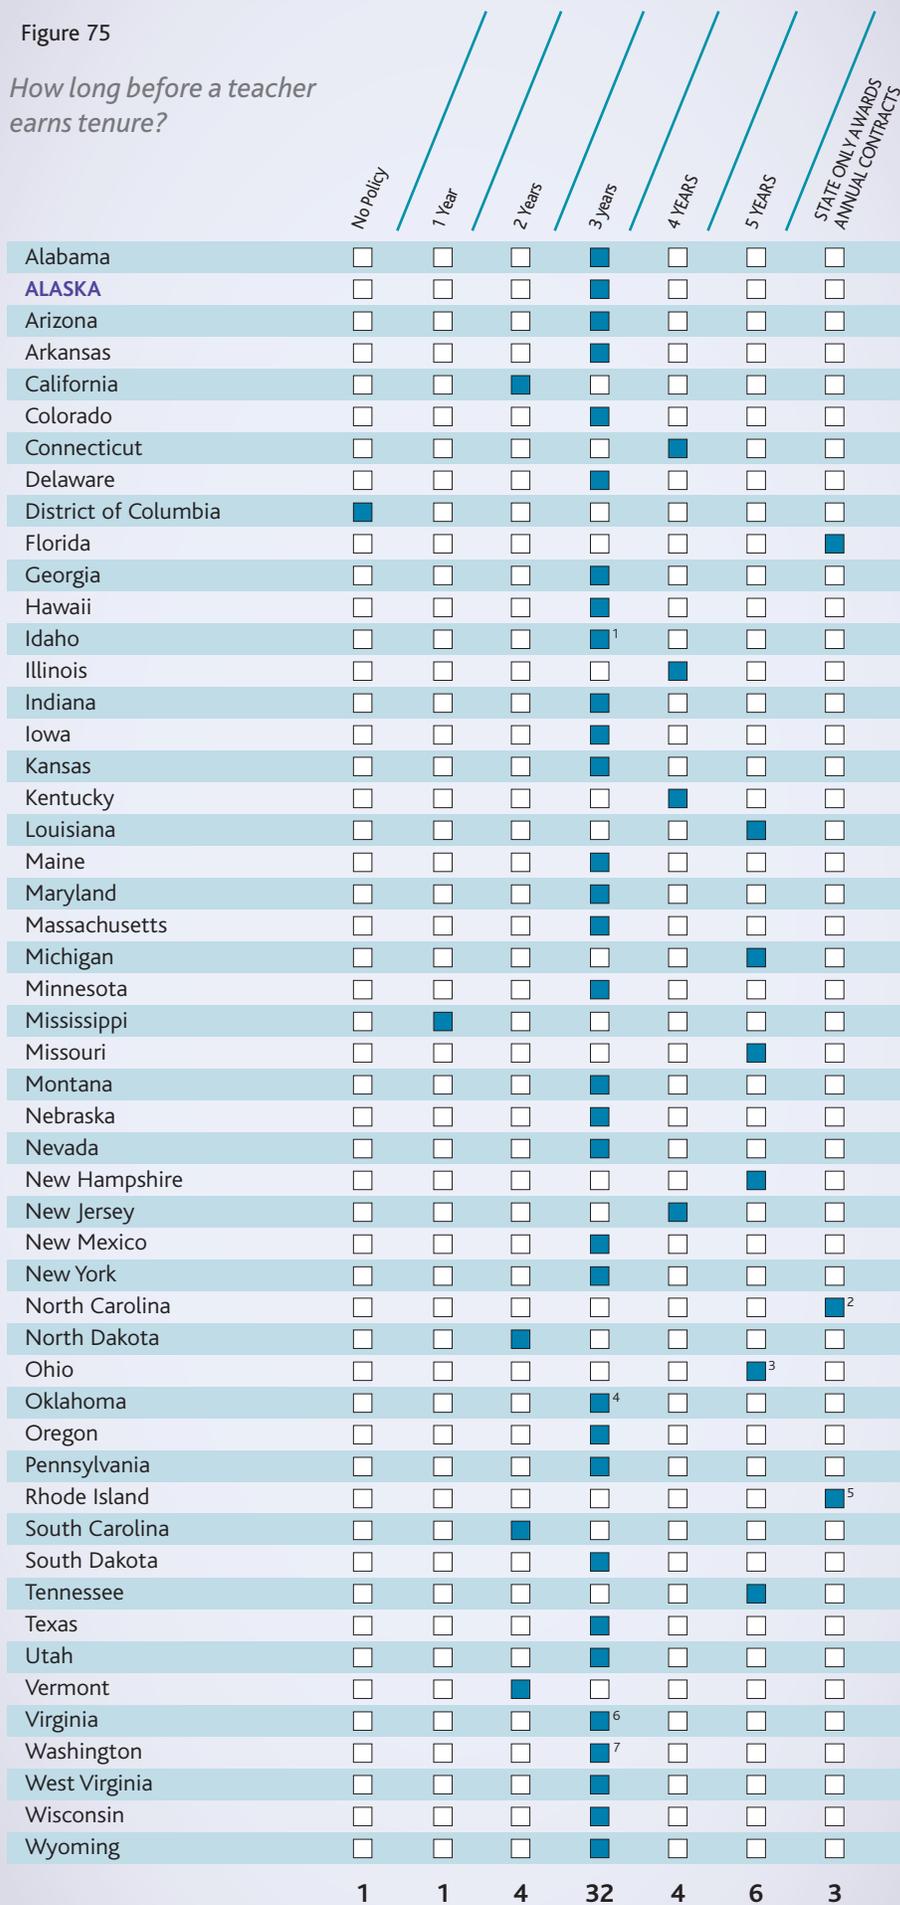

Alaska Statute 14.20.150(a)(3)

LAST WORD

The state has not presented any evidence that an additional process evaluating cumulative evidence of teacher effectiveness is required for tenure.

Figure 75

How long before a teacher earns tenure?

1. Idaho limits teacher contract terms to one year.
2. A teacher can receive up to a 4-year contract if deemed proficient on evaluation.
3. Teachers must hold an educator license for at least seven years and have taught in the district at least three of the last five years.
4. Teachers may also earn career status with an average rating of at least effective for a four-year period and a rating of at least effective for the last two years.
5. While technically not on annual contracts, Rhode Island teachers who receive two years of ineffective ratings are dismissed.
6. Local school board may extend up to five years.
7. At a district's discretion, a teacher may be granted tenure after the second year if he/she receives one of the top two evaluation ratings.

★ EXAMPLES OF BEST PRACTICE

Connecticut and **Michigan** appropriately base tenure decisions on evidence of teacher effectiveness. In Connecticut, tenure is awarded after four years and must be earned on the basis of effective practice as demonstrated in evaluation ratings. Michigan requires a probationary period of five years, with teachers having to earn a rating of effective or highly effective on their three most recent performance evaluations. Both states require that student growth be the preponderant criterion of teacher evaluations.

	11	9	31

1. Florida only awards annual contracts.

2. North Carolina has recently eliminated tenure. The state requires some evidence of effectiveness in awarding multiple-year contracts.

3. Oklahoma has created a loophole by essentially waiving student learning requirements and allowing the principal of a school to petition for career-teacher status.

Area 3: Identifying Effective Teachers

› Goal E – Licensure Advancement

The state should base licensure advancement on evidence of teacher effectiveness.

Goal Components

(The factors considered in determining the states' rating for the goal.)

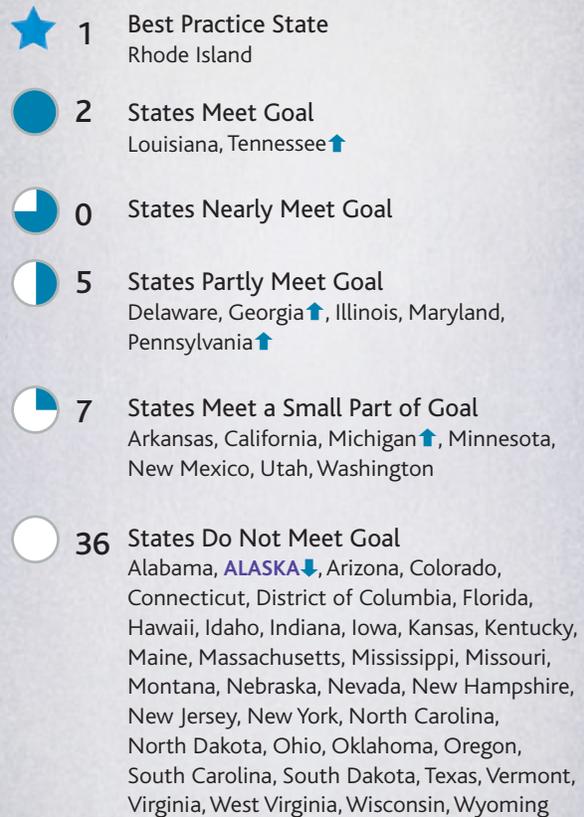

1. The state should base advancement from a probationary to a nonprobationary license on evidence of effectiveness.
2. The state should not require teachers to fulfill generic, unspecified coursework requirements to advance from a probationary to a nonprobationary license.
3. The state should not require teachers to have an advanced degree as a condition of professional licensure.
4. Evidence of effectiveness should be a factor in the renewal of a professional licenses.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 77

How States are Faring in Licensure Advancement

Progress on this Goal Since 2011:

↑ : 4 ↔ : 46 ↓ : 1

3-E Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska's requirements for licensure advancement and renewal are not based on evidence of teacher effectiveness.

Teacher certification in Alaska is a three-tiered system consisting of Initial, Professional and Master certification. To advance from the Initial Teacher Certificate (valid for three years and nonrenewable) to the Professional Teacher Certificate (valid for five years and renewable), the state requires that teachers pass a competency examination if they have not yet met this requirement as of the date of the Initial Teacher Certificate as well as a Praxis II content area examination. They must also complete three semester hours in Alaska studies and three semester hours in multicultural education or cross-cultural communications. During the period of the Initial Certificate, teachers must complete an accepted teacher education program. Finally, as determined by each department, teachers must complete any additional academic training deemed "necessary for personal development." To earn the state's optional Master Certificate, teachers must receive National Board certification.

Alaska does not require that teachers demonstrate effectiveness in order to renew a professional license. The state requires that teachers earn six credits from a regionally accredited university for renewal or reinstatement of a regular five-year certificate.

Supporting Research

<http://www.eed.state.ak.us/teachercertification/Certification.html>

<http://www.eed.state.ak.us/teachercertification/TPR/>

RECOMMENDATION

■ **Require evidence of effectiveness as a part of teacher licensing policy.**

Alaska should require evidence of effectiveness to be a factor in determining whether teachers can renew their licenses or advance to a higher-level license. While the requirement to present evidence of classroom performance may be a step in the right direction, the state should consider additional requirements that base professional licensure on evidence of teacher effectiveness as measured by objective evidence of student achievement. Alaska should use evidence of effectiveness from teacher evaluations as a factor in determining whether teachers advance to the next licensure level (see Goal 3-B). However, states must consider carefully how to use this evidence, as the standard for denying licensure—the right to practice in the state—should not necessarily be the same standard that might result in termination from a particular position.

■ **Discontinue licensure requirements with no direct connection to classroom effectiveness.**

Alaska's stipulation regarding academic training deemed necessary for personal development is vague and leaves the door open for requiring unwarranted coursework. While some targeted requirements may potentially expand teacher knowledge and improve teacher practice, Alaska's coursework requirements do not correlate with teacher effectiveness.

■ **Require teachers to pass content knowledge assessments as a condition of initial licensing, not advanced licensing.**

Alaska places students at risk by requiring passage of both basic and subject-area licensure tests to attain professional licensure rather than for an initial license. The state's policy allows teachers who may not be able to pass basic skills or content knowledge tests to teach for three years on an initial license.

ALASKA RESPONSE TO ANALYSIS

Alaska was helpful in providing NCTQ with facts that enhanced this analysis.

	6	4	9	32

1. Evidence of effectiveness is required for license renewal but not for conferring of professional license.
2. Illinois allows revocation of licenses based on ineffectiveness.
3. Maryland uses some objective evidence through their evaluation systems for renewal, but advancement to professional license is still based on earning an advanced degree.

Figure 79

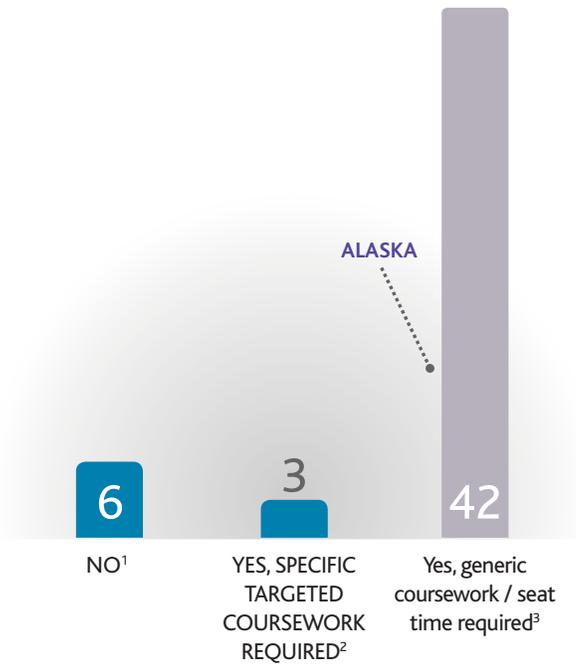

Do states require teachers to earn advanced degrees before conferring professional licensure?

- Strong Practice:** Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Kansas, Maine, Michigan, Minnesota, Nevada, New Hampshire, New Jersey, North Carolina, North Dakota, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Vermont, Washington, Wisconsin, Wyoming
- Connecticut, Kentucky, Maryland, Mississippi, Montana, New York and Oregon all require a master's degree or coursework equivalent to a master's degree.
- Illinois, Massachusetts, Missouri
- Alabama, Hawaii, Indiana, Iowa, Louisiana, Nebraska, New Mexico, Ohio, South Carolina, Utah, Virginia, West Virginia

Figure 80

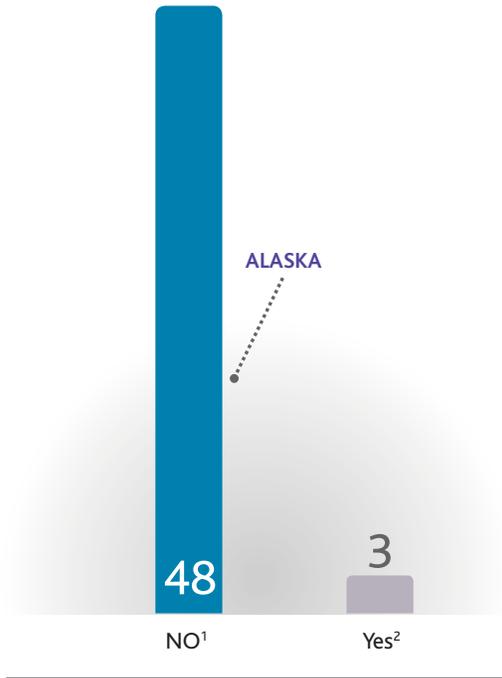

Do states require teachers to take additional coursework before conferring or renewing professional licenses?

- Strong Practice:** Hawaii, Louisiana, New Jersey, New Mexico, Rhode Island, Tennessee
- Strong Practice:** California, Georgia, Minnesota
- Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New York, North Carolina⁴, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming
- Some required coursework is targeted.

Figure 81

Do states award lifetime licenses?

★ EXAMPLE OF BEST PRACTICE

Rhode Island is integrating certification, certification renewal and educator evaluations. Teachers who receive poor evaluations for five consecutive years are not eligible to renew their licenses. In addition, teachers who consistently receive "highly effective" ratings will be eligible for a special license designation.

1. **Strong Practice:** Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut³, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Wisconsin, Wyoming
2. New Jersey, Pennsylvania, West Virginia
3. Although teachers in Connecticut must renew their licenses every five years, there are no requirements for renewal.

Area 3: Identifying Effective Teachers

› Goal F – Equitable Distribution

The state should publicly report districts' distribution of teacher talent among schools to identify inequities in schools serving disadvantaged children.

Goal Components

(The factors considered in determining the states' rating for the goal.)

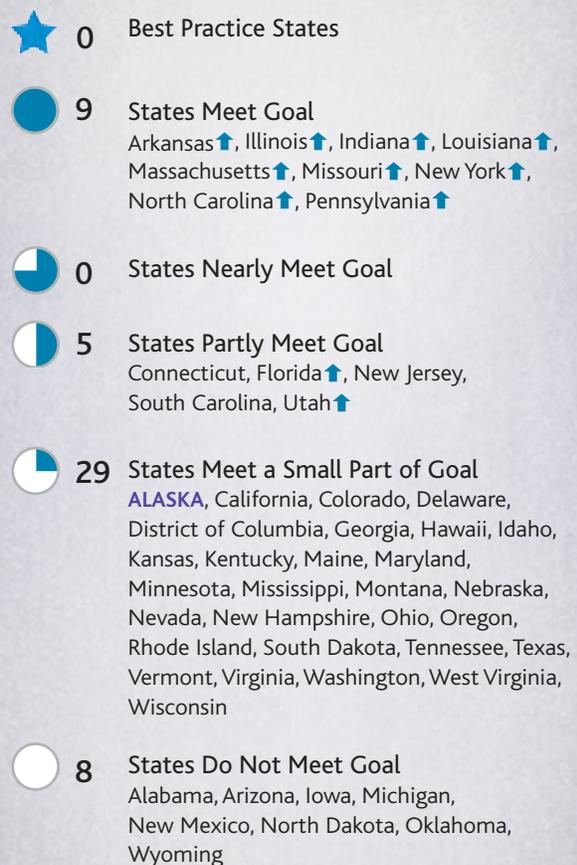

1. The state should make aggregate school-level data about teacher performance—from an evaluation system based on instructional effectiveness as described in Goal 3-B—publicly available.
2. In the absence of such an evaluation system, the state should make the following data publicly available:
 - a. An “Academic Quality” index for each school that includes factors research has found to be associated with teacher effectiveness such as:
 - percentage of new teachers;
 - percentage of teachers failing basic skills licensure tests at least once;
 - percentage of teachers on emergency credentials;
 - average selectivity of teachers' undergraduate institutions and
 - teachers' average ACT or SAT scores
 - b. The percentage of highly qualified teachers disaggregated by both individual school and by teaching area.
 - c. The annual teacher absenteeism rate reported for the previous three years, disaggregated by individual school.
 - d. The average teacher turnover rate for the previous three years, disaggregated by individual school, by district and by reasons that teachers leave.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Progress on this Goal Since 2011:

↑ : 11 ↔ : 40 ↓ : 0

3-F Analysis: Alaska

State Meets a Small Part of Goal

Progress Since 2011

ANALYSIS

Providing comprehensive reporting may be the state's most important role for ensuring the equitable distribution of teachers among schools. Alaska reports little school-level data that can help support the equitable distribution of teacher talent among schools within districts.

Alaska does not require districts to publicly report aggregate school-level data about teacher performance, nor does the state collect and publicly report most of the other data recommended by NCTQ. Alaska does not provide a school-level teacher-quality index that demonstrates the academic backgrounds of a school's teachers and the ratio of new to veteran teachers. The state also does not report on teacher absenteeism or turnover rates.

Alaska does report on the percentage of highly qualified teachers and educational attainment of teachers. Commendably, these data are reported for each school, rather than just aggregated by district. The state is also commended for comparing the percentage of highly qualified teachers at high- and low-poverty schools statewide.

<http://www.eed.state.ak.us/reportcardtothepublic/> Alaska State Report Card to the Public 2011-2012 <http://www.eed.state.ak.us/reportcard/2011-2012/reportcard2011-12.pdf>

Educator Evaluation FAQs http://www.eed.alaska.gov/TeacherCertification/pdf/evaluation_reg_faqs.pdf

RECOMMENDATION

■ Report school-level teacher effectiveness data.

Alaska should make aggregate school-level data about teacher performance—from an evaluation system based on instructional effectiveness—publicly available. Given that Alaska requires teacher evaluations to be based to a significant extent on evidence of student learning (see Goal 3-B), such data about the effectiveness of a school's teachers can shine a light on how equitably teachers are distributed across and within school districts.

■ Publish other data that facilitate comparisons across schools.

Alaska should collect and report other school-level data that reflect the stability of a school's faculty, including the rates of teacher absenteeism and turnover.

■ Provide comparative data based on school demographics.

As Alaska does with highly qualified teachers, the state should provide comparative data for schools with similar poverty and minority populations. This would yield a more comprehensive picture of gaps in the equitable distribution of teachers.

ALASKA RESPONSE TO ANALYSIS

Alaska was helpful in providing NCTQ with facts that enhanced this analysis.

EXAMPLES OF BEST PRACTICE

Although not awarding “best practice” honors for this goal, NCTQ commends the nine states that meet the goal for giving the public access to teacher performance data aggregated to the school level. This transparency can help shine a light on how equitably teachers are distributed across and within school districts and help to ensure that all students have access to effective teachers.

Figure 84

Do states publicly report school-level data about teacher effectiveness?

1. **Strong Practice:** Arkansas³, Illinois, Indiana, Louisiana, Massachusetts⁴, Missouri, New York, North Carolina, Pennsylvania

2. Alabama, Alaska, Arizona, California, Colorado, Connecticut, Delaware, District of Columbia, Florida⁵, Georgia, Hawaii, Idaho, Iowa, Kansas, Kentucky, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah⁵, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

3. Reporting of teacher effectiveness data will begin in 2017.

4. Massachusetts' evaluation system is not based primarily on evidence of teacher effectiveness.

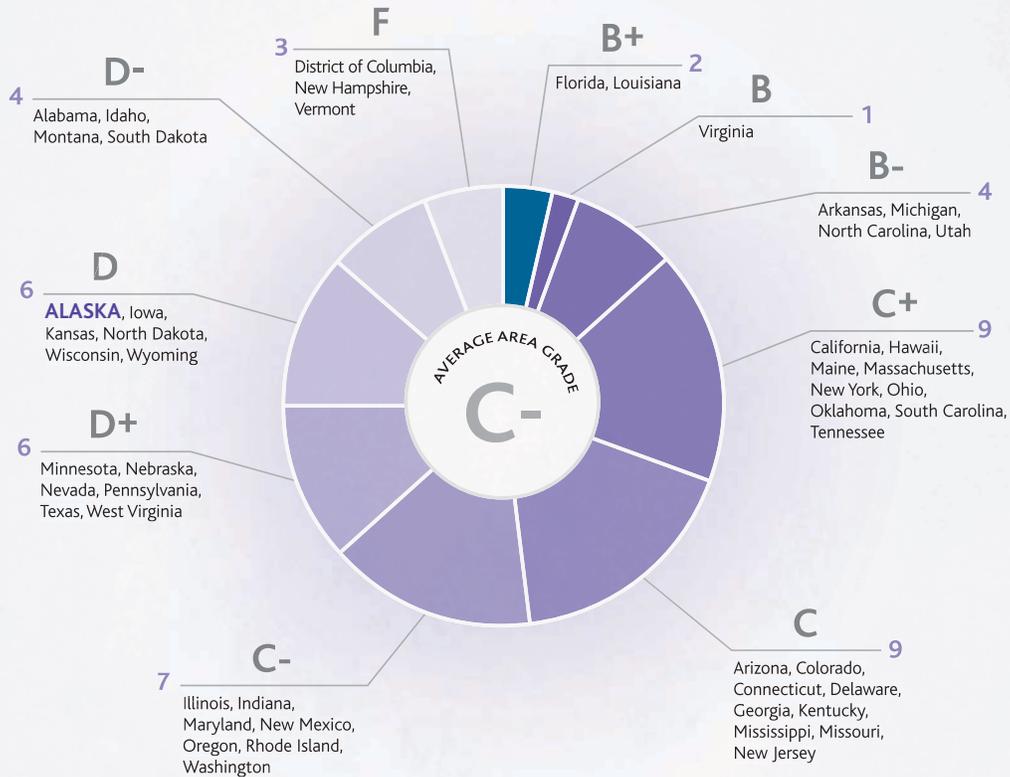

5. Reports data about teacher effectiveness at the district level.

Area 4 Summary

How States are Faring in Retaining Effective Teachers

State Area Grades

Topics Included In This Area

4-A: Induction

4-B: Professional Development

4-C: Pay Scales

4-D: Compensation for Prior Work Experience

4-E: Differential Pay

4-F: Performance Pay

Area 4: Retaining Effective Teachers

› Goal A – Induction

The state should require effective induction for all new teachers, with special emphasis on teachers in high-need schools.

Goal Components

(The factors considered in determining the states' rating for the goal.)

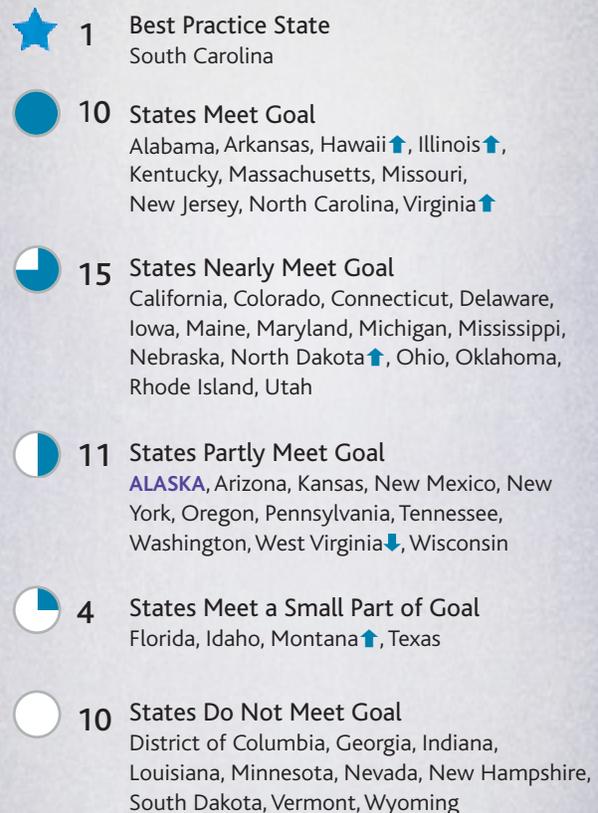

1. The state should ensure that new teachers receive mentoring of sufficient frequency and duration, especially in the first critical weeks of school.
2. Mentors should be carefully selected based on evidence of their own classroom effectiveness and subject-matter expertise. Mentors should be trained, and their performance as mentors should be evaluated.
3. Induction programs should include only strategies that can be successfully implemented, even in a poorly managed school. Such strategies include intensive mentoring, seminars appropriate to grade level or subject area, a reduced teaching load and frequent release time to observe effective teachers.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 85

How States are Faring in Induction

Progress on this Goal Since 2011:

↑ : 5 ↔ : 45 ↓ : 1

4-A Analysis: Alaska

State Partly Meets Goal

Progress Since 2011

ANALYSIS

Alaska does not require a mentoring program or other induction support for all of its new teachers, although it does offer a voluntary Alaska Statewide Mentor Project for its new teachers in rural districts. With additional federal funding the mentoring program will be expanded to include urban districts. The mentors are teachers with extensive classroom experience who receive formal training in eight three-day Mentor Academy sessions held over two years.

Supporting Research

The Alaska Statewide Mentor Project <http://www2.ed.gov/programs/innovation/2011/u411b110072narrative.pdf>

Alaska State Board of Education Retreat Minutes and Agenda for January 25-56, 2012 <http://www.alaska.edu/bor/>

RECOMMENDATION

- **Ensure that a high-quality mentoring experience is available to all new teachers, especially those in low-performing schools.**

Although Alaska does provide mentoring to teachers in its intervention districts, the state should ensure that all new teachers—especially any teacher in a low-performing school—receive mentoring support, especially in the first critical weeks of school. Alaska should continue to work toward expanding its program throughout the state.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

★ **EXAMPLE OF BEST PRACTICE**

South Carolina requires that all new teachers, prior to the start of the school year, be assigned mentors for at least one year. Districts carefully select mentors based on experience and similar certifications and grade levels, and mentors undergo additional training. Adequate release time is mandated by the state so that mentors and new teachers may observe each other in the classroom, collaborate on effective teaching techniques and develop professional growth plans. Mentor evaluations are mandatory and stipends are recommended.

Figure 87

Do states have policies that articulate the elements of effective induction?

1. **Strong Practice:** Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Nebraska, New Jersey, North Carolina, North Dakota, Ohio, Oklahoma, Rhode Island, South Carolina, Utah, Virginia

2. Alaska, Arizona, Florida, Kansas, Montana, New Mexico, New York, Oregon, Pennsylvania, Tennessee, Texas, Washington, West Virginia, Wisconsin

3. District of Columbia, Georgia, Idaho, Indiana, Louisiana, Minnesota, Nevada, New Hampshire, South Dakota, Vermont, Wyoming

Area 4: Retaining Effective Teachers

› Goal B – Professional Development

The state should ensure that teachers receive feedback about their performance and require professional development to be based on needs identified through teacher evaluations.

Goal Components

(The factors considered in determining the states' rating for the goal.)

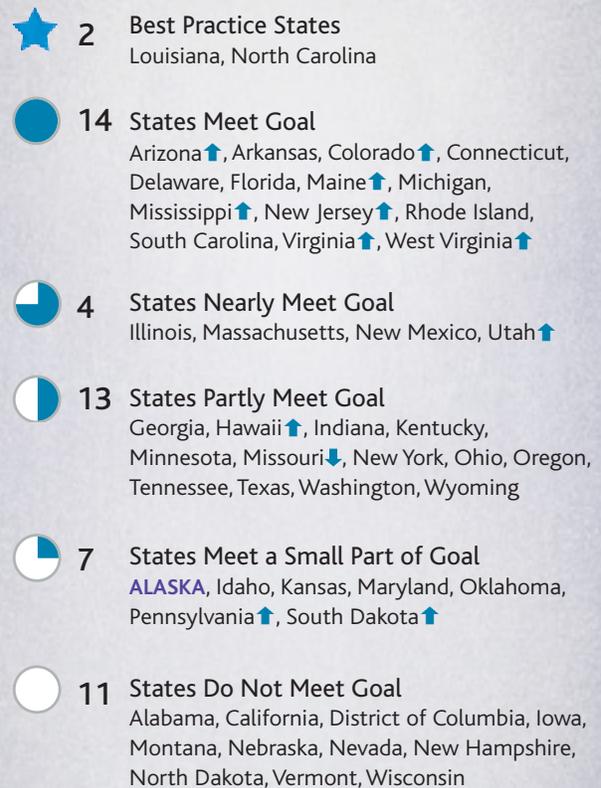

1. The state should require that evaluation systems provide teachers with feedback about their performance.
2. The state should require that all teachers who receive a rating of ineffective/unsatisfactory or needs improvement on their evaluations be placed on an improvement plan.
3. The state should direct districts to align professional development activities with findings from teachers' evaluations.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 88

How States are Faring in Professional Development

Progress on this Goal Since 2011:

↑ : 11 ↔ : 39 ↓ : 1

4-B Analysis: Alaska

State Meets a Small Part of Goal

Progress Since 2011

ANALYSIS

Alaska articulates that teachers are entitled to copies of their evaluations. New evaluation guidelines specify that teachers receiving a rating of basic on two or more standards be provided district support and assistance on the standards in question. In addition, "the district may optionally develop a plan of professional growth in consultation with the educator." An improvement plan is required for all tenured teachers not meeting district performance standards on evaluations.

Supporting Research

Educator Evaluators FAQs <http://www.eed.alaska.gov/educators.html>

Alaska Statute 14.20.149 (b) (6) and (e)

4 AAC 19

RECOMMENDATION

- **Require that evaluation systems provide teachers with feedback about their performance.**

Although Alaska requires teachers to receive copies of their evaluations, this only ensures that teachers will receive their ratings, not necessarily feedback on their performance. Alaska should specify that all teachers should receive specific feedback on identified strengths and areas that need improvement.

- **Ensure that professional development is aligned with findings from teachers' evaluations.**

Professional development that is not informed by evaluation results may be of little value to teachers' professional growth and aim of increasing their effectiveness in the classroom. Alaska should make it mandatory rather than an option that districts utilize teacher evaluation results in determining professional development needs and activities for all teachers. Professional development should be available to all teachers, not just those with a rating of basic on two or more standards.

- **Ensure that teachers receiving less than effective ratings are placed on a professional improvement plan.**

Alaska should adopt a policy requiring that all teachers who receive even one unsatisfactory evaluation be placed on structured improvement plans, not just tenured teachers. These plans should focus on performance areas that directly connect to student learning and should list noted deficiencies, define specific action steps necessary to address these deficiencies and describe how and when progress will be measured.

ALASKA RESPONSE TO ANALYSIS

Alaska stated that in order for a district's evaluation system to be in full compliance with statutes and regulations, the system must be designed to improve the performance of the district's educators. The state added that the system must provide information and analyses that help the educator grow professionally and improve the effectiveness of instruction.

Supporting Research

AS 14.20.149(a)

4 AAC 19.010 (a)

★ EXAMPLES OF BEST PRACTICE

Louisiana and **North Carolina** require that teachers receive feedback about their performance from their evaluations and direct districts to connect professional development to teachers' identified needs. Both states also require that teachers with unsatisfactory evaluations are placed on structured improvement plans. These improvement plans include specific performance goals, a description of resources and assistance provided, as well as timelines for improvement.

4. Wisconsin's educator effectiveness system requires that evaluations inform professional development, but it is still in the pilot stages. Full implementation will not begin until 2014-15.

Area 4: Retaining Effective Teachers

› Goal C – Pay Scales

The state should give local districts authority over pay scales.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. While the state may find it appropriate to articulate teachers' starting salaries, it should not require districts to adhere to a state-dictated salary schedule that defines steps and lanes and sets minimum pay at each level.
2. The state should discourage districts from tying additional compensation to advanced degrees. The state should eliminate salary schedules that establish higher minimum salaries or other requirements to pay more to teachers with advanced degrees.
3. The state should discourage salary schedules that imply that teachers with the most experience are the most effective. The state should eliminate salary schedules that require that the highest steps on the pay scale be determined solely by seniority.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 92

How States are Faring in Pay Scales

Progress on this Goal Since 2011:

↑ : 5 ↔ : 45 ↓ : 1

4-C Analysis: Alaska

State Partly Meets Goal

Progress Since 2011

ANALYSIS

Alaska gives local districts the authority for pay scales, eliminating barriers such as state salary schedules and other regulations that control how districts pay teachers. The state allows administrators to “determine and disburse the total amount to be made available for compensation of all school employees.”

Supporting Research

Alaska Statutes 14.14.090

RECOMMENDATION

- **Discourage districts from tying compensation to advanced degrees.**

While still leaving districts the flexibility to establish their own pay scale, Alaska should articulate policies that definitively discourage districts from tying compensation to advanced degrees, in light of the extensive research showing that such degrees do not have an impact on teacher effectiveness.

- **Discourage salary schedules that imply that teachers with the most experience are the most effective.**

Similarly, Alaska should articulate policies that discourage districts from determining the highest steps on the pay scale solely by seniority.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

★ EXAMPLES OF BEST PRACTICE

Florida and **Indiana** allow local districts to develop their own salary schedules while preventing districts from prioritizing elements not associated with teacher effectiveness. In Florida, local salary schedules must ensure that the most effective teachers receive salary increases greater than the highest salary adjustment available. Indiana requires local salary scales to be based on a combination of factors and limits the years of teacher experience and content-area degrees to account for no more than one-third of this calculation.

Figure 93

	3	1	32	15

1. For advanced degrees earned after April 2014.

2. Rhode Island requires local district salary schedules to include teacher "training".

3. Texas has a minimum salary schedule based on years of experience. Compensation for advanced degrees is left to district discretion.

4. Beginning in 2015-2016.

Area 4: Retaining Effective Teachers

› Goal D – Compensation for Prior Work Experience

The state should encourage districts to provide compensation for related prior subject-area work experience.

Goal Component

(The factor considered in determining the states' rating for the goal.)

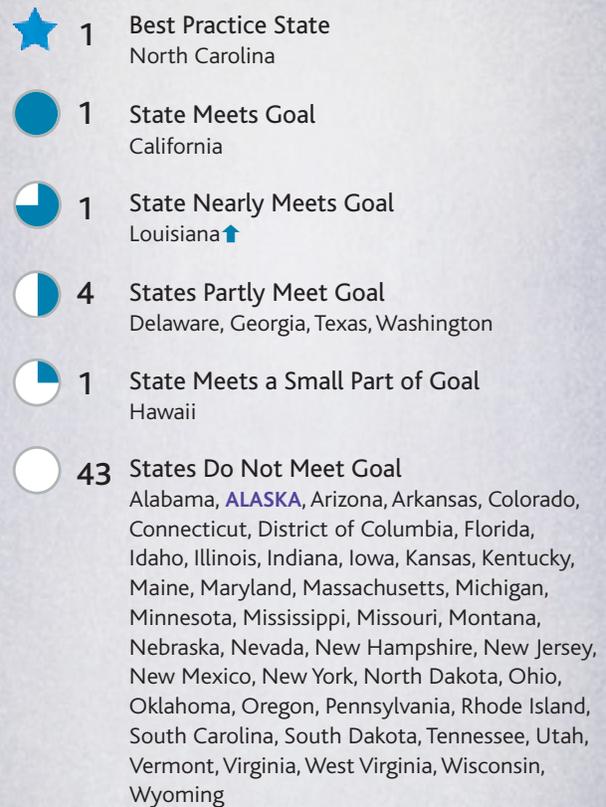

1. The state should encourage districts to compensate new teachers with relevant prior work experience through mechanisms such as starting these teachers at an advanced step on the pay scale. Further, the state should not have regulatory language that blocks such strategies.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 95

How States are Faring in Compensation for Prior Work Experience

Progress on this Goal Since 2011:

↑ : 1 ↔ : 50 ↓ : 0

4-D Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not encourage local districts to provide compensation for related prior subject-area work experience. However, the state does not seem to have regulatory language blocking such strategies.

RECOMMENDATION

- **Encourage local districts to compensate new teachers with relevant prior work experience.**

While still leaving districts with the flexibility to determine their own pay scales, Alaska should encourage districts to incorporate mechanisms such as starting these teachers at a higher salary than other new teachers. Such policies would be attractive to career changers with related work experience, such as in the STEM subjects.

ALASKA RESPONSE TO ANALYSIS

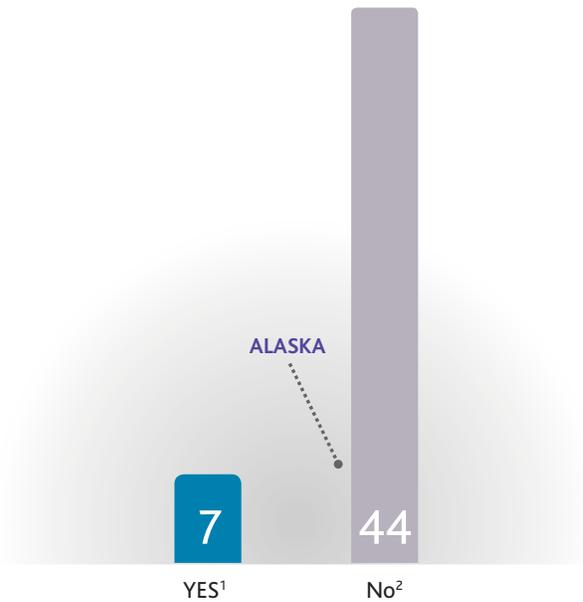

Alaska recognized the factual accuracy of this analysis.

★ EXAMPLE OF BEST PRACTICE

North Carolina compensates new teachers with relevant prior-work experience by awarding them one year of experience credit for every year of full-time work after earning a bachelor's degree that is related to their area of licensure and work assignment. One year of credit is awarded for every two years of work experience completed prior to earning a bachelor's degree.

Figure 96

Do states direct districts to compensate teachers for related prior work experience?

1. **Strong Practice:** California, Delaware, Georgia, Louisiana, North Carolina, Texas, Washington

2. Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, District of Columbia, Florida, Hawaii³, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, West Virginia, Wisconsin, Wyoming

3. Hawaii's compensation is limited to prior military experience.

Area 4: Retaining Effective Teachers

› Goal E – Differential Pay

The state should support differential pay for effective teaching in shortage and high-need areas.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support differential pay for effective teaching in shortage subject areas.
2. The state should support differential pay for effective teaching in high-need schools.
3. The state should not have regulatory language that would block differential pay.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 97

How States are Faring in Differential Pay

Progress on this Goal Since 2011:

↑ : 3 ↔ : 46 ↓ : 2

4-E Analysis: **Alaska**

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska neither supports differential pay by which a teacher can earn additional compensation by teaching certain subjects nor offers incentives to teach in high-need schools. However, the state has no regulatory language that would directly block districts from providing differential pay.

RECOMMENDATION

- **Support differential pay initiatives for effective teachers in both subject-shortage areas and high-need schools**

Alaska should encourage districts to link compensation to district needs. Such policies can help districts achieve a more equitable distribution of teachers.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

Wyoming	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	22	7	15	11	20

1. Maryland offers tuition reimbursement for teacher retraining in specified shortage subject areas and offers a stipend for alternate route candidates teaching in subject shortage areas.

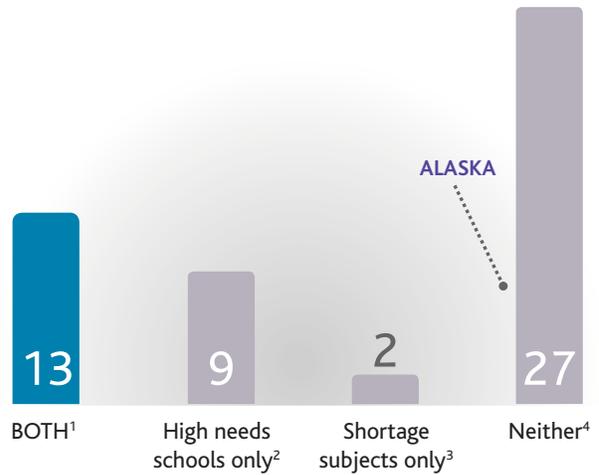

2. South Dakota offers scholarships to teachers in high-need schools.

★ **EXAMPLE OF BEST PRACTICE**

Georgia supports differential pay by which teachers can earn additional compensation by teaching certain subjects. The state is especially commended for its compensation strategy for math and science teachers, which moves teachers along the salary schedule rather than just providing a bonus or stipend. The state also supports differential pay initiatives to link compensation more closely with district needs and to achieve a more equitable distribution of teachers.

Figure 99

Do states support differential pay for teaching in high need schools and shortage subjects?

1. **Strong Practice:** Arkansas, California, Florida, Georgia, Kentucky, Louisiana, Nevada, New Mexico, New York, Ohio, Oklahoma, Tennessee, Virginia
2. Colorado, Delaware, Hawaii, Maryland, North Carolina, Texas, Washington, Wisconsin, Wyoming
3. Pennsylvania, Utah
4. Area 4: Retaining Effective Teachers

› Goal F – Performance Pay

The state should support performance pay, but in a manner that recognizes its appropriate uses and limitations.

Goal Components

(The factors considered in determining the states' rating for the goal.)

1. The state should support performance pay efforts, rewarding teachers for their effectiveness in the classroom.
2. The state should allow districts flexibility to define the criteria for performance pay provided that such criteria connect to evidence of student achievement.
3. Any performance pay plan should allow for the participation of all teachers, not just those in tested subjects and grades.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 100

How States are Faring in Performance Pay

Progress on this Goal Since 2011:

↑ : 6 ↔ : 42 ↓ : 3

4-F Analysis: **Alaska**

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not support performance pay. The state does not have any policies in place that offer teachers additional compensation based on evidence of effectiveness.

RECOMMENDATION

- **Support a performance pay plan that recognizes teachers for their effectiveness.**

Whether it implements the plan at the state or local level, Alaska should ensure that performance pay structures thoughtfully measure classroom performance and connect student achievement to teacher effectiveness. The plan must be developed with careful consideration of available data and subsequent issues of fairness.

- **Consider piloting performance pay in a select number of school districts.**

This would provide an opportunity to discover and correct any limitations in available data or methodology before implementing the plan on a wider scale.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

Figure 101

 **EXAMPLES OF BEST PRACTICE**

An increasing number of states are supporting performance pay initiatives. **Florida** and **Indiana** are particularly noteworthy for their efforts to build performance into the salary schedule. Rather than award bonuses, teachers' salaries will be based in part on their performance in the classroom.

1. Nebraska's initiative does not go into effect until 2016.

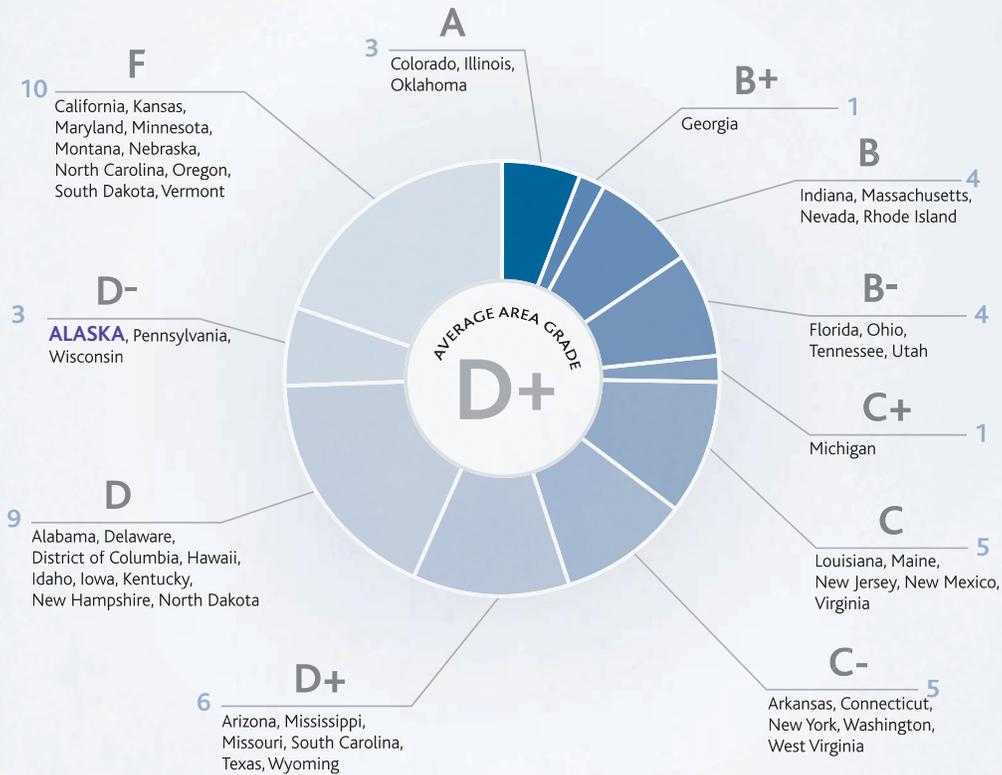

2. Nevada's initiative does not go into effect until 2015-2016.

Area 5 Summary

How States are Faring in Exiting Ineffective Teachers

State Area Grades

Topics Included In This Area

- 5-A: Extended Emergency Licenses
- 5-B: Dismissal for Poor Performance
- 5-C: Reductions in Force

Area 5: Exiting Ineffective Teachers

› Goal A – Extended Emergency Licenses

The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.

Goal Components

(The factors considered in determining the states' rating for the goal.)

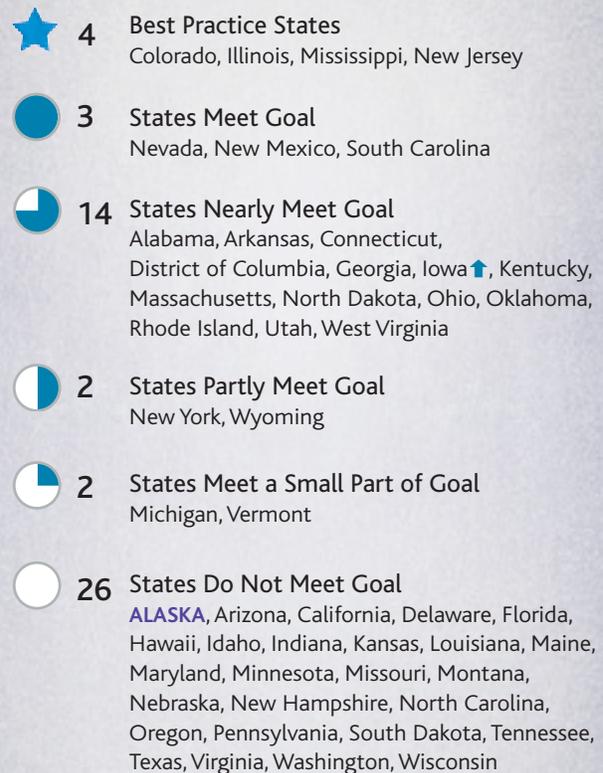

1. Under no circumstances should a state award a standard license to a teacher who has not passed all required subject-matter licensing tests.
2. If a state finds it necessary to confer conditional or provisional licenses under limited and exceptional circumstances to teachers who have not passed the required tests, the state should ensure that requirements are met within one year.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 102

How States are Faring in Licensure Loopholes

Progress on this Goal Since 2011:

↑ : 1 ↔ : 50 ↓ : 0

5-A Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

Alaska does not require subject-matter testing for new teachers. The state's initial license only requires candidates to have a passing score on a basic skills test. The state's current certification system allows new teachers to delay passing a subject-matter test for three years.

The state does require that teachers receive passing scores on the Praxis II to obtain a professional teaching certificate, which a teacher may obtain after three years of teaching.

Supporting Research

4 AAC 12.305; 4 AAC 04.210

RECOMMENDATION

- **Award standard licenses to teachers only after they have passed all required subject-matter licensing tests.**

All students are entitled to teachers who know the subject matter they are teaching. Permitting individuals who have not yet passed state licensing tests to teach neglects the needs of students, instead extending personal consideration to adults who may not be able to meet minimal state standards. Licensing tests are an important minimum benchmark in the profession, and states that allow teachers to postpone passing these tests are abandoning one of the basic responsibilities of licensure. As such, Alaska should require all teachers to pass subject-matter tests prior to entering the classroom. The state's current policy puts students at risk.

ALASKA RESPONSE TO ANALYSIS

Alaska noted that it requires teachers to be highly qualified in the core academic subject areas in which they provide instruction regardless of level of certification (Initial, Professional, Master) or endorsement area. Highly qualified designation is not included on the teaching certificate as an endorsement.

Alaska asserted that state regulations require all districts to ensure that a teacher employed by the district is highly qualified. Highly qualified status is tied directly to the core academic subject being taught by the educator. Depending on the teacher's core academic subject areas, he or she would need highly qualified designation. By regulations, the teacher would have the following options for gaining highly qualified status:

- 1) Passing the appropriate high school subject area Praxis II exam,
- 2) Having a bachelor's or graduate degree in the subject area, or
- 3) Completing 30 semester hours or 45 quarter hours in the subject area from a regionally accredited college.

Districts are required by regulations to track highly qualified status of their teachers and report this to the Department of Education each October.

Supporting Research

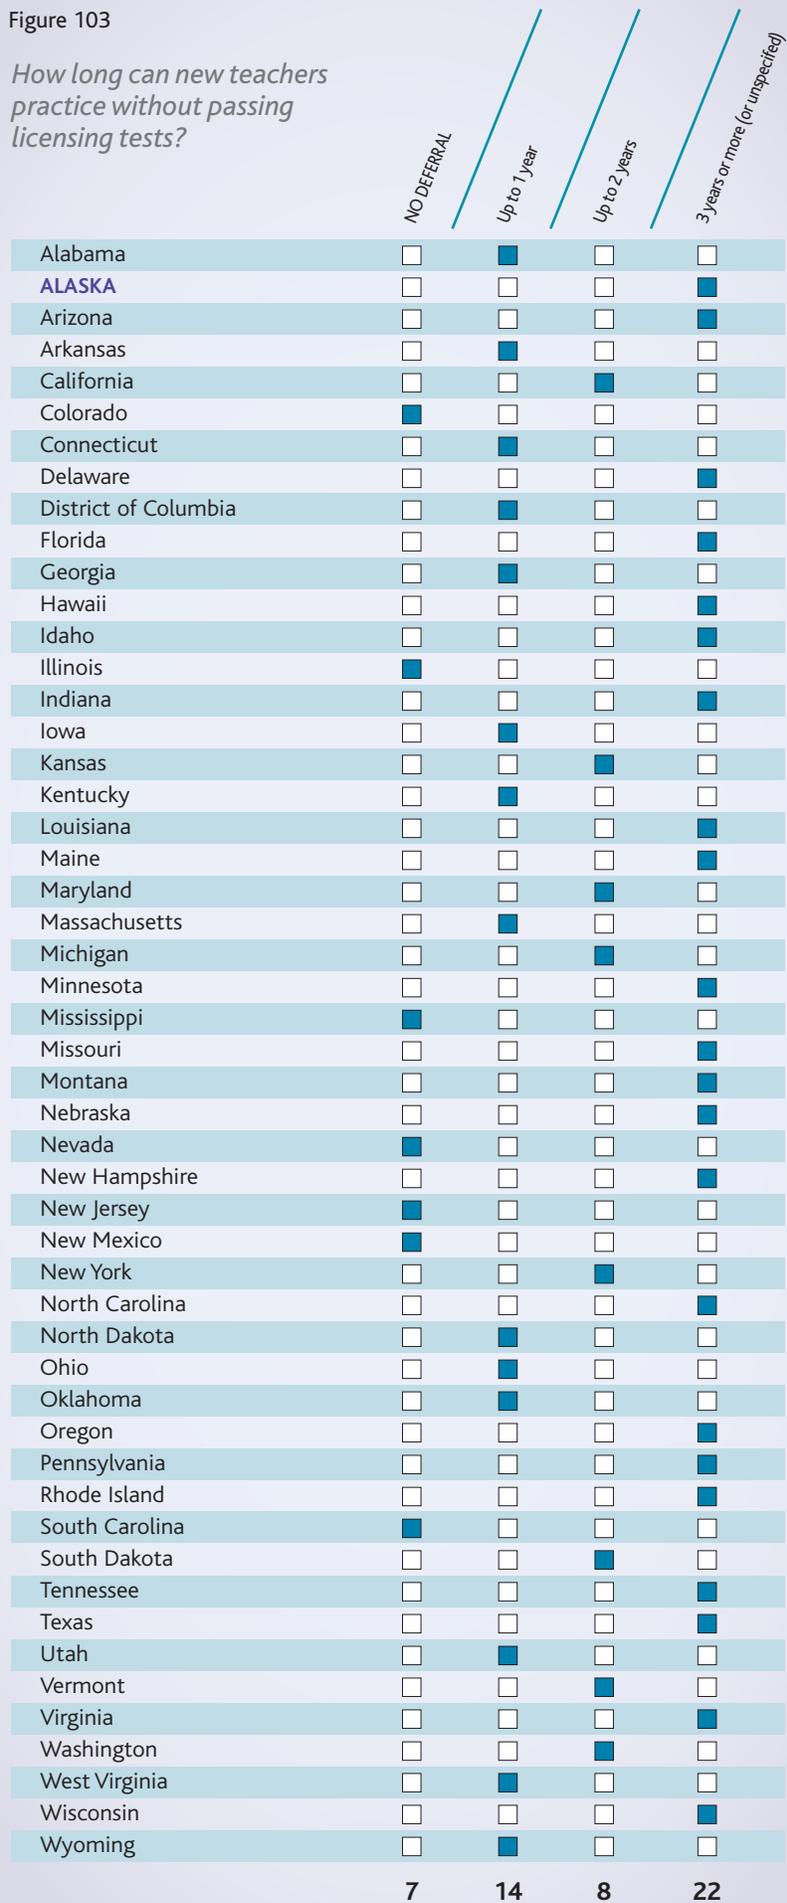

4 AAC 04.210

LAST WORD

Alaska takes a significant risk by relying on federal HQT provisions rather than articulating in its own certification requirements that teachers must demonstrate subject-matter knowledge. The state is putting the burden on districts to ensure that their teachers are HQT instead of making this part of licensure. In addition, while a degree in a subject area is certainly indicative of knowledge of that area, it offers no assurance that an individual has studied the specific content he or she will be required to teach.

Figure 103

How long can new teachers practice without passing licensing tests?

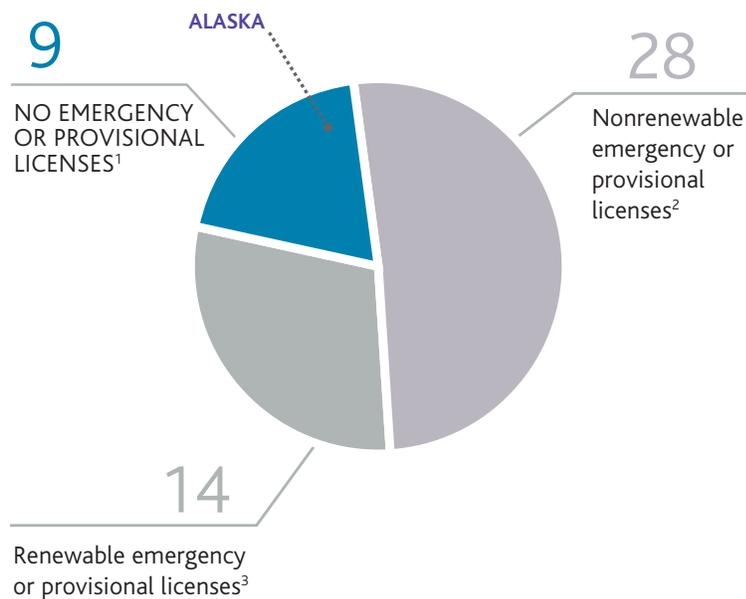

★ **EXAMPLES OF BEST PRACTICE**

Colorado, Illinois, Mississippi, and New Jersey require all new teachers to pass all required subject-matter tests as a condition of initial licensure.

Figure 104

Do states still award emergency licenses?

1. **Strong Practice:** Alaska⁴, Colorado, Illinois, Mississippi, Montana⁵, Nevada, New Jersey, New Mexico, South Carolina

2. Alabama, Arkansas, California, Connecticut, Delaware, District of Columbia, Florida, Georgia, Idaho, Iowa, Kansas, Kentucky, Maryland, Massachusetts, New Hampshire, New York, North Carolina, North Dakota⁶, Ohio⁶, Oklahoma, Oregon, Rhode Island⁶, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming

3. Arizona, Hawaii, Indiana, Louisiana, Maine, Michigan, Minnesota, Missouri, Nebraska, Pennsylvania, South Dakota, Tennessee, Texas, Wisconsin

3. Alaska does not require subject-matter testing for initial certification.

5. Montana does not require subject-matter testing for certification.

6. License is renewable, but only if licensure tests are passed.

Area 5: Exiting Ineffective Teachers

› Goal B – Dismissal for Poor Performance

The state should articulate that ineffective classroom performance is grounds for dismissal and ensure that the process for terminating ineffective teachers is expedient and fair to all parties.

Goal Components

(The factors considered in determining the states' rating for the goal.)

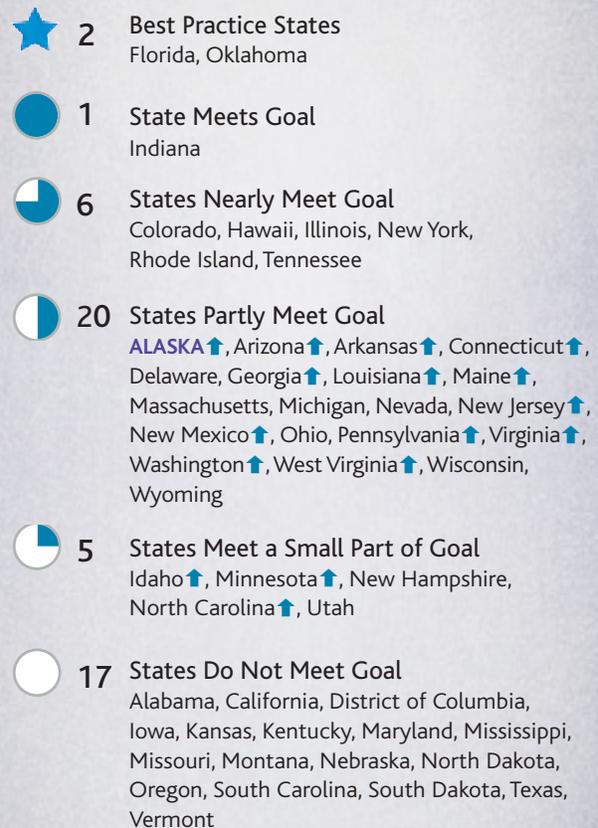

1. The state should articulate that teachers may be dismissed for ineffective classroom performance. Any teacher that receives two consecutive ineffective evaluations or two such ratings within five years should be formally eligible for dismissal, regardless of tenure status.
2. A teacher who is terminated for poor performance should have an opportunity to appeal. In the interest of both the teacher and the school district, the state should ensure that this appeal occurs within a reasonable time frame.
3. There should be a clear distinction between the process and accompanying due process rights for teachers dismissed for classroom ineffectiveness and the process and accompanying due process rights for teachers dismissed or facing license revocation for felony or morality violations or dereliction of duties.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 105

How States are Faring in Dismissal for Poor Performance

Progress on this Goal Since 2011:

↑ : 16 ↔ : 35 ↓ : 0

5-B Analysis: Alaska

State Partly Meets Goal

Progress Since 2011

ANALYSIS

Alaska articulates that tenured teachers not meeting district standards after being placed on an improvement plan are eligible for nonretention. However, the state does not distinguish the due process rights of teachers dismissed for ineffective performance from those facing other charges commonly associated with license revocation, such as a felony and/or morality violations. The process is the same regardless of the grounds for dismissal, which include "failure to perform the teacher's customary teaching duties in a satisfactory manner," immorality and substantial noncompliance with school laws.

In Alaska, tenured teachers who are terminated may appeal multiple times. After receiving written notice of the employer's decision to dismiss, a teacher has 15 days to appeal and request a hearing before the school board. The time frame for the hearing is not addressed by the state. If the school board sustains the dismissal, the teacher may appeal this decision to the superior court for judicial review.

Supporting Research

Alaska Administrative Code 14.20.149(e); 14.20.170; 175; 180

RECOMMENDATION

- **Ensure that teachers terminated for poor performance have the opportunity to appeal within a reasonable time frame.**

Nonprobationary teachers who are dismissed for any grounds, including ineffectiveness, are entitled to due process. However, cases that drag on for years drain resources from school districts and create a disincentive for districts to attempt to terminate poor performers. Therefore, the state must ensure that the opportunity to appeal occurs only once and only at the district level. It is in the best interest of both the teacher and the district that a conclusion is reached within a reasonable time frame.

- **Distinguish between the process and accompanying due process rights for dismissal for classroom ineffectiveness and dismissal for morality violations, felonies or dereliction of duty.**

While nonprobationary teachers should have due process for any termination, it is important to differentiate between loss of employment and issues with far-reaching consequences that could permanently affect a teacher's right to practice. Alaska should ensure that appeals related to classroom effectiveness are decided only by those with educational expertise.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

★ **EXAMPLES OF BEST PRACTICE**

Florida and **Oklahoma** clearly articulate that teacher ineffectiveness in the classroom is grounds for dismissal. In both states, teachers are eligible for dismissal after two annual ratings of unsatisfactory performance. Each state has taken steps to ensure that the dismissal process for teachers deemed to be ineffective is expedited. Teachers facing dismissal have only one opportunity to appeal.

Figure 106

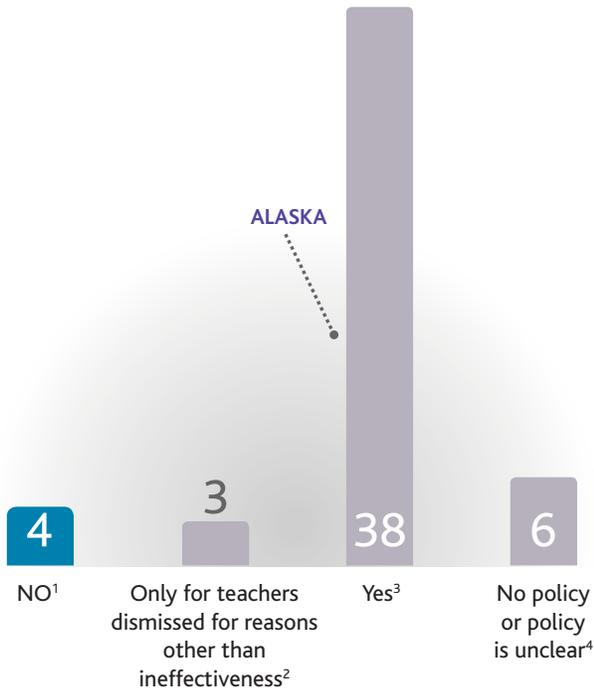

Do states articulate that ineffectiveness is grounds for dismissal?

1. A teacher reverts to probationary status after two consecutive years of unsatisfactory evaluations, but it is not articulated that ineffectiveness is grounds for dismissal.

Figure 107

Do states allow multiple appeals of teacher dismissals?

1. **Strong Practice:** Florida, Louisiana, Oklahoma, Wisconsin

2. Teachers in these states revert to probationary status following ineffective evaluation ratings, meaning that they no longer have the due process right to multiple appeals: Colorado, Indiana, Tennessee

3. Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Virginia, Washington, West Virginia, Wyoming

4. District of Columbia, Maine, Nebraska, Nevada⁵, Utah, Vermont

5. Though a teacher returns to probationary status after two consecutive unsatisfactory evaluations, Nevada does not articulate clear policy about its appeals process.

Area 5: Exiting Ineffective Teachers

› Goal C – Reductions in Force

The state should require that its school districts consider classroom performance as a factor in determining which teachers are laid off when a reduction in force is necessary.

Goal Component

(The factor considered in determining the states' rating for the goal.)

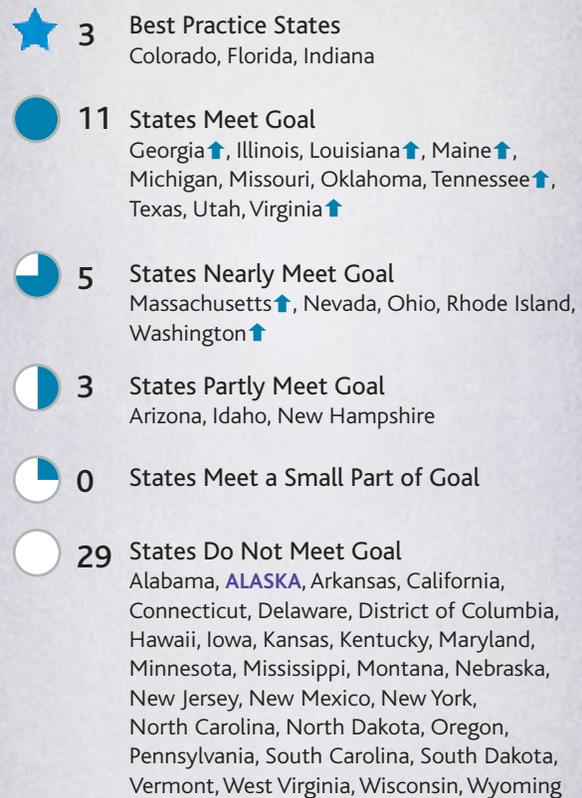

1. The state should require that districts consider classroom performance and ensure that seniority is not the only factor used to determine which teachers are laid off.

Background

A detailed rationale and supporting research for this goal can be found at: nctq.org/statepolicy

Figure 108

How States are Faring in Reductions in Force

Progress on this Goal Since 2011:

↑ : 7 ↔ : 44 ↓ : 0

5-C Analysis: Alaska

State Does Not Meet Goal

Progress Since 2011

ANALYSIS

In Alaska, the factors used by districts to determine which teachers are laid off during a reduction in force must consider a teacher's tenure status and are decided at the district level. School districts may only lay off tenured teachers after notice of dismissal has been given to nontenured teachers. In addition, "a school district may retain a nontenured teacher and place on layoff status a tenured teacher if there is no tenured teacher in the district who is qualified to replace the nontenured teacher."

Supporting Research

Alaska Statute 14.20.177

RECOMMENDATION

- **Require that districts consider classroom performance as a factor in determining which teachers are laid off during reductions in force.**

Alaska can still leave districts flexibility in determining layoff policies, but it should do so within a framework that ensures that classroom performance is considered.

- **Ensure that tenure is not the only factor used to determine which teachers are laid off.**

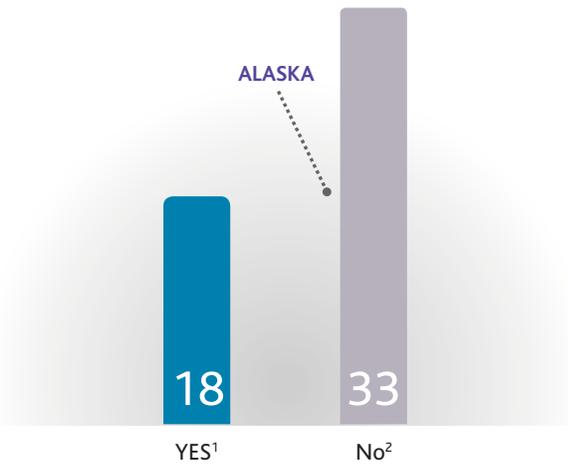

While it is not unreasonable to lay off probationary teachers before those with tenure, doing this without also considering performance is in effect a proxy for seniority-based layoffs and risks sacrificing effective teachers while maintaining low performers. Further, because probationary teachers draw lower salaries, the state may be mandating that districts dismiss a larger number of effective probationary teachers rather than a smaller group of ineffective tenured teachers to achieve the same budget reduction.

ALASKA RESPONSE TO ANALYSIS

Alaska recognized the factual accuracy of this analysis.

Figure 109

Do districts have to consider performance in determining which teachers are laid off?

1. **Strong Practice:** Colorado, Florida, Georgia, Illinois, Indiana, Louisiana, Maine, Massachusetts³, Michigan, Missouri, Ohio³, Oklahoma, Rhode Island, Tennessee, Texas, Utah, Virginia, Washington

	18	22

★ **EXAMPLES OF BEST PRACTICE**

Colorado, Florida, and Indiana all specify that in determining which teachers to lay off during a reduction in force, classroom performance is the top criterion. These states also articulate that seniority can only be considered after a teacher’s performance is taken into account.

Figure 111

Do states prevent districts from overemphasizing seniority in layoff decisions?

1. **Strong Practice:** Arizona, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Maine, Massachusetts⁶, Michigan, Missouri⁶, Nevada, New Hampshire, Ohio⁶, Oklahoma, Rhode Island, Tennessee, Texas, Virginia, Washington
2. **Strong Practice:** Louisiana, Utah
3. Hawaii, Minnesota, New York, Pennsylvania, West Virginia, Wisconsin⁷
4. California, Kentucky, New Jersey, Oregon
5. Alabama, Alaska⁶, Arkansas, Connecticut, Delaware, District of Columbia, Iowa, Kansas, Maryland, Mississippi, Montana, Nebraska⁶, New Mexico, North Carolina, North Dakota, South Carolina, South Dakota, Vermont, Wyoming
6. Nontenured teachers are laid off first.
7. Only for counties with populations of 500,000 or more and for teachers hired before 1995.

Goals and Keywords

GOAL	STATEMENT	KEY WORDS
AREA 1: Delivering Well Prepared Teachers		
1-A: Admission into Teacher Preparation	The state should require teacher preparation programs to admit only candidates with strong academic records.	<i>admission requirements, academic proficiency measures, basic skills tests, GPA</i>
1-B: Elementary Teacher Preparation	The state should ensure that its teacher preparation programs provide elementary teachers with a broad liberal arts education, providing the necessary foundation for teaching to the Common Core or similar state standards.	<i>license/certification, elementary teachers, early childhood teachers, content tests, elementary coursework/standards, content specialization requirements</i>
1-C: Elementary Teacher Preparation in Reading Instruction	The state should ensure that new elementary teachers know the science of reading instruction.	<i>license/certification, elementary teachers, early childhood teachers, science of reading tests, science of reading coursework/standards</i>
1-D: Elementary Teacher Preparation in Mathematics	The state should ensure that new elementary teachers have sufficient knowledge of the mathematics content taught in elementary grades.	<i>license/certification, elementary teachers, early childhood teachers, math content tests, math coursework/standards</i>
1-E: Middle School Teacher Preparation	The state should ensure that middle school teachers are sufficiently prepared to teach appropriate grade-level content.	<i>license/certification, middle school teachers, content tests, K-8 licenses, content specialization requirements</i>
1-F: Secondary Teacher Preparation	The state should ensure that secondary teachers are sufficiently prepared to teach appropriate grade-level content.	<i>license/certification, secondary teachers, secondary social studies, content tests, endorsements</i>
1-G: Secondary Teacher Preparation in Science	The state should ensure that secondary science teachers know all the subject matter they are licensed to teach.	<i>license/certification, secondary general science, content tests, combination sciences</i>
1-H: Special Education Teacher Preparation	The state should ensure that special education teachers know the subject matter they are licensed to teach.	<i>license/certification, special education teachers, content tests, K-12 special education license, elementary special education, secondary special education</i>
1-I: Assessing Professional Knowledge	The state should use a licensing test to verify that all new teachers meet its professional standards.	<i>license/certification, pedagogy, professional standards/knowledge, performance assessments, edTPA</i>
1-J: Student Teaching	The state should ensure that teacher preparation programs provide teacher candidates with a high quality clinical experience.	<i>student teaching, cooperating teachers, clinical preparation, placements</i>
1-K: Teacher Preparation Program Accountability	The state's approval process for teacher preparation programs should hold programs accountable for the quality of the teachers they produce.	<i>teacher preparation programs, program accountability, student achievement, standard of performance, public reporting, national accreditation</i>

Goals and Keywords

GOAL	STATEMENT	KEY WORDS
AREA 2: Expanding the Teaching Pool		
2-A: Alternate Route Eligibility	The state should require alternate route programs to exceed the admission requirements of traditional preparation programs while also being flexible to the needs of nontraditional candidates.	<i>alternate route programs, admission requirements, GPA, academic proficiency measures, subject-matter test, flexibility/ test-out</i>
2-B: Alternate Route Preparation	The state should ensure that its alternate routes provide efficient preparation that is relevant to the immediate needs of new teachers, as well as adequate mentoring and support.	<i>alternate route programs, coursework requirements, length of program, student/ practice teaching, induction, mentoring</i>
2-C: Alternate Route Usage and Providers	The state should provide an alternate route that is free from limitations on its usage and allows a diversity of providers.	<i>alternate routes; subject, grade or geographic restrictions; college or university providers; district-run programs; non-profit providers</i>
2-D: Part-Time Teaching Licenses	The state should offer a license with minimal requirements that allows content experts to teach part time.	<i>part-time license/certificate, adjunct license</i>
2-E: Licensure Reciprocity	The state should help to make licenses fully portable among states, with appropriate safeguards.	<i>license reciprocity, license portability, out-of-state teachers, testing requirements, online teachers</i>
AREA 3: Identifying Effective Teachers		
3-A: State Data Systems	The state should have a data system that contributes some of the evidence needed to assess teacher effectiveness.	<i>longitudinal data systems, definition of teacher of record, teacher production</i>
3-B: Evaluation of Effectiveness	The state should require instructional effectiveness to be the preponderant criterion of any teacher evaluation.	<i>teacher evaluation, teacher effectiveness, student learning, classroom observations, surveys, rating categories</i>
3-C: Frequency of Evaluations	The state should require annual evaluations of all teachers.	<i>teacher evaluation, evaluation frequency, classroom observations, feedback</i>
3-D: Tenure	The state should require that tenure decisions are based on evidence of teacher effectiveness.	<i>tenure, probationary period, continuing contracts, teacher effectiveness</i>
3-E: Licensure Advancement	The state should base licensure advancement on evidence of teacher effectiveness.	<i>probationary license, professional license, license renewal, evidence of teacher effectiveness, coursework requirements</i>
3-F: Equitable Distribution	The state should publicly report districts' distribution of teacher talent among schools to identify inequities in schools serving disadvantaged children.	<i>public reporting, aggregate school-level data, evaluation ratings, school report cards, teacher absenteeism rate, turnover rate</i>

Goals and Keywords

GOAL	STATEMENT	KEY WORDS
AREA 4: Retaining Effective Teachers		
4-A: Induction	The state should require effective induction for all new teachers, with special emphasis on teachers in high-need schools.	<i>mentoring, induction, mentor selection, reduced teaching load, release time</i>
4-B: Professional Development	The state should ensure that teachers receive feedback about their performance and should require professional development to be based on needs identified through teacher evaluations.	<i>feedback from observations/evaluations, professional development linked to evaluations results, improvement plans</i>
4-C: Pay Scales	The state should give local districts authority over pay scales.	<i>teacher compensation, salary schedules, pay scales, steps and lanes, advanced degrees, years of experience, teacher performance</i>
4-D: Compensation for Prior Work Experience	The state should encourage districts to provide compensation for related prior subject-area work experience.	<i>teacher compensation, relevant work experience</i>
4-E: Differential Pay	The state should support differential pay for effective teaching in shortage and high-need areas.	<i>teacher compensation, differential pay, shortage subject areas, high-need schools</i>
4-F: Performance Pay	The state should support performance pay, but in a manner that recognizes its appropriate uses and limitations.	<i>teacher compensation, performance pay, teacher performance, student achievement</i>
AREA 5: Exiting Ineffective Teachers		
5-A: Extended Emergency Licenses	The state should close loopholes that allow teachers who have not met licensure requirements to continue teaching.	<i>emergency licenses, provisional certificates, loopholes, subject-matter tests</i>
5-B: Dismissal for Poor Performance	The state should articulate that ineffective classroom performance is grounds for dismissal and ensure that the process for terminating ineffective teachers is expedient and fair to all parties.	<i>dismissal, ineffectiveness, poor performance, appeals, due process</i>
5-C: Reductions in Force	The state should require that its school districts consider classroom performance as a factor in determining which teachers are laid off when a reduction in force is necessary.	<i>reduction in force, layoffs, teacher performance, seniority</i>

Teacher Policy Priorities for Alaska

AREA 1: Delivering Well Prepared Teachers

<ul style="list-style-type: none"> Require teacher preparation programs to screen candidates prior to admission by using a common test normed to the general college-bound population, and limit acceptance to those candidates demonstrating academic ability in the top 50th percentile. 	Goal 1-A
<ul style="list-style-type: none"> Adopt an elementary content test with independently scored subject-matter subtests in each of the core areas, and ensure content knowledge as a condition of initial licensure. 	Goal 1-B
<ul style="list-style-type: none"> Require all elementary teacher candidates to pass a rigorous stand-alone science of reading test. 	Goal 1-C
<ul style="list-style-type: none"> Adopt a rigorous stand-alone math test for all elementary teacher candidates. 	Goal 1-D
<ul style="list-style-type: none"> Eliminate the generalist K-8 license, and ensure that all middle school teacher candidates pass a content test in every core area they are licensed to teach. 	Goal 1-E
<ul style="list-style-type: none"> Require subject-matter testing for all secondary teacher candidates. Specifically require secondary science and social studies teacher candidates to pass a content test for each discipline they are licensed to teach. 	Goal 1-F Goal 1-G
<ul style="list-style-type: none"> Eliminate the K-12 special education certificate, and ensure that both elementary and secondary special education teachers possess adequate and appropriate content knowledge for the grades and subjects they teach. 	Goal 1-H
<ul style="list-style-type: none"> Require all new teachers to pass a pedagogy test. 	Goal 1-I
<ul style="list-style-type: none"> Ensure that cooperating teachers for student teaching placements have demonstrated evidence of effectiveness as measured by student learning, and require teacher candidates to spend at least 10 weeks student teaching. 	Goal 1-J
<ul style="list-style-type: none"> Hold teacher preparation programs accountable by collecting data that connect student achievement gains to programs, as well as other meaningful data that reflect program performance, and by establishing the minimum standard of performance for each category of data. 	Goal 1-K

AREA 2: Expanding the Teaching Pool

<ul style="list-style-type: none"> Increase admission requirements to alternate route programs, including a high bar for academic proficiency and passage of a subject-matter test. 	Goal 2-A
<ul style="list-style-type: none"> Broaden alternate route usage, and allow a diversity of providers for alternate route programs. 	Goal 2-C
<ul style="list-style-type: none"> Eliminate licensure obstacles for out-of-state teachers. 	Goal 2-E

AREA 3: Identifying Effective Teachers

■ Require annual formal evaluations for all teachers.	Goal 3-C
■ Ensure that evidence of effectiveness is the preponderant criterion in tenure decisions.	Goal 3-D
■ Base licensure advancement from a probationary to a nonprobationary license and licensure renewal on evidence of effectiveness.	Goal 3-E
■ Publish aggregate school-level teacher evaluation ratings from an evaluation system based on instructional effectiveness.	Goal 3-F

AREA 4: Retaining Effective Teachers

■ Require effective induction for all new teachers, including mentoring of sufficient frequency and duration.	Goal 4-A
■ Link professional development activities to findings in individual teacher evaluations.	Goal 4-B
■ Discourage districts from basing teacher pay scales primarily on advanced degrees and seniority.	Goal 4-C
■ Support differential pay initiatives for effective teachers in both shortage subject areas and high-need schools.	Goal 4-E
■ Support performance pay to recognize teachers for their effectiveness.	Goal 4-F

AREA 5: Exiting Ineffective Teachers

■ Award standard licenses to teachers only after they have passed all required subject-matter licensing tests.	Goal 5-A
■ Use teacher effectiveness as a factor when determining which teachers are laid off during a reduction in force.	Goal 5-C

National Council on Teacher Quality
